THE LITERARY HISTORY OF ENGLAND.

CHAPTER I.

LONDON: THE LOWER CIRCLE—"THE COCKNEY SCHOOL."

A LITTLE before the beginning of the outburst of literary life in Edinburgh, which has been the subject of our recent chapters, a curious and characteristic circle, or series of circles, existed in London, quite distinct from the higher level of life and letters on which Canning and his polite associates flourished. This lower region possessed many peculiarities of the old Grub Street existence. It was poor; its life was full of literary schemes and compilations of all kinds, "Specimens," "Selections," "Epitomes of History," "Annual Registers," and many more—which, along with such poor scraps as were then required in the shape of magazine articles, answered the purpose of securing daily bread to a large body of writers to whom literature had become a trade; while ever and anon a poem, more or less ambitious, a drama, a philosophical essay, would burst forth from the obscurity to show how among these poor literary hacks, labouring hard in their vocation, there was some genius and much ambition, and that desire to do something worth remembering, or being remembered by, which gives a generous inspiration often to the merest scribbler. The most remarkable and individual figure among them was that of William Godwin, whose works, both of philosophy and imagination, if such a sombre and subtle study of motive

and impulse as *Caleb Williams* can be called by the latter name, have taken a permanent place in literature. So much can scarcely be said for Holcroft, whose novels have dropped out of recollection altogether, though one or two of his dramas, notably the *Road to Ruin*, still hold the stage; or Hazlitt, most of whose essays and criticisms, though often brilliant, have fallen into that limbo which, alas! is the natural place even of the ablest commentaries upon other men's works and lives. One of the most curious particulars in the life of these London coteries of the poorer kind is the quiet commonplace *bourgeois* existence which they carried on obscurely in out-of-the-way streets in all the usual subjection to law and social order, notwithstanding that the principles they maintained were wild enough, as they thought themselves, and as many people thought, to upset all the foundations of society and blow the British Empire out of its secure place in the protecting seas. Some of them were tried for high treason, no less, in those hot and exciting French Revolution days. They were considered dangerous to their country and to religion, and to everything that the ordinary mass holds sacred; yet, nevertheless, lived very quiet, humdrum, citizens lives, guilty of little more than an occasional indulgence in what is euphemistically called "wine," and fighting very hardly for existence in the lower levels of literary work. They possess a certain importance in literary history, chiefly as examples of that boundless underground of persevering labour which exists in every generation unseen, struggling with, yet clinging to, "the booksellers," concocting with them a hundred schemes which are as much "trade" on the one side as the other, furnishing series of histories, of biographies, of editions of the poets, in continued repetition, yet fondly retaining still that hope of the dreaming fancy—

> "To frame it knows not what excelling thing,
> And win it knows not what sublime reward
> Of praise and honour."

Godwin, who was the most remarkable member of this group, was at the same time the most striking example of its union of extravagant opinions and humdrum life. Twice during his career his house and name came before the world with an original and even dazzling identity, in strange discordance with the calm and tradesmanlike tenor of his ordinary habits. One of these periods was that in which the philosopher, with his bold and wild opinions and prim pedantic yet romantic temper, found his mate in the beautiful and brave woman whose pensive countenance and untimely fate silence criticism, who was, like himself, a philosopher and sceptic, and whose name for long was the emblem of unwomanly revolutionism, regarded by the public with that horror which unbelief in a woman always inspires. Mary Wollstonecraft was Godwin's wife for not more than a year, but this brief romance gives him an interest which does not really belong to him as a human creature in his own right. Some seventeen years later the brilliant apparition of the young Shelley, sweetest, most visionary, and most lawless of poets, crossed this humdrum life, and once more it blazes out for a moment upon the world. In neither instance is the light without painful and bitter shadows, but it interrupts with curious intensity as obstinate, serious, self-willed, and dull a career as ever London citizen lived among the dingy little streets, monotonous in a half twilight of ordinariness and routine. *Caleb Williams* and the *Political Justice* burst out of this gray existence as Mary Wollstonecraft and young Shelley broke into it; but the time illustrated by these luminous points is as a half-hour in a long day of dull and regular occupation, domesticity, shopkeeping, homely meals, and humdrum surroundings.

There was no wealth and little grace of aspect in this underground society, in the small houses and back parlours which were in themselves so unbeautiful; and it is difficult, without some aid of money, to give interest to domestic surrounding, at least in a great monotonous town, where the idyllic is out of place, and such a happy thrifty home as that of Southey's among the mountains is impossible. The Holcrofts and Hazlitts had not the gift of Boswell to make the bustling old streets and dingy coffee-houses picturesque and animated, and the atmosphere is dull which breathes about them, although the Lambs would sometimes come arm-in-arm to call, or Coleridge make his appearance looming largely against the sky, or Wordsworth pay a passing visit, bringing with him the breath of the hills.

Otherwise we find little beauty, either of temper or manners, in this little world of literature. It is hopelessly plebeian and narrow, self-asserting and self-repeating. Except in the case of "Lamb, the frolic and the gentle," neither the conversations nor the letters are of a brilliant character that reach us out of that active, fluent, much-discussing, and reasoning community, where every individual possessed some notable features, and all were supposed to be, and believed themselves, guides of opinion and teachers of men. Upon the Lambs in their quaint city chambers, the walls lined with dark "Hogarths" and old books; the tables surrounded once a week with earnest whist-players; the supper spread on one side, cold beef and roast potatoes, and the kindest welcome—the spectator lingers lovingly. No such pair as that brother and sister are in all the bands of their contemporaries: the tender love that braved every suffering undaunted — the forlorn delightful wit that made shift to smile amid its tears—the union, passing that even of marriage, of common misfortune, of heroic

self-devotion, of fraternity above all parallel—the patience and the misery, and the peace and happiness, what words can do justice to them? To see them in their low-roofed, dark little rooms up those stairs in the Temple, looking out upon the court, where, for pleasure and diversion, "there is a pump always going," and "the trees come in at the window, so that it is like living in a garden:" or sitting together "in the front row of the pit at Drury Lane:" or taking their "evening walk, past the theatres, to look at the outside of them at least," through the streets, all dim with smoky oil lamps, and twinkling shop-windows, and the news of battles and victories cried about the pavements: or perhaps with a heartrending sympathy, to watch them turning sadly in their periodical pilgrimage towards the asylum, in which one of them had to spend half her life — "slowly pacing together a little footpath in Hoxton fields, both weeping bitterly"—is perhaps, of all the sights then procurable in England, the one most entirely touching. But it is not Charles and Mary Lamb that are our subjects, though they were by far the most attractive group in the literary community, quick and keen, and vivacious, and headstrong, hot in politics and obstinate in philosophy, which flourished in the narrow city streets, dining upon hot shoulders of mutton, and supping on pieces of cold beef, and contenting itself in its little sphere of limited enjoyment and middle-class atmosphere, as unlike as possible to the more elegant and bigger world of letters, which scarcely touched it in its totally different orbit above.

William Godwin was the son of a dissenting minister in the country, a man of narrow but fervent religious zeal, "with so great a disapprobation for the Church of England as rather to approve of his children absenting themselves from all public worship than joining in her

offices,"—one of a class which has supplied more largely, perhaps, than any other, the rank and file of literary workers. The position of a dissenting minister is, and still more was, one of considerable picturesqueness and a sort of paradoxical interest: for while the ambition of the class invariably, or almost invariably, points towards letters and cultivation, their generally hopeless confinement within a petty circle of uneducated and narrow-minded people gives them a bitter sense of exclusion from what they most desire, an exclusion which, without being really a wrong done to them by society, appears like one, and impresses the individual as a distinct personal injury. "Their youthful hopes and vanity had been mortified in them," says Hazlitt, another branch of the same tree, and an excellent authority on the subject, "even in their boyish days, by the neglect and supercilious regard of the world:" which perhaps may be explained to mean that the world objected, under any circumstances, to accept the training of the dissenting colleges as equal to that of the universities, even though the dissenter might know himself, and might really be, infinitely more intellectual and cultivated than the Oxford pass-man; or to grant to the preacher, whose sphere was confined to the lower and least instructed middle classes, the same position as the clergyman who, however poor, has still the possibility of high clerical rank and importance before him.

This disadvantage, which is, we fear, still in many country circles unalterable, adds a persistent undertone of injured feeling, even now, to the sentiment of the clerical class in dissenting communities. Although their position has been greatly modified by the growth of so many wealthy and cultivated congregations in large towns, it is still sufficiently affected by the same depressing influence as to retain a certain injured tone, a mixture of self-

assertion and resentment, which, if not amiable, are yet sufficiently natural feelings; and this sense of injury gives a strong bias of sentiment to the democratic opinions generally prevalent among them. "Their sympathy was not with the oppressors, but the oppressed," Hazlitt adds, with a natural adoption of a most natural prejudice, as if the class he describes were really oppressed and not merely the victims of circumstance, suffering for their resistance to an accepted order of things which they professed to despise, and, according to their own principles, ought to have despised. We would not linger upon this definition of the dissenting minister and his place in the world if we did not feel the importance of it, in reference to the many writers expressing sentiments of extreme liberalism, both in religion and politics, who have come from this class. The sons of dissenting ministers are, in a manner, born heirs to this sense of wrong: they have a fanciful rank as the most highly instructed in their own sphere, which the general world refuses to ratify. And those who, setting out perhaps from no very elevated social level, enter life through this curious little side-door to letters and public influence, are apt to feel its restrictions all the more bitterly from the high expectations of inexperience, to which society always seems more delightful and inspiring than reality shows it: and can scarcely help looking with scorn upon those no better, or probably much less capable than themselves, whom the world persistently ranks above them. They are thus put on the side of all who have a grievance, all the world over. And yet the wrong is imaginary, the grievance only one of those sentimental grievances which cut deeper than actual wounds, yet are too wide and general to be anybody's fault. The principle of sectarianism, and the deification of individual opinion to which it leads, no doubt helps on the full development of every intellectual

vagary; but we believe that the social disqualifications, which bring with them a profound sense of injury, not to be healed by any practical success, have still more to do with this tendency towards scepticism in religion and revolutionism in politics. Nor do we accuse dissenting ministers of any pettiness or conscious warp of feeling in this instinctive sentiment. No injury is so deep as systematic disparagement, the allowed and instinctive imputation of inferiority; and when, in addition to the fact that there is often no reason for it, there is added the other still more painful fact that there seems no help for it, it is impossible to wonder at the deep-lying resentment it produces—resentment as causeless and as hopeless as itself.

It was from this class of poor and strongly-feeling men, whose position, had they been in the Church of England, would have been that of the most conservative and constitutional of all poorly remunerated and hard-worked public servants, but who, out of it, were the natural champions of every infringed right, and warmest eager upholders of every democratic claim—men to whom every poor curate, no better off than themselves, embodied the principle of aristocracy and tyranny—that Godwin sprang. He began life a precociously rigid Calvinist, and at seventeen was rejected at Homerton Academy "on suspicion of Sandemanianism," the straitest form of the Calvinistic system. At Hoxton, where he entered on being thus repulsed, under an apparently milder sway, he maintained the doctrine of eternal punishment against his tutor, and came out of college in his twenty-third year "as pure a Sandemanian as I had gone in." But no sooner was he out of college than the conflicting tides of opinion seized him, and "my religious creed insensibly degenerated," he says. He was actually a dissenting minister at Ware, the religious instructor of a congrega-

tion, when his mind thus changed. This modification of his views was brought about by contact with another member of the same profession, the Rev. Joseph Fawcett (it is curious how particular both Godwin and Hazlitt are in giving this unknown authority the title of Reverend), who was considered among his contemporaries "a person of literary eminence," author of the *Art of War*, and a popular lecturer, but now altogether fallen out of knowledge—"one of whose favourite topics was a declamation against the domestic affections." By the influence of Fawcett and the gradual development of his own mind, Godwin was brought, though not till after he had served another dissenting congregation for some two years as their pastor—leaving them "in consequence of a dispute with my hearers on a question of Church discipline"—to abandon his profession and take to literature. By this time he was gradually getting loose from religious faith altogether, plunging into the works of "the French philosophers," and, like most of his generation, turning his eyes with more and more intense interest to the great drama then just beginning on the other side of the Channel, where every tie was philosophically unloosed before the great current of popular passion awoke to appal the theorists. It is curious to think of Godwin, the future preacher of absolute theoretical lawlessness, he who believed rule and punishment to be conducive to vice, and marriage a pernicious institution, quarrelling with his congregation on a question of Church discipline.

When he thus abandoned the career for which he had been trained, his first step was to go to London, and his first idea to adopt literature as his profession, after the example of so many others: it was not, however, the modern version of the trade, but essentially the threadbare and beggarly Grub Street form of it upon which Godwin entered. His *Life of Lord Chatham*, his first

literary performance, shows the ambition of an independent writer: but as soon as he settled in London he seems to have fallen into the melancholy routine of a literary hack. "My principal employment was now writing for the *English Review*, published by Murray in Fleet Street, at two guineas the sheet, in which employment it was my utmost hope to gain twenty-four guineas per annum. This was probably the busiest period of my life; in the latter end of 1783 I wrote, in ten days, a novel called *Damon and Delia*, for which Hookham gave me five guineas, and a novel in three weeks called *Italian Letters*, purchased by Robinson for twenty guineas; and in the first four months of 1784 a novel called *Imogen*, a Pastoral Romance, for which Vane gave me ten pounds." This was followed by "a small volume of my Sermons," dedicated to the Bishop of Llandaff, and various translations and book-work of different kinds. The literary hack of the present day may take comfort in seeing this list of the early and unremembered labours of a man whose reputation has already lasted a century, and whose position in literature is so well defined. Notwithstanding all that is said about the increase of popular literature and the unbounded fertility of the present generation in novel-writing, we believe there are now no literature shops where wares manufactured at this rate would sell in the same way. Even that branch of the craft which supplies the *Family Herald* and *London Journal* has encouragement to take more time at least upon its productions.

Godwin lived in this way for about ten years, during which his creed underwent various modifications from Socinianism to Deism, and passed through many vague shades of sentiment in respect to the possible existence of God. He became, he says, "a complete unbeliever" in 1787; but even that seems doubtful, since there are self-

discussions on the subject at a later period, and he did not hesitate to say, in a letter to his mother, that he had "faithfully endeavoured to improve the faculties and opportunities God has given me"—though the words might be used in deference to the prejudices of the very notable, pious, thrifty, and sensible old lady, whose letters to her son (though without any commas) are about the most natural and wholesome things in Godwin's biography. He lived in homely lodgings in the Strand during this period, and occasionally saw very good company; but all his intimate relations were with men of similar training and convictions to his own. He had a brother or two in town—not very creditable to their family, as appears from the mother's frequent comments and lamentations—and a sister who was established as a dressmaker; and all his surroundings were of a humble class.

When Godwin began his life in London there was also existing there among the shadows a sort of jovial Satyr, not of any class that was recognised by respectability, half parson, half doctor, an altogether lawless personage, whose career from beginning to end had little in it but rude adventure and reckless living, but whose name cannot be omitted in any record of the literature of his period. John Wolcot, or Peter Pindar, as he called himself, had gone through a whole Odyssey before his appearance in the London streets as a man of letters and satirical poet. He had been brought up in the medical profession in his youth, but, going to Jamaica, had found apparently that it would suit his purposes better to be a clergyman, and, according to the easy methods of the time, came home and got himself ordained by the then Bishop of London, for the advantage of his West Indian patients. When he came back finally to England he threw off the clerical character and resumed the medical; and while trying to establish himself in Cornwall in the

latter profession, picked up as his surgery-boy a little Cornishman, a miner's son, John Opie, who turned out to have what was considered at that time a genius for art. It was the growing success of this young painter, whom he had honestly helped on and furthered with all his power, that brought Wolcot to London; and it was here apparently that the strange and abundant faculty of satiric verse which distinguished him found its way into public notice. He had subjects in plenty ready to his hand, and first among them the quaint irrepressible figure of the old king George III., which shines in his verse with a graphic individuality such as graver history rarely secures for its heroes. It would be hard to call these mock odes and ballads ill-natured. They were calculated to make the monarch's august form ridiculous, and sharply point the ludicrous inappropriateness of such a mind as the possessor of royal power; but at this distance the fun and sport and spontaneous overflowing laughter of the satirist, and the perfect and laughable distinctness of the figure he sets before us, are far more conspicuous than any political mischief that could have been in them. The story of the Dumpling, over which the inquisitive king puzzled his brains to know how the apples got into it, and the visit of his Majesty to Whitbread's brewery, are still as amusing as when they were written; and few of the personages in grave historical biography stand out with half the force which characterises this careless light-hearted picture, in which the fun is so much more prominent than the satire.

> "Now did his majesty so gracious say
> To Mr. Whitbread in his flying way,
> 'Whitbread, d'ye nick th' excisemen now and then?
> Hæ, Whitbread, when d'ye think to leave off trade?
> Hæ? what? Miss Whitbread's still a maid, a maid?
> What, what's the matter with the men?

"'D'ye hunt?—hæ, hunt? No, no, you are too *old*—
You'll be lord may'r—lord may'r one day—
Yes, yes, I've heard so—yes, yes, so I'm told:
Don't, don't the fine for sheriff pay—
I'll prick you ev'ry year, man, I declare:
Yes, Whitbread—yes, yes—you shall be lord may'r.

"'Whitbread, d'ye keep a coach, or job one, pray?
Job, job, that's cheapest—yes, that's best, that's best—
You put your liv'ries on your draymen—hæ?
Hæ, Whitbread?—You have feather'd well your nest.
What, what's the price now, hæ, of all your stock?
But, Whitbread, what's o'clock, pray, what's o'clock?'

"Now Whitbread inward said, 'May I be curst
If I know what to answer first;'
Then search'd his brains with ruminating eye—
But e'er the man of malt an answer found,
Quick on his heel, lo, majesty turn'd round,
Skipp'd off, and baulk'd the pleasure of reply."

As an example of personal portraiture, distinct as photography and far more life-like, there could not be anything better than this. The malice has all evaporated out of it, but the amusing reality remains.

Wolcot treated a large number of his contemporaries as he treated George III., taking them off with infinite fun and frolic, and with a sense of enjoyment in that malicious pleasantry which takes the bitterness out of it; but the mimicry was so complete and the range so wide that Peter Pindar was as much dreaded by his possible victims as laughed over by the public, on whom he lavished the riotous outpourings of his mirth in the shape of little poetical pamphlets, which flew from hand to hand. He was bribed by Government at last, it is said by a pension, but that is a story of doubtful authority. There seems no doubt, however, that he did execute an arrangement with the booksellers which must have delighted him heartily for the sake of the practical joke that was in it. He got them to grant him an annuity

of £250 a year for the copyright of his works, and lived for more than twenty years in the enjoyment of this pension, when the works in question had sunk into the limbo of publications out of date. Probably this amused him as much as any "taking off" he ever succeeded in. His personal appearances are few in the society of his time. Gifford, provoked by some of his many assaults, published an epistle to Peter Pindar, all pompous abuse and rancour, without a gleam of the witty malice of his antagonist, in which Wolcot is described as

> "A bloated mass, a gross blood-boltered clod;
> A foe to man, a renegade from God."

This, apparently, was too much for the temper of the satirist, who waylaid Gifford and attacked him with a cudgel; which, however, it was said, was turned against himself, and the result was a beating and humiliation, not to the Quarterly Reviewer, who, we feel sure, deserved it much more, but to Peter. "A Cut at a Cobbler" was his revenge. Such squabbles, however, are too petty to deserve a record. Wolcot seems to have been a Bohemian of the coarsest type, although, curiously enough, the finest of fine personages, Beckford, the author of *Vathek*, is one of the few to speak for him, describing him as "a delightful companion, and the best storyteller he ever heard;" and we hear of him afterwards as showing magnanimous courtesy to another writer of the refined and cultured type, Isaac D'Israeli, than whom no man could be more unlike himself.

Wolcot is little more than a digression from our immediate subject, for his home would seem to have been in the darker depths of town life, not among our decent *bourgeoisie* of literature; and we return to the circle whose homely life and high ambitions are our immediate subject in the person of Thomas Holcroft, who was one of

the friends and intimates of Godwin, and belonged to the same sphere. Holcroft, however, was of lower origin than the minister's son. He was the son of a shoemaker, and himself spent a portion of his youth in that speculative trade, varying it with the life of a groom in training-stables at Newmarket—until he suddenly found that he could write, and that the editor of a London evening paper would give him five shillings a column for his productions. But neither literature nor shoemaking got him bread, and he was about to enlist in the East India Company's Service when he was picked up by a theatrical recruiter in search of odd men, and thus began his connection with the theatre. His autobiography, which is a fine and original piece of writing, though he had no education but what he had himself picked up at chance moments in stables or on roadsides, breaks off at this period, giving us very little information except in respect to his youthful experiences as stable-boy and groom; and when years after he re-emerges into sight in London, he is already permanently established as a play writer and general *entrepreneur* in literature. It would be rash to say that Holcroft was the originator of the system of adaptation from the French, which has so largely tinctured the dramatic literature of our own time; but we are not aware that it had been further exercised than in translations and borrowings from Molière and other established writers, when the *Figaro* of Beaumarchais created an excitement in Paris which roused the interest of London managers. Holcroft had no sooner heard of this than he determined to rush over to Paris (not so easy a matter in those days) to make himself master of the new production. It was not printed, and the French manager had no idea of communicating the new work to an English stranger; it was necessary, therefore, to resort to other means. Holcroft accordingly, with the help of a French coadjutor,

adopted an original plan. They went to the theatre "every night, a week or ten days successively," and learned the play by heart. It was translated immediately, and produced in London very shortly afterwards; and for this, which his biographer justly says was due "more to Mr. Holcroft's industry and enterprise than to his genius," he received six hundred pounds, "besides a considerable sum for the copyright." This was in the days when France was lying in the calm of expectancy before the storm, dreaming fine philosophical dreams of human perfectibility and the rights of man, and applauding, without a notion of what might come of it, *Figaro's* satirical commentary on the Count's advantages and qualities, "Qu'avez vous fait pour tant de bien? vous vous êtes donné la peine de naître, et rien de plus." A little later Holcroft translated the works of the King of Prussia in "twelve or thirteen volumes," at which he worked night and day in order not to be forestalled, and for which he received twelve hundred pounds. It is a feature of the time as much as any other, that it should have been worth a publisher's while to give so large a sum for the "works of the King of Prussia." Unless his Majesty kept a private journal full of State secrets and gossip, no such trade importance would attend his productions now.

These strenuous exertions, not of a much higher class of labour than the paternal shoemaking, kept life afloat. But some of Holcroft's plays had real vitality, and one at least, the *Road to Ruin*, still maintains its place upon the stage.

Another member of the group was Mrs. Inchbald, whom the others admired and applauded—a beautiful and brilliant woman, poor but provident, who had been from early youth dependent upon her own exertions, and had kept her reputation and her freshness through the vicissitudes of an actress's life, before she came to the

more peaceful career of a successful author. Other figures flit to and fro through the misty scene. Ritson, the savage editor of the early English ballads, of whom there is an uncomfortable sketch in the life of Scott, and whose wild temper and vegetarian crotchets have found a more permanent place in history than his collections; and on the other extreme of sentimental gentility, Merry, and the other melodious elaborate songsters of the so-called Della Crusca School, upon whom Gifford directed his bitter and spiteful satires. At a later period Hazlitt joined this literary circle, then Leigh Hunt; and it began to be assailed as the "Cockney School" when *Blackwood's Magazine* and its skirmishers came into being. The epithet would be most completely merited but for the contempt implied. They were all Londoners, citizens living a homely town life, deep down underneath all the glitter of fashion, having their shabby meetings, their thrifty simple dinners—Lamb's card parties on the Wednesday being by far the finest things we hear of;—but always respectable in this, that they worked hard, and were constantly at work, with eyes open to every possibility of a want in the way of literature which the British public might deign to exhibit. They earned their living as laboriously as any other trade then going, and after they had earned it, yet added a virtue, and produced some *fine fleur* of intelligent observation, some tale or piece of reasoning which was their present to the world. Had anything but literature been their profession, a better example of the brotherliness and clinging together of a kindly craft and trade could not be, nor of the industry and perseverance which are the best preservatives of the working man. Whatever irregularities might be in their lives, they held close to their work, and stood by each other with exemplary fidelity. If the venerable popular fiction as to the rivalries, quarrels, and mutual hatred of

literary persons were not so deeply rooted, we might hope that this example among so many would make an end of the prejudice.

Nevertheless, as they were not perfect, quarrels did arise in the little community—hurricanes of sudden wrath from time to time. In Godwin's case these little discordances, *démêlés* as he calls them, were often very hot and stiff. "The same calm temperament which enabled him to dispense with much which is often thought of the essence of religion, seems to have kept him free from any feeling which can be called love," says Mr. Kegan Paul in his biography, "except the one great passion of his life: and even this was conducted with extreme outward and apparent phlegm. Friendship stood to him in the place of passion, as morality was to him in the room of devotion. All the jealousies, misunderstandings, wounded feelings, and the like, which some men experience in their love affairs, Godwin suffered in his relations with his friends. Fancied slights were exaggerated; quarrels, expostulations, reconciliations, followed quickly on each other, as though they were true *amantium iræ*. And his relations with women were for the most part the same as those with men. His friendships were as real with the one as with the other, but they were no more than friendships." We must give one example of these storms, which is tragi-comic in the highest degree. What its occasion was has been long forgotten, but here is the fierce little epistle which Holcroft, his friend and brother, discharged at Godwin on some one of the small provocations of ordinary life:—

"SIR—I write to inform you that instead of seeing you at dinner to-morrow, I desire never to see you more, being determined never to have *any* further intercourse with you of any kind.

T. HOLCROFT.

"I shall behave, as becomes an honest and honourable man, who

remembers not only what is due to others but to himself. They are indelible, irrevocable, injuries that will not endure to be mentioned. Such is the one you have committed on the man who would have *died* to save you."

This letter, postscript, italics, and all, is a typical example of the kind of correspondence which is called feminine, but which is no more confined to the intercourse of women than are many other things which the language of society appropriates to them. The belligerents made it up, we need hardly say, and were soon as warm friends as before.

The dawn of the French Revolution, which was the great event of the time, and to which the historian in every sphere must perforce return again and again, had an even greater effect upon Godwin and his friends than it had upon the musing and serious mind of Wordsworth. Holcroft had already some acquaintance with France, and no doubt had drawn in a little of the contagion of those opinions which had leavened French society, and made it possible for Figaro, with his free comments, to be listened to and applauded; and as the tide of Revolution rose a great excitement rose within the bosoms of those eager thinkers and observers scattered over London. One of the smaller singers of the time, Helen Maria Williams—who in her youth had figured in Dr. Johnson's society, one of the ladies with whom he drank innumerable cups of tea—and who had even held some correspondence with Burns: had lately returned from a residence in France, where she had known many of the philosophers and revolutionaries, and at her lodging in London the men of the little society would meet and talk as name after name came uppermost. The enthusiasm which Wordsworth has described was swelling everywhere—

> "Good was it in that dawn to be alive,
> And to be young was very heaven!"

For was it not the sunrise of freedom, and of a universal bettering of mankind and purifying of the world? Now at last, for the first time, the chains and trammels imposed upon the race by tyranny and unjust laws being thrown off, was the world to gain assurance of what man was, how noble, how generous, how largely endowed. Godwin and his friends were no longer young, but their political opinions were all the stronger and more rigid from the absence of that fluid atmosphere of youth; and if they had less chance of seeing the complete and glorious renovation of everything earthly which was about to take place, they were still young enough to lend a helping hand to its completion. They formed themselves into a club of Revolutionists—before which it is curious to hear one of its members preach, at a city meeting-house, with some inaugural services of a religious character—and exchanged addresses and congratulations with the French leaders. The letters of this obscure knot of petty citizens, with scarcely one name of any note among them, to the men who had seized the very helm of State and were masters for the time of the fortunes of a great nation, are wonderful in their calm assumption of equal importance and similar hopes: and still more amazing is the didactic verbosity with which they address their compliments to the Convention. "So admirable and illustrious an example cannot be lost," is the language of one letter; "the proceedings of the people of France will secure tranquillity and all the virtues of patriotism to themselves, and a dawn of justice and moderation to surrounding nations."

It is curious that while we are thus informed on every side of the excitement and enthusiasm caused by the Revolution, we have so little opportunity of judging of the impression produced by the blood and horror that so soon followed that wonderful dawn of promise. Wordsworth alone unfolds the alarmed pause and tremor of

spirit, the shock and pang of disappointment which had so great an effect upon his mind. That there remained in England, notwithstanding all that happened, a strong party opposed to all hostile intervention on the part of England, which considered the declaration of war which followed as a sort of national crime, and whose faith in the ultimate justice of the French cause was strong enough to live through the Terror itself, is evident; but we have to trust to our imagination to picture forth what were the feelings with which English sympathisers must have looked on while the new-born Freedom rolled her garments in blood, and all the frenzies of a mad populace were displayed before high heaven. In the case of political partisans and philosophers, the effect no doubt was less than that produced on younger and simpler enthusiasts, and there is no evidence that Godwin, for instance, was moved by it at all.

In the meantime, these English sympathisers had a little excitement of their own. Twelve members of the Revolutionist Club, of whom Holcroft was one, were indicted in London for high treason, as Muir and Palmer had been in Scotland. Godwin was not included in the number, for he was not given to violent speech, and consistently disapproved in his calm philosophy of all violent action; but he appeared instantly in print on their behalf, describing the accusation against them as "an attempt to take away the lives of men by a constructive treason, and out of many points, no one of which was capital, to compose a capital crime." If there was, however, any intention on the part of the Government to hang or behead this group of intellectual rebels, which seems extremely unlikely, it was at once balked by the jury, which acquitted the first brought before them. Holcroft, who had delivered himself up when he heard of the prosecution, unnecessarily, and with a somewhat melodramatic determination

to identify himself and not accept the loophole of escape held out to him by the unwilling judge before whom he appeared—was kept for a week or two in Newgate awaiting the trial which, so far as he was concerned, never came. He supposed that he was the object of a more subtle prosecution afterwards, that his plays failed, and theatrical managers and audiences were prejudiced against him by the Government and its myrmidons. Whether this was the case or not it is now impossible to tell: but it might well enough be that the public, frightened to death by all that was going on in France, and full of the same unreasoning prejudice which in Edinburgh believed an innocent gentlewoman to decapitate chickens (by way of practice) with a toy guillotine, might for this reason have turned against the candidate for its favour.

Godwin, however, shaped his political utterance in a different way. When his more excitable associates were getting themselves into notoriety by noisy defiances of the Government, he was evolving in his steady yet fantastic brain his theory of what he called Political Justice. It was a theory extremely captivating to the mind of his time, to which Political Freedom was the last great discovery, a principle from which every good was to spring. Godwin's conception of Justice as the ruling principle of government was another name for absolute and boundless freedom. All laws, of whatsoever kind, all natural prepossessions, such as the preference which it is usual for a man to entertain for the members of his individual family, every restrictive power of government, every penalty exacted for the infringement of law, were breaches of this fundamental principle—as was also the idea of property and bonds of every kind, social or spiritual. In creating a duty according to this theory, you created a wrong, and the sole rule of perfection was that every man should do what was right in his own eyes. Rousseau had given the

world to understand that all government was founded on a Social Contract, the bargain by which men gave up a little of their natural freedom for the protection of law, and security of their lives and possessions. But Godwin abjured this expedient, and denounced all possessions, all securities, everything that involved the infringement of another's right to do what he pleased, as contrary to the supreme sway of justice. All law for him was wrong. He was no revolutionary: violence of any kind was out of his thoughts: he disapproved even, or at least was disposed to discountenance, all sudden changes. But in his decent obscurity, in the humdrum life and surroundings, where he lived "indifferent honest," paying his way, infringing no law—this was his philosophical settlement of the complicated affairs of earth. It extended to every rule of the family as well as the State. "Marriage is law, and the worst of laws," he says: for naturally there is nothing which interferes in so fundamental a way with personal freedom. "Marriage is an affair of property, and the worst of all properties." It was, therefore, such a breach of justice as the human race ought not to endure. Education, in like manner, was an infringement of justice, since it was, he thought, "no more legitimate to make boys slaves than to make men so. No creature in human form will be expected to learn anything but because he desires it." Thus, his theory of absolute right was to liberate man from every chain of duty and every rule of law, to abolish force and punishment, and to leave to every individual the undisturbed privilege of doing what he pleased. "Give to a State liberty enough" is his crowning sentiment, "and it is impossible that sin should exist in it."

We are apt to believe that men who profess such principles do so in the interests of the lawless and criminal, and that a desire to shake off the bonds of morality is at

the bottom of every such system. But it would be doing injustice to Godwin to suppose this. He married his own wife honestly and fairly, notwithstanding his opinions: and those who make it a reproach to him that at a later period he insisted, contrary to his own system, on securing his daughter's rights and that of her child to future wealth and position by this very expedient of marriage which he had condemned, forget that he had adopted it in his own case, and had not shown any inclination to live without the sanction required by the existing code of the country. He was, indeed, one of those unusual though not altogether singular men, who are able to set forth and reason out to its logical (however impossible) end, the most deeply reaching and universally applicable philosophy, without feeling themselves under any practical necessity either to embrace it themselves or to apply it to others. He was no missionary. He asked no man to act upon what he said, nor did he feel impelled to act upon it himself. His theory was independent of any of those limits which must have been imposed upon it, had the need of making it practicable occurred to him.

And at the same time, it is only just to add, that the real soul of his theory and that which commended it to enthusiast minds, was not the opening to universal license which it seemed to admit, but the generosity of virtue which it made possible, and the boundless trust in human nature which it set forth. "Impossible that vice should exist" in a State if it had but "liberty enough"? Mankind, universally, in its graver moments, knowing itself, has but one opinion as to the folly of such a sentiment. But, notwithstanding, it was and is a beautiful sentiment, full of chivalrous and magnanimous feeling, and the poetry of that faith in Man, the image of God, which has inspired more or less all great movements. The philosophy which is in fashion in our own day has taken a completely

different turn, and knows of nothing but Law, rigid and unalterable, a system of which man is the puppet. But Godwin's theory was founded upon a lofty, if entirely overweening estimate of the power, independence, and natural virtue of mankind. Left entirely to his own instincts, to his own sense of what was good and what bad, undemoralised by fictitious restraints, judging for himself, guided by himself, it was a fine and noble idea that man would at once reach a state of high and voluntary virtue. His capacity for this, nay, the certainty that if left to himself he would prove his possession of every noble quality, was at the bottom of all those impassioned claims of right, and assertions of universal liberty, which were the language of the time; and a passionate faith in human nature, a faith far superior to all teachings, either of reason or experience, was its inspiration. It does not seem necessary, however, to such a mind as Godwin's that he should even have possessed this faith. His passionless intelligence wrought out his theory without any concern for its application or practical use. It was a matter of logic to him, and fundamental truth. For his own part, he did nothing to disturb the constitution of existing things, had no objection to shape his course by it—and while laying down one law, obeyed another with great composure and unbroken phlegm, notwithstanding that he had that moment denounced it as a wrong to humankind. "I never for a moment," he says, "ceased to disapprove of mob government and violence, and the impulses which men, collected together in multitudes, produce on each other. I desired such political changes only as should flow purely from the clear light of the understanding, and the erect and generous feelings of the heart."

To "place the principles of politics on an immovable basis," and to supply "a less faulty work" than that of

Montesquieu, was Godwin's professed purpose in the composition of this work, and it was evidently the subject of much discussion and expectation among the congenial minds surrounding him. During the year 1792 he describes himself as being "in the singular position of an author, possessing some degree of fame for a work still unfinished and unseen." When it was published, however, a theory so novel and extraordinary met with somewhat harsh criticism even from the hands of those with whom the author had taken counsel, and with whom he had reasoned, if not of "Fate—free-will, foreknowledge absolute," and the ways of God to man, yet upon the subjects which had replaced these; "self-love, sympathy, and perfectibility, individual and general . . . justice and disinterest." The same journal which informs us of the perpetual talks and discussions on these subjects, in which the philosophical friends indulged, records also the unkind reception his system of thought met with from them. "Horne Tooke tells me my book is a bad book, and will do a great deal of harm," he says. "Holcroft . . . said the book was written with very good intentions, but, to be sure, nothing could be more foolish." These were two of the Revolutionists whom Godwin stood stoutly by when they were arrested on the imposing charge of high treason, and their criticism must have had a Brutus-touch of unexpectedness. But there were many consolatory evidences of sympathy and approval to restore the author's confidence, and he would seem even to have been able to persuade himself that his views were popular, as will appear from the following note:—

"In October I went into Warwickshire on a visit to Dr. Parr, who had earnestly sought the acquaintance and intimacy of the author of *Political Justice*. My position on these occasions was a singular one; there was not a person almost in town or village who had any acquaintance with modern publications that had not heard

of the *Enquiry concerning Political Justice*, or that was not acquainted in a great or small degree with the contents of that work. I was nowhere a stranger. The doctrines of that work (though, if any book ever contained the dictates of an independent mind, mine might pretend to do so) coincided in a great degree with the sentiments then prevailing in English society, and I was everywhere received with curiosity and kindness. If temporary fame was ever an object worthy to be coveted by the human mind, I certainly obtained it in a degree that has seldom been exceeded."

It is difficult to believe that any appreciable amount of general approval could be given to such a theory at any time, but as a matter of fact this publication, which affronted all the world's prejudices and most people's convictions, had the sanction of that prosaic but very real test, profit, to justify its author's idea of its popularity. Godwin received no less a sum than seven hundred pounds for his treatise, and it made him very widely and generally known, creating much interest and some enthusiasm. "We are told," says a contemporary, "that the poorest mechanics were known to club subscriptions for its purchase;" and even such an authority as Southey declares that, "faulty as it is in many parts, there is a mass of truth in it that must make every man think." "No work in our time," says Hazlitt, "gave such a blow to the philosophical mind of the country;" and the same authority speaks of its author as blazing "like a sun in the firmament of reputation—no one more talked of, more looked up to, more sought after." It is while recording, twenty-five years later, the entire overthrow of this reputation that the essayist describes—with no doubt some exaggeration—its extent and power.

"Was it for this that our young gownsmen of the greatest expectation and promise—versed in classic lore, skilful in dialectics, armed at all points for the foe, well read, well nurtured, well provided for—left the University and the prospect of lawn sleeves, tearing asunder the shackles of the free-born spirit and the cobwebs of school divinity, to throw themselves at the feet of the new Gam-

aliel and learn wisdom from him? Was it for this that students at the bar, acute, inquisitive, sceptical (here only wild enthusiasts), neglected for a while the paths of preferment and the law as too narrow, tortuous, and unseemly to bear the pure and broad light of reason? Was it for this that students in medicine missed their way to lectureships and the top of their profession, deeming lightly of the health of the body and dreaming only of the renovation of society and the march of the mind? Was it for this, etc. etc., that Mr. Godwin himself sat with arms folded, and 'like Cato gave his little Senate laws'? or rather like Prospero, uttered syllables that, with their enchanted breath, were to change the world, and might almost stop the stars in their courses?"

This hyperbole, worthy of one of the chief members of the Cockney school, who has himself dropped into the mists of forgetfulness, is no doubt very extravagant. "The young gownsmen" who threw themselves at Godwin's feet are represented to us by no more (and at the same time no less) than young Shelley, who long after, in the flush of youthful caprice and contradiction, flung himself body and soul into the city shop and back parlour, to which by that time the philosopher had retired; the other youths who formed this enthusiastic train, resolve themselves into a few unknown and luckless lads, whose names appear in the list of Godwin's correspondents, but nowhere else. Still there is no doubt that this strange essay in revolutionary philosophy attracted far more notice and comment than philosophical essays even of the highest pretensions are apt to attain.

A year after the publication of the *Political Justice,* Godwin produced *Caleb Williams,* the work by which he is now most generally known. This extraordinary book has had a career—if we may use such a word in reference to a book—as extraordinary as itself. The subject is painful, and destitute of all the usual attractions of romance; the characters are vague and abstract, embodied principles rather than men (for women do not exist in its pages); and the style, though clear and lucid, has no

special charm to fascinate the reader. Yet it has held its place from that time to this with the most curious tenacity, and could not be left out of any record of literature, though probably not a tenth part of the reading public has ever seen a page of it. It has stamped itself upon its age in all its harsh and unattractive force, and cannot be ignored. It is the parent of Mrs. Shelley's *Frankenstein,* and possessed of something of the same weird fascination. From beginning to end it is the conflict of two minds which is brought before us—the one in desperate defence of a terrible secret, the other inquisitive and prying till he has discovered it, and pursued by the consequences of his discovery afterwards as by an implacable fate. The story is in all likelihood known to the reader, though he may never have met with the book. Falkland, a vague Grandison of a sterner type, without any love-making on his hands, and of small stature,—a curious departure from the recognised type of hero, which embodies every excellence, physical as well as moral,—attracts the warmest admiration and affection of Caleb Williams, the orphan youth whom he takes into his house and establishes as his secretary and favourite. Yet nevertheless when the young man hears the tale of a crime in which Falkland's name had been momentarily entangled, a suspicion immediately springs up in his bosom that this and nothing else is the secret of his master's melancholy. Falkland is a man of fortune and character—a *preux chevalier* of spotless honour, honest and generous, the champion of the poor, and the refuge of afflicted merit of every kind. The only shadow which has crossed his path is that caused by the mysterious murder of a man who had been his persistent enemy and rival, and who had just insulted him in the most unpardonable way before meeting his death. Before, however, suspicion has had time to form against him, Falk-

land defies and confronts it by demanding an instant investigation, and by producing what seem to be triumphant proofs of his innocence, which is soon after established beyond all possibility of doubt by the conviction of a farmer and his son, whom the murdered man had treated most cruelly, and whose guilt is brought home to them by the most conclusive proofs of circumstantial evidence. When this story is told to Caleb Williams, notwithstanding his profound veneration for his employer, the question, What if Falkland were the murderer after all? flashes across his mind and will not be shut out. The instant consciousness of the lad's suspicion, which the reader is allowed to perceive in Falkland, converts him immediately to Caleb's opinion, and the short but exciting conflict of curiosity on the one side and fierce fear and self-defence on the other, has a painful interest which it is impossible to resist. But before the struggle has gone far, Falkland has been wound to such a pitch of agony, that, finding Caleb on the eve of investigating a certain chest, in which it is to be supposed the proofs of his crime are hidden, he suddenly brings the situation to a close by confessing that Caleb's guess is right, and that he is indeed, notwithstanding that the luckless Hawkins has died for it, the murderer of Tyrrel. This striking incident has given its name to the drama founded upon Godwin's tale, which still retains its interest, and has reappeared upon the stage in very recent days, the *Iron Chest*.

The rest of the tale is occupied by Falkland's deadly and relentless pursuit of the youth to whom he has thus been forced to unbosom himself, and whom he overwhelms with false accusations, imprisons, pursues, forces out of every refuge in which he has hid himself, until at last the unfortunate young man is driven to the point of denouncing his persecutor. That all this time Caleb

should retain his affection for his master, and consider his secret as inviolable, seemed quite natural to the reader as to the victim, whose faith in his former benefactor is scarcely even shaken by the fact that he has been guilty of one cowardly murder and has permitted two innocent people to die in his stead; and this, it is needless to say, infers a wonderful amount of power in the carrying out of the strange story. When the unfortunate Caleb, apprehended a second time on a false charge, and seeing himself on the verge of a hopeless imprisonment, bursts forth at last with his accusation, he is overwhelmed by remorse before he gets to the end of it, and the conflict of fine sentiment between him, the accuser, and Falkland, who, worn and emaciated, has come to hear the charge against him, is kept up to the end. "Mr. Falkland is of a noble nature," cries the young man when he has told his extraordinary and incredible story, at which all the assembly is gaping; "I proclaim to all the world that Mr. Falkland is a man worthy of affection and kindness, and that I am myself the basest and most odious of mankind." The criminal whose guilt he has just denounced is not to be outdone in high-flown generosity: "He rose from his seat, supported by his attendants, and to my infinite astonishment threw himself into my arms. 'Williams,' he said, 'you have conquered; I see too late the greatness and elevation of your mind:'" and determined not to outlive his reputation he dies, leaving his accuser in agonies of remorse.

The struggle thus terminated is the sole subject of the tale, for the story of Tyrrel and the events which led to his murder are merely reported to Caleb, and are of the slightest and most conventional description, without a touch of human nature or individuality. Nor is there one character in the book which can be said to take hold upon the reader. The hero and his adversary are abstrac-

tions, representatives on one side of what the author supposes an elevated sense of honour, and on the other of intellectual curiosity. It is little recommendation to the public to say of a work of fiction that it embodies a philosophical theory, and probably very few who read the book now have the remotest idea what the principle was which it is intended to set forth—but nothing can be more distinct, when the attention is directed to it, than the meaning of the writer in this extraordinary tale. With a curious artlessness, as in a child's fable, he sets forth his moral: the fact that punishment must follow crime is the wrong upon which everything turns. But for this Falkland would have repented of his murder in a gentlemanly way becoming his character, and all would have been well; it is the existence of a degrading penalty, which he cannot endure to contemplate, which compels him to permit the execution of the two innocent victims, and to shower miseries upon the unfortunate Caleb Williams, who has no desire to denounce him, but whose "elevation and greatness of mind" he does not appreciate till the end. Caleb himself feels to his heart the mistake he has made in letting loose the terrors of the law upon the magnanimous and noble sufferer — a step which is alien to all his intentions, and to which he is driven only by desperation. The evils of judicial interference with the natural progress of the mind are brought in over and over again in the minor details of the picture. The scene in the prison, where Caleb is placed by Falkland on a false charge of robbery, has none of the riot and reckless jollity which other writers of the day put into the same scenes. Each prisoner is overwhelmed with "his own internal anguish," and if a brawl does occur among them, it fades into speedy silence amid the preoccupied and thoughtful felons. "We talk of instruments of torture," cries the narrator; "Englishmen take credit to themselves

for having banished the use of them from their happy shore. Alas! he that has observed the secrets of a prison well knows there is more torture in the lingering existence of a criminal, in the silent intolerable minutes that he spends, than in the tangible misery of whips and racks." On another occasion Caleb finds refuge with a romantic band of robbers, who act on the Robin Hood principle of taking solely from the rich and helping the poor. "I saw and respected their good qualities and their virtues,' he says: "I was by no means inclined to believe them worse men or more hostile in their dispositions to the welfare of their species than the generality of those that look down upon them with the most censure." And Mr. Raymond, the head of this virtuous band, makes it clear, considering the question with great impartiality, that he and his followers are more sinned against than sinning.

"Those very laws," he tells the hero, "which by a perception of their iniquity drove me to what I am, preclude my return. God, we are told, judges men by what they are at the period of arraignment, and whatever be their views, if they have seen and abjured the folly of their crimes, receives them to favour. But the institutions of countries that profess to worship this God admit no such distinctions. They leave no room for amendment, and seem to have a brutal delight in confounding the demerits of offenders. It signifies not what is the character of the individual at the hour of trial—how changed, how spotless, how useful, avails him nothing. Am I not compelled to go on in folly, having once begun?"

The virtuous steward Collins, who is almost the only amiable character in the story, expresses his benevolent sentiments in strict accordance with this rule. "It is more necessary for me to feel compassion for you than that I should accumulate your misfortune by my censures. I regard you as vicious, but I do not consider the vicious as proper objects of indignation and scorn," he says. Thus the author of the *Enquiry concerning Political Justice* never loses sight of his theory.

St. Leon, which was Godwin's second novel, has not shared the curious immortality of *Caleb Williams,* nor does it in the least deserve to do so. It has something of the same connection, but in a different sense, with the *Political Justice,* which was ever uppermost in his thoughts, and owed its complexion, if not its existence, to Godwin's desire to modify the philosophical disapproval of the domestic affections and family life which had been expressed in that book. St. Leon is a French nobleman of the sixteenth century who dissipates his means, and is saved and converted into the *père noble* of a melodrama by the exertions of his wife: but after living a life of virtuous poverty with her and a group of sons and daughters, perfect both in mind and person, has the fatal secrets of the philosopher's stone and the elixir vitæ communicated to him, and loses everything that makes life worth having, by becoming rich and immortal. The wife, Marguerite, who is his guardian angel, is said to be "drawn from the character of Mary Wollstonecraft," but the reader who braves the dust and cobwebs to look into the history of *St. Leon* will, we fear, find little help in identifying any human creature by means of this immaculate wife, who is a piece of perfection, and not reducible by any means to a human resemblance. The story is painful and monotonous, and few people, we think, will follow *St. Leon* to the end of his tale.

Godwin's later works were many—some of them not written under his own name, and most of them for daily bread, but without anything of the inspiration which necessity sometimes confers. His *Political Justice* has a certain place in the history of his time, and *Caleb Williams* retains a tradition of interest, the surviving shadow of that which it once excited: but this is almost all that can be said of a writer who once occupied so noticeable a place in the literary world. During his

own lifetime, according to Hazlitt, his friend and contemporary, he had fallen as completely from that place as if it had never been his. "Mr. Godwin's person is not known, he is not pointed out in the street, his conversation is not courted, his opinions are not asked, he has no train of admirers, no one thinks it worth his while to traduce and vilify him, he has scarcely friend or foe, the world makes a point (as Goldsmith used to say) of taking no more notice of him than if such an individual had never existed; he is to all ordinary intents dead and buried." But the strong individuality of the two works we have quoted, and his personal history and connections, will make his name always a known word. The husband of Mary Wollstonecraft and the father of Mary Shelley, his life is the centre of many branching lines which connect him with the higher circles of his time, as well as the city society to which he immediately belonged; and his steady clerkly presence, methodical and hard working, his tradesman-like adherence, amid the wildest views, to the routine and method which in principle he scorned, the tremendous revolutionism of his ideas, and the plodding and humdrum prose of his life, afford contrasts enough to give us a kind of paradoxical interest in the shopkeeping philosopher, with his small person and his large head full of notions, his sober and drab-coloured life, and the strange associations that cluster round it. Associated with that of his wife, his name became to many of his countrymen a synonym for atheism and every unruly passion; and the strange and painful story of his household might be taken to prove how little consonant with a virtuous and peaceful life were the principles on which his family was founded; but when we look at the man closer, and through the medium of Mr. Paul's able biography make acquaintance with the faded fortunes and forgotten tenor of that curious exist-

ence, the traditionary prejudice with which he has been regarded will be much modified, although there is little that is lovable or attractive in the story in what light soever it may be regarded.

Godwin was already within the boundaries of middle-age when Mary Wollstonecraft, a name which has been hated and contemned on all hands as that of one of the typical representatives of feminine Atheism, the most odious of all characters to the general mind—came into his life. She was a woman who had already experienced many hard struggles and much sorrow. She had been in some degree the bread-winner, in every way the support and guide of a family, neither so amenable to her influence nor so grateful for her exertions as would have been seemly, the members of which were in the habit of criticising their sister somewhat sharply in the letters which passed between them behind her back. Her father was an entirely disreputable person, from whom his children derived neither help nor countenance. To be brought up under such a shadow, or rather to struggle towards a better and higher life, in the depressing presence of a hopeless and degraded parent, is the breeding of all others which most revolts the mind of a high-spirited girl. Indeed, we might almost venture to say that the strong protestations in favour of something, varying from age to age, which is called the Rights of Women, with which society has been vexed and disturbed to an extent which has made it incapable of judging what is just in them—have risen almost invariably from women compelled by hard stress of circumstances to despise the men about them. Exception will probably be taken to this assertion both by the women themselves who utter these protestations and by the critics; but yet we hold by what we have said. Women, no more than men, are exempt from the painful action of contempt; but when

they are obliged to despise those to whom they would naturally look up, the irritation and misery of the sentiment is magnified tenfold. To say that her drunken father was the reason why Mary Wollstonecraft wrote the *Rights of Women* would be too strong an accusation; but this circumstance evidently brought a painful struggle into her life. And one of her sisters, the pretty one, the beauty of the family, "poor Bess," made an unhappy marriage, and had to be taken out of her husband's clutches almost in a state of frenzy by Mary herself. Thus degraded by the besotted folly of one man, and driven into energetic action by the unkindness of another, she certainly was. And it was not till after nearly ten years' experience of the "slings and arrows of outrageous fortune" that she put forth the book which was the first word of a long controversy. For the greater part of that time she had been engaged in teaching, and when in 1787 she came to London to "a little house in a street near Blackfriars Bridge" to endeavour, with the favour of good Mr. Johnson, the publisher, to get her living by translations from the French and little books for children, she was a woman nearly thirty, at an age when the deprivations of life and the "spurns which patient merit of the unworthy takes" are felt most keenly. Here she made a home for her brothers and sisters, supported her father in his village, and was the head of all the family concerns; and it was here that the *Vindication of the Rights of Women* was produced.

The woman who wrote this book was not an abstract personage, or one of the class which is called strong-minded. "She was incapable of disguise. Whatever was the state of her mind, it appeared when she entered. When harassed, which was very often the case, she was relieved by unbosoming herself, and generally returned home calm, frequently in spirits," writes her publisher,

Johnson. The sisters were flippant and impatient, and not dutiful to Mary's sway, though they came upon her in all their troubles. It was she who found them situations, sent one of them to Paris to improve her French, and generally cared for and watched over them. The woman who stands in this position to a family has, alas! a great deal of disenchantment to go through, and is taught the meanness that dependence produces, and the ingratitude of many which is so often the result of the self-devotion of one, in a bitter and effectual way. The disreputable father, the troublesome brothers, the brother-in-law who drove "poor Bess" to madness, were all, no doubt, before her proud and sensitive soul, in her mind's eye, as she wrote her book—she, too, amid the literary drudgery by which she earned her living, hoping to do something which should move the world and give a new tide to popular opinion.

We have said that society is too much vexed and irritated even yet by this subject to be able to permit it to be discussed with calmness: and still more was this the case in the end of last century, when for the first time a woman ventured to complain of the inequality of her lot. But, indeed, though the time permitted a simplicity of language not possible in our day, Mary Wollstonecraft's plea for women is of the mildest description. She vindicates their right to be considered as human creatures, bound by the general laws of truth and honour, and with a generous vehemence assails the sentimental teachings of Rousseau and of the more virtuous moralists—Gregory, Fordyce, and even Mrs. Chapone—who take it for granted that the highest mission of a woman is "to please," and excuse in her, nay, recommend to her, those arts by which she can govern while appearing to obey. All that Mary Wollstonecraft asks is education for her clients and an exemption from that

false and mawkish teaching specially addressed to "the fair," in which the eighteenth century was so rich, and which has not quite died out, even among ourselves. In one sentence, indeed, in her book, she "drops a hint" which she fears will probably "excite laughter;" "for I really think that women ought to have representation instead of being arbitrarily governed;" but this opens the whole political question to her, and she allows that as women are "as well represented" as the great proportion of men, the grievance here is small. The case, it will be seen, is very different in our own days. Those who look up the old volume in its faded printing with the hope of finding anything in it that resembles the claims of some women now, will be entirely disappointed. The question was in a much more elementary form in Mary Wollstonecraft's time. The instructors who counselled a woman never to let her husband be sure of her love for him, that so she might retain her empire over him; to "be even cautious in displaying your good sense," lest this might be thought to "assume a superiority;" and to keep any information she may possess "a profound secret, especially from men"—nay, even to show no animation in dancing, lest it should be supposed a fault against delicacy—are the objects of her indignant criticism: and no one will say she errs in denouncing the whole pitiful system of fictitious existence which was built upon such a foundation.

Nor does this feminine revolutionary suggest any violent remedy for the evil she deplores. The only thing she can think of—besides that broadest but most difficult of all panaceas, a general adoption of the principles of honest simplicity and truth—is a common education, of boys and girls together, with the object apparently of making them respect each other as brothers and sisters rather than look upon each other as hero and heroine in the brief drama whose stilted rules are supposed to affect

the life of one of them from beginning to end. Many readers of mature age (the younger generations have scarcely heard the name) will recollect when Mary Wollstonecraft was a name of horror, considered as that of a female atheist and libertine, an offence to God and man. To such it will be a surprise to find that while her book is altogether free from revolutionary principles, either political or moral, it is also full of the warmest religiousness, and appeals to the Maker, the Father of all. Here is her comment upon the remark of a sage that women might not learn the science of botany "consistently with female delicacy." "Thus," she cries, "is the fair book of knowledge to be shut with an everlasting seal. On reading similar passages, I have reverentially lifted up my eyes and my heart to Him who liveth for ever and ever, and said, 'O my Father! hast Thou by the very constitution of her nature forbid Thy child to seek Thee in the fair forms of Truth? And can her soul be sullied by the knowledge that awfully calls her to Thee?'" Such are the grievances upon which she dwells, and such the rights of women she claims. It is a curious lesson over again of the cruelty of general report and the violence of prejudice. The book would attract no attention now-a-days, unless some reader might be struck with here and there an eloquent passage. Its complaints are too mild and general, its suggestions too little revolutionary, to count in the literature of the subject. One or two gleams of character there are, as when she calls Lord Chesterfield "a cold-hearted rascal (for I love significant words)."

After her book was published she went to France, and remained in Paris during all the misery and alarm of the Reign of Terror. Her account of the King's passage through the streets to appear before the Assembly, "moving silently along—excepting now and then a few strokes on the drum which rendered the stillness more awful

—through empty streets, surrounded by the National Guards," while the inhabitants of the houses along the way stood at their closed windows looking out upon this strange sight, is curiously impressive and picturesque. Courageous woman as she was, she was struck with a chill of fear to the bottom of her heart, and fancied she saw eyes glance at her through her glass door, and bloody hands shaken. "I wish I had kept even the cat with me," she cries. "I want to see something alive. Death in so many frightful shapes has taken hold of my fancy." Perhaps it was this terror and her forlorn position, alone in such a confused and horrible scene, which made her cling to the support which was offered to her. But indeed she herself would probably have put forth no such excuse nor felt any necessity for it. Like Godwin and so many of those around her, she had come to the conclusion that marriage was wrong in itself, and she was not restrained by that thought of the inevitable injury inflicted upon the woman by all irregular relations, which sometimes prevented a man of generous temper from carrying out his own convictions in this way. The generosity on the woman's side was to scorn all dangers and run all risks. She united herself in Paris to an American called Finlay, whose faithful wife she was for about two years, when he availed himself of the freedom which the absence of the marriage bond left him, and deserted her—to the surprise and distress of the woman-philosopher, who naturally, but very unphilosophically, was heart-broken by the abandonment which it was the very point of her creed to make possible. That this freedom involved an ideal faithfulness, a constancy more than romantic, was the conclusion she would have drawn: the primary idea of all enthusiasts of Mary Wollstonecraft's class being to credit the human race in general with this rarest and most beautiful of qualities. She was in Lon-

don with her child when this terrible event occurred, and refusing to accept the annuity which the man whom she had considered her husband would have settled on her, she returned to her former occupation and took up the broken threads of her previous life. And whether it was that the society in which she lived was deeply imbued with the same principles as her own, or that her great qualities won for her, as has been seen in other cases, an exemption from the common rule, it seems certain that Mrs. Finlay, as she called herself for some time, was received by all her friends with very little, if any, diminution of respect.

It was at this period that she met Godwin, whom she had previously known, but formed no great acquaintance with. He had not been without passages of sentiment in his life before—and he was a man of taste, liking beautiful women and women of genius. Miss Alderson, who was afterwards Mrs. Opie, one of the gentle little chorus of minor poets, was supposed to have attracted him; and Mrs. Reveley, a person of great beauty, though otherwise undistinguished, who, however, had a husband living; and the beautiful actress and author Mrs. Inchbald. But the fair and injured woman who thought more entirely with him than any of these, soon seems to have fixed his choice. Southey describes her face as "the best, infinitely the best," that he has seen among the *literati* in London, with an air of superiority which was disagreeable, but no other drawback, and eyes "the most meaning I ever saw." In the picture it appears an altogether noble face—pensive and with a sweet languor as of fatigue or sorrow past, but in every respect a pure and lovely countenance. Nothing could be more odd than Godwin's description both of their love and marriage. "The partiality we conceived for each other was in that mode which I have always considered as the purest and

most refined style of love. It grew with equal advances in the mind of each. It would have been impossible for the most minute observers to have said who was before and who was after. One sex did not take the priority which long-established custom has awarded it, nor the other overstep that delicacy which is so severely imposed." "There was no period of throes and resolute explanation attendant on the tale. It was friendship melting into love." Godwin felt himself bound to explain the step he had taken to Thomas Wedgewood, the friend of Coleridge and his own, a munificent and tender-hearted benefactor of literary persons in general. Some people had accused him of inconsistency in marrying at all. "But I cannot see this," says the philosopher. "The doctrine of *Political Justice* is that an attachment in some degree permanent between two persons of opposite sexes is right, but that marriage, as practised in European countries, is wrong. I still adhere to that opinion. Nothing but a regard for the happiness of the individual whom I had no right to injure would have induced me to submit to an institution which I wish to see abandoned, and which I would recommend to my fellow-men never to practise but with the greatest caution. Having done what I thought necessary for the peace and respectability of the individual, I hold myself no otherwise bound than before the ceremony took place."

Nothing could better show the pragmatic, wrong-headed, obstinate, yet on the whole right-feeling man. His wife and he lived in two houses in "the Polygon, Somers Town," one about "twenty doors off" the other, and called upon each other and wrote notes to each other daily with the most amusing play at being lovers and not married persons. The precise date even of their marriage was not known to their friends, the two philosophers being a little ashamed of having in spite of

their principles done what everybody else did, and "submitted to an institution" which they disapproved. Then they were poor, and Mary had (it would seem) in some degree escaped the penalties of poverty so long as she remained unmarried. She was "so beloved by her friends that several, and Mr. Johnson in particular, had stood between her and any of the annoyances and mortifications of debt." This, we suppose, means that they paid her debts for her, which was a thing they could not continue to do for Godwin's wife—while he, on the other hand, had no desire to advertise himself as a married man for still more delicate reasons. "It is usual that when a man marries he commences new habits under such a totally new influence, and that he is lost to all his former friends. Mr. Godwin spent a portion of every day in society, and was much beloved; his more intimate friends believed they should suffer from the change. *Two ladies shed tears when he announced his marriage*—Mrs. Inchbald and Mrs. Reveley." These exquisite explanations are from the pen of Mrs. Shelley, the daughter of this pair, and are given in perfect good faith and gravity. It is to the credit of both parties, however, that, notwithstanding all these inducements to keep it secret, the marriage was made known very shortly after it was contracted. The notes that passed between them in the meantime are pretty and playful enough, and show the most curious kind of united yet separate life. It might be a good experiment for impatient and fanciful people to make, to live thus "twenty doors off" or round the corner. "Did I not see you, friend Godwin, at the theatre last night?" his wife asks. "I thought I met a smile, but you went out without looking round. . . . I shall leave home about two o'clock. I tell you so lest you should call after that hour. I do not think of visiting you, because I seem inclined to be industrious. I

believe I feel affectionate to you in proportion as I am in spirits, still I must not dally with you when I can do anything else. . . . Should you call and find only books, have a little patience and I shall be with you. Do not give Fanny a cake to-day; I am afraid she stayed too long with you yesterday. You are to dine with me on Monday, remember; the salt beef awaits your pleasure." Sometimes, however, she is a little cross, and wishes he would desire Mr. Marshal, a useful friend of all work, whom Godwin seems to have kept about him, to call on her. "Mr. Johnson or somebody has always taken the disagreeable business of settling with tradespeople off my hands," she says with an aggrieved tone. "I am perhaps as unfit as yourself to do it, and my time appears to me as valuable as that of other persens accustomed to employ themselves." Here there is a little of the petulance of the beauty and queen of hearts, as well as of the conscious woman of genius, who has learned to expect to be exempted from the vulgarities of daily existence. But when Godwin is absent on a journey, their letters to each other are very natural and delightful. "And now, my dear love, what do you think of me?" he writes. "Do you not find solitude infinitely superior to the company of a husband? Will you give me leave to return to you again when I have finished my pilgrimage? . . . I wish I knew of some sympathy which could inform me from moment to moment how you do, and what you feel. Tell Fanny something about me. Ask where she thinks I am. Tell her I have not forgotten her little mug, and that I shall choose her a very pretty one." To this Mary replies from the Polygon. "I find you ever write the kind of letter a friend ought to write, and give an account of your movements. I hailed the sunshine and moonlight, and travelled with you scenting the fragrant gale. Enable me still to be your company, and I will enable

you to peep over my shoulder and see me under the shade of my green blind, thinking of you and all I am to hear and feel when you return. You may read my heart if you will. I am not fatigued with solitude, yet I have not relished my solitary dinner. A husband is a convenient part of the furniture of a house, unless he be a clumsy fixture. I wish you from my soul to be riveted in my heart, but I do not desire to have you always at my elbow, although at this moment I should not care if you were. . . . Fanny forgets not the mug."

This is all far too pretty and tender for two abstract philosophers who disapproved of marriage; and notwithstanding the portentous reputation of the author of the *Rights of Women*, there is nothing she writes which does not attract us towards the woman who, though she so little knew it, was but a few months from her grave. She died after the birth of her child, another Mary, she who was to be the love and wife of Shelley in after years. In Godwin's concise and business-like diary, where, even when his wife is very ill, he pauses to note "Pichegru arrested," there is one break, "10 seconds 20 minutes before 8——" and then some blank lines. His wife was dead.

But in its sorrow as in its happiness this literary community cannot help being tragi-comic. The very day of his wife's death Godwin began the most curious wrangle with Mrs. Inchbald—over her grave, so to speak. "My wife died at eight this morning," he wrote; "I always thought you used her ill, but I forgive you. You told me you did not know her. You have a thousand good and great qualities. She had a very deep-rooted admiration for you." To which the lady replies the same day with the greatest spirit, "You have shocked me beyond expression, yet I bless God, without exciting the smallest portion of remorse. Yet I feel most delicately on every

subject in which the good or ill of my neighbours is involved. I did not know her. I never wished to know her. Against my desire you made us acquainted. With what justice I shunned her your present note evinces, for she judged me harshly. . . . Be comforted; you *will* be comforted. Still I feel for you at present." Next day she wrote again with the most curious philosophy of consolation which we ever remember to have encountered. It is thus Mrs. Inchbald offers the comfort of her own experience to her friend, whose wife had been taken from him the day before:—

"I have too much humility to offer consolation to a mind like yours. I will only describe sensations which nearly a similar misfortune excited in me. I felt myself for a time bereft of every comfort the world could bestow; but these opinions passed away, and gave place to others, almost the reverse. I was separated from the only friend I had in the world, and by circumstances so much more dreadful than those which have occurred to you, as the want of warning increases all our calamities; but yet I have lived to think with indifference of all I then suffered."

These are very probably the experiences of many, but few have the courage to express them with such composure. Two days later Godwin resumed this strange correspondence, some special slight shown by Mrs. Inchbald to his wife having apparently come uppermost in his mind, curiously mingled with a hankering after that lady herself. "I must endeavour to be understood as to the unworthy behaviour with which I charge you towards my wife," he says. "I think your shuffling behaviour about the taking places to the comedy of the 'Will' disgraceful to you. I think your conversation with her that night at the play base, cruel, and insulting. There were persons in the box who heard it, and they thought as I do. I think you know more of my wife than you are willing to acknowledge to yourself, and that you have an understanding capable of doing some small degree of justice to

her merits. I think you should have had magnanimity and self-respect enough to have showed this. . . . I thank you for your attempt at consolation in your letter of yesterday. It was considerate and well intended, although its consolations are entirely alien to my heart." All this went on while the poor woman lay unburied—a curious warfare of mingled praise and recriminations, notes like arrows flying from house to house, as so lately poor Mary's little notes had flown. "I could refute any charge you allege against me," Mrs. Inchbald retorts. . . . "As the short and very slight acquaintance I had with Mrs. Godwin, and into which I was reluctantly impelled by you, has been productive of petty suspicions and revilings, surely I cannot sufficiently applaud my own penetration in apprehending, and my own firmness in resisting, a longer and more familiar acquaintance." A more extraordinary correspondence never was carried on at such a moment. It ended a month after with a brief declaration on the part of Mrs. Inchbald that their acquaintance must end *for ever*. Probably, had she been less energetic, Godwin would have asked her to marry him a few months later, which seems the only other alternative.

There is one other curious little controversy over this grave. One of the friends of Godwin and his wife declined to be present at her funeral, because he much doubted "the morality of assisting at religious ceremonies," to which objection Godwin sent the following curious reply:—

"I think the last respect due to the best of human beings ought not to be deserted by their friends. There is not, perhaps, an individual in my list whose opinions are not as adverse to religious ceremonies as your own, and who might not with equal propriety shrink from and desert the remains of the first of women. I honour your character. I respect your scruples. But I should have thought more highly of you if, at such a moment, it had been impossible for so cold a reflection to have crossed your mind."

. It would not appear that Mary had ever shared hei husband's entire want of religious faith: she believed, at least, in the existence of God; but it is strange to note that this man, who had married in spite of his principles, should now, in the midst of a company all adverse to religious ceremonies, have buried his wife with the specially solemn and striking ceremonial which the Church of England employs. But we go too far: Mary, it is true, was buried, as ordinary Christians are: but her husband was "too prostrate both in body and mind," though he had been equal to the writing of all these letters, to be present himself on the occasion.

This was in September 1797. In March of the following year he was in Bath, and there made the acquaintance of two sisters, Sophia and Harriet Lee, who were among the most popular novelists of their time. The elder sister had been a well-known author for many years and had long before established a school, after the fashion of Hannah More and her sisters, in Bath, where the Misses Lee were the ornaments of one of those little centres of literary society to which we have alluded in a former chapter. Harriet Lee, who was considerably younger than Sophia, had but lately begun her literary career when Godwin visited Bath. She was the author of by far the greater part of the series entitled the *Canterbury Tales,* of which the first volumes had just been published. These tales have fallen out of the knowledge of the present generation, but they were highly thought of by their contemporaries, and one of them is spoken of by no less an admirer than Byron with real enthusiasm. "It may be said to contain the germ of much that I have since written," he said. It was only a year after the acknowledgment of Godwin's marriage with "the first of women," ar d she had not been six months dead —when he formed this new acquaintance. It was some-

what early for a new sentiment, but the steady and argumentative way in which he immediately sits down to argue Harriet Lee into marrying him, is one of the most curious of the many characteristic episodes in his life. The lady resisted, perhaps not without a little enjoyment of the prolonged and delicate controversy, such as any novel writer and most women might be expected to feel But she would not have him, notwithstanding all the elaborate arguments which he brought forward to prove that she ought to have him, and the high ground he took of moral disapproval when she persisted in rejecting him. When he can say no more, he tells her that she acts in the spirit of the eleventh and twelfth centuries, putting out of sight the man, and asking only what he believes: but even this did not move her. A similar correspondence took place a year later with Mrs. Reveley, of whom it has been already told that Godwin would have married her before he met Mary Wollstonecraft, but for the trifling circumstance that she was herself married. This mistake was now, however, rectified by the death of Mrs. Reveley's husband, and in the same month Godwin summons the new-made widow to admit him to her presence, apparently in the position of a lover, scouting indignantly the suggestion that for some time it was better that she should not see him. "Is woman always to be a slave?" he cries. A little later he puts his proposal plainly, and indeed somewhat authoritatively, before her. "You are invited to form the sole happiness of one of the most known men of the age; of one whose principles, whose temper, whose thoughts, you have been long acquainted with, and will, I believe, confess their universal constancy. This connection, I should think, would restore you to self-respect, would give security to your future peace, and insure for you no mean degree of respectability. What you propose to choose in opposition

to this I hardly know how to describe to you." What the poor lady did choose, was to marry, after a not very long interval, somebody whom it is to be supposed she preferred to Godwin; but his intense disapproval of her on this subject, and angry sense of her folly in not immediately deciding in his own favour, are comical in the extreme. If the loves of the philosophers should ever be written,—and there is no doubt that the subject is a fertile and amusing one, instructive if not exactly edifying,—Godwin's serious setting forth of his own claims, and grave enforcement of the duty and propriety of marrying him upon the objects of his affection, and his grieved perception of their incredible folly in refusing to see this, would furnish one of its most characteristic chapters.

He married eventually in 1801, or was married by, a woman of no special pretensions—a widow with two children—Mrs. Clairmont, to whom he seems to have been for the rest of his life a faithful and even submissive husband. It was her energy and business qualifications which suggested the bookseller's shop and small publishing business, in which the last portion of his life was spent, and which was carried on chiefly by her for many years. Mrs. Godwin published not only many minor productions of her husband,—school-books and other compilations, most of them in a feigned name,—but brought out one of the prettiest of gentle interpretations—Lamb's *Tales from Shakspeare*, the work by which Mary Lamb did her best to eke out her brother's humble income, and in which he too had a share; and also *Mrs. Leicester's School*, Miss Lamb's only independent production. And here it was that young Shelley came in his enthusiasm and met the girl whose young beauty and ardent uncontrolled nature helped him to shake himself loose of other legal bonds, and brought darker shades into the fatal spider's web of passion and theory which entangled so

many lives. Godwin was very good to the children of his two marriages and of his two wives. It is one of the best features in his character; but we must return hereafter to the group of young women who grew up in his house and wove threads of connection, not happy or beautiful, between that humble shopkeeper's parlour and other names more distinguished than his own.

Godwin lived as far into the present century as the year 1836, and, strangely enough, owed the comfort of his latter days—he, the philosophical revolutionary and antagonist of law and authority—to a small sinecure office under Government. The "Yeoman Usher of the Exchequer" was the title which the author of the *Political Justice* carried to his grave—a curious mockery of fate. He pursued the profession of literature to the end of his life; but the culmination of his mind and reputation was in the last four years of the eighteenth century. It was at this period also that the stern Holcroft set his teeth against disease and pain, believing them to be within the power of the will to overcome and make an end of, as his friend believed vice and crime were to be annihilated by restoring to every man an uncontrolled and perfect freedom. The "sanguinary plot against the liberties of Englishmen"—that is, the State trial to which we have referred—came, as has been already described, to nothing, and Holcroft went on writing novels and plays, until, stung and sore at the neglect of the public, but trying hard to think himself a political martyr, he disappeared for a number of years from London, living on the Continent. The terrible story of his son's suicide gives a point of tragic interest to his life. The boy, an unruly lad of sixteen, had run away, and threatened if his father came after him to shoot himself—which he did, to the horror of all beholders, on seeing that stern father approach his hiding-place,—an appalling incident, of which,

however, nothing is said in the supplemental memoir with which Hazlitt concludes Holcroft's fragment of autobiography.

Another, but a wealthier and less laborious member of the same circle, and pseudo-martyr of the same period, Horne Tooke, had the distinction of being sent to the Tower, one scarcely knows why, since Holcroft was only in Newgate—a very invidious and injurious partiality. In connection with this individual, Rogers, in his recollections, tells a very odd anecdote of the paternal consideration of the Government for its prisoners. Tooke was kept, it appears, for a fortnight without anything to read or any writing materials, but at the end of that time three volumes were sent him—"one of Locke, one of Chaucer, and Wilkins's Essay"—books which had been found upon his table when he was arrested, and which it was afterwards supposed he must have been reading. He made notes upon the margin of the Chaucer, an old black letter copy, for his book, "The Diversions of Purley," which he published shortly after. It is a work upon philology and grammar, with a sprinkling of philosophy, and is in the form of a long dialogue between himself and Sir Francis Burdett. The philology is eccentric and old-fashioned, and the book "diverting" to its author rather than its readers: but it is very unlike a work on which a revolutionary accused of high treason was likely to have been engaged. Horne Tooke was a wit and patron of letters in his way, and took in among his associates a larger and (conventionally) more important society than that of the literary community about Holborn, the laborious hacks of the generation.

Mrs. Inchbald, who has been repeatedly mentioned, was one of the first of the school of female novelists whose heyday was yet to come. She was at this time in the full glory of her literary career, "drawing her chair into the centre of the room" wherever she went, and

gathering "the men" about her in a crowd, like a heroine of Miss Burney, though she was far too incisive and imperious for one of these gentle ladies. Her *Simple Story* is not a great work of art. It sets forth the caprices of a young lady, never known to the reader by any name more familiar than that of Miss Milner, who torments and is tormented by her guardian until they marry, and we are in hopes that a natural solution has come to all the questions between them: but, unfortunately, this hope proves without reason, as there is added a postscriptal volume, in which Miss Milner falls into dire trouble and dies, leaving a child, who is not permitted even to see her stern father. At the final crisis, when this lovely and innocent but ill-used girl falls into her father's arms, the only words he can utter in his surprise are, "Miss Milner, dear Miss Milner!" for, of course, she is the image of her mother. The character of Dorriforth is intended to be one of lofty sternness, so noble, so highly exalted above any kind of levity, that it is impossible for him to tolerate or forgive it; but the novelist has succeeded only in making him a harsh tyrant—ungenerous and untender. Oddly enough, he begins by being a Catholic priest (Mrs. Inchbald was herself a Catholic), but is freed of his vows when he succeeds to the title of a cousin, a peculiarity almost as out of the way as Miss Milner's deprivation of a Christian name. Miss Milner herself is a lively portrait of an impulsive and capricious young woman, full of good impulses, but impatient of control, who is driven into sin at last by the cold superiority and practical desertion of her husband. Like many female writers, however, Mrs. Inchbald makes this polished tyrant the object of her chief care, elevates him into the most magnanimous of heroes when he acknowledges his daughter, and repays him with the love and gratitude of the young people upon whom he has inflicted so many blows to

begin with. But there were no *Waverley Novels* in those days, no Jane Austen, no Maria Edgeworth: and the *Simple Story* was highly prized by its contemporaries. "Mrs. Inchbald was always a great favourite with me," says Hazlitt. "There is the true soul of woman breathing from what she writes as much as if you heard her voice. It is as if Venus had written books:" and he proceeds to relate how the *Simple Story* had "transported him out of himself." "I recollect walking out to escape from one of the tenderest parts," he says, "in order to return to it again with double relish. An old crazy hand-organ was playing 'Robin Adair,' a summer shower dropped manna on my head, and slaked my feverish thirst of happiness. The heroine, Miss Milner, was at my side." Perhaps it is because a great many capricious young ladies, impatient of restraint, have been introduced to us in fiction, since then, that Miss Milner touches us less than she touched Mr. Hazlitt. But nobody now-a-days suggests of a female novelist that "it is as if Venus had written books." The reader will remember how this Venus wrote to Godwin when his wife lay yet unburied. Afterwards, we find her in a letter congratulating him when one of his plays failed, on "having produced a work which will protect you from being classed with the successful dramatists of the present day!" A Venus, certainly, with a very sharp tongue. She had a hard life up to the time when one of her little plays caught the fancy of the public, and never gave up the economical habits which she acquired then. In a black gown, which had not cost more than a few shillings (one wonders in those dear days of the war, when everything was costly, what sort of a gown this could have been, or whether the description is a mere piece of masculine ignorance), she would take her place in the finest society, they say—though, to tell the truth, we do not see much trace of it in the record—and fascinate everybody

who came near her with a "face beautiful in effect and beautiful in every feature," which is her own modest description of it. "With acknowledged talents and ready social powers to make all other women jealous," says her most recent editor, "a Bohemian who wanted nothing, but still lived in her garret with virtue on twenty shillings a week . . . affectionate in nature, without passion, wholly feminine, she was amiable and lovable in an extraordinary degree." This last statement, we think, must be taken with caution. She was not an epitome of all the virtues, but a woman of a decided temper, not used to mince matters, and calling a spade a spade. But she too has gone out of the recollection of the reader, as all but the greatest are fated to go.

Mrs. Inchbald was not the only, or even the most remarkable of the female novelists who, with little ostentation or show in society, still had their successes and enjoyed them, and would occasionally with a little state and not ungraceful pedantry, and conscious but modest greatness, present themselves in a preface, like Miss Jane Porter, to explain and illustrate their work. This lady, and her sister Anna Maria, a much more voluminous writer, both flourished in London in somewhat finer regions, appearing in suburban parties, and haunts of lettered society, and enjoying a large share of popular favour, in the beginning of the century. They spent part of their childhood in Edinburgh. When Walter Scott was a youth at college he would play with these little girls, and tell them stories, a contact sufficient to awaken the powers of fancy which lurked in them. The youngest published *Artless Tales* at twelve years old, the beginning of a long but forgotten series—all of the romantic-historical order; but none of these so struck the popular taste as *Thaddeus of Warsaw* and the *Scottish Chiefs*, the productions of her sister. These lofty romances delighted

the primitive and simple-minded public, which as yet knew nothing of *Waverley*. It is possible that with a little modernising they might still excite and charm the readers of the *Family Herald*, sated with more modern splendour and mystery. To our critical eyes now-a-days, the all-accomplished Thaddeus looks a little like a waxwork hero; but it will be hard to find in all our overabundant romances of the nineteenth century so fine a gentleman, so disinterested a lover, an individual so certain to do what was right and best in every possible combination of circumstances. Count Thaddeus Sobieski has never any questioning with himself as modern heroes use —he never has any doubt how to act in an emergency. The splendour of his exploits and the depth of his misfortunes take away our breath. When he is introduced into London drawing-rooms as a poor teacher of languages, his conduct is as sublime in his humiliation as it was princely in his prosperity. No heart of woman could resist this union of qualities; and accordingly we find his path strewn with sighing ladies of the first fashion, to whom he behaves with an exquisite grace as well as a chivalrous honour, which secure their lifelong gratitude, even when he has to repel their advances. We have, alas! no such heroes now-a-days. The race has died out: and we fear even that a paladin so magnanimous might call forth the scoffs rather than the applause of a public accustomed to interest themselves in shabby personages of real life. But in the early days of the century the English reader was simple in his tastes, and less richly provided.

"The author to her friendly readers," in a preface full of old-fashioned stateliness, describes the origin of her tale by giving an account of some events of her youth. The little curtain rises and displays to us an enthusiastic girl, in the days when war was echoing on all horizons, coming nearer, and affecting the imagination more closely

than has happened in our day—whose mind was fired with the same romantic pity and fervent sympathy for Poland and its heroes which thrilled the English heart when, not very long before, Campbell had made the shriek of Freedom when Kosciusko fell, ring into all the echoes. The great Polish general was in London, weak with wounds and downfall, when Robert Porter, the brother of the young writer, was taken to see him, introduced by a friend as "a boy emulous of seeing and following noble examples." He returned full of enthusiasm to tell every particular of the interview to the eager sisters, who could not hear enough of this wonderful hero. And they themselves in their walks had seen other pathetic sufferers, old soldiers, wan and poor, who had excited their anxious and painful sympathy. "One person," Miss Jane says, "a gaunt figure, with melancholy and bravery stamped on his emaciated features, is often present to the recollection of us all. He was clad in a threadbare blue uniform greatcoat with a black stock, a rusty old hat pulled rather over his eyes, . . . his aspect that of a perfect gentleman, and his step that of a military man. . . . We saw him constantly at one hour in the middle walk of the Mall, and always alone; never looking to the right or the left, but straight on: with an unmoving countenance and a face which told that his thoughts were those of a homeless and a hopeless man ——" Between this figure which crossed the young author's daily walks and the vision of the wounded general, and the excitement in the air, Thaddeus, the sentimental embodiment of everything that delights a girl's fancy, took his being. It was the first beginning of the historical novel properly so called; and it is Miss Jane Porter's boast that no less a follower than Sir Walter Scott "did me the honour to adopt the style or class of novel of which *Thaddeus of Warsaw* was the first—a

class which, uniting the personages and facts of real history or biography with a contriving and illustrating machinery of the imagination, formed a new species of writing in that day." Sir Walter is said with his usual generosity to have acknowledged this obligation—as he did also to Miss Edgeworth, by whose national pictures he professed to have been inspired. It would have been strange if the former lady at least, whose romantic gift was not made keen by any insight into character, had not taken him at his word.

The book, as something new, was published with great doubt and timidity, but was immediately successful, and went through edition after edition. Kosciusko sent the enthusiast who so celebrated his country a medal with his portrait, and a lock of his hair; and many tributes of gratitude and admiration came to her from other Polish heroes. She was made "a lady of the chapter of St. Joachim," she informs us, by her admirers in Germany, "and received the gold cross of the order from Wirtemburg." Another present less sentimental she received from America in the shape of "a handsome rosewood chair," which was sent to her as a memorial of high and respectful admiration for the author of "some of the purest and most imaginative productions in the wide range of English literature." In default of other acknowledgments, perhaps some of the writers of the present day would not object to similar testimonials from that great Transatlantic audience which British writers are expected to minister to, like Spenser's angels, "all for love and nothing for reward."

Sir Robert Ker Porter, the boy who visited Kosciusko, the brother of these ladies, an artist of creditable reputation in his day, travelled much and published various interesting accounts of his journeys; so that the whole family was known in literature. Crabbe Robinson

mentions some years after the "stately appearance and graceful manners" of the author of *Thaddeus*, whom he met at the house of Miss Benger, another writer of obscure miscellaneous literature, whose name has escaped even the dictionaries. "Few ladies," he says, "have been so gifted with personal attractions, and at the same time been so respectable as authors." Indeed the literary women of this period seem to have been specially distinguished by their good looks. Mary Wollstonecraft, Mrs. Inchbald, Mrs. Barbauld, were all beautiful women. And if Mrs. Opie's soft bloom did not reach this height, she was at least pretty and charming. Mrs. Opie came from the learned coterie at Norwich to add her gentle reputation to that of the other rising novelists. Her stories are on a gentler level, domestic, moral, and with a view to the improvement of the reader, and continue to be readable in their way, though no new departure like that of the historical novel begun, as has been narrated by Miss Porter, is to be traced to her.

These ladies, however, pale before the reputation of Mrs. Radcliffe, whose name everybody knows, but whose works, great as their power and effect was in their day, are less known now than their merit deserves. The *Mysteries of Udolpho* is old-fashioned, but it is fine reading for those who have leisure to trace the meanderings of the threads so carefully entangled, and to follow the most ethereal of heroines through the piled-up troubles which make her reward all the sweeter when it comes: and that reward always does come. In those days novelists had a different conception of their art from that which encourages them now to leave their readers with a handful of unfinished threads to be twisted up into the web of life at their individual pleasure. Mrs. Radcliffe gives us no problems to solve, no tales to complete; that is her business, not ours. She requires nothing of us but to

listen and look on, keeping all our wits about us, never knowing when a door may open which will contain the solution of the mystery, or a casket may be unlocked out of which the secret may fly. Her landscapes, even now, though literature has done a great deal since then in the pictorial art, are full of an elaborate and old-fashioned yet tender beauty. She is not familiar with them, nor playful, but always at the height of a romantic strain; not graphic, but refined and full of perception. There are scenes that remind us of the learned Poussin, and some that have a light in them not unworthy of Claude before he was put down from his throne by the braggart energy and rivalship of Turner—since when the modern spectator has scarcely had eyes for those serene horizons and gleaming moonlight seas. Perhaps of all others Mrs. Radcliffe's art is most like that of the gentle painter whom people call Italian Wilson. There is a ruined temple in the distance, a guitar laid against a broken column; but the lights, how mellow and soft, the skies how full of tempered radiance, the pastoral valleys unprofaned by ungracious foot—full of the light that never was on sea or shore! The great feudal castle which she builds in the midst of the dewy chestnut woods has never been equalled for mystery. We lose our way in its corridors, its winding stairs, the chambers high up in the turrets, where sometimes it is a bleeding retainer, and sometimes an injured wife, who is hidden away from curious eyes. Down below, in the vaulted passages underground, quarrels and passages of arms are rife, while in her spacious chamber the heroine listens and trembles—yet when the noises cease and her fluttered spirits are somewhat recovered, can always soothe herself by playing a plaintive air upon her lute, or by taking down one of the favourite volumes of her well-chosen library, in which she finds inexhaustible solace for all the evils of life.

It is not often now-a-days that we come across anything that approaches to the ethereal perfection of Emily, a being too delicate almost to have even the finest love made to her, and the very sight of whom tames the fiercest. The gloomy chieftain Montoni tries, indeed, to force her will, to make her consent to a hateful marriage, and to sign papers disposing of all her fortune; but not one of his bravoes says a word to her that is not pretty, and her "spirits" are never "fluttered" by unseemly wooings. Valancour, though he errs and goes astray, is always the most respectful of lovers; and the captive, whom she supposes to be Valancour, and who is brought out of his dungeon by her humble retainers on this mistaken idea, how devoted, how unpresuming is his despairing adoration! Perhaps this is a little too fine for ordinary human nature; but it must be remembered that the school of realism and the canons of probability had nothing to do with Mrs. Radcliffe's art. The chief distinction of her power to the more commonplace reader is the skill with which she manages her mysteries—leading us from step to step through dim corridors, by uncertain lights, which have a way of going out at the most thrilling moment, across deserted chambers, where curtains rustle and sliding panels open, and the supernatural is always feared yet always averted. She was a great deal too enlightened ever to have anything to say to a ghost. In those days the ancient love of superstition had faded, and the new groping after spiritual presences had not begun. There are a hundred apparitions in her pages, but they are all elaborately accounted for, and never turn out to be anything more alarming than flesh and blood. Sometimes the effect, so carefully worked up to, is a failure, as in the case of the mystery of the veiled recess in Udolpho, where our imagination refuses to accept as anything but a flagrant imposition and deception the

waxen image of death which is supposed to shock every beholder out of his wits. But as a matter of fact, no mysterious terror which is not supernatural will stand investigation even by the most skilful hands. The reader is angry at being defrauded of his alarm, and knows that he has no right to be so frightened by anything that can be explained.

The character in these books, if it can be called character at all, is of a kind as old-fashioned as the costume. It is confined to the lovely creature who is the heroine, into whom the author throws herself as if the work were an autobiography. We doubt whether perhaps it is altogether well for fiction that Emily is so unlike the modern young woman who figures in the same position now. She who was too delicate to mention to her parents the declaration of love made to her, and who modestly shrinks from the certainty that she can be indeed the object of such devoted affection, can scarcely be imagined of the same species as she who describes all her lover's kisses, and glories in his fondness. But Emily, though she may be very unhappy, never makes an exhibition of herself. Concealment, like a worm in the bud, preys on her damask cheek; her smile grows more and more pensive; her gentle abstraction more deep; but she neither defies the people about her, nor cries out to heaven and earth to know why she should be so miserable. She takes a walk instead, and admires the scenery, and pens a little poem expressive of the melancholy that fills her soul; or she retires to her room and finds consolation in touching a few notes of her lute. And with a being so patient, so sweet, so humble-minded, everything of course comes right in the end. Udolpho itself cannot bring her to any evil; and her erring lover is so touched by the sight of her that he mends on the moment, without an effort, and all is well. There is a vein of sense, too,

running through the diaphanous delicacy of this fair creature. She will not sign those papers with which Montoni is always threatening, nor be led to believe that the voice on the battlements is that of an apparition. When she finally escapes at last, her ride through the woods is almost as inspiriting as that of Mary Stuart in the *Abbot*, when she escapes from Lochleven. The picture altogether has a sort of personal attraction. There is no divided interest—everything centres in Emily; and Emily, even in the utmost flutter of her spirits, never disappoints her admirers. She is always immaculate, never too much disturbed to take down a favourite volume or pen the following verses, or be consoled by touching a few notes on the lute.

There is an old-fashioned book of travels by the same hand which one feels is exactly what Emily would have written had she set out travelling with Valancour a few years after their happy nuptials. It is the *Journal of a Tour through Holland and the Western Frontier of Germany*, made in the summer of 1794, and is,—besides much information, some still quite true and to the purpose, some showing how curiously everything has changed, —full of charming descriptive sketches. The author in her preface explains her "use of the plural term" by the fact that her journey was performed in the company of her "nearest relation and friend," a periphrasis of the homely title of husband such as the nineteenth century has scarcely leisure for. Some of her ideas are quaintly insular and *rococo*, as when she tells us that travelling Englishmen "should be induced at every step to wish that there may be as little political intercourse as possible either of friendship or curiosity between the blessings of this island and the wretchedness of the Continent," and considers that to hear "the voices of a choir on one side of the street and the noise of a billiard-table on the other"

showed "a disgusting excess of licentiousness." But if we smile at such indication of old-world sentiments, the reader will immediately find himself back again in the sweet company of the gentle Emily, when he reads such a description as the following, the only difference being that Emily would have penned at least one copy of verses, if no more, as she gazed at the wonderful scene. The travellers were hurrying home from Holland, finding the war come uncomfortably close to them; indeed, when becalmed, and lying near the Flemish shore for about three days in that condition, they found "the firing before Sluys not only audible, but terribly loud." Here is a night and morning on the Channel, the echoes of the guns scarcely died out of their ears, but England and peace before them:—

"It was most interesting to watch the progress of evening and its effects on the waters; streaks of light scattered among the dark western clouds after the sun had set, and gleaming in long reflection on the sea, while a gray obscurity was drawing over the east as the vapours rose gradually from the ocean. The air was breathless; the tall sails of the vessel were without motion, and her course upon the deep scarcely perceptible, while above the planet Jupiter burned with steady dignity, and threw a tremulous line of light on the sea, whose surface flowed in smooth waveless expanse. Three other planets appeared, and countless stars spangled the dark waters. Twilight now pervaded air and ocean, but the west was still luminous where one solemn gleam of dusky red edged the horizon from under heavy vapours.

"It was now that we first discovered some symptoms of England. The lighthouse on the South Foreland appeared like a dawning star above the margin of the sea. The vessel made little progress during the night. With the earliest dawn of the morning we were on deck, with the hope of seeing the English coast; but the mists veiled it from our view. A spectacle, however, the most grand in nature repaid us for our disappointment. The moon, bright, and nearly at her meridian, shed a strong lustre on the ocean, and gleamed between the sails upon the deck; but the dawn beginning to glimmer, contended with the light, and soon touching the waters with a cold gray tint discovered them, spreading all

around to the vast horizon. Not a sound broke upon the silence except the lulling one occasioned by the course of the vessel through the waves, and now and then the drowsy song of the pilot as he leaned on the helm, his shadowy figure just discerned, and that of a sailor pacing near the head of the ship with crossed arms and a rolling step. The captain, wrapped in a seacoat, lay asleep on the deck, wearied with the early watch. As the dawn strengthened, it discovered white sails stealing along the distance, and the flight of some sea-fowls as they uttered their slender cry, and then, dropping upon the waves, sat floating on the surface. Meanwhile the light tints in the east began to change, and the skirts of a line of clouds below to assume a hue of tawny red, which gradually became rich orange and purple. We could then perceive a long tract of the coast of France, like a dark streak of vapour hovering in the south, and were somewhat alarmed on finding ourselves within view of the French shore, while that of England was still invisible.

"The moonlight faded fast from the waters, and soon the long traces of the sun shot their lines upwards through the clouds, and into the clear sky above, and all the sea below glowed with fiery reflections for a considerable time before his disk appeared. At length he rose from the waves, looking from under clouds of purple and gold; and as he seemed to touch the water, a distant vessel passed over his disk, like a dark speck. We rose soon after, cheered by the faintly-seen coast of England."

The woman who made a minute drawing like this of all the gradations of the sunrise, though agitated by the sight of the French coast somewhat too near, and longing to see the English more plainly, was no insignificant artist. It is not like the dashing and graphic art of to-day; its touches are like those of a miniature, lingering and tender; but the sea and sky come before us as we read with a magical, soft clearness, reality and truth.

There is very little known of Mrs. Radcliffe in actual life. Her maiden name was Ward, and her husband was the proprietor of a newspaper. She was, we are told, "distinguished for her beauty," but "studiously avoided London society, and spent her time in excursions to favourite rural resorts, and in the enjoyments of her quiet home." Certainly she never appears in any of the

gossiping chronicles of the time. The *Mysteries of Udolpho* is said to have brought her £500, and *The Italian* a still larger sum; but that is about all the record that has remained of them and of her.

In the last ten years of the century, so fruitful in original work, there existed a little group of painters who have all a certain place in the literary history of their time. The gentle Sir Joshua belongs more appropriately to a previous age, but Flaxman, Fuseli, and Blake all mingled in the society of which Godwin and his wife, Holcroft, and the other members of that bourgeois circle, were members. Of these men, all so remarkable in their way, the last named is the one whose niche in literature is the most curious. He is one of the strangest figures altogether that ever appeared in any record, and the sight of him, with his rapt and gleaming eyes, among those bustling old-fashioned streets, is like a visible appearance of the wild and ghostly among the most prosaic haunts of men. Blake was the son of a London tradesman, a respectable dissenting hosier, in the neighbourhood of Golden Square, a poor man, yet a creditable parent enough, who bound his boy apprentice at fourteen to the trade of engraving, then a most popular and flourishing profession in its heyday. It is not necessary for us to follow the elaborate story of his training, and the processes by which he attained his place in art, such as it is. He was little esteemed in his own day, though divined by a few humble friends and artful connoisseurs, and lay for many years in the depths of an almost impenetrable darkness, until in our own time the world came back to him, and rediscovered beauty and meaning in the work, which is still caviare to the general. A great deal of that work even his admirers will allow to be grotesque, and much of it is entirely unintelligible—neither, we believe, will it ever commend itself to unsophisticated

and uneducated lovers of art. What is called its unconventionality and independence of rule is in reality only a conventional merit of a higher class than that usually called by the name, an art of symbol and indication discernible by the illuminated, but impossible to the ignorant. We do not believe that the merely intelligent beholder, capable of admiring beauty and loving poetry, but without any settled creed in art or foregone conclusion, would ever of his own accord find in Blake the wonderful genius and grandeur with which it is now usual to credit him. Here and there he produces something by a sort of accidental inspiration, as in the beautiful creation, full of heavenly joy and beauty, of the "Morning stars singing together," by which the most insensible must be moved. But it is unfortunate that his exponents should strain their demands so far as to require us to applaud in an equal degree all those weird outlines flung about the windy skies, all the crouching horrors and staring wild apparitions which mope and gibber in so many of his extraordinary pages. His poems are scarcely more easy to characterise than his pictures. *The Songs of Innocence* and *Songs of Experience* were both the productions of his youth, most artless, sometimes most sweet—striking accidental melodies out of the simplest words, out of an idea half suggested, a sentiment of the ineffable sort, such as an infant, new out of the unseen, might give utterance to, could it give utterance at all. The reader is struck silent by the surprise of the little verse, a sort of babble, yet divine, which is beyond all dogmas of criticism or art, and yet touches the soul with a momentary soft contact as of angels' wings: nay, it is a silly angel, one might suppose a spoiled child of heaven, petted for its tender foolishness, as sometimes a child is on earth, but yet in its way celestial. The little snatches of verses should be sung by children in fair spring landscapes, among the

new-born lambs, or under the blossoming trees, but to criticise them as literary productions is impossible; it would be a kind of offence to simplicity and innocence. Sometimes, indeed, there strikes in suddenly a stronger note, as, when after all that ethereal babble of lambs, and flowers, and little children, the dreamer, in his bewildered Arcadia, suddenly dreams of a Tiger—and running off in his wonder into a few wild glowing stanzas, asks suddenly, *Did He who made the lamb make thee?*

This strange visionary was one of the company who met at Johnson's the publisher, in St. Paul's Churchyard, at the afternoon dinners, homely and simple, where that good man assembled the authors whom he admired, and patronised, and controlled, with something of that half worship and half contempt which is the benign bookseller's most characteristic mood. Mary Wollstonecraft, in her pensive beauty, before she had ever left England, or stepped into any of the complications of her career, was the only woman of whose presence we are informed on these occasions, and Blake was employed to illustrate some of the children's books by which she then managed to live. A story is told of his interference to save Tom Paine from the consequences of one of his political indiscretions, in which the artist seems to have shown himself the most far-sighted of the company. It was at the moment when that unattractive revolutionary had been invited to France, but, in the meantime, he had been pouring forth sedition at a public meeting, of which he gave a flaming account to the company at Johnson's table next day. They were all republicans and sympathisers with France, though varying in their inclination to commit themselves; and all with an alarmed (and, as it seems to us, exaggerated) terror of the Government, and what it was likely to do. Blake, it is said, listened to Paine's brag with a certainty that steps

would be taken at once against him. When he rose to leave, Blake laid his hand on the orator's shoulder, saying, "You must not go home, or you are a dead man!" and hurried him off on his way to France. By the time Paine was at Dover, the officers were in his house, so that the champion of the Rights of Man escaped at least a temporary eclipse, if no more (though in those days they thought of nothing less than hanging), through the means of the mild and visionary dreamer. Blake was himself a great revolutionist in his innocent way, wearing the *bonnet rouge* about the streets as no one else ventured to do.

His first publication, if publication it can be called, is a strange little romantic episode in literary history. He did not know how to bring out his *Songs of Innocence*. The painter-mind has always odd little follies peculiar to itself, and to a man so used to employ his own hands and art, it would no doubt appear more natural to produce copies of his poems by transcription than to have them printed, which he seems never to have attempted. After much consideration and prayer, and conference with the unseen, he at last decided upon this extraordinary method.

"Mrs. Blake went out with half-a-crown, all the money they had in the world, and of that laid out one shilling and tenpence on the simple materials necessary for setting in practice the new revelation. This method, to which Blake consistently adhered for multiplying his works, was quite an original one. It consisted in a species of engraving in relief—both words and designs. The verse was written and the designs and marginal embellishments outlined on the copper, with an impervious liquid—probably the ordinary stopping-out varnish of engravers. Then the white parts of lights, the remainder of the plate that is, were eaten away with aquafortis or other acid, so that the outline of letter and design was left prominent as in stereotype. From these plates he printed off in any tint—yellow, brown, blue—required to be the prevailing or ground colour in his facsimiles; red he used for the letterpress. The page was then coloured up by hand, in imitation of the original

drawing, with more or less variety of colour in the local lines. He taught Mrs. Blake to take off the impressions with care and delicacy, which such plates signally needed, and also to help in tinting from his drawings."

In this strange way was produced the series of little books, now worth almost their weight in gold to the collector, each page of which was a separate work of art. These pages are very small, worded with firm, small writing, in a framework of wild design, with little illustrations intermixed—at once an etching, a frame, and a picture. In the sweet little quaint poem, perhaps the best known of any, called *The Lamb*, we have a child caressing a lamb at a cottage door, a flock visible under the shadow of a tree, and a fanciful framework of half-developed spring branches, in a space of five inches long. Thus, every page was a picture, with its little rhyme set in the middle. Nothing could be more characteristic of the primitive artist-mind. We confess, but for the wonder and quaintness of them, that we do not always see the beauty of these strange pages—and, no doubt, if he had not preferred this fanciful primitive way, he could have got his *Songs* published easily enough. But the strange little book, bound by the wife, who was Blake's docile pupil and seconder in all things, is naturally far more precious now than any printed book; and is, in itself, a touching evidence at once of the simplicity and practical straightforward impulse of the true artist. He could do it himself: why not do it? What so appropriate, what so easy, as those tools which lay nearest to his hand?

Blake produced a great many books in the same way—for the most part merely wild ravings, of which the sober-minded reader will make neither head nor tail, allegories of earth and air, of Europe and America, with every kind of rambling mystic horror and wonder brought

in. The book of *Thol*, *The Gates of Paradise*, *Jerusalem*, and a number more—books of prophecy he called them, and they are wild as the dreams of any crazed spirit trembling on the verge of madness. It is a great question among all the critics whether Blake was mad; certainly in many of his letters there is great room for the doubt; but of one thing there can be no question, that he was an early disciple of the strange system called among us Spiritualism or Spiritism—and before mediums or *séances*, dark or light, had been thought of, believed himself to be attended by all the phenomena which of late have caused so much discussion. What were the means of communication in which he believed is not told, but it is evident that he had an entire belief in the guidance and inspiration of spiritual beings, sometimes dead members of his own family, sometimes others, as the following solemn words will prove:—

"I am not ashamed, afraid, or averse," he says, "to tell you what you ought to be told—that I am under the direction of messengers from heaven daily and nightly. . . . I never obtrude such things on others unless questioned, and then I never disguise the truth. But if we fear to do the dictates of our angels, and tremble at the tasks set before us: if we refuse to do spiritual acts because of natural fears or natural desires—who can describe the dismal torments of such a state? I too well remember the threats I heard, 'If you who are organised by Divine Providence for spiritual communion, refuse, and bury your talent in the earth, even if you should want natural bread—sorrow and desperation pursue you through life, and after death, shame and confusion of face to eternity. Every one in eternity will leave you, aghast at the man who was covered with glory and honour by his brethren, and betrayed their cause to their enemies.'"

These reproaches of his spiritual friends, and the struggle which he thus explains, arose in consequence of the attempt made during a three years' residence in the country to fix Blake down to ordinary work, engraving other people's sketches, painting portraits, and pursuing

other commonplace occupations, for daily bread. He had been introduced to Hayley, the biographer of Cowper, a kind and friendly man, if a sentimental and somewhat mawkish poetaster, with the view of illustrating that writer's works and making money for himself; and with this purpose had taken a little rustic cottage at Felpham, near his patron, with which he was delighted for a time. But when Blake found that his time was to be fully occupied with task work, and his own wild original power of production limited and discouraged, his opinion changed, and the struggle arose which he has here described. He left Felpham in three years, renouncing the attempt to make money, and recurred to his original compositions and to a very precarious and limited livelihood. "I am again emerged into the light of day," he cries after his emancipation. "I have conquered, and shall go on conquering. Nothing can withstand the fury of my course among the stars of God and in the abysses of the accuser." This is wild enough in all conscience. A little later he speaks of the composition of "a sublime allegory which is now perfectly completed into a great poem. I may praise it since I dare not attempt to be other than the secretary; the authors are in eternity. I consider it the grandest poem this world contains." Whether this was the *Jerusalem: the Emanation of the Giant Albion,* we are not exactly informed; but as it is the first "prophetic" work which follows this announcement, it is to be supposed this is what he means. Such language has been heard since from believers in the fantastic system which draws its tenets from the teachings of a piece of furniture. There is no tangible medium of communication mentioned in Blake's descriptions, but the disciples of this faith write as he did, utterances of which they do not claim to be more than the secretary, and of which they sometimes assert that they are great poems. His is

a curious antedating of a mystery which is often very vulgar, and often very foolish, but which cannot be quite accounted for either by mere imposture or credulity. There was no imposture in Blake, and it is strange to find in him the phraseology which was utterly strange to his time, but has come to be a comparatively well-known jargon now. The great poem is the wildest rhapsody that can be conceived. But his early songs last, and will continue to do so: even they cannot be said to be appreciated by the uninitiated. They are little known and little likely to be known: but in their ineffable artlessness they are unlike anything else of the time, or perhaps it might be safe to say, of the language, in which he remains a unique figure, unapproachable and alone.

To return more closely to the city circle, which we have, for the advantage of classification, allowed ourselves, with Southey and *Blackwood*, to call the Cockney School, we come to William Hazlitt, who has already been mentioned on various occasions, and who occupied a considerable place among his contemporaries, though none of his works were of a kind to live. He was not a poet or a philosopher, but a literary man in the closest sense of the word, impelled by circumstances and a vehement and lively intelligence to do such work as he was capable of in this fashion, rather than constrained by a higher necessity to utter what was in him for the advantage of men. It never has been proved, nor can it be proved, according to our belief, that to write for bread is bad for real genius, especially of the creative kind: but to write for bread when you have no message to deliver, no definite burden of prophecy, no story to tell, is a different matter. It is in these circumstances that literature is a dangerous profession. In most cases the professional writer has some gift besides, which buoys him up above the common merchandise of buying and selling. But Hazlitt had no

philosophy and no story; he was an essayist, a critic, a commentator upon other men's works and ways, rather than an original performer. There is nothing in literature so difficult as this branch of the profession, which tempts the unwary with its seeming ease. How far it benefits genius, to be trained and polished by all the appliances of learning, is still a moot point; but there can be no question that culture is the first essential to the literary man who does not possess genius, but only a talent for expressing himself, and the power of seeing intellectual subjects from a critical point of view. In his case the proverb does not tell, which declares that a poet must be born and not made—for he is not a poet, and his chances of commanding anything more than a present audience depend upon his thorough cultivation and knowledge. Hazlitt did not possess these qualities, and his books are already as old as if they had been written a thousand years ago, instead of half a hundred. He was, like Godwin, the son of a dissenting minister, inheriting the intellectual activities and natural political bias of the class along with its nervous sense of social slight and injustice.

"Hazlitt," says De Quincey, always depreciatory, "smiled upon no man, nor exchanged tokens of fame with the nearest of fraternities. . . . His inveterate misanthropy was constitutional,—exasperated it certainly had been by accidents of life, by disappointments, by mortifications, by insults, and still more, by having wilfully placed himself in collision, from the first, with all the interests that were in the sunshine of this world, and with all the persons that were then powerful in England. But my impression was . . . that no change of position or of fortune could have brought Hazlitt into reconciliation with the fashion of this world, or of this England, or of this *now*. A friend of his it was, a friend wishing to love him, and admiring him almost to extravagance, who told me, in illustration of the dark sinister gloom which sat for ever on Hazlitt's countenance and gestures, that involuntarily when Hazlitt put his hand within his waistcoat (as a mere unconscious trick of habit) he himself felt a sudden recoil of fear as from one who was searching for a hidden dagger."

Talfourd describes the gloomy essayist as "slouching in from the theatre" to Lamb's cheerful parties, "his stubborn anger for Napoleon's defeat at Waterloo" somewhat "softened by Miss Stephens' angelic notes." On this point he was at variance, not only with the authorities, but with all patriotic and enlightened opinion, and characteristically resented the disagreement in which he found himself, even with the entire band of the French sympathisers, who were otherwise his brethren, but who held Bonaparte as a sort of Antichrist.

The temper of the man, and the almost ludicrous length to which political sentiment was carried, could scarcely be better shown than in the remarks of this sharp-tongued and unwary critic upon Coleridge when floating about in the chaos of London, in the unhappy years which preceded his final settlement at Highgate. Hazlitt, the reader will remember, furnished us with one of the most delightful pictures we have of Coleridge at Nether-Stowey, and Wordsworth at Alfoxden, in those days of early inspiration, when on "Quantock's airy ridge" they planned and pondered that conquest of the world, which they indeed accomplished, but not as they thought. "What has become of that mighty heap of thought, of learning, of humanity?" Hazlitt asks, when, far from the downs and the sea, and the hopes of youth, he finds the philosophic poet amid the dreary monotonies of town, "it has ended in swallowing doses of oblivion, and writing paragraphs for the newspapers." And the keen political sectary goes on to find a reason for this decadence, with the semi-fictitious passion which was characteristic of him. It is because "Liberty, the philosopher's and the poet's bride, had fallen a victim to the murderous practices of the hag legitimacy" that the mighty had thus fallen. "Proscribed by court hirelings, too romantic for the herd of vulgar politicians, our enthu-

siast stood at bay, and at last turned on the pivot of a subtle casuistry to the *unclean side;* but his discursive reason would not let him trammel himself into a poet-laureate or a stamp collector," says the envious and bitter critic. Southey, the excellent, the kind, enjoyed one of these wealthy offices; and Wordsworth, self-absorbed as one of his own mountains, maintained his independence with the aid of the other; but Coleridge, incapable of any conditions, even that of furnishing birthday odes, "sank into torpid uneasy repose, tantalised by useless resources, haunted by vain imaginings, his lips idly moving, but his heart for ever still." "Such," Hazlitt cries shrilly, "is the fate of genius in an age when, in the unequal contest with sovereign wrong, every man is ground to powder who is not either a born slave, or who does not willingly and at once offer up the yearnings of humanity and the dictates of reason as a welcome sacrifice to besotted prejudice and loathsome power!" The only comment we can offer after such a peroration is that of Mr. Burchell—"Fudge!" The author of *Fire, Famine, and Slaughter,* the most fierce and powerful of political assaults, was wont to boast that it was he who had raised the circulation of the *Morning Post,* the paper in which that wonderful eclogue appeared, from an almost nominal rate to a large and profitable sale—an assertion of course denied by the editor of the paper, who attributed the increase to other causes, but yet showing how futile was this tattle about sovereign wrong or offerings of reason and humanity to loathsome power. Such was, however, the nature of the critic and the fashion of the time.

Hazlitt, however, had the gift of a brilliant style, and a great deal of incisive and irritable force, though the saucy critic of to-day would call his writing "tall," and pull his showy sentences to pieces; and he maintained a distinct place in the literature of his time, though few

people recollect much about him now-a-days. He was a born magazine writer, with much of that sparkle and petulant force which tells at the moment, and a ready power of response to any call, a "Contributor" of a valuable kind. Such a writer, with no independent gift of production, must lay his account with oblivion. But Hazlitt in his own person must, one cannot but think, have been more impressive and interesting than in print, for, in the beginning of the two volumes which his grandson has dedicated to his memory, there are various laudatory paragraphs, testimonials, so to speak, to his merit, which rank him much more highly. "I should belie my own conscience," says Charles Lamb, "if I said less than that I think W. H. to be, in his natural and healthy state, one of the wisest and finest spirits breathing. . . . I think I shall go to my grave without finding, or expecting to find, such another companion." Higher praise than this no man could have, and when we add his biographer's simple estimate of his titles to immortality as an "Edinburgh Reviewer, London Magazine man, a person of letters who was thought big enough game, both in London and Edinburgh, for Mr. Gifford's and Mr. Blackwood's longest shot," we feel that we have said all for Hazlitt which it is necessary to say. To have been held up to public admiration by Christopher North, as a leading member of the Cockney School, was something; and notwithstanding his real literary power, a Cockney of letters he assuredly was, subjecting all things to the standard of a narrow circle, always defiant in his own person, and in angry resistance to all the larger influences, against which his arrogant independence and self-esteem revolted.

In his personal history we find some curious circumstances. He took a step which we do not remember to have heard of as resorted to by any man of character,

before or since; being an Englishman, with no connection whatever with Scotland, he took advantage of the Scotch law of divorce to shake himself free of a wife who did not suit him. It is true that the lady was of the same mind, and very willing to aid in the strange operation, which was carried out accordingly. His motive was to be able to marry a young woman, the daughter of the house in which he lodged, who had roused him in middle age into all the fervour of an early passion. Whether she was aware of the strong step taken by her elderly lover to open a way for her we are not told, but when he rushed back to London, a free man, to marry her, the girl put him off and played with him, and was finally discovered to be on much more affectionate terms with another lover. His fury and passion, and the letters which passed between the pair, and the terrible disappointment of his hopes, he put, red-hot with love and rage, into a book which he called the *Liber Amoris.* Such an exhibition never could be met with anything but laughter, and it has left a shade of permanent ridicule upon this fierce figure, once so active and loud, now so little known. At a later period he managed to marry another more soft-hearted woman; but any marriage must, we should suppose, have been of doubtful legality in the circumstances. The whole story is that of one who was anything but a happy man. He began his life with a very dry and lifeless exposition of philosophy *On the Principles of Human Action;* but all his other contributions to literature, except a *Life of Napoleon,* consisted of essays and criticism. His sketches of his contemporaries retain the interest which the work of an eye-witness always must have, but there is little that is profound or original in his criticism, much of which was spoken in the form of lectures before it found its way into print

Of the same class, though with qualities so much more attractive that his memory is still fresh and pleasant to many readers, is Leigh Hunt, who, with the same imperfect education and want of literary training, but with a spark of genius which makes up for many deficiencies, became a member of the same lively literary circle of newspaper and magazine writers, which more or less embraced all the names that have come before us. It is a curious proof of the difference that this little spark of genius makes, to contrast the productions of these two men, both of whom have produced a mass of miscellaneous comment on every subject under heaven, hundreds and thousands of pages which served to occupy and amuse, if not to instruct, the readers of their day, just as so many of ourselves do—with an amount of workmanlike skill which earns its daily recompense very honestly so long as it has no pretension to do more, but which is altogether inadequate to build a lasting literary reputation upon. Leigh Hunt, like Hazlitt, wrote largely in newspapers, in magazines, and reviews, and collected these writings into volumes which exist and are laid up on dusty shelves where nobody thinks of disturbing them. But Leigh Hunt did what Hazlitt could not do. There came out of his heart at least two exquisite little poems, which, to apply our favourite test, would, if all he ever wrote was swept away by some conflagration, linger in individual memories for generations, and flutter down orally through the mist of years, indestructible and sacred. One of these scraps of verse is the exquisite little fable called *Abou Ben Adhem:* the other, Lines addressed "To T. L. H., six years old, during a sickness." The former is so brief that, well known though it be, we may quote it once more as Leigh Hunt's "title to the skies" of poetical remembrance and fame:—

"Abou Ben Adhem—may his tribe increase—
Awoke one night from a deep dream of peace,
And saw within the moonlight in his room,
Making it rich and like a lily in bloom,
An angel writing in a book of gold ;
Exceeding fear had made Ben Adhem bold,
And to the presence in the room he said,
'What writest thou ?' The vision raised his head
And, with a look made of all sweet accord,
Answered, 'The names of those who love the Lord.'
'And is mine one ?' said Adhem. 'Nay, not so,'
Replied the angel. Abou spoke more low,
But cheerily still, and said, 'I pray thee, then,
Write me as one that loves his fellowmen,'
The angel wrote and vanished. The next night
He came again with a great wakening light,
And showed the names whom love of God had blest,
And, lo ! Ben Adhem's name led all the rest."

He who has left one such jewel as this has a claim upon his race surpassing that of the most excellent writing, the best criticism, the highest popular skill and adroitness in contemporary history. It is, indeed, the only claim that Time acknowledges short of actual creation or discovery. The clever writer who has in him, besides his writing and his cleverness, the something indefinable, unpurchasable, not to be manufactured or inherited, which can produce this little bit of verse, has a certain place secured to him for ever in the records of his language. But without this, vague miscellaneous writing, however clever, is nothing more than a profession, which earns its wages according to its quality, and has no right to expect any more.

Leigh Hunt wrote in innumerable papers; some of these—for instance, the *Examiner*, which still exists after many changes—retain a sort of prejudice in their favour from this time, a vague idea of some literary grace and excellence superior to the ordinary, though it is long since all connection was severed between them and the original

from which this prejudice came. And his stray articles and essays would fill—do fill—more volumes than it is easy to number. He was also the victim, in a more actual sense than Holcroft, Horne Tooke, and their companions, of a political persecution. Of that "sanguinary plot against the liberties of Englishmen," as Godwin calls it, which did these gentlemen so little harm, it is difficult to form any serious judgment now through all the heroics of the defendants, and in face of the fact that it came to nothing. Leigh Hunt's, however, was no sedition but a libel against the Prince Regent, the "Adonis of fifty," who had so offended the Liberal party in his time by that invariable and historical expedient of Heirs Apparent, the change of politics which follows a change of position from expectancy to power, that no mercy was shown him. Few people now-a-days will strike a blow for George the Fourth, but the man who calls the head of a State Sardanapalus, and describes him as "a violator of his word, a libertine over head and ears in disgrace, a despiser of domestic ties, the companion of gamblers and demireps," could scarcely expect, in an age of political excitement and arbitrary proceedings, to do so without remark. The printer and writer of the article were tried for libel, and sentenced to be imprisoned for two years, and pay a fine of five hundred pounds each. Leigh Hunt informs us that it was notified to them that "if we would abstain in future from commenting upon the actions of the royal personage" both penalties might be remitted; but this neither he nor his brother chose to do—and there is no doubt that he made a great deal of literary capital out of his imprisonment. His description of it, and the means he took to make it pleasant, is very characteristic of the man, and sets at once before us the sentimentalities and prettinesses which he brought into a sort of fashion. His room in prison was "papered with a trellis of roses, the

ceiling coloured with clouds and sky, the barred windows I screened with Venetian blinds; and when my bookcases were set up with their busts, and flowers and a pianoforte made their appearance, perhaps there was not a handsomer room on that side of the water." He was permitted to have his family with him in this Bower of Bliss, and the satisfaction of beholding the surprise and delight of every new visitor at the transformation he had effected must have gone a long way to undo the pains of the confinement. Amateurs of decorative art in the present day will shudder at Leigh Hunt's skyey ceiling and trellis of roses; but he thought it very fine, and got true enjoyment out of his sentimental prison.

Leigh Hunt lived a long life, and wrote an interminable amount of prose, such as the world very willingly lets die. He produced a poem, the *Legend of Rimini*, a soft and novelistic version of the stern tale of *Paolo and Francesca*, in which critics were accustomed to say there are some "exquisite lines"—but the public has never cared very much for this poem. And a great deal of pretty writing came from Leigh Hunt—genial babble of green fields, pleasant enumeration of pleasant landscapes, and that kind patronage of nature which is so easy to a fluent pen, and carries with it a suggestion of delicate morality and a fine mind. At a later period he went to Italy on the invitation of Lord Byron and to join him—with the idea of setting up "a Liberal periodical publication" in conjunction with Byron and Shelley—a most curious project, which naturally came to nothing. We shall be obliged to return to this subject in our remarks upon the two great poets, at whose melancholy and prematurely ended lives we have now almost arrived.

Another most gentle and friendly figure which links itself on to this group, in the beginning of the century, by means of the Lambs, is Cary, the translator of Dante, he

who had begun his poetical career under the wing of the Swan of Lichfield, and exchanged poetical complaints in that old-world coterie. Cary was as unlike as it is possible to conceive to the half-educated and restless writers above mentioned. He was a scholar born, and a wide and unwearied reader, keeping journals which are little more from beginning tc end than a list of books carefully mastered and annotated, a student whose library was his workshop, his field of action, the centre of his life. From his childhood he had exercised himself in the work of translation. "When he was only eight years old," we are informed, "I have heard him say pleasantly, laughing at his own precocious taste for translating and blank verse, that at that age he rendered a considerable portion of the first book of the Odyssey into his childish prose, and, having done so, cut it into lengths of ten syllables each, which he then wrote out under the persuasion that it was poetry." When he was a boy at Rugby, in a more advanced stage, he agreed with two of his friends "to attempt a metrical translation of the chief Greek poets." Thus the child was father to the man. His University career seems to have passed tranquilly without any special distinction, and he entered the Church in accordance with his father's wishes in due time, and was in 1797, when all the new poets and writers of the undeveloped age were at their fullest activity, the vicar of Abbots Bromley, newly married, and in the enjoyment of that perfect tranquillity and happiness which seem nowhere more likely to be attained than in a parsonage. Here he began, with a pleasant irregularity, by the *Purgatorio*, his great work. But it was not till 1805, when he had changed to another living, and was surrounded by children, that the first volume of the translation, beginning, as was necessary, with the Inferno, was published. It is amusing to find that it did not at all please Miss Seward, the "dear

mistress," whose strictures he listened to with affectionate patience, and who neither liked the original nor the translation. There is a proof of a certain superficial growth at least of culture and knowledge among us in the present day, in the frankness with which the people of that time expressed their opinions upon subjects which are now sacred from irreverent remark. Miss Seward frankly did not like Dante, and owned it. A "Muse" of society occupying her position now-a-days might be of the same mind, but would not venture to confess as much. And she found Cary's translation to be defaced by obscurity and vulgarisms of language, which she set forth in a long, very long, letter, full of verbal criticism, though without convincing the author. But either the world was of Miss Seward's opinion concerning Dante, or, as is more probable, knew nothing about that great poet, and the translation fell dead and was no more heard of. The happy chance by which it was introduced to general notice and the light of day affords one of the prettiest of literary anecdotes. Cary had suffered great domestic griefs, which shook his being to its very depths, and, in the summer of 1817, was at the seaside at Littlehampton, sadly healing from one of those great wounds, and teaching his eldest boy, by way of occupation for his languid life. It is this boy, his biographer in after years, who tells the story.

"After a morning of toil over Greek or Latin composition, it was our custom to walk on the sands and read Homer aloud, a practice adopted partly for the sake of the sea-breezes, and not a little, I believe, in order that the pupil might learn to read *ore rotundo*, having to raise his voice above the noise of the sea that was breaking at our feet. For several consecutive days Coleridge crossed us in our walk. The sound of the Greek, and especially the expressive countenance of the tutor, attracted his notice; so one day, as we met, he placed himself directly in my father's way, and thus accosted him: 'Sir, yours is a face I *should* know. I am Samuel Taylor Coleridge.' His person was not unknown to my father, who had already pointed him out to me as the great genius of our age

and country. Our volume of Homer was shut up; but, as it was ever Coleridge's custom to speak—it could not be called talking or conversing—on the subject that first offered itself, whatever it might be, the deep mysteries of the blind bard engaged our attention during the remainder of a long walk. I was too young at the time to carry away with me any but a very vague impression of his wondrous speech. All that I remember is, that I felt as one from whose eyes the scales were just removed, who could discuss and enjoy the light, but had not strength of vision to bear its fulness. . . . The close of our walk found Coleridge at our family dinner-table. Among other topics of conversation, Dante's 'divine' poem was mentioned. Coleridge had never heard of my father's translation, but took a copy home with him that night. On the following day, when the two friends (for so they may from their first day of meeting be called) met for the purpose of taking their daily stroll, Coleridge was able to recite whole pages of the version of Dante, and though he had not the original with him, repeated passages of that also, and commented on the translation. Before leaving Littlehampton, he expressed his determination to bring the version of Dante into public notice; and this, more than any other single person, he had the means of doing in his course of lectures delivered in London during the winter months."

It is pleasant to find that much as Coleridge was in the habit of forgetting his promises and engagements, he did not forget this. On the margin of his notes for one of his lectures stands the memorandum, "Here to speak of Mr. Cary's translation:" and he did so speak of it that "the work, which had been published four years, but had remained in utter obscurity, was at once eagerly sought for. About a thousand copies of the first edition that remained on hand were immediately disposed of, and in less than three months a new edition was called for," while, to crown all, both the *Edinburgh* and *Quarterly Reviews* re-echoed the praises that had been sounded by Coleridge, and henceforth the claims of the translator of Dante to literary distinction were universally admitted. Before this, Cary, joining in the universal verdict, had announced to his brother-in-law his meeting with Coleridge as "the most extraordinary man I ever met with."

It is pleasant, amid the accounts already quoted and those given by De Quincey and others of the chaotic character of the poet's lectures, to find so delightful an incident connected with them.

The work thus recommended to the world has kept its place ever since as the standard translation of Dante. Others may have greater literary excellence, but its faithfulness and completeness, and the, on the whole, dignified and sufficient manner in which the work is executed, give it a lasting value which no other translation has attained. Cary was guilty of many pipings of original song besides, which did not meet with such approval. We have already quoted the tender and sympathetic verses addressed to Lamb, who had found in the learned and gentle clergyman a congenial spirit. In the latter portion of his life Cary quitted the parsonage, over which the death of several children had thrown a lasting gloom, and received an appointment which exactly suited him in the British Museum. This brought him into the circle of literature in London, but not to its high places or among its fashionable votaries. He lived in Bloomsbury, as simply and as gravely as he had lived in the country; devoted to his books, and spending all his days in the great library which it was a happiness to him to watch over and care for; writing occasional magazine articles like the rest, and sending forth other essays in translation, among which was a version of the "Birds" of Aristophanes. But after ten years' enjoyment of this modest post, Cary's mind was disturbed and his position altered by the sudden elevation over him of the late well-known and celebrated Antonio Panizzi. Everybody is agreed now-a-days that a more admirable appointment than that of Panizzi could not have been made; but it is curious to see, looking back, the hard case of the good Cary, who, whatever his business qualifications may have been, was a devoted lover of books.

and the most creditable of public servants. The promotion of his subordinate, however, was more than his gentle temper could bear, and he addressed a spirited protest to the Lord Chancellor; but he had no success in his effort to undo the decision, and accordingly resigned his appointment after ten years' service. The loss, however, was not one that affected him vitally, and a few years later a pension was granted to him. He used the leisure thus forced upon him in miscellaneous literary work, and edited, among other things, a series of English poets—which, by the way, is a thing which almost every notable writer of the period seems to have done. What has become of all these series, specimens, extracts, new editions, one after the other, it is impossible to tell. But there was scarcely a bookseller or unoccupied author who did not plunge into some undertaking of the kind.

Cary died peacefully as late as 1844, in a gentle old age, consoled by the love and attention of his son. He seems to have had no special place in society, being always retiring and shy; but the Lambs, after their retirement, when Temple Lane was a thing of the past and they had gone into their suburban exile, came once a month to dine with him in Bloomsbury, a little festival which was looked forward to with pleasure on both sides. "We were talking of roast *shoulder* of mutton with onion sauce; but I scorn to prescribe to the hospitalities of mine host," is Lamb's playful suggestion in reference to one of these friendly dinners. Cary was brought in contact with other members of the craft at the "Magazine dinners," given generally by the publishers, which kept the contributors to the *London Magazine* together. At one of them a rustic author made his appearance whom we may note in passing, a gentle poet, for whom something friendly was done by the lovers of literature of the time, but who was not great, and had it not in him to

attain any height. Among the gentlemen, he was a little out of place, and did not know what to do with himself. "The most interesting of the party was the poet Clare. He was dressed in a labourer's holiday suit. The punsters evidently alarmed him, but he listened with the deepest attention to his host" (who was Cary himself, the dinner being for some forgotten reason at his house). It required something beyond the range of a rustic versifier to make out what all the wits were after—Lamb, with his rolling stammer, skilfully exercised to the advantage of his genius, and all the younger talkers used to the quick exchanges of skilful conversation.

The mention of the *London Magazine*, to which this school of writers was attached, and in which the *Essays of Elia* appeared, brings before us a brief but curious romance of literature, the tragic episode of which John Scott, the editor of that publication, was the hero. It is difficult to find any distinct record of this writer and his fate, though there are innumerable allusions to him in the literary memoirs of his day. His writings have not been collected or preserved save in the pages of his *Magazine*, but nothing can be higher than the testimony borne to his qualities by his friends and literary coadjutors. "He was," says Sergeant Talfourd, "a writer of remarkable candour, elegance, and discrimination," and his power of managing the staff of contributors, which included so headstrong and petulant a member as Hazlitt, and one so eccentric and uncertain as De Quincey, was marvellous. Talfourd invests his unfortunate end with an almost ludicrous mystery. "In a luckless hour," he says, "instead of opposing the little personalities of Blackwood by the exhibition of a serene power, he rushed with spurious chivalry into a personal contest, caught up the weapons he had himself denounced, and sought to unmask his opponents, and draw them beyond the pale of

literary courtesy . . . and at last met his death almost by lamentable accident in the uncertain glimmer of moonlight, from the hand of one who went out resolved not tc harm him." This melodramatic picture was not needed to turn into a painful horror the ridicule which had hitherto attended literary duels, such as the intended encounter, for instance, between little Moore and little Jeffrey, of which (especially as it never came to anything) it was impossible to think without a laugh. In the present case the contest of sharp words ended in real bloodshed, and the laugh is quenched in horror, mingled with a painful sense of entire incongruity. The lively dinners round the publisher's table, where Lamb punned and Hazlitt raved, and gentle Mr. Cary had his learned little joke, on one hand,—and the wilder mirth of Ambrose's parlour, where Christopher North flashed forth the light of his genius, and the Shepherd talked the divinest of nonsense, on the other,—came thus into contact for a moment with a sharp and stern touch of wrong-headed reality, incongruous human passion, out of place and out of date, half bathos, but altogether tragedy, which it is most painful to contemplate. This incident leaves a scar across the peaceful story. It is, fortunately, the only accident of this kind which we are called upon to record.

The society in London, which we have thus attempted to set before the reader, had nothing to do with the great world. If they touched occasionally upon the outskirts of that fairer sphere, their lives were entirely spent in a different atmosphere, in dingy houses and small rooms, in streets populous and noisy, or lost in the dulness of a homely suburb. The Polygon, Somers Town, the small streets about Holborn, the Temple, a more dignified title: where the air was not so heavy as it is now-a-days in the most elegant regions, and where there was little talk of fog: but where everything was Town, and the atmosphere

had all the bustle and the limitations of the streets. Little notes conveyed by hand, droppings in on this and that acquaintance, quick response of communication at all times, and a murmur of perpetual talks, rustle through this limited world. They are spectators, in minutest detail, of each other's existence, but the larger stream of life does not touch them. There is no coming and going of imperial interests, not even any greatness of passing strangers, or influences out of literature, the action, always so much needed among professional persons, of the ordinary world. This great advantage, which is shared by so many people in the higher classes, who are quite unable to profit by it, was unknown to this world underground. Hence the justice of the injurious title of the Cockney School, and hence much of the narrowness and petty personality of men whose views were large enough. The largeness of their views, passing all bounds of the practical, was indeed due to the same limitation which contracted their lives. They knew at once too little and too much for the *rôle* they assumed—too much of books and too little of men. To all fine spirits shut up in a petty world, the capabilities of nature, if once emancipated from its bounds, are far more like to become the objects of passionate belief than is possible with those who, seeing all varieties of mankind pass before their eyes, learn the limits of hope, and get somehow to understand how little is likely to be accomplished. The little circle of *bourgeois* writers turning round and round in its own orbit, changing its combinations chiefly by means of personal quarrels and controversies, made little progress, though it believed in so much. It missed its full development because it was thus cabined and confined.

Nevertheless, there are other names which bring us westward into the more open air of the great world, where everything is more spacious, more free, more varied.

Leigh Hunt was a friend of Byron, of Shelley, and the younger group of poets. These names lead us, though ever so slightly, to the wider region, even when they themselves can scarcely be said to belong to it. Mackintosh, who had written his *Vindiciæ Gallicæ* in his young days, to change into views much more moderate as maturity and all its mixed motives came, linked them with public life and a philosophy less ideal and impossible than that of Godwin. Hazlitt lived next door to Jeremy Bentham. Thus the one sphere touched the other in which, after a different fashion, with more space and less concentration, life and thought, imagination and reason, satire and fancy, were being as fully exercised in a different way.

It is perhaps scarcely just to add to the end of this humble circle the name of a poet never attaining the first rank, yet reaching a gentle eminence on which his name, more than his work, perhaps, is still fully known—Bryan Waller Procter, more universally known in his lifetime as Barry Cornwall: but it is difficult to allot him his place elsewhere. His name involves that of Basil Montagu, whose stepdaughter he married, and to whose circle he belonged. This gentleman, the early patron and friend of many men of letters, holds a sort of middle position between the *bourgeois* circle and the finer groups of society. He was a man of fine literary taste, who loved to gather about him such members of the literary profession as came within his reach, and who, beginning with Godwin and his peers, kept up for a long time the friendly tradition, and encouraged young authors and courted old ones, as has always been the custom with those better-off people who, without the faculty or impulse of writing themselves, have yet a fondness for the society of those who exercise that craft, and love to hold on by the skirts of literature. The hospitable house of Basil

Montagu has been hardly and ungratefully used in recent days; but every such circle is liable to be so treated when it has been subject to the inspection of critical eyes, without the glamour of gratitude or kindness in them. Mæcenas becomes easily ridiculous, and no doubt there were men in Rome who thought little of that patron of the arts, considered him to be seeking but his own glory in drawing the wits about him, and called his company a menagerie, and Horace no better than a parasite. It is needless to say to the reader who it is that has done this, or to excuse the heedless words, never intended to go out of his own study, of Thomas Carlyle. The truth would seem to have lain, as usual, between the two statements: that Montagu, himself a dabbler in literature, loved its professors, yet liked at the same time to find himself at the head of a band all more or less known, about whom he was as likely to make mistakes as others of his contemporaries were, nor less or more, but for the excellence of all of whom he was ready to go to the stake—is true enough. And some were ungrateful, but some devoted to his kindly service. It was a home in which many young men were received with kindness, and notably the raw young Scotsman with Annandale strong about him, its very earth upon his shoes, who tried so hard in his early[1] letters to screw himself up to a pitch of seemly admiration, but in his old age had long forgotten that, and remembered only the oddities of the company, and some whiff of the lion-hunter in the heads of the house. This kind and cultivated household was in Bedford Square, half-way between the Cockney School and the ladies and gentlemen of higher social pretensions who would occasionally meet their humbler brethren in the drawing-room, which lay midway. Of all the writers who flourished there, and were applauded to the echo, Procter

[1] Privately printed by Mrs. Procter.

is the one most closely connected with this little centre of refinement and cultivation. He appeared in 1815 with a volume of dramatic sketches, in which he too had felt himself moved to the attempt, to "try the effect of a more natural style than that which had for a long time prevailed in our dramatic literature." His success in this was small; for among the modern writers for the stage no one as yet has found the means of adapting a poetic diction with marked success to a dramatic story. He found his way, indeed, to the stage, and had the satisfaction of seeing his works acted by such performers as Macready and Charles Kemble; but his success, so far as this goes, was one of the day, and his plays are unknown, we fear, to any theatrical repertory. He was the schoolfellow of Byron at Harrow, and lived long enough to be a kind critic and counsellor far on in the century to another generation of poets. His shorter lyrics, many of them very melodious and graceful, are what has lasted longest. And he had the gentle succession, which somebody has said is peculiar to the greatest men—he handed on his little lamp of genius to his daughter, and thus prolonged a mild but beautiful fame.

CHAPTER II.

THE COUNTRY.

It is so difficult to follow a distinct classification in respect to the literary workers who are continually crossing each other's paths, appearing and reappearing in different links and windings of the same historical way, that some arbitrary mode of division is necessary. And we think it better, having given such glimpses as we have been able of one section of the literary world in London, to pause for a little upon those who do not appear much in the centre of national life at all, before proceeding to the other greater and more showy region which touches the highest circles of the state, and belongs to what is called and has always been called "Society." The reign of the literary coteries in the provincial towns had begun to die out about the time of the new century; but yet we find many points of light all over the country, where men and women pursued their varied intellectual pursuits, with less delightful complacency indeed than that which distinguished the Swan of Lichfield, but still with a deeper sense of their own superiority and importance as enlighteners of the earth, than is general now among the unobtrusive professors of literature. So near London as Hampstead, Joanna Baillie, the most modest of women, but the most ambitious of female poets, lived for the greater part of a long life. We cannot feel that, great as her reputation was, and high as was the opinion expressed

of her by many of her most distinguished contemporaries, we should be justified in leaving out that prefix and ranking her boldly among the poets without distinction of sex. That she was superior to many men of her time is no reason for claiming for her an approach to the circle of the greatest: and to name her with Wordsworth or with Coleridge would be folly, although there is now and then a Shakspearian melody in her blank verse which pleased the general ear more than the stronger strain of the *Excursion*, and stood no unfavourable comparison with the diction of Coleridge's dramas. It is evident that she herself aimed at a reputation not inferior to theirs, and that the consciousness of a lofty purpose, and the applause of "those qualified to judge," which she received in no stinted measure, and indeed the favour of the public, which demanded several editions of the first volume of her *Plays on the Passions*, gave her a certain dignified sense of merit, such as of itself impresses the reader, and disposes him to grant the claim so gravely and modestly put forth. Personally no one could be less disposed to plume herself upon her genius, or claim the applause of society; but that she seriously believed herself to have produced great works, which the world would not let die, is we think very clear. And so thought Scott, whose opinion has so much right to be received and honoured. A woman might well think much of her work of whom he had said that "the harp" had been silent "by silver Avon's holy shore" for two hundred years until—

> "——She, the bold enchantress, came
> With fearless hand and heart on flame,
> From the pale willow snatched the treasure
> And swept it with a kindred measure;
> Till Avon's Swan, while rang the grove
> With Montfort's hate and Basil's love,
> Awakening at the inspirèd strain,
> Dreamed their own Shakspeare lived again!"

This praise, out of all proportion to its object, and which we would not now apply to the greatest of recent poets, was given in all good faith ; and Joanna Baillie received it with a sober composure which has nothing of vanity or self-consciousness in it. There is no instance indeed in literature of a self-estimation so lofty, yet so completely modest and untinctured with elation or self-applause. Her ambition reached to the very highest heights of fame, and she believed that she had attained an elevation near them. This of itself is always impressive to contemporaries, who never can be entirely certain how posterity is to receive their estimate of excellence, and who are indeed so continually proved to be wrong in it. Not only from her own generation, however, but to the present time, respect and a kindly veneration have ever attended her name. We honour her fine purpose and intention, if we forget the works in which she believed she had carried them out, and would still meet with almost indignation any attempt at unkindly criticism upon a poet so pure and high-toned, a woman so worthy of all respect. Her gentle and lovely life had no incident in it. She was one of those maiden princesses about whom there always breathes a soft and exquisite perfume, too delicate for common appreciation, of that reserved and high virginity, which, never reaching to any second chapter of life, involves an endless youth. This is not what we mean when we speak, vulgarly and meanly, of an old maid—and yet an old maid, worthy of the name, with all the strange experiences by proxy which life brings, yet with the first awe of imagination still undeparted, and the bloom never banished from her aged cheek, is one of the most delicate objects in nature. Perhaps, however, we must add, such a one is very inadequately qualified for the composition of tragedies, especially those that deal with the passions.

In the preface to her first volume, Joanna Baillie sets forth her theory of the extreme interest of "mankind to man," by way of accounting for the choice of her subjects. Her illustration of the manner in which that interest works is very bold and ingenious; we do not venture to assert that it was altogether original, but it has certainly been often repeated. Not only does she assert this to be "the proper study" of the enlightened mind, but she claims it as the origin even of those hideous curiosities, which move the multitude to the enjoyment of executions and murders, and, indeed, as in the following example, the excuse of absolute cruelty.

"Revenge, no doubt, first began among the savages of America that dreadful custom of sacrificing their prisoners of war. But the perpetration of such hideous cruelty could never have become a permanent national custom but for the universal desire in the human mind to behold man in every situation, putting forth his strength against the current of adversity, scorning all bodily anguish, or struggling with those feelings of nature which, like a beating stream, will ofttimes burst through the barriers of pride. Before they begin those terrible rites they treat their prisoners kindly; and it cannot be supposed that men, alternately enemies and friends to so many neighbouring tribes, in manners and appearance like themselves, should so strongly be actuated by a spirit of public revenge. This custom, therefore, must be considered as a grand and terrible game which every tribe plays against another; where they try, not the strength of the arm, the swiftness of the feet, nor the acuteness of the eye, but the fortitude of the soul. Considered in this light, the excess of cruelty exercised upon their miserable victim, in which every hand is described as ready to inflict its portion of pain, and every head ingenious in the contrivance of it, is no longer to be wondered at. To put into his measure of misery one agony less, would be doing a species of injustice to every hero of their own tribe who had already sustained it, and to those who might be called upon to do so—among whom each of these savage tormentors has his chance of being one, and has prepared himself for it from his childhood. Nay, it would be a species of injustice to the haughty victim himself, who would scorn to purchase his place among the heroes of his nation at an easier price than his undaunted predecessors."

By this startling yet fine example does the author declare her conviction that human character and action are of all things in the world the most interesting to men, a truth which scarcely requires so daring an illustration. It is on this ground that she chooses the action of the passions as her special theme. But the limitation of her powers, and the absence of the broader genius which can conceive life as a whole, is apparent in her parcelling out of the great motives, generally so strangely intertwined, of human action; and a treatment so artificial deprives us of the very sympathy she claims, since, to see a man struggling, for instance, with the passion of hatred is a different thing from seeing him contend in "the grand and terrible game," as she finely calls it, where not strength of arm, nor swiftness of foot, nor keenness of eye, but the fortitude of the soul is concerned. This pedantic separation of one mental force from another turns the men of her tragedies into puppets so helpless in the grip of the formal passion, which is supposed to sway them, that we accompany their mock struggle with impatience rather than sympathy. The most popular of the tragedies, and the one which the author had the gratification of seeing performed by no less actors than John Kemble and Mrs. Siddons, the play of De Montfort, affords us at once an instance of this. It is, perhaps, the best of Joanna Baillie's tragedies; but there is no trace in it of "the grand and terrible game." From the moment when the hero presents himself to us he is not struggling against his master-passion, but nursing it in long soliloquies and musings, and seizing every opportunity to secure its ascendency over him. None of that wonderful play of suggestion with which Shakspeare leads us to the inevitable end is possible in so straightforward an exhibition. Nor is there any cause given, anything to justify the victim of passion or to call forth our sympathy. His enemy has

done him no harm, his hatred is entirely without reason, his wrath wordy and weak. Artifices of the simplest description suffice to drive him to madness, his revenge is cowardly, and his remorse womanish. He is introduced in gloomy self-absorption, impatient alike of kindness and service, brooding over his passion. "I loathed thee when a boy" is all the excuse he attempts to make for himself: and it is not only when his enemy crosses his path that the ecstasy of rage is on him. It possesses him continually as love does, but with even more constant force. It has

> "Driven me forth from kindred peace,
> From social pleasure, from my native home,
> To be a sullen wanderer upon earth,
> Avoiding all men, cursing and accursed."

The forced character of the hero's attitude is all the more evident from the fact that the object of this concentrated wrath has no special connection with the hater, and does not force himself upon him in any way, the only direct act of intercourse between them, of which we are informed, being that Rezenvelt has spared the life of De Monfort in an encounter of arms when he was at his enemy's mercy. Nor does Rezenvelt's demeanour, when he is introduced, revolt us as it ought to do, to keep us in sympathy with Monfort, for his light-heartedness is of an innocent kind, and his wit not pungent enough to hurt a fly. Jane, the sister of De Monfort, is a noble description, but she is not much more. The following passage, which is the preface to her appearance, has been often quoted; but it is almost the only one we care to give, not only as an example of Joanna Baillie's power, but also of her weakness:—

> *Page.* Madam, there is a lady in your hall,
> Who begs to be admitted to your presence
> *Lady.* Is it not one of our invited friends?

Page. No, far unlike to them ; it is a stranger.
Lady. How looks her countenance ?
Page. So queenly, so commanding, and so noble,
I shrunk at first in awe ; but when she smil'd,
For so she did to see me thus abash'd,
Methought I could have compass'd sea and land
To do her bidding.
Lady. Is she young or old ?
Page. Neither, if right I guess ; but she is fair :
For time hath laid his hand so gently on her,
As he too had been aw'd.
Lady. The foolish stripling !
She hath bewitch'd thee. Is she large in stature ?
Page. So stately and so graceful is her form,
I thought at first her stature was gigantic ;
But on a near approach I found, in truth,
She scarcely does surpass the middle size.
Lady. What is her garb ?
Page I cannot well describe the fashion of it.
She is not deck'd in any gallant trim,
But seems to me clad in the usual weeds
Of high habitual state ; for as she moves
Wide flows her robe in many a waving fold,
As I have seen unfurled banners play
With a soft breeze.
Lady. Thine eyes deceive thee, boy ;
It is an apparition thou hast seen.
Freberg (*starting from his seat*). It is an apparition he has seen,
Or it is Jane De Monfort.

This is said to be a wonderfully good description of Mrs. Siddons, and to see that great actress enter immediately after must have had a wonderful effect upon the audience; but once on the stage, except to receive the tedious and lengthened confidences of her brother, there is little or nothing for Jane de Monfort to do, and though everybody else continues to admire and praise her, she has no influence on the course of events, and is, in short, a mere dignified spectator from beginning to end. It is unnecessary to point out the prosaic line here and there in the poetry itself, which mars the effect even as a

description. Besides the absence of any possible sympathy with the hero, the play is without incident or movement. Hatred holds the stage alone, unreasoning and extreme. The play of human life is all suspended, and the central figure has room for no sentiment, no idea, but one. In *Basil* the construction of the play is better, for it is not so entirely monotonous. Besides the love of the hero, there is the desire to conquer on the part of the heroine, mingled with a wavering beginning of affection: and the double intrigue of the Duke and his counsellors to detain the unlucky general and excite against him his mutinous soldiers, relieves the pressure of the one sole passion. It is unnecessary to enter into the whole series in detail. They are all marked with the same faults, and in none is the workmanship so fine as to dazzle the reader. Potent and great poetry will triumph over any fault of construction, but it is marvellous to contemplate the acres of respectable verse, in which an unnatural and formal pose of the soul can be kept up, scene after scene and act after act, with rarely a gleam of nature shining through. The tragedy of *Ethwald* is a double one, two long plays to exemplify the well-worn dangers of ambition, which are only not so trite as they are bloody. But all these tragedies, without exception, are bloody. When there is not a hecatomb of slaughtered victims, the one invariable "corse" is pierced with a dozen wounds at least.

All this is in very strange contrast with the character and position of a woman so womanly and genuine: but stranger still is her sober certainty of the dignity and importance of her work. This conviction shone through every line of her elaborate prefaces, and enshrined her name and her dwelling in the quiet modesty of private life. For many years her house at Hampstead was an object of pilgrimage to many, and the best of the age

resorted to it with a respect which was almost allegiance. Not that she they sought had any wealth of instruction or witchery of words to charm them withal, such as were possessed by the greater poet so near her on the other suburban hill at Highgate. It would be hard, indeed, to say what was and has been since the secret of Joanna Baillie's power; perhaps it was at bottom that profound and most modest, yet unwavering faith in herself, which is visible in all she says. A conviction so serious and so entirely unmingled with vanity, is very impressive, and her generation would seem, respectfully and devoutly, though not without here and there an occasional scepticism, to have taken her at her word. Jeffrey, in his early boldness, in one of the first numbers of the *Edinburgh*, assailed her in his usual frank manner, being no respecter of persons. Some years after, when she and her sister were in Edinburgh, the dauntless critic, who evidently had so little malice in his assaults that he never considered them a reason for keeping aloof from the victims, sought her acquaintance; but, as her biographer says, "Joanna was inexorable." She would have nothing to say, in his own empire and capital, to the Rover-chief, the Arch-critic, as his townsfolk called him. No other author we know of was so stern or determined. Southey sneered in his sleeve, but did not refuse to meet his literary enemy—but Joanna was inexorable. At a later period, however, the poet forgave—and little Lord Jeffrey, in his visits to London, found his way as often as another to Hampstead, where Scott hastened whenever he had a chance, and many a visitor besides, whose visits were well worth remembering. Joanna was not eloquent in talk, nor in any way remarkable to a stranger: her sister Agnes, who was her constant companion, was the first of the two in society: but Sir Walter Scott declared that if he wanted to give an intelligent stranger the best idea

possible of an English (he should have said Scots) gentlewoman, he would send him to Joanna Baillie, and it would be hard to find higher praise.

Her first publication was a little volume of *Fugitive Verses*, and this, a reprint of the juvenile collection, was also her last. She dedicated the last edition to Samuel Rogers, who had advised its republication, "a poet," she says, "who, from his own refined genius, classical elegance, and high estimation with the public, is well qualified to judge," and to whom she was indebted for "very great and useful service" in criticism. But at the same time, with a half pathetic apology, through which there tingles an ironical note, Joanna explains that "Modern Poetry, within these last thirty years, has become so imaginative, impassioned, and sentimental, that more homely subjects in simple diction are held in comparatively small estimation." This was long after Wordsworth's defiance of fine words and high poetic language had resounded to all the winds; but contemporaries are oblivious of each other. And Joanna still stood upon the pre-Wordsworth ground, at a time when Byron and Shelley were raising new standards of poetic advancement. "When these poems were written," she adds, "of all our eminent poets of modern times not one was known. Mr. Hayley and Miss Seward, and a few other cultivated poetical writers, were the poets spoken of in literary circles. Burns, read and appreciated as he deserved by his own countrymen, was known to few readers south of the Tweed." What a revolution to have occurred in one woman's life! Joanna Baillie died in the serenest and most beautiful age so short a time ago as 1851, after a long, gentle, and tranquil life.

It might, perhaps, have been better to place the name of Mrs. Barbauld in our last chapter among the *bourgeois* circle already referred to; for she is frequently spoken of

among them, sometimes with friendly comment, sometimes with the natural asperity which a critic must expect to meet with: for she was a frequent contributor to the periodicals of the time, and a reviewer, the most ungracious of all offices. No such weight of reputation as that which Joanna Baillie has retained—through an almost complete ignorance on the part of the present generation of her works—has ever, so far as we can make out, belonged to Mrs. Barbauld: yet it is difficult to tell why, for she has left behind her at least one scrap of verse which is immortal, and much beside that is well worthy a place in the recollection of her country. She was, like so many of the writers we have had occasion to refer to, the child of a dissenting minister. The position seems to have been exceptionally favourable to literature. In the case of Mrs. Barbauld, a whole succession of dissenting ministers are involved, dating on one side from one of the Seceders of 1662, "the noble 2000," as Miss Aikin describes them, "who resigned their livings rather than violate conscience at the prompting of that treacherous bigot, Lord Clarendon." She was born in 1757, Anna Letitia Aikin, and her father's life was chiefly spent at the head of a theological academy for dissenting students, established at Warrington. Of the professors there, the famous Dr. Priestley was one, and Gilbert Wakefield, afterwards convicted after the pleasant fashion of the time for sedition, in consequence of a political pamphlet, another; so that it is evident the little community was of advanced views. Dr. Aikin was the theological tutor of his academy. He held some "obscure notions," according to Priestley, upon the doctrine of the Atonement, but was an Arian like the rest. The Nonconformity of the time, at least in its most cultivated and intellectual circles, was everywhere strongly inclined to Unitarianism. They made a lively little community of their own, the

distinct colour of the Nonconformist party of which it consisted giving an amusing and characteristic variety to the type. The Professor's daughter was a beautiful and sprightly girl, of a fine spirit, and full of activity and life. There is a story of her sudden escape, by climbing a tree, from the anxious suit of a rustic lover. The tree grew against the garden wall, and the alarmed young lady swung herself over into the lane beyond, leaving her suitor *planté la*. "He lived and died a bachelor," adds the record: "and though he was never known to purchase any other book whatever, the works of Mrs. Barbauld, splendidly bound, adorned his parlour to the end of his days." It might have been well for the girl if she had been content with this faithful farmer, and not gone farther and fared worse.

The man she married was a young Frenchman of a Huguenot family, whom his father, who had a post in the household of the Electors of Hesse, "destined for the English Church," we are told, though, by a somewhat ludicrous mistake, he sent his son, in preparation for the Anglican Establishment, to the Warrington Theological Academy, to the hands of the Priestleys and Wakefields. By this time Miss Aikin had already published a volume of poems, of which Dr. Priestley writes, with somewhat ponderous flattery, that one of his friends has read them not only "with admiration, but astonishment," and requests from her a poem to be published for the benefit of Paoli and the brave Corsicans, which, he says, "may be the *coup de grâce* to the French troops in that island." This first essay in literature also procured for the young author a solemn letter from the great Mrs. Montagu, once the arbiter of fame, expressing the great pleasure she feels in "opening a more intimate correspondence with Miss Aikin." "You are certainly obliged," says the Queen of Society to the novice whom she compliments, "to every

man who is not jealous, and to every woman who is not envious of your talents." The young lady thus distinguished was possessed of great beauty. "Her form was slender, her complexion exquisitely fair, with the bloom of perfect health; her features regular and elegant, and her dark blue eyes beamed with the light of wit and fancy." Perhaps amid all the professors who "drank tea together every Saturday," and whose "conversation was equally instructive and pleasing," the gay young Frenchman, Rochemont Barbauld, though he was somewhat flighty, and his "theatrical French manners" alarmed the Lancashire society, was a welcome relief. "Neither Oxford nor Cambridge could boast of brighter names in literature and science than several of those dissenting tutors," says Mrs. Barbauld's niece and biographer, Lucy Aikin, herself not without pretensions to fame. But even dons of the first water are found to go to the wall in honour of a foolish undergraduate, and the girl-poet was no wiser than her kind. When she was warned that her lover had a predisposition to insanity, she answered bravely, "If I were now to disappoint him he would certainly go mad"—and held to her choice. The new-married pair went to live in the village of Palgrave, in Suffolk, where the husband became the minister of the little Salem of the place, and, in addition, set up a school. The success of the school was great, and Mrs. Barbauld "threw herself heart and soul into the work." She had to contend with her husband's occasional "fits of insane fury," and to keep the routine of the place undisturbed by this terrible risk. Studious little boys of cultivated families, such a person as William Taylor of Norwich, and that great Dr. Sayers whose claims to renown have so entirely died out of recollection, were among the pupils whom she introduced to the early ways of learning: and for them and her nephew and adopted child, Charles

Aikin, she wrote the delightful *Early Lessons*, which is the most poetical and idyllic of all baby books. Never were words of one syllable so charmingly employed. The *Hymns in Prose*, perhaps as having a somewhat higher aim, have held their place longer. But hymns in prose are a mistake, and never will be so popular as verse with children; whereas the lovely little pictures of the *Early Lessons* are never out of date. They are, among the dull pages of ordinary lesson books, like vignettes by Stothard among the common illustrations of a penny journal.

The Barbaulds went often to London in their holidays and saw congenial people, and got free of the toils of their life; and after about ten years of school work they left their country academy and settled in Hampstead for some time. Here Mrs. Barbauld made the discovery that De Monfort, a tragedy which it had given her great pleasure to see, and which had been recently published in a volume called *Plays on the Passions*, was written by "a young lady of Hampstead whom I visited, and who came to Mr. Barbauld's chapel, all the while with as innocent a face as if she had never written a line." It was no small glory, it may be well supposed, for that young lady (not quite so young perhaps as friendship describes her) to have her fine verses mouthed by Mrs. Siddons and Kemble. Mrs. Barbauld has never had any such rank as the visionary unjustifiable rank of the modest and gentle Joanna. She was but a writer of little poems, of children's lesson-books, of reviews, and magazine articles, beside the lofty pretensions of the dramatist. Yet she had always warm admirers. Hannah More writes to her about her "incomparable poem" addressed to Mr. Wilberforce, on an incident in the agitation for the abolition of slavery. Young Mr. Crabb Robinson being asked by a young lady if he would like to know Mrs. Barbauld, answered with enthusiasm, "You might as well ask me if I would like

to know the angel Gabriel,"—and such authorities as Dr. Johnson and Charles James Fox regretted the waste of her great talents in the composition of children's books. On the other hand, Lamb, whom she reviewed with considerable severity, launched keen little stammering gibes at her, and spoke of her and Mrs. Inchbald as the Bald women.

It was while she was living in Hampstead that her brother, Dr. Aikin, between whom and herself the warmest affection always existed, produced the *Evenings at Home*, which for a long time was one of the most popular of instructive books, read aloud on winter evenings in thousands of families, and forming the minds of many gentle unlearned people. In this book Mrs. Barbauld had some share. And it was about this time (in 1793 or '94) that she was in Edinburgh, and gave, as Sir Walter has said, the first distinct touch to his dormant genius by making known the translation of "Lenore," made by her old pupil and young friend William Taylor, whose sobriquet "of Norwich" is somewhat tedious, but reads like a title. All this time she was living a life of the keenest agitation and distress, watching over her unfortunate husband, whose mad paroxysms got more and more alarming, but from whom she would not be separated as long as it was possible to keep him at home. In the beginning of the new century they removed to Stoke Newington, where her brother had gone to live, and bought a house close to Dr. Aikin's, whose presence was a support to the unhappy wife in her terrible watch and charge. Here she lived, sometimes in danger of her life, screening and shielding her unfortunate husband at once from public knowledge of his state, and from the horrors of restraint. It was here that Crabb Robinson saw her and put down his impressions with his usual graphic neatness of touch. "Mrs. Barbauld bore the remains of great personal beauty,'

he says. "She had a brilliant complexion, light hair, blue eyes, a small elegant figure, and her manners were very agreeable, with something of the generation then departing." A short time after her husband's malady broke out into wild madness: he pursued her with a knife to kill her, and she was compelled to take refuge in her brother's house. After this, the devoted woman was compelled to yield, and he was put under restraint; but shortly after released himself and her by suicide. She lived more than a dozen years after this, dying a very old woman, over eighty. Among her productions were some political essays, as well as many on literary subjects, all lost in the indiscriminate mass of anonymous periodical writing, to which most known authors have contributed more or less. Her poem on the year 1811, written at a melancholy moment of the national history, and when she herself had little cheerfulness to spare, contains the original of that famous New Zealander of Lord Macaulay's, with whom we are now all so familiar. It was an "ingenuous youth" from "the Blue Mountains, or Ontario's Lake," whom she imagined, coming on pilgrimage to see "London's faded glories."

> "Pensive and thoughtful shall the wanderers greet
> Each splendid square and still, untrodden street;
> Or of some crumbling turret mined by time,
> The broken stairs with perilous steps shall climb;
> Then stretch their view the wide horizon round,
> By scattered hamlets trace its ancient bound,
> And choked no more with fleets, fair Thames's sway
> Through reeds and sedge pursue his idle way."

This, in those days when prosecutions for sedition were easy, was considered unpatriotic. "There was a disheartening and even gloomy tone" in it, which "I," says Crabb Robinson, "even with all my love for her, could not quite excuse." It was met by a "coarse review in

the *Quarterly*," which gave Mrs. Barbauld great pain, and of which Miss Edgeworth wrote to her in warm indignation, but droll phraseology, condemning "the odious tone in which they dare to speak of the most respectable and elegant female writer of whom England can boast." Mrs. Barbauld, however, was more than respectable and elegant. She is one of the most attractive figures of her age. Her little *Lessons* will commend themselves to everybody who loves childhood—and she is one of the writers, who, apart from all other claims upon our recollection, has won a tender immortality by one stanza of exquisite and genuine feeling such as finds an echo in most human breasts. It is best that the reader who probably knows this should have it in the setting given it by Crabb Robinson, and hear what great voice it was that confirmed its title to the skies.

"It was after her death that Lucy Aikin published Mrs. Barbauld's collected works, of which I gave a copy to Miss Wordsworth. Among the poems is a stanza to Life, written in extreme old age. It was long after I gave these works to Miss Wordsworth that her brother said, 'Repeat me that stanza by Mrs. Barbauld.' I did so. He made me repeat it again. And so he learnt it by heart. He was at the time walking in his sitting-room at Rydal, with his hands behind him; and I heard him mutter to himself, 'I am not in the habit of grudging people their good things, but I wish I had written those lines—

'Life! we've been long together,
Through pleasant and through cloudy weather;
'Tis hard to part when friends are dear,
Perhaps 'twill cost a sigh, a tear,
Then steal away, give little warning,
Choose thine own time;
Say not good night, but in some happier clime
Bid me good morning.'"——

Mrs. Barbauld's family was full of literature—but as so often happens when one of an attached kindred attains eminence, the work of the rest is of a nature to encourage

the suspicion that it never would have come into being but for the existence of one person of genius among a number of intelligent followers. Miss Lucy Aikin, her niece, wrote her biography, with an old-fashioned formality which must have been antiquated in her own day, but which now is pleasant like Chippendale furniture and blue china—and was besides the author of various historical compilations. This lady's brothers produced some scientific work, carrying out, as the family biographer says, the family vocation. Thus, as in so many cases, the clear little stream of genius dwindled and lost itself among the sands.

Of the same class of cultivated and intellectual minds, stamped with the peculiar individuality given by the air of the provinces and the atmosphere of Dissent, was William Roscoe, one of the earliest of those commercial magnates whose taste and love of art have given them a distinct place in the world of literature. It is a combination which always has been popular. Great wealth makes great expenditure not only lawful but laudable—and for a man without estates to keep up, or natural dependants to provide for, there is something very seductive in the power of accumulating beautiful things about him, and making the symbols of his money more splendid and graceful than even the stately houses and historical surroundings of the longer-established aristocracy. The inclination which turns the mind of such a man to the glories of the Renaissance, and the citizen-princes who cultivated the genius and enjoyed the luxuries of that impure and cruel, but glorious and gifted age—is a very natural one: and nowhere better could the biographer of Lorenzo the Magnificent be found than in a merchant of Liverpool, then rising into wealth and importance such as all the wealth of the Italian cities could vainly have attempted to rival, yet entirely destitute of that kind of

endowment which has made them immortal. The Roscoes—for this refined and intellectual citizen was the father of a family of sons, all intellectual and highly cultivated as became their parentage, and all authors—which perhaps was more than was necessary—were the centre of a lively and clever society in Liverpool, better known than they probably would have been had they been in London itself, and coming into contact as the notabilities of their town with everybody notable that passed that way. We have almost forgotten now-a-days how excellent a point of vantage this local reputation is, and how much it enhances the reputation of a writer, who, under the present laws, would probably be swallowed up amid the literary circles of London, and fail altogether for want of the pedestal which a big admiring provincial town could give him. Roscoe was a pupil of Mrs. Barbauld in his early years, like the often-quoted William Taylor of Norwich. Both of these men kept a certain nucleus of literary life in their different regions, and derived a sense of greatness and superiority from their position, the pomp of which is sometimes amusing: but no doubt it was a good thing that they were there, leavening the rude energy of a great mercantile community on one hand, and quickening the dulness of provincial life on the other. They were all Dissenters — the Roscoes, the Aikins, the Taylors, and many more—inclining towards Unitarianism, if not going farther in the way of "free thought,"—all come of respectable well-to-do families, known to their fellow-townsmen, and thus as good as a certificate in favour of literature, showing that it was not a vagabond profession, as so many good people thought.

Of a very different class, though still Dissenters, and still provincial, were the great preacher Robert Hall, and the severe essayist John Foster. The former we must leave for another chapter. But Foster is a distinct variety

among the professors of literature. He is the impersonation of a somewhat gloomy Dissenter, shut up by circumstances in a small circle, sitting among his little group ot intellectual persons with a heartfelt sense of aggrieved superiority, and contemplating most things in heaven and earth as subjects to be discussed by letter or by word of mouth. His essays had, at one time, a wide reputation, and they have always been of the kind of literature appreciated by persons of thoughtful minds without much education, to whom the gravity of steady intellectual investigations, not of too scientific an order, is new and delightful. An essay *On Decision of Character* does not seem likely to be very original, but yet there is the originality of a mind not too much cultivated or too much pervaded by other men's thinkings in the conscientious examination of his subject, which Foster gives. He speaks, in one of his letters, of "my total want of all knowledge of intellectual philosophy and of all metaphysical reading," which is not a promising beginning foi a thinker; but he adds—a consideration which atones foi his ignorance—that "whatever of this kind appears . . . is from my own observation and reflection much more than from any other resource." This, though sadly unsatisfactory to the student, is precisely the kind of semi-philosophical thinking which pleases those "thoughtful" readers who are, if we may use the expression, of the middle class in mind as usually in circumstances; and who feel themselves superior to the easy level of mere light literature without being sufficiently educated or capable of severe mental exertion to appreciate scientific philosophy.

In the many excellent households ambitious of both the reputation and the reality of thoughtfulness, and loving to believe that theirs was no flippant talk about objects of no particular interest, but lofty conversation,

in which no wandering Raphael—did such a visitant ever appear unawares—need have felt himself out of place, Foster was a congenial teacher. Every idea that presented itself to his mind did so as an object for exposition or discussion. There is a curious confession of weakness made by him in his old age, which shows how entirely this had been the habit of his life. He describes himself as unable any longer to "*work a conversation,*" and therefore avoiding visitors. "In my present state of debility," he says (in a letter concerning the arrival of a colleague), "I feel an absolute horror of the necessity of long laborious *talks,* such as would be inevitable to a constant association with a man like him, a thorough college man, hard disciplined, doggedly literary and nearly a stranger. With *you* the case is quite different—we are old acquaintances; there is no obligation of ceremony; we can talk about what we like; read Walter Scott; be under no necessity of mental exertion, but just as far as we find it agreeable . . . anything more formal, more laborious, and more continued than this, miserably jades me. *It would be as bad as having to preach every day.*"

This alarmed avoidance of the kind of conversation which was too familiar to him, gives a sort of whimsical picture of what he had been. His essays, and even his familiar letters, all convey the same impression. One can imagine the little narrow circle sitting round, all with ears on the alert for every new opening for thought, "working the conversation" with conscientious zeal, losing no opportunity of self-improvement. An essay-writer is always more or less exposed to the suspicion of writing for writing's sake, whether he has or has not anything to say; and Foster had none of the qualifications of fine and flowing style, of gracious and graceful imagination, which sometimes make the mere charm of the execution a very sufficient reason for literary work. He besieged

his subject with all the science he knew, and the most conscientious intention, as he drove it from line to line of its fortifications, of doing real service to humanity by forcing it to disclose itself; and the process was eminently satisfactory to a large audience of the like-minded, fond of thought that could be thus followed, that was not too deep for them, and that looked so much more profound than it was. "I like my mind," he says, "for its *necessity* of seeking the abstraction of every subject; but, at the same time, this is, without more knowledge and discipline, extremely inconvenient, and sometimes the work is done very awkwardly or erroneously. How little the reader can do justice to the labours of an author unless himself also were an author!" Bacon himself had no such elevated idea of the difficulties of his work.

We require to call up before us the dissenting community of the period, with its strong underlying sense, not only that it was the salt of the earth, but that its bounden duty was to prove itself so, amid the levities and flippancies of ordinary society, even in its domestic privacy—by "working the conversation," and keeping up a pervasive intellectualism as well as piety—in order to understand such men and their productions. For one of the strangest things in the revelation, when such a man as Foster rises high enough to be visible against the firmament, is the sudden surging out of chaos along with him, hanging to his skirts, of numbers of nameless persons, each with a little glimmer of reputation of his own, author of a book, an essay, at the least a volume of sermons, which makes him think himself, and induces his friends to believe that he is, a member of the literary republic. These swarm about Foster, Reverends this and that, men whom he considers of genius, born lights of the dim provincial sphere. And it is very surprising to see how intellectual those excellent people were, how literature

ran in families, and how scarcely a chapel existed in all the towns and villages of the Midland Counties without some little light of the kind, some maker of gentle verse, or writer of moral essays, on *Maternal Solicitude*, on *Rival Pleasures*, a thousand little subjects on which well-turned formal sentences could be put together, and well-worn but modest and virtuous thoughts be expressed. The reader may be permitted to wonder whether anything of the same high, if narrow level, remains now-a-days in the simple homes where poor Independent ministers vegetate, sadly subject, as we have learnt to think them, to vulgar deacons and green-grocers—where there is one small maid-of-all-work for all attendance, but the highest subjects are discussed in the little parlour, and father and mother alike, or at least, one of the young ladies, retire from time to time to compile the careful manuscript. Such a household at Lewisham in Suffolk, and afterwards at Ongar, was the family of the Taylors, the father of which was an engraver as well as a pastor, the mother the author of one or two moral tales, the daughters Jane and Ann writers of a little more note, and the son the well-known Isaac Taylor, the author of many philosophical works in the same vein as those of Foster, though much more voluminous and wordy. His *History of Enthusiasm* is one of the best known and most popular of many works, and may be considered in some sense the parent of a great deal of recent literature, in which a gentle egotism and an inclination to mix up the mild records of personal experience with more legitimate commentaries upon books and life, and keep a virtuous and amiable "I" always in the front, whatever may be the subject treated—have originated a popular literary method. This domestic eloquence and tea-table sublimity bring the art of "thoughtful writing" down to the capacity of the simplest audience, and make the reader proud of himself

as well as delighted with his intellectual guide. But the sisters belong entirely to the gentle refinement of that obscure world above which Isaac Taylor hovers in the more ambitious position of a great writer and thinker. They both wrote verses, *Original Poems for Infant Minds*, and several other collections, in one of which occur the little verses which are in their way immortal, though the reader will smile at the description — the "Twinkle, twinkle, little star," which we have all learned in our day and taught to our children. Jane Taylor was the more gifted of the two sisters, and there are some of her prose sketches which are worth remembering. "How it strikes a Stranger," a little epilogue in which the supposed impression made upon the mind of an angel whose curiosity has tempted him, even at the cost of sharing their mortality, to descend among men, is the theme, recurs to our mind from the recollections of youth with considerable force.

A writer of more note and power, connected with a similiar community though scarcely proceeding from the same caste of prophets, was James Montgomery, who, at the beginning of the nineteenth century, was the editor of the *Sheffield Iris*, and already known as a poet of the highest moral tone. He was the son of a Moravian missionary, but had broken forth from that quaint society in the energy of his youth, though he returned to his allegiance in after days. Though it is difficult to think of him now but as the gentlest and mildest of religious poets, he was one of those who came in contact with the capricious and irritable power of the State in the agitating years of the French Revolution. A poem which he printed on the demolition of the Bastille, though not written by himself, was interpreted to be a seditious libel, and he was fined and imprisoned for it. A similar offence brought him again into York Castle some time later; but such

accidents brought distinction rather than disgrace in those troubled times. He published various long poems which have faded from recollection—"The World before the Flood," "The Pelican Island," and many others; but it is by the occasional verses still to be found in collections of pious poems, and in some cases, we think, even used as hymns, which keep him in remembrance—such poems as that on "Prayer," which express the pseudo-thought and real devotion of the vast underground audience (if we may so call it) to whom poetry is only poetry when it puts into words something they want and understand—or veils their want of understanding for them with melodious words, which perhaps is still better. These verses give us no additional insight into the character of prayer. To have it described as

> "The motion of a hidden fire
> That trembles in the breast,"

the "burden of a sigh, the falling of a tear," does not, we are obliged to say, convey any clearer conception. But the way of saying it has proved delightful to many a gentle reader, very well and devoutly conscious of that profound operation of the soul, though no more able to explain it than the poet. The religious poetry which pleases the multitude—and nothing does so please the multitude as religious poetry—is all more or less of this class.

To turn from those pious circles so full of all the paraphernalia of thinking, its symbols and surroundings, to a life so full of the excess of practical energy as that of William Cobbett, is a leap indeed. Nothing could be more unlike the calm and regulated existence, with more books and ideas than life and action in it, of the ministers' houses, than the story of the restless and eager peasant lad, who "did not remember the time when I did not

earn my own living," and who stormed through every phase of life with an energy and self-will, and independent pride in his own exertions, which is amusingly tempered by much mental adroitness and a great deal of the moral confusion of a mind intensely bent upon its own advancement. His account of his early days reminds us, in a small degree, of the more tender picture left us by Burns and his brother Gilbert, of the corresponding cottage in Ayrshire, where, at about the same period, these Scotch ploughboys were being trained by the patriarch father whose noble and serious character gave dignity to his race. The breeding of the two families seems to have been somewhat similar. "We were all of us strong and laborious; and my father used to boast that he had four boys, the eldest of whom was but fifteen, who did as much work as any three men in the parish of Farnham." And though Cobbett seems to have made his first step in the thorny ways of letters in a dame's school, it was this father who, "in the winter evenings, learnt us all to read and write, and gave us a pretty tolerable knowledge of arithmetic. Grammar he did not properly understand himself, and, therefore, his endeavour to teach us that necessarily failed." One wonders if there are many hardworking labourers or even small farmers in these regions now who can teach reading and writing and a tolerable knowledge of arithmetic, even without grammar, to their boys in the winter evenings; and if so, whether the Board schools are so great an improvement as we suppose?

They knew nothing of politics, these hardworking rustic folk. No newspaper was ever seen in the cottage in the dimness of the eighteenth century. When there was a victory they huzzaed, without well knowing why: and yet "my father was a partisan of the Americans" in the war which startled the country and the century as

nothing had done before. It was the first enlightening principle which woke the old tranquillity of indifference; "he would not have suffered his best friend to drink success to the king's arms at his table." Cobbett, who went through several changes of opinion afterwards, came to think this "a mistaken prejudice" on his father's part; but it is very curious to find so much independent opinion at such a period and on so low a level of society. From this humble but worthy home the boy ran off at sixteen, moved by the spirit of adventure and desire to see the world. After a time spent in London in an attorney's office, where, among other valuable discoveries, he found out that he could not spell, he enlisted, and as there was no war going on at the moment, and a great deal of leisure afforded to the young recruit, he set to work to educate himself. It is a curious proof of the difference between a youth sprung from the uneducated classes, and one who is in the habit of hearing moderately correct English from his cradle, that Cobbett's first literary study was a Grammar which he "studied with unremitting attention," writing out the entire book two or three times, and getting it by heart. By this means he taught himself to write "without falling into very gross errors." The racy English he afterwards wrote and poured in such floods upon the world was then unthought of, and all that he cared for was to be able to copy General Debeig's correspondence. He became a smart and efficient soldier, sergeant-major in his regiment, popular with everybody, and obtained his discharge after eight years service with "thanks for his behaviour and conduct." After this he married a girl whom he had seen at work eight years before at daybreak on a winter's morning, "out in the snow scouring out a wash tub." "That's the girl for me," the young soldier had said to himself. His choice seems to have been the turning

point of his life. Had she not been faithful to him, he would have married another lady with whom he met in the meantime, and settled as a farmer, and lost all the grandeur of his after career. "My rare conduct and great natural talents would then have failed of the success that afterwards attended them," he says, so that honesty in love proved the best policy for the future journalist and Member of Parliament. His wife, if not of the same talents, was as magnanimous as himself. He had met her in Nova Scotia, and when the regiment to which her father belonged was ordered back to Woolwich, it occurred to Cobbett that his Mary might not find herself happy in a soldier's crowded quarters: upon which ground he confided to his betrothed his entire savings, a hundred and fifty guineas, that she might keep herself comfortably until he could follow and marry her. When he returned to England, however, he found her a maid-of-all-work with five pounds a year, and the first thing she did was to put back into his hands his hundred and fifty guineas untouched. No doubt this was the girl for the future demagogue.

After his marriage he went to America, where, with characteristic pugnacity, the young Englishman, then a determined king's man and Tory, with all the uncompromising partisanship which becomes a soldier, flung himself at the head of the new-formed nation in a series of warm animadversions upon their conduct and politics. His first production was an assault upon Dr. Priestley, then newly arrived in America in all the odour of political martyrdom, a sufferer for his opinions. "His landing was nothing to me," Cobbett says; "but the fulsome and consequential addresses sent him by pretended patriots, at once calculated to flatter the people here, and to degrade his country and *mine*, was something to me,"—and he flew into print with a pamphlet intended

to be called "The Tartuffe detected," but which was published with the milder title of *Observations on the Emigration of a Martyr to the cause of Liberty.* After this he produced various fiery tracts of a similar description,—*A Bone to Gnaw for the Democrats, A Kick for a Bite,* etc. etc., signed by Peter Porcupine—pamphlets so keen in racy abuse and national spirit that the author made an immediate reputation, notwithstanding the dislike of the American people to criticism. These compositions were interrupted by the discovery that his publisher had taken the liberty to "promise a continuation, and that it should be made very interesting:" which Cobbett took for an engagement that he, *he* the champion Englishman, should do what a bookseller told him, and write to please his customers!—"No," he shrieks, "if all his customers, if all the Congress, with the President at the head, had come and solicited me—nay, had my life depended upon a compliance, I would not have written another line!" He then turned publisher himself, to spite the man who had thus insulted him, opening a shop "as being at once a means of getting money and of propagating writings against the French." It was thought a dangerous step by his friends, who entreated him at least to put no "aristocratical portraits" in his windows; but this advice was enough to set the dare-devil in a blaze. The question was, whether "to set all danger at defiance, or live in everlasting subjection to the prejudices and caprices of the democratical mob." Needless to say which course of action commended itself to Cobbett. He filled his windows with portraits of kings, queens, princes and nobles, George the Third in the place of honour. "I had all the English ministers, several of the bishops and judges, the most famous admirals, and, in short, every picture that I thought likely to excite rage in the enemies of Great Britain."

Upon this a hand-to-hand fight ensued between the insulted Commonwealth and its officials on the one side, and William Cobbett, *alias* Peter Porcupine, late sergeant-major in His Majesty's forces, on the other. The dauntless "foreigner" was beaten eventually as a matter of course, but not before he had made the very air resound with wild blows right and left, at the country, the Government, and private individuals, it did not matter whom. When he evacuated the field of battle at last, it was with colours flying and pride unabated. The encounter is amusing and characteristic, and would be as humorous an outburst of foolhardy daring as ever offended common sense and delighted national sentiment, had not the bold monarchist, the national champion, turned round to the other side as soon as he found himself in the regions where it was orthodox to be loyal. It is curious to know that the *Weekly Register* was begun with the pure principles of Conservatism, and that in Cobbett's first prosecution for libel, all kinds of eminent Tory personages bore witness to his character as "a strong defender of the king and constitution," "a zealous supporter of the monarchy." In a few years after his return to England he had turned entirely to the other side, reversing the operation of time and self-interest on so many of his contemporaries, whose change from youthful republicanism to soberer views was explained by the maturing of their minds, as well as in some cases by the opening up of their worldly prospects. Cobbett, for his part, seemed incapable of holding any opinion after it was fully proved to him that it was the opinion of the reigning class, and that honour and advancement in the ordinary meaning of the words lay that way. To snatch popularity and profit from the expression of sentiments which were all but rebellious, and to keep his standing in the very teeth of superior power, was his dearest ambition

He was in and out of prison at intervals during the next dozen years, sometimes for "seditious libels"—sometimes for audacious comments upon the action of Government. His longest term of imprisonment was in consequence of his animadversions upon the flogging of men in a militia regiment, a freedom which cost him a thousand pounds and two years in Newgate. Some time later he was obliged to flee to America a second time to escape the action of a new law which was passed in Parliament, with a special view to the punishment of such offences—but neither imprisonment nor exile prevented the appearance of the *Weekly Register*, which he went on launching at the head of all in power, reducing its price at one time, and calling his thunderbolts "Twopenny Trash," in order to reach a wider audience. He came back from America in a calmer condition of affairs after the Peninsular War was over, when the State, less alarmed by the internal heavings of the popular volcano, had abolished the law aimed against him and his rebellious brethren of the press—but the return of the once devoted champion of kingly rights was now considered, in some places, dangerous to the national peace. The authorities of Manchester forbade his entrance into their town, and published placards, warning all well-disposed citizens to stay indoors, in case he should force his way into their streets. This born revolutionary had by that time changed all his principles, and was not only republican, but free-thinking, bringing with him, as sacred relics, from America, the bones of Tom Paine, a name which made the hair stand erect on the head of British virtue. A great part of the wild prejudice against him was doubtless due to the mad brag of sedition, irreligion, and disloyalty thus made, and the association with his own of a name of such bad repute. Never was there such a squalid version of an apotheosis; and Cobbett soon discovered that even to the

most advanced free-thinkers and the wildest revolutionary the martyr of his ignorant and hot-headed fancy was an unsavoury saint.

It would be vain, however, to attempt to follow the entire course of this extraordinary egotist and braggart. He was throughout all his life a consistent type of a stubborn English clown, his mind entirely untouched by any ameliorating influences from the grammar which had formed his education, and quite incapable of perceiving the relations of affairs, or taking anything but the most positive and practical view of things around him. Thus he never actually changed his mind at all through all the apparent divergences of his opinion. His principle was opposition to the powers that be, in violent reaction from that submission to the same powers which he was born to. His supposed education so laboriously and conscientiously acquired, the "rare conduct and great natural talents" of which he was so sincerely conscious, added to a natural delight in fighting, and intense sense of his own superior wisdom, all tended to produce this reaction. He was the Hampden of the fields, not mute nor inglorious, mixing up the shrewdest natural wit with the most impenetrable obtusity, seeing vividly in one small circle, but outside it not at all, and bringing the spirit of fierce village quarrels, and personal feuds, with all the unbounded power of vituperation which belongs to them, the sudden offence, the spite and fiery intolerance of the uneducated, into public affairs: a strange evidence of how the absence of the atmosphere of education tells upon those who have emancipated themselves from actual ignorance. But this very positivism and personal consistency of opposition had a force upon the multitude which reason and moderation seldom possess—and Cobbett was on the whole, notwithstanding all his misfortunes, a prosperous man. He got into Parliament before he died, and, sobered by that

responsibility, conducted himself there with greater moderation than at any other period of his life.

But, on the other hand, Cobbett was master of the most excellent and vigorous English, simple, nervous, and to the point. Even his long expositions of past quarrels, and spiteful, personal attacks upon men dead and forgotten, have a certain interest, so living is the narrative, full of hot impulse and feeling, and boundless graphic detail. And in the foreground of everything he writes, the centre of all, is always that lively, amusing, hot-headed, wrong-headed self, a being inaccessible to reason, swayed by sudden impulses, by rapid mistaken impressions, by side gleams of confused reflection and distorted perspective so far as concerned the great public affairs into which he rashly threw himself without training for the work or understanding of its real bearings. But when we turn to the other side of his character, and find him in scenes which he thoroughly understands, in the fresh rural landscapes, and humble thrifty houses, and village economics among which he was bred, he is a very different person. Occasionally we come to a bit of fine observation of nature which would not have misbecome White of Selborne: and his pictures of home-scenery are often as touching and real in English sweetness and homely subdued beauty as if they had come from the hands of Gainsborough or Constable. In this branch of art he has no violent effects, no tempest or passion, but the soft veiled skies, the hazy distance, the cheerful homesteads of a purely English landscape, with the birds singing all about, the larks in the grass, the swallows under the eaves. And here his constitutional brag, and sense that what *he* does must always be admirable, cannot take away the excellent good sense of his advice, or the inspiring spirit of domestic love, honesty, and truth, which is his principle of education. He was himself far too busy, too perpetually occupied, too

wrong-headed, to learn anything out of the larger lessons of life in his own person: but his system of training, as he expounds it, is far more liberal, more noble and generous, than anything else in him, and his love and appreciation of the country and domestic life are always fine. It was to be sure the picture of an individual house among productive gardens and blossomed trees, where his word was absolute, and himself regarded as the first of mankind, which was Cobbett's symbol of rural life, But in that home he was no doubt worthy of the love and sway he demanded. Here is a little vignette, taken at random, which is not a bad instance of his power. He has been describing with all the self-sufficiency of a man who has travelled and seen the world, and who has made his way, and has everything handsome about him, the impression of smallness and insignificance made upon his mind by the scenery of his native village when he returns to it—till nature suddenly seizes him, and reveals, notwithstanding all his pride and good-fortune, the heart still beating in his well-to-do breast.

"Everything was become so pitifully small: I had to cross in my postchaise the long and dreary heath of Bagshot, then, at the end of it, to mount a hill called Hungry Hill; and from that hill I knew I should look down into the beautiful and fertile vale of Farnham. My heart fluttered with impatience mixed with a sort of fear to see all the scenes of my childhood. There is a hill not far from the town called Crooksbury Hill, which rises up out of a flat in the form of a cone, and is planted with Scotch fir-trees. This hill was a famous object in the neighbourhood. It served as the superlative degree of height. . . . Therefore, the first object that my eyes sought was this hill. I could not believe my eyes—literally speaking, I for a moment thought the famous hill removed, and a little heap put in its stead; for I had seen in New Brunswick a single rock, or hill of solid rock, ten times as big, and four or five times as high. The postboy, going down hill, and not a bad road, whisked me in a few minutes to the Bush Inn, from the garden of which I could see the prodigious sandhill where I had begun my gardening works. What a nothing! But now came

rushing into my mind all at once my pretty little garden, my little blue smock frock, my little nailed shoes, my pretty pigeons that I used to feed out of my hands, the last kind words and tears of my gentle and tender-hearted and affectionate mother! I hastened back into the room. If I had looked a moment longer I should have dropped"——

And if we added another line the sentiment would drop down ten fathoms deep into bathos and vanity: for this strange mixture of a man, with the tears still in his eyes, immediately looks down upon his clothes to reflect, what a change! and remembering that he had dined the day before in company with Mr. Pitt, and been waited upon by men in gaudy liveries, he puffs out his chest, and swells his feathers with the habitual brag. "I had nobody to assist me in the world, no teachers of any sort; nobody to shelter me from the consequences of bad, and no one to counsel me to good behaviour. I felt proud"—— Thus was formed one of the most notable demagogues of his time. All his warm energy and passion have not been sufficient to keep him from oblivion, but yet there are many pages in his works that the world should not willingly let die.

While so many humble persons were having their say in the literature of their times, two of the richest men of the day also came upon the stage, with a whimsical variation in the tone. They have each retained the name of the productions that gave them fame. We still speak of "Anastasius" Hope, and recognise the other as Beckford of Vathek more easily than if we called him Beckford of Fonthill, though it is true that neither the names of the books nor those of the men produce now a very lively impression on the present generation. Curiously enough, both of these millionaire writers were men whose wealth forms one of the chief features of their character, persons of magnificent tastes, living like princes, or rather like those eastern potentates, whose houses and

habits are too gorgeous for anything but an Oriental legend or fairy tale. Beckford was the son of one of the wealthiest of Englishmen, the representative of a rich West Indian family — Jamaica being in those days a golden island, as rich as it is now poor—upon whom money poured from all sides, and who was like Whittington, twice, if not three times, Lord Mayor of London. Never was a young prince more surrounded by worship and observance than the young heir to "one of the first fortunes in the kingdom," whose wealth was increased by the savings of a long minority, and who, when he came into possession of his fortune, seemed, to the dazzled imaginations of all around, to have the whole world before him. His youth was spent in wandering over the earth in all the most beautiful scenes, and with all the advantages of a wealthy Englishman—tutor, physician, and a suite of servants accompanying the young man in his wanderings. This luxurious training and abstraction from all the rougher encounters of schoolboy life, which now would be thought doubly necessary as ballast to so much wealth, helped to confirm young Beckford in those weaknesses of character which made him in after years a luxurious recluse, something between a hermit and a Sultan, a shy and proud man accustomed to follow his own caprices, and to live surrounded by parasites and flatterers, intolerant of the equality of ordinary society, and that operation of "finding your level," which it is the highest mission of fashion now-a-days to carry out.

Very early in life, in his twenty-second year, Beckford wrote *Vathek*—with characteristic caprice in French; and it was not till some years later that an English translation saw the light. Thus, bizarre in this point as in others, his work appeared in his native language only at second hand, an English audience, or indeed any audience at all being apparently indifferent to the young potentate whose

pleasure it was to compose a story for his own entertainment. He had always been disposed to study the Oriental languages and literature; and gave up Latin and Greek, as soon as he was his own master, for Persian and Arabic. The story of Vathek is a wild parable of crime and punishment, with gleams of modern humour quaintly incongruous with the form of the Eastern apologue. Thus we are told that the hero, "ninth Caliph of the race of the Abbassides, and grandson of Haroun-al-Raschid," had an agreeable and majestic countenance—but when he was angry, one of his eyes became so terrible, that nobody dared look at him; the unfortunate person upon whom his gaze was fixed immediately fell back, and sometimes died on the instant. "For which cause, in fear of depopulating his states, and making his palace a desert, this prince permitted himself to be angry very rarely." His palace, which is full of unimaginable pleasures and delights, is described with all the unction of a builder of palaces; and around the prince, who is himself a mildly pitiless despot, unconscious that there can be any will in the world but his own, is a group of vaguely yet cleverly indicated figures—his mother, Carathis, who is a Greek, curious in every kind of forbidden learning and grotesque diablerie, his fussy Vizier, envious and servile, and a comic eunuch, fat and important, whose life is made a burden to him by the caprices of the ladies under his care.

Vathek himself, having everything that he can desire, is naturally weary, and longing for a little more. He is visited after some time by a hideous Indian pedlar who brings wonderful wares, but will not speak to him, and cannot be slain even by the terrors of his eye, and who escapes from the prison where he has been placed, leaving behind some mysterious sabres with inscriptions, which, being with difficulty deciphered, tantalise the prince with

descriptions of the country in which they were made, which is worthy of the greatest prince in the world. When a long delay has wrought the Caliph to the verge of madness, this hideous Giaour reappears, and after some ludicrous preliminaries, offers to Vathek riches and glory, to which his present state is as nothing, on condition of his renouncing the faith of Mahomet. To this the prince agrees with much ease, cementing his compact by treating his new and grim ally to the blood of fifty children—a regale upon which the Indian insists. To procure this a great feast to the children of the city is proclaimed; and Vathek, selecting fifty of the noblest, leads them out with games and rejoicing, something as the Pied Piper of Hamelin did in after days, till they reach the edge of a pit, into which he flings them one by one with great cheerfulness. This naturally leads to a trifling disturbance in the city, caused by the unreasonable fathers and mothers; but, notwithstanding, Vathek sets out with great pomp on the journey prescribed to him by the Giaour: on which, however, he is stopped by a romantic adventure, falling in love with the daughter of an Emir who offers him hospitality on the way. When he has possessed himself of this lovely lady, Nouronibas by name, at the cost of her father's life, and by breaking all the laws of hospitality, offences of which she is a willing partaker, he is recalled by the sudden arrival of his mother to the necessity of proceeding on his way. The Giaour had promised to open to him the palace of subterranean fire, and to put him in possession of the treasures accumulated by the pre-Adamite Sultans. Both Carathis and Nouronibas are eager for these acquisitions, and he resumes his journey, accompanied by his bride. When they reach the hall of Eblis, the end of their journey, the description reaches a kind of Dantesque grandeur. Full of eager expectation, the new-comers pass through a great

hall full of pale figures coming and going ceaselessly, taking no notice one of the other, and holding each his hand pressed upon his heart. This alarms them a little, but they are reassured by Eblis himself, who tells them that all the wealth in his dominions, and power indescribable over all the Genii, so that whatever they wish will instantly be performed, are at their disposal. They are then led into an inner hall, where are the Sultans of the past, whose measureless riches they are about to enjoy. They are, however, appalled to find these potentates laid out in a terrible torpor upon biers of cedar wood, just sufficiently alive to feel their misery. The first and greatest among them is King Solomon, who, as the new-comers approach his bed, lifts up a solemn voice, and informs them of their sin and misery. When he concludes, he throws up his hands, one of which has been on his heart like all the rest, and the terrified spectators see his side transparent like crystal and his heart in flames.

> "At this terrible sight Nouronibas fell as if petrified into the arms of Vathek. 'O Giaour!' said that unhappy prince, 'whither hast thou led us? Let us go from this place. I free thee from all thy promises. O Mahomet! is there no mercy for us?' 'No, there is no more mercy for you,' answered the pitiless Genius; 'know that this is the sojourn of despair and revenge. Thy heart shall burn like that of all the worshippers of Eblis: a few days are allowed thee before that fatal moment, use them as thou wilt; make thy bed of gold, command the infernal powers, survey these immense caverns at thy pleasure, no gate shall be closed before thee. As for me, I have fulfilled my mission.'"

The wretched lovers have, however, no inclination now to attempt to enjoy the pleasures for which they encountered their doom. They roam about the dismal place awaiting their fate in all the despair of anticipation. The only use Vathek makes of his power is to order the Genii, with vindictive rage, to bring his mother, the corrupter of his youth, that she at least may share their torments.

Carathis comes; and once more it is the spirit of modern humour which breaks into the gloomy tale. The inquisitive witch, greedy of power and knowledge and money, is not the least discomposed by the gloomy scene. The half-dead kings are nothing to her. She exerts her newly-acquired power at once, compels the Genius to show her all their treasures, snatches at all their charms and talismans, and, when the fatal moment comes, is struck by it in the midst of a crowd of obsequious spirits whose homage she has exacted.

These scenes are really powerful. They are far more striking than Southey's pyrotechnic horrors, and recall in the pale crowds, whose horrible indifference to everything but their own tortures makes of each one a hopeless solitary, something like the terrible hell of Dante. It is curious that the most luxurious dreamer of his time, the lavish, wealthy, self-indulging master of the only fairy palace of modern times, should have produced this one gloomy picture, in which there seems a subtle mockery of his own life as well as that of his hero—and should have done no more.

He did do more, however: he built a wonderful palace, Fonthill Abbey, close to the very handsome house which his wealthy father had built, but which the son demolished as not important enough for him. He made his new building into a palace of enchantment, the wonder of its day, filling it with everything that was gorgeous and costly. Annoyed by the intrusion of sportsmen on his grounds, he had a wall of twelve feet high, extending to a distance of seven miles, built round his property. Within this enclosure hundreds of workmen laboured at the new palace, to which he gave, one does not know why, the name of Abbey. Sometimes when it pleased his caprice to hurry the work, it was continued by night, by torchlight. When the house was completed

it was furnished in the same magnificent manner. "He deposited diamonds in a china cup," says the awed and admiring narrator of all these wonderful doings. Inside the seven miles of wall, nineteen hundred acres of ground afforded every variety of beautiful scenery, landscapes both soft and wild, space enough for every kind of recreation. The establishment included, besides a host of servants, a physician, a learned antiquary, who acted as secretary, and a musician of great accomplishment. Vathek himself had scarcely a combination of delights more stately and splendid than were included within. "The ladies," spoken of in bated breath, two daughters whom his young wife, dying after three years of marriage, had left to him, lived in a house in the park, with an establishment of their own, where their education was carried on as if they had been princesses. In this wonderful retirement Beckford lived for many years, until his fortune, which had been diminished by various losses, proved insufficient to keep up the vast expenditure which the house required. Instead of diminishing the expenditure, he sold the place. Perhaps by this time he had got tired of his vast plaything. But he immediately proceeded to make himself another house, scarcely less splendid, though smaller than Fonthill, in Bath, where all his most cherished treasures were removed, and where he lived and died. A more strange episode was never worked out upon the sober web of literary history. Our space does not permit any account of the finery, the splendour and beautiful things with which he was surrounded. But this lover of the beautiful cast off his eldest daughter, who would not marry another millionaire as he wished, and left her to languish in poverty, while he transferred everything he had to give and to leave to her sister, who did her duty and married a duke of her father's choice.

Thomas Hope had, if not a breeding so luxurious as

that of Beckford, at least, like him, the advantage or disadvantage of almost boundless fortune, and many similar tastes. He did not shut himself up in costly and fastidious seclusion, but he was one of the first to make an elaborate study of furniture and decoration, and his luxurious and splendid houses were part of himself and inseparable from his life. He was Dutch by origin, a merchant of Amsterdam, where the family still keep up their business connection. Eastern travel was perhaps, in those days, considering the much increased rate of travelling in general, more usual than now—the shores of the Levant having attractions besides those which occupy the tourist. Hope, no doubt, had unusual facilities for understanding the details of Oriental life, and his one tale is an elaborate exposition of Eastern society, of the Turks and the Greeks of that age when Turkey was still an appreciable power, and Greece an unformed nation, oppressed and rebellious, acknowledged by nobody. The story of Anastasius is that of a rascally Greek, cunning, subtle, and treacherous, according to the conventional idea of his race. It is very long, very elaborate: the tale is delayed continually, to furnish us with details of the varied life of the court, the harems, the mercenaries, the suspicions and dangers amid which both rulers and favourites lived. It is a story of adventure and manners, rather than of character, since there is no one who attracts the reader's regard throughout, and the hero himself is an odious schemer, whose successes and misfortunes are equally far from attracting our sympathy. But the book had a success which we cannot see that it deserved, and has rescued its author from the oblivion, which even wealth has no spell against, at least, in so far as this, that everybody in his own generation had heard of it, and that even now a vague sense of identification comes to the public mind when any one, asking to what Hopes

a well-known family belongs, is answered not by any technical designation or county title, but by the name of Anastasius, a curious distinction—so small, yet enough to outlive a great many more substantial things.

Another writer who flourished in the end of the century, a little preceding some of those here mentioned, has a special interest for us, not only for his own productions, but for the strange genius mixed with much alloy, but yet genius still—more remarkable than any other of his father's works—who has descended to us from him. Isaac Disraeli was the son of a Jew, not of the merely moneyed kind, with which we are most familiar, but of those who boast a high European lineage, as well as the misty honours of Eastern centuries. The family, according to the account given by its last distinguished member, had gone from Spain to Venice in the fifteenth century, where it adopted, in gratitude for its escape from Torquemada and the Inquisition, the name of Disraeli, "a name never borne before or since by any other family." The father of Lord Beaconsfield sprang from a race of keen and successful merchants, but was himself most strangely unlike them, a dreamy recluse and student, breaking all the traditions of his family with such an obstinate if gentle and sentimental impracticability, that nothing was possible but to leave him to the pursuit of his studies and fancies. From his childhood he showed himself "doomed his father's soul to cross;" and his mother was a passionate and discontented personage, who had "imbibed a dislike for her race," and was "so mortified by her social position, that she lived until eighty without indulging in a tender expression"—a most uncomfortable parent. The young Isaac, after an unhappy childhood, drove his father frantic by "producing a poem," which seemed to the wealthy merchant to promise only beggary and ruin to his only child. "The unhappy poet was

consigned like a bale of goods" to the correspondent of the firm at Amsterdam. When he returned at eighteen he was "a disciple of Rousseau," burning to prove himself the most sentimental and tender of sons to the mother whose indifference he had probably forgotten. But when he would have flung himself upon her bosom, the lady "burst into derisive laughter," ridiculing at once himself and his appearance, which was eccentric and unusual. "Whereupon," says his son, "Emile, of course, went into heroics, wept, sobbed, and finally, shut up in his chamber, composed an impassioned epistle. My grandfather, to soothe him, dwelt on the united solicitude of his parents for his welfare, and broke to him their intention, if it was agreeable to him, to place him in the establishment of a great merchant at Bordeaux. My father replied that he had written a poem of considerable length which he wished to publish, against Commerce, which was the corruption of man!"

The impracticable youth, however, was not always persecuted: such parental severities can last only for a time, and though the gentle sufferer in this rich household was not over happy, yet by and by he emancipated himself. His first publication was some "polished and pointed" verses on the Abuse of Satire, aimed at the famous "Peter Pindar" Wolcot, then maintaining a free fight against all the powers that were. The "effusion" had such success as was possible, enough to fill the journals and startle the stern parents with their son's fame. Shortly after he made the acquaintance of young Samuel Rogers, then gaining his little reputation as a poet, and of "Mr. Pye"—a celebrity whom even the encyclopædias scorn, and of whom we know nothing save that he was Poet-Laureate (!) before Southey took and vindicated the office. He was "a master of correct versification," Lord Beaconsfield says. Young Disraeli did not reach even so

far as young Rogers on the soft little slopes of Parnassus, but he was led to the odd byway of literature in which he gained his reputation, by means of a residence in Exeter, which brought him into the literary circle then flourishing there. Here, as so often before, a new and gentle group of amateur writers opens upon us once more. Exeter, like Lichfield, was full of gentlemen who could all compose agreeable verses, the chief among them being Dr. Downman, "a poet and physician, and the best of men." The names of Hole and of Hayter say little to posterity, and of all the group the only well-known name is that of the composer Jackson, who was also, according to Lord Beaconsfield, "an author of high æsthetical speculation." "It was said," the same authority adds, "that the two principal if not sole organs of periodical criticism at at that time, I think the *Critical Review* and the *Monthly Review*, were principally supported by Exeter contributions." It is not usual now-a-days to find a little local school of letters in every country town, and society is no longer parcelled out into pieces, but hangs together from one centre in a way perhaps more complete but not so picturesque as of old; but it is curious to find starting up about us, as we pursue our investigations, another and another long-forgotten circle, all conscious of excellence, and many perhaps looking for nothing less than immortality.

Isaac Disraeli was, as has been said, a poet to begin with, like so many of his compeers. The kind and good Sir Walter, with that capacious memory in which all kinds of strays and waifs found refuge, and with that genial desire to give everybody he met pleasure, which in him was never insincere, met the collector of literary curiosities years after, with the delightful compliment of "reciting a poem of half-a-dozen stanzas," which Disraeli had written in this early period. "Not altogether with-

out agitation," says his biographer, "surprise was expressed that the lines should have been known, still more that they should have been remembered." "Ah!" said Sir Walter, "if the writer of these lines had gone on, he would have been an English poet."

This, however, whether he could or could not have attained it, was not to be. Chance directed him to the quiet byways of literature, in which he achieved a mild but complete success. The *Curiosities of Literature* is more interesting than many a book of higher pretensions, and some of Mr. Disraeli's essays were good and able: but, perhaps, had not his son arisen greater than he, we should have thought less of the father: and granting the interest of his chief publication, there is no sort of greatness in it, nor original power. The character of the man, however, as given by his son, affords us a very clear and concise sketch of the literary workman. "He had not a single passion or prejudice," says this unquestionable authority. "He disliked business, and he never required relaxation. He rose to enter the chamber where he lived alone with his books, and at night his lamp was ever lit within the same walls. In London his only amusement was to ramble among booksellers. In the country he scarcely ever left his room but to saunter in abstraction upon a terrace, muse over a chapter, or coin a sentence." He had arrived at the mature age of forty-five "before his career as a great author influencing opinions really commenced." The reader at this distance will perhaps imagine, wonderingly, whether that career ever commenced at all. He lived to be a very old man, like so many of the subjects of this history. Great genius may exhaust and wear out, though chiefly when associated with great passions; but a little genius is a wonderfully safe and comfortable possession. It gives interest to life whatever may be its burdens, and cheers the weary years.

Disraeli published some historical books, one of them an elaborate work on the *Life and Reign of Charles I.*, and various essays, one of which, the *Essay on Literary Character*, his son considers "the most perfect of his compositions," besides many shorter articles. But the work by which he will be known is the *Curiosities of Literature*, though it is neither the most ambitious nor the most serious of his productions.

It seems scarcely necessary to refer again to the two sisters, Sophia and Harriet Lee, who have been already named, the authors of the *Canterbury Tales*, stories not important enough to have any national value, though they have lived longer than they had any particular right to do, and may still be found in old libraries: nor to good Mr. Bage near Tamworth, whom Godwin, about the time when he tried to persecute and argue Miss Harriet Lee into marrying him, went out of his way to see, asking, "Are not such men as much worth visiting as palaces, towns, and cathedrals?" Bage was born a miller, and was a well-to-do person with paper-mills, beside those that ground the grain. To "dissipate his melancholy" under some special trouble, he began to write novels; and afterwards, when he had formed the habit, went on producing them methodically one every two years, as children are born in well-regulated families. Where have all those children of the fancy gone? "Hermsprong," which Godwin reports to be "his sixth," very much indeed as if it had been a baby, is the one that is best known.

We will not turn back to Hannah More, though she was no older than several of the writers here described. She too, amid her band of maiden sisters, was still living and writing when the century began, and *Cœlebs in search of a Wife* was not published till 1805; but she was a woman of the Johnsonian age, with little opening in her to the promise of the new times to come.

Another gentle figure, however, which is altogether modern, came into the world in the end of the old century, in Liverpool; then a much less important and bustling place, with no such overwhelming rush of trade and commercial activity as now, with its old church surveying the old quays and great river, lively and brisk with traffic although smoke and steam were absent. Felicia Hemans was all that the daintily cultivated flower of a wealthy merchant family is apt to be—over sweet, over refined, in natural contrast to the primitive vigour and stronger atmosphere of her birthplace. But she was not brought up among the traders in the wealthy town, under the shadow of the wings of Roscoe and his court, but in Wales, where her family retired after some mercantile catastrophe. She was Felicia Brown in those days, and the embodiment of a muse such as Gray or Collins would have drawn—"distinguished from her cradle by extreme beauty and precocious talents." At fifteen she had already published a volume of little poems, which some heartless critic handled roughly. "The young poetess was then . . . in the full glow of that radiant beauty which was destined to fade so early. The mantling bloom of her cheeks was shaded by a profusion of natural ringlets of a rich golden brown; and the ever-varying expression of her brilliant eyes gave a changeful play to her countenance, which would have made it impossible for any painter to do justice to it." Whoever the wretched being might have been that cut her pretty verses to pieces in his obscurity in 1808, who could now lay a hand upon this pretty creature? Her poems are like this description of herself. They are always sweet, liquid, and melodious: they mean as much as so soft and beautiful a nature ever requires to mean: "Sweet records, promises as sweet"—the gentle sentiments that lie on the surface, subdued sorrows, chastened happiness. She married in her Welsh solitude

a certain Captain Hemans, "by no means destitute of advantages, either of person or education," with whom her life was not happy—but who was so kind as to take himself away before things grew intolerable, leaving to her the undisturbed possession of her children, which was enough for happiness of a moderate kind. Her little biography is very reticent, but the glimpses it gives of the rural household, the boys and their mother, are very pretty and touching. The group of children, whose "heroine" is "mamma,"—one of whom sprang up from his Latin exercise, and shouted out, "Now I am sure mamma is a better poet than Lord Byron"—surround her with such a soft background of cherub faces as suits at once her pretty genius and her gentle personality. She wrote a great many poems which children will always willingly learn, and gentle souls admire—full of tenderness and soft pathos, and the purest sentiments. In the first half of the century she was the first love of the girls in poetry, as Scott was the first love of the boys. But by this time her works have faded like a bouquet of flowers. They continue to be printed (we think) in pretty editions, and sold—but it is with a smile that we hear of the great fame of Mrs. Hemans. She died young, and her little story is throughout most tender and touching. And her verses linger in the memories of people who are growing old, with echoes and fragrances in them of their own youth—but are gone out of mortal ken for any more important use.

About the same time, in Manchester, another poet of the same gentle kind, but who never reached to the same distinction, and whose name is scarcely remembered at all, lived and flourished. She was the friend of Wordsworth, and left an interesting reputation behind her, mingling to some degree in the literary activity of the time, writing critical articles and general literature, as

well as now and then the sweetness of a little poem; while at the same time bringing up, as well as an elder sister could, a family of orphan children. Save for her connection with Wordsworth, and the similarity of her slight productions and position to those of Mrs. Hemans, it would be scarcely worth while to place the name of Maria Jewsbury on record at all. Her sister Geraldine took, at a much later period, a respectable rank as a novelist. Manchester does not seem to have had any pretension, like its neighbour town, to be a literary centre. Here is the only little glimpse of a taper which at that moment it seems to have possessed.

If we were to say that Bishop Heber was a sort of male twin to Mrs. Hemans, we fear that the comparison would be received with little favour by many readers. So few of the poets of the time accomplished all the rites of education, and trained themselves, as ancient tradition bade, on the classic models, that it is disappointing to find, in the rare instance of a fully-qualified academical poet, an example so little remarkable as this excellent and blameless soul. In the dearth of writers properly marked with the sign-manual of the Universities, it ought to be noted that Heber gained the prize of poetry at Oxford, fulfilled all his studies there with distinction, and became a Fellow of All-Souls. So much for so little! But it has never ceased to be true that poets must be born, and cannot be made. He was the son of a clerical race: of a nature born to goodness and every excellence, with nothing wayward in him or irregular. His poems are the utterance of the most spotless of well-regulated minds and devout spirits. It is doubtful whether the best of poets ever produced anything more widely known and popular than the "Missionary Hymn" about "Greenland's icy mountains," or that which celebrates the Star in the East of the Epiphany. So that this mild singer had his reward

of the most liberal kind in the affectionate enthusiasm with which the simple-hearted religious crowd regards the writers of its sacred songs. The kind of tranquil life he led, and the boundless correspondence which proceeded from his rectory, have been put before the world on various occasions. His letters were voluminous and fluent, and always, it need hardly be said, perfect in sentiment: but they have few literary attractions. He became Bishop of Calcutta in 1823, and addressed himself to his work there with great courage and faithfulness, dying of it in a very few years—an end which has given him, to many, something of the sanctity of a martyr.

Another poet of the same culture, and of more ambitious pretensions, was Dean Milman; like Heber, the author of a prize poem, and distinguished in his University: but not, unfortunately, born to a more successful issue in this branch of attainment. When Heber had subsided into a country living, Milman was Professor of Poetry in Oxford, a post which ought to involve a crown of poetical honour not much below that of the Laureate; and he was perhaps the best poet living who had any right to a place within those academical precincts—which was not saying much. He made some very bold and ambitious ventures in the poetical drama, and succeeded so far as to have his tragedy of *Fazio* acted at Drury Lane. But the public did not sustain his claims to the name of poet, and he has fallen into the limbo of poetical writers, like those who "senza speme vivono in disio." His more important work, however, held a different place, and the man who is recognised as the historian of Latin Christianity does not need to break his heart over the failure of poetic fame.

In a still more humble obscurity, in distant spots in the country—in Bedfordshire, the *Farmer's Boy* Bloomfield; in Suffolk, the mild young Quaker poet, Bernard Barton; in hardheaded Yorkshire, the rude and fervent

spirit—usually inspired with political themes, but sometimes dropping into unexpected strains of tenderness—of Ebenezer Elliot; in Lincolnshire, among the level fields, a village minstrel, John Clare, ploughboy and peasant—not much more than glow-worms about the hedgerows, still kept a little flicker about of poetical light. The better part of Elliot's productions, the often stirring and effective strains which got him the name of the Corn Law Rhymer, were of a later date; but these softer chorus-singers had all begun in the early morning of the century to swell the greater voices which had made of that new period a renowned and great poetic age.

In another branch of literature another most charming and feminine figure appears out of the rural shades, from the village scenery, which was her best inspiration, towards the end of the first quarter of the century, beyond which we do not pretend to go in this record. (Jane Austen, a greater competitor for fame, we reserve for a separate notice.) The name of Mary Russell Mitford is one which recalls to us many of the most delightful idyllic sketches in the language. The landscape clears round her, the village roofs ascend, the little town builds itself in the clear sunshiny atmosphere, where merit, sometimes depressed, is always happy in the end, and every wrong is righted and every mistake made clear. She was the daughter of a foolish prodigal, an attractive and dashing fine gentleman, a sort of man, fortunately, more common in novels than in life, who wasted his daughter's money and lived upon her affection, shutting her out from everything in life but his own service. She, always cheerful, tender, and patient, contentedly resigned comfort and tranquillity, as well as fortune and position, in order that he should have everything he wanted, and when their money was spent, worked for him with heroic devotion. The story would be a beautiful one if it were not too painful

to see one life thus sacrificed to the caprices of another. Filial devotion is heavenly, but it rouses a sort of moral indignation when we see how its very greatness is the occasion of developing unutterable meanness on the other side. This, however, is a view of self-sacrifice which it is very painful to be forced to take, and which, let us thank Heaven, is always an unpopular view. The world takes an unfailing pleasure in the spectacle of supreme and self-forgetting virtue, little as it may feel inclined to copy it. Miss Mitford did more for her father than to endow him with all her worldly goods, and when they were gone to labour for his living; she did all that in her lay with every wile of her delightful power, and all the special pleading of affection, to represent him to us as the hero which he would seem to have remained to her—the best, most benign and gracious of mankind. She was eminently well connected, taking the Russell in her name from the house of Bedford, and thus vanquished the sorest infliction of poverty, the slights and scorns of social life. Her stories and her autobiographical ramblings convey to us many glimpses of her youth, which, notwithstanding many ups and downs of fortune, had evidently no small amount of brightness in it. But her outset upon her literary career was after a far more ambitious sort than her after successes. The smiling girl, whose pretty experiences among her kindred and the rural gentry whom she sketches so happily were all of the simplest and most artless kind, and who had already cares about the butcher and the baker, though she had seen her father run through more than one fortune, suddenly stepped forth upon the world with no less a production than a tragedy, which was played upon the big stage of Drury Lane in 1823, and covered the young woman with glory. Perhaps, by the way, she was no longer a girl when this startling success took place; but she was one of those

who are always young, and the predominance of her father in her story keeps her in the position of youth. Her *Julian*, like so many other plays which at the moment secure everything that critics and listeners can say of applause and admiration, died soon after, and has never reappeared on the stage. *Rienzi* was also acted, and met with similar good fortune. They are perfectly readable now, with much pretty verse and many fine situations; but nobody thinks of reading them, nor has any theatre attempted to produce them on the stage. It is almost a commonplace to say this: it would seem to be the ordinary fate of poetical dramas of average merit, without either great genius or a powerful hold upon the intricacies of stage business.

These productions were like meteors blazing and falling. The real fame of the author rests upon a very different foundation. Whether she was cast down by the very temporary character of her first reputation, we are not told; she was at all times so reasonable, so sweet-tempered, and so ready to do what her hand found to do, that, even had she been so, it is not likely she would have made much show of her feelings. But it was after this temporary glory was over—when it was forced upon her that she was not as Shakspeare, but rather as Joanna Baillie, as Barry Cornwall—as Coleridge, ever so much greater than either—had been, a dramatist of the moment, without power to lay hold upon the public, or any real ascendency over its imagination—that she turned to the humble everyday scenes about her, the simple stories of the hamlet, the changes and chances that befell her humble neighbours, the strain of common life. Nothing more pleasant, more touching, more fresh and odorous of the fields and farms, could be—or more true to English life and country manners. *Our Village* became as well known to the English-speaking world in a year or two as if that

collection of cottages in leafy Berkshire had been one of the centres of the world. And these delightful little pictures are still as fresh, as lifelike as ever, scarcely even old-fashioned, though there are no modern appliances in them, no telegraphs or railways, but long anxieties and waiting and patience, which, perhaps, for the poet's and the story-teller's art, are better things. Miss Mitford can scarcely be said to be a creator; but no one has clearly annexed and brought in to the realm of literature a more real piece of English soil.

JOANNA BAILLIE, born 1762; died 1851.
Published Plays on the Passions (1st volume), 1798.
" " (2d "), 1802.
" " (3d "), 1812.
Miscellaneous Dramas, 1804.

THE LITERARY HISTORY OF ENGLAND.

CHAPTER III.

LONDON: THE UPPER CIRCLE: ROGERS—BYRON—MOORE.

It is Talfourd, we think, in his *Memorials of Charles Lamb,* who compared the cheerful whist parties in those little rooms high up among the housetops of the Temple, where the brother and sister held their homely court, with the much more ambitious home of the muses, in the gorgeous and stately retirement of Holland House. Nothing could more clearly exemplify the difference between London *bourgeois* and literary, and London fashionable, elegant, and lettered. The former is poor and homely, and familiar in all its circumstances—the other, brilliant in external aspect, much farther reaching in its associations, and full of that involuntary consciousness of being the very best and finest development of society, which is only kept from the height of arrogance by being involuntary, and with no possibility of doubt or argument about it. A glimmer of uncertainty as to whether they are really the great people they think themselves to be, will dash the confidence of the most self-sufficing circles on a lower level. The grand distinction of a society which is socially elevated as well as

mentally distinguished, is that the mere force of circumstances takes away all doubt upon the matter. However determinedly your man of letters may assert that he is Sir Oracle, the dogs will bark whatever he may say; but when he is a great potentate besides, these vulgar voices are hushed in awe, and nothing contradicts his conviction. It is true that there are audacious persons now-a-days to whom Holland House with all its grandeurs, and the bated breath with which the initiated once spoke of that abode of the gods, and the undisclosed anxiety with which they hoped to please its Juno and Jupiter, have an amusing, half-pathetic side — as showing at once the smallness of the finest shrine, and the pettiness of the most elevated humanity. The poorer and less important sphere, where outside circumstances are nothing, and where men are free to exhibit themselves and their characteristics in their own way, has all the advantage with posterity. We cannot get free of the splendid rooms, fine enough to have an art-history of their own like a mediæval city, nor even in a lesser way can we get free of Rogers's view over the park, his pictures and his luxuries. But there they stand, the other side of this world of literature, mingled with all the flutter of society, the gossip of lords and ladies, the scraps of politics, the secrets of antechambers, all that spray of social life, if we may use such an expression, which fills the air, and confuses the view. Something is gained, indeed, for wherever imperial interests are touched upon there is, at the worst, a *faux air* of enlargement and noble aim, and at the best, a real dignity which mere individualism rarely supplies; but at the same time there is something lost, for it is difficult to make the flattered members of that "best society" aware that the greater part of their enlightenment is merely gossip, and the knowledge of what is going on "behind the scenes," on which they pride themselves, no more than the revelations of the back stairs.

Holland House, however, is unquestionably the most important and brilliant centre of literary society that we have known in England in recent days. It was the headquarters of a band of visitors on whom it conferred distinction, and who gave more distinction than they received. Naturally those who did not receive the flattering compliment of admission indemnified themselves by gibes and satirical assaults: while those who did, occasionally avenged the pricks and scorns to which they were subject under such a despotism, by after-revelations of discontent and rebellion. The master of the house was a man of some literary power and much accomplishment, whose modest hope expressed at the end of his life that, as "nephew of Fox and friend of Grey," he had cast no discredit on his position, conciliates the good opinion of posterity. But he was only a sort of good-natured god in this temple of the muses, often retired altogether from public view, veiled by illness, by gout and invalid habit from contact too close and general; while the ever active ruler of the community, familiar and imperious, a genial but sharp-tongued despot, exacting much worship, and spreading an atmosphere of awe around her, was Lady Holland, a woman who evidently added to the skill which could collect and manage the different elements of society, a great deal of that witty disregard for other people's feelings which keeps a little community in excitement and amusement, but leaves many a rankling recollecti n to come forth afterwards in bitter depreciation of the splendid reign and too autocratic rule. The mistress of a *salon*, who exclaims with serious concern, "What a pity! but couldn't you suppress it?" when one of her friends informs her he is about to publish a poem; who told Moore that his *Life of Sheridan* was a dull book, and interrupted Macaulay in his brilliant talk with, "Come, Macaulay, we have had enough of this," must have been a somewhat

alarming person. In most of the records of the society which she collected round her, a sense of her somewhat arrogant superiority, her careless treatment of the distinguished guests whose presence alone made her fine house more remarkable than other fine houses, is quite apparent. She treated them all with that mingling of admiration and contempt, condescension and flattery, which is so usual an attitude of the rich and great towards Art and its professors in general; but in her case, the bold sincerity of rudeness, the tantalising attractions of a caprice never to be calculated upon, and the charms of an unusually splendid and magnificent house, which it was a matter of pride to be connected with, made the guests endure, although it was impossible to prevent them from resenting. Macaulay has left the most graceful and benignant description of this great coterie, in magnanimous indifference to any of the snubs he received there. He was always fond of the idea of decadence and hoar antiquity falling upon the scenes with which he was acquainted; but Holland House still exists, defying all such gloomy imaginations.

"The time is coming when perhaps a few old men, the last survivors of our generation, will in vain seek among new streets and squares, and railway stations, for the site of that dwelling which was in their youth the favourite resort of wits and beauties, of painters and poets, of scholars, philosophers, and statesmen. They will then remember with strange tenderness many objects once familiar to them, the avenue and the terrace, the busts and the paintings, the carving, the grotesque gilding, the enigmatical mottoes. With peculiar fondness they will recall that venerable chamber, in which all the antique gravity of a college library was so singularly blended with all that female grace and wit could devise to embellish a drawing-room. They will recollect, not unmoved, those shelves laden with all the varied learning of many lands and many ages, and those portraits in which were preserved the features of the best and wisest Englishmen of two generations. They will recollect how many men who have guided the politics of Europe who have moved great assemblies by reason and eloquence,

who have put life into bronze and canvas, or who have left tc posterity things so written as it shall not willingly let them die, were there mixed with all that was loveliest and gayest in the society of the most splendid of capitals. They will remember the peculiar character which belonged to that circle, in which every talent and accomplishment, every art and science, had its place. They will remember how the last debate was discussed in one corner, and the last comedy of Scribe in another; while Wilkie gazed with modest admiration at Sir Joshua's Baretti; while Mackintosh turned over Thomas Aquinas to verify a quotation; while Talleyrand related his conversations with Barras at the Luxembourg, or his ride with Lannes over the field of Austerlitz: they will remember above all the grace, the kindness far more admirable than grace with which the friendly hospitality of that ancient mansion was dispensed. They will remember the venerable and benignant countenance, and the cordial voice of him that bade them welcome."

This delightful description balances with stately eulogium the revelations of private letters and journals, which show in many cases a schoolboy sort of anxiety on the part of the illustrious guests as to whether my lady would be in a good humour, or Lord Holland's gout not too severe to permit him to be visible, and a certain sense that things might possibly turn out badly at any moment, and those stately rooms and brilliant assemblies be closed upon them for ever.

Of the names mentioned above, Mackintosh, one of the most remarkable members of the society, must be left to another chapter for an outline of his life and works. He was one of the foremost of the "Scotchmen" whom Byron in his ill-tempered verses declared to "feed," and of the "critics who carouse" at "the banquets spread at Holland House." All the members of the belligerent band of the *Edinburgh Review* were to be found there by right of their party, just as, in the same right, they were banished from so much in their own capital. There were now resident of them in London, in the beginning of the century, Henry Brougham, beginning with characteristic energy

and power his wonderful career, a man never popular, yet impressing his fellows with a perception of boundless force, vivacity, and power, such as we scarcely attribute now to the robust and restless Chancellor, who gained every prize that his profession and his country could give, and yet remained in some inexplicable way always an unsuccessful man; Francis Horner, one whose abilities we have in a great measure to take on trust from the panegyrics of his companions—for he did not live to give much proof in literature of the powers they saw in him: and Allen, whose post in the household of Lord Holland made him a sort of vizier of the brilliant despotism. Mackintosh, the mild and candid, had his balance in Hallam, a historian of a different mettle, whose judgment cannot be called mild. And Sydney Smith, with the "faun-like face," which "was a sort of promise of a good thing when he does but open his lips," lent his lighter wit to dispel the sometimes oppressive atmosphere, a man able to meet my lady on her own ground, and laughingly extract the sting from her impertinences. The coterie would not have been complete without a certain number of lesser members, poets of society and amateurs in literature, such as Henry Luttrell—a brilliant man about town, with the faculty of writing agreeable verses, of whom Rogers says that "none of the talkers I meet in London society can slide into a brilliant thing with such readiness as he does"—a quality which of itself was recommendation enough.

The representative of poetry in this brilliant company was, however, Rogers himself, the last, as he is somewhere called, of the old school, the only wealthy member of the confraternity living, a patron of literature, as well as practising the same, at once Mæcenas and poet. He had a *cortége* and following of his own, not indeed equal to the sublime and exclusive circle of Holland House, yet important and distingushed, and as the years went on, including

all that was greatest in poetry and letters. It was his ambition to surround himself with beautiful things, fine pictures and gifted people, and the company he collected at his table for nearly half a century was in its way the best in England. His poetry was not of such noble quality: but the *Pleasures of Memory*, which he published in 1792, had more than its meed of praise, and has not yet ceased to hold an active place as a gift-book and prize-book in handsome bindings, while its position as a poem which no library can be without, is permanent. In those days it was read devoutly by all who professed any love for poetry, and exalted by the critics far above the hotly contested productions of Wordsworth and Coleridge. And his other profession of banker, and his beautiful house, and his wealth, gave Rogers such a position as, alas, the greatest genius by itself will never confer. He was the friend, in his early days, of Mrs. Barbauld and Isaac Disraeli, two persons who might almost be taken to represent the opposite poles of literary society. He had little to do with the literary folk who lived at the other end of London and of life, though, when the great poets from the north came to town, there would be meetings in which Lamb, and sometimes even Godwin, were for the moment brought within his range; but to all writers who belonged ever so little to the great world, or had managed to get themselves introduced there, he gave his notice and hospitality, and sometimes help to the rising and unknown.

How it was that the little Irishman from Dublin, Tom Moore, who came across the Channel in the very end of the century with a few introductions and some translations from Anacreon in his pocket, scrambled into good society, it is somewhat difficult to make out. But he did so, and made himself the fashion, and got admission, he also, though not till some years later, into that heaven of Holland

House which dazzled every candidate for fame. There could not be a greater contrast than between the respectable sentiments, and apparently life, of this lively little candidate for poetical distinction, and the character of his first original publication, the poems by Thomas Little, of which Posterity remembers nothing except that they were of a licentious tendency, and patronised by the Prince Regent, to whom that class of literature was attractive. Whether Moore's poetical improprieties were simply artificial to suit the taste of the moment, or if he himself had gained the premature enlightenment of a *jeunesse orageuse*, it is hard to tell. His little scrap of autobiography, and his innocent home-letters, give no ground whatever for the latter supposition. He began his life apparently with a dutiful love and reverence for his parents, and an honest desire to earn his living and aid his family, which he did steadfastly through some misfortunes and many temptations, notwithstanding the fact that he loved society dearly, and was never so happy as when among the great. Amid so many greater names, to which the higher classes gave little or no recognition, Moore was the only one who found success easy, and was petted and made much of in the most elegant circles. Perhaps he was more amenable to the blandishments of fashion than poets of a larger kind. "In anecdote, small-talk, and especially in singing, he was supreme—for many years he had been the most brilliant man of his company," says Crabb Robinson. "My songs have taken such a rage! even surpassing what they did in Dublin," he writes to his mother, to whom he reports every pleasant thing that is said of him, with something which the critics call vanity, but which seems to us almost the best point in his character—an unfeigned desire to give her pleasure. None of his contemporaries, names to which it would be laughable now to compare his, had penetrated as he did into the heart of polite society.

They were all on the outskirts, among the undistinguished masses, poor men little noticed by the great. But Moore found his way, in the very beginning of his career, to the society of lords and ladies, and into the class which considered itself as the highest in England. Of the new generation there were but this lively little Irishman and Campbell, who had some small links of connection with the gilded crowd, and shyly appeared from time to time among them—to represent the morning lights of a new poetical age.

There was now, however, to blaze upon the busy world of society, with Mr. Rogers in St. James's Place twinkling a very mild little taper across its darkness, and Canning and Hookham Frere carrying into statesmanship only a pungent recollection of verse which was satire rather than poetry, and Gifford uttering from his corner, in the same breath with the Baviads and Mæviads, a sentimental song which was not much less ornate and feeble than the chirpings of the poor little Della Cruscans whom he slew —a sudden meteor of the first magnitude dazzling the unaccustomed eyes of Town. A child born of two unruly houses, English and Scotch, brought up as badly as ever unfortunate boy was, spoiled alike by good fortune and bad, a lord, a braggart, and a genius, passionately wrong-headed, self-adoring, yet self-disgusted, poor, extravagant, dissipated, and lonely, a kind of young outcast from humanity, yet favourite of fortune, had come through doubtful episodes of restraint at school and college, and wild license and wandering elsewhere, to man's estate. He had published the first flowers of his youth in an idle volume, and then, stung to the very marrow of his bones by unnecessary severity of criticism thereupon, had revenged himself in a trenchant and fiery satire, a very different kind of stuff from the Baviads, and was now come back after various travels, with a trumpery manu-

script in the same vein, which he called "Hints from Horace," and was eager to publish, and a neglected bundle of Spenserian verses of which he thought nothing, but which turned out to be no less a thing than the first part of *Childe Harold's Pilgrimage.* This young Lord Byron was twenty-three, and one of the most forlorn beings imaginable, though possessed of wonderful gifts of fortune —without friends or family, or a home, or anything to make up to him for the precocious and miserable knowledge of "life" in its worst aspect, which he had been so unfortunate as to acquire. His school and college friends were dead or estranged; relations he had scarcely any; his mother, for whom, so long as she lived, he had felt little affection, died immediately after his return from his wanderings; and his manner of life, before he set out upon these wanderings, had been such as to prejudice most of the people who knew him against him—indeed, this would seem to have been one of the objects of his uncomfortable, unlovely, and unenjoyed life, to make so much stir at least, that everybody should think as badly as possible of the hapless young reprobate. It was not a great ambition, but he would seem to have succeeded in it. When he took his seat in the House of Lords there was not a creature to stand by him, not another peer—and he loved peers—to give him the countenance which a young man needs. Unfortunate young Byron! He was proud, very conscious of his own rank, and eager for the deference it ought to have brought him. But the doors of society, which we are apt to think so very ready to open before such a young hero, remained obstinately closed in his case. He had nobody to introduce him, or teach him how to get the *entrée,* and he found the homage he loved only among servants and humble country folk. And being but a boy, and far from wise, he had made a little flourish of self-importance about his peerage in the little book that he

had innocently issued to a hard world. Jeffrey's review, after all, was nothing so very dreadful. Any graceful young lordling of the present day who should put forth his "Hours of Idleness" would get as hard or harder from the *Saturday Review*, and would in all likelihood bear it like a man without gratifying his critics by any outcry of pain or vengeance. But criticism was a new art in those days, and though no more ferocious (we think) than now, was much more keenly felt. And the *Edinburgh* had the art of planting wounds so that they should sting and burn. The reader must not suppose, however, that young Byron and his pretty little poems (for they were no more) had the honour of being the subject of such an elaborate article as those we now see in the great Reviews. Such small deer were not exposed to pursuit so lengthened. The *Review* in its earlier stages admitted articles of very varied extent, and that which the young poet so deeply resented was not longer than a literary newspaper would devote to a similar offender now.

But what an outburst of young passion and energy was in the reply! "English Bards and Scotch Reviewers" is not a great poem. If it were possible to drop it out of Byron's life and works, we believe his lovers would always have been glad to do so, and he himself not the least contented; but it could not be dropped out of a literary history. Never was there a more remarkable example of "how it strikes a contemporary." It is always a matter of curiosity and interest to get at the opinion of youth, and to form an idea what the tendencies of the time are by the likings of its future masters—especially when these are the most highly endowed and educated of their day. Young Byron, indeed, was not of the latter class; his education was imperfect, his information desultory and chaotic, and his university had conveyed to him but a small share of those humanising

influences with which we are fondly apt to credit that seat of learning. But there was not such another literary genius in all the ranks of English youth, and he, if any one, should have seen and appreciated the nobler gifts, which had come to full development just as he reached that opening day in which everything that is beautiful in nature is most beautiful to the young seer. How strange is the difference between this high probability and the real state of affairs! The young Byron, the new poet, he who should have recognised by instinct his immortal brethren, vindicates above all things else the blindness of human intelligence, the obstinacy of prejudice, the old-fashionedness and conventionalism of youth. Nothing so artificial, so prejudiced, so blindly conservative could be, as the violent charge he makes in hot exasperation of vanity and injured *amour propre* against all who were before him in the lists of honour: all, or almost all, the exceptions being as edifying as the abuse. An indiscriminate assault upon all sorts and conditions of poets, Coleridge and Monk Lewis, Wordsworth and Grahame, all holding about the same place, apparently, in the young champion's eyes, is more remarkable than the rush at Jeffrey which was comprehensible and perhaps not illegitimate. Scott comes in for the most prolonged abuse of all, as "Apollo's venal son," as a "hireling bard" with a "prostituted muse," as one of the poets who "rack their brains for lucre not for fame." Then comes "ballad-mongering Southey," on whom he is scarcely so severe, though he means to be so, for indeed poor Southey, though he produced "annual strains" to take the field like armies, never was lucky enough to get half-a-crown a line. "Vulgar Wordsworth," whom the young avenger in all sincerity does not seem to think worth his steel, is described as "the meanest object of the lowly group," and his "verse of all but childish prattle void:" and Cole-

ridge "to turgid ode and tumid stanza dear," as "the laureate of the long-ear'd kind;" while poor Mr. Cottle in Bristol, the gently garrulous bookseller, to whom we owe many pleasant reminiscences if we have all forgotten his poetry, comes in, in the absolute absence of all perspective, for rather more remark than either of these preceding poets. "Smug Sydney," "blundering Brougham," "paltry Pillans," are more naturally, as being Edinburgh reviewers, the object of this schoolboy vituperation. But at last the young man in the crowd he has raised about him falls in with some one whom he can praise. "Neglected genius! let me turn to you," he cries.

> "Come forth, oh Campbell! give thy talents scope;
> Who dares aspire if thou must cease to hope?
> And thou, melodious Rogers! rise at last.
> Recall the pleasing memory of the past;
> Arise! let blest remembrance still inspire,
> And strike to wonted tones thy hallow'd lyre;
> Restore Apollo to his vacant throne,
> Assert thy country's honour and thine own.
> What! must deserted Poesy still weep
> Where her last hopes with pious Cowper sleep?
>
> . . . . . .
>
> No! though contempt hath mark'd the spurious brood,
> The race who rhyme from folly, or for food,
> Yet still some genuine sons 'tis hers to boast,
> Who, least affecting, still affect the most:
> Feel as they write, and write but as they feel—
> Bear witness Gifford, Sotheby, Macneil."

These illustrious names were the representatives, according to the young poet who was so soon to seize the very crown of rapid fame in England, of the poetry of his time The last name will scarcely be known even to the most well-informed reader. Macneil was the author of "Scotland's Scaith," and the "Waes of War," of which we are told "ten thousand copies were sold in one month." It is about all that history has to say on his account.

The reader will smile to see what the poetic youth, fresh from Cambridge, and touched himself (though his genius was as yet undiscovered, either by himself or others) by the divine fire, thought of the poets of his time.

Curiously enough, however, it was to this assault upon his contemporaries that Byron owed his first introduction to the world of literature, and through it to society. It has been mentioned in a previous chapter that a duel of a somewhat ludicrous description took place between Jeffrey and the young poet Moore on the occasion of a severe review (these were days in which reviews were dangerous for the critics as well as for the authors) of the first volume of dubious verse, which he published under the name of Little. This absurd incident exactly suited Byron's purpose. He brings in with delighted malice

> "That ever glorious, almost fatal fray,
> When Little's leadless pistol met his eye,
> And Bow Street myrmidons stood laughing by."

Moore, however, who had published an accurate account of the transaction, exonerating himself from the ridicule of the "leadless pistol," considered Byron's allusion to it as directly giving him the lie, and being as Irish and as warlike as ever, wrote a sort of challenge to the new assailant, which, however, never reached Byron till a year later, when the little Irishman was married and had cooled down. Several letters followed, and Moore was glad to accept the explanation that Byron had never seen his published denial of the more ludicrous part of the circumstances, and not unwilling to meet and make friends with the young man who had proved himself at least a dangerous enemy, and who was a lord and a wonder besides. On receiving Byron's letter proposing a friendly, not a hostile meeting, "I went instantly," he says, "to my friend Mr. Rogers and informed him of the correspondence in which I had been engaged. With his usual readiness

to oblige and serve, he proposed that the meeting between Lord Byron and myself should take place at his table, and requested of me to convey to the noble lord his wish." The invitation was immediately accepted. It was intended at first that Rogers and Moore alone should form the party, "but Mr. Thomas Campbell, having called upon our host that morning, was invited to join it." It is easy to imagine the curiosity and interest with which these three awaited the altogether unknown, and remarkable young stranger. The two elder men had been specially distinguished by his praises, and little Moore, though laughed at, had been far more leniently treated than his betters.

> "—Little ; young Catullus of his day,
> As sweet, but as immoral in his lay!"

was such a shaft as made no very serious wound. Lords were familiar to Rogers, and probably not exciting ; but yet rank adds an attraction the more to all other qualities, and a noble poet is piquant and picturesque ; whereas the other two *convives* were of a humble position, and could scarcely fail to be dazzled by the title of the new brother, who had it in his power to be so potent a friend or enemy. And already many stories had been told of this wild and wandering spirit ; youthful orgies at Newstead exaggerated into something portentous, and adventures innumerable, by sea and land, all contributed to rouse the expectations of the poets, who waited for the opening of the door and the announcement of the novel, the terrible, the delightful guest. He came, and Moore, for one, was enchanted with everything about him—"the nobleness of his air, his beauty, the gentleness of his voice and manners, and—what was naturally not the least attraction—his kindness to myself." "Being in mourning for his mother, the colour, as well of his dress as of his glossy, curling, and picturesque hair, gave more effect to the pure, spiritual

paleness of his features, in the expression of which, as he spoke, there was a perpetual play of lively thought, though melancholy was their habitual character when in repose." Altogether, it was a hero of romance who thus burst upon the vision of the assembled poets—good Campbell, fresh from his respectable, middle-class, suburban cottage; Moore, out of his economical retirement; middle-aged Rogers, who from another point of view could scarcely fail to be dazzled too by the youth and limitless future which lay before his young guest. It was a little embarrassing that there was nothing for him to eat, for the young poet, afraid of getting fat,—a very natural if somewhat absurd fear,—lived upon vegetables; and "biscuits and soda water," for which he asked, were not to be had. "He professed, however," says Moore, "to be equally well pleased with potatoes and vinegar, and of these meagre materials contrived to make rather a hearty dinner." Barring this whimsical difficulty, the meeting was very successful, and Moore continued Byron's devoted liegeman for the rest of his life.

This is the first glimpse we have of the poet in anything that can be called or imagined the society of his peers. He had as a boy been received at one or two houses of his kinsfolk, in one of which he formed a romantic and premature attachment, which certainly was the inspiration of several poems, and which is romantically supposed to have helped to overshadow his life. The terrible want of that life was, it is evident, something to fix him in his orbit, some ties of home or duty, some sense of responsibility, anything that would have freed him from the restlessness that consumed his soul, and which no excitement satisfied. The air of hurry and breathless reposeless movement which is about him during this early period, when as yet there was no fatal step taken, or irrecoverable mistake made, is very remark-

able. His letters, which in our opinion are never very attractive, have an air of haste for which there could be no necessity save in his nature. Everything is mentioned in the curtest manner, not a pause, not an indication of interest beyond the most cursory and trifling His friends, his occupations, the (fine) people he meets, the news of the time, all come in hurriedly to the breathless record. Few glimmers of genius, and not even much that could be called human individuality, the features that mark one man from another, are to be found in these productions. His biographer gives them at full length, and it has again become a fashion in the present renaissance of Byron's fame to applaud those hasty chapters of his experiences: but we cannot find them worthy of any serious remark. They are the kind of letters which any undistinguished young man, with coarsish tastes, and time entirely occupied with the frivolous occurrences of the day, might have written: nor, if he had not turned out to be Byron, would any one have supposed them worth the dignity of print.

He was very lonely, Moore tells us. The humble little poet would come and dine with his noble friend at a tavern when he could escape from the more important people who invited him to their houses. Only Mr. Dallas, who was a connection, and whom Byron trusted with the management of his literary business, and his solicitor, knew him in all that world of London, where a young man of his rank has generally such hosts of friends. Galt, whom he had met on his travels, is the only man of any kind of reputation who speaks of him at this dim portion of his career; and Galt was nothing more than a half-ruined adventurer in these days. Even the "coffee-house companions," who had given him an undesirable society on his first appearance in town, had dispersed and fallen away, as it is the way of loose company to do.

And it is impossible to imagine a more forlorn figure than that of this noble, handsome, gifted, young man, wandering about from one poor tavern to another, now and then rescuing an evening from the dreary inane around by the note, "I dine with Rogers to-morrow," knowing nobody, caring for nobody, with neither hope to inspire nor duty to fix him to any spot or any occupation on earth. It is extraordinary to realise such a position. He had done nothing worse than hundreds of other careless young men—nothing that could make a Pariah of him or shut him out from friendship and kindness at so early an age. And there does not indeed seem to have been any inclination on the part of society to reject him. He was forgiven with wonderful readiness for his general abuse of the literary profession. Lord Holland interposed his friendly offices to give him information on a subject on which he meant to speak in the House of Lords, notwithstanding that both his wife and himself had been visited with the young poet's utmost scorn. In short, there seems to have been absolutely no reason for his entire isolation; and yet it existed. When he made that first speech and appearance in the House of Lords (on behalf of the poor rioters in his own county—a very good object), he describes himself with his usual curious ostentation as "a person in some degree connected with the suffering county, though a stranger not only to the House in general, but to almost every individual whose attention I presume to solicit." And yet he had been educated at Harrow and Cambridge. The fact is so strange that it seems impossible to credit it; poverty, which is sometimes represented as the cause, scarcely seems a sufficient one; and the explanation to which we are driven is the painful one that the company of his own class was really not agreeable to Byron. He had accustomed himself to a reedom and self-indulgence incompatible with the re-

straints of society. It is easier for the lawless mind to "get on" in a tavern than in a drawing-room. What other elucidation of the mystery can we find or suggest?

Perhaps this speech about the Nottingham stocking weavers was an attempt to find an entrance into a better sphere. The applause with which it was received seems to have given this fortunate-unfortunate the highest gratification. His friend, Mr. Dallas, who met him directly after its delivery, found him "glowing with success and much agitated." He had been told that Sheridan thought he would make a great orator, and Lord Holland and Lord Granville paid him "high compliments" in their speeches in the same debate. "Lord H. tells me I shall beat them all if I persevere, and Lord G. remarked that the construction of some of my periods is very like Burke's," he says in a letter to Hodgson. It was the first social success of his life, and soothed and stilled the uneasy sense he seems always to have had of not really belonging to the sphere of which, even while seeming to despise it, he had such an exalted opinion. But it was not to be to his oratory that he owed his admission into society. Two days after this hopeful speech the young poet delivered his real credentials to the world. He had brought with him from his travels, as has been said, two manuscripts, one which he looked upon with complacency, and was hot to publish—a satire after Horace, a reminiscence at once of his previous spites against society and the critics, and of that youthful classicism which it is the object of the schools to foster; and another, a miscellaneous bundle of verses, written apparently on the pressure of the moment, and mingled with fugitive poems of all descriptions, which he took "from a small trunk," and felt were not "worth troubling" his friend with. Mr. Dallas, fortunately, was a better critic than Lord Byron; and he it was whose insistance brought into the world

the poem which was to found a new school of poetry, and influence the public mind, at least for the time, as no other poem of the generation did. That he himself had no sort of notion of this is evident from the very flutter of delight and gratified vanity with which on the edge of a success so much greater he speaks of this speech of his in the House of Lords. Two days after *Childe Harold* appeared. It is not too much to say that the public mind was moved by it to a sort of sudden ecstasy of interest such as is almost incredible in our calmer days. "I awoke one morning and found myself famous," he says. The first edition was sold out at once, and a universal ferment of interest about the young author flew through that society which up to this time had known and cared nothing about him.

"At his door," his biographer tells us, "most of the leading names of the day presented themselves,—some of them persons whom he had much wronged in his Satire, but who now forgot their resentment in generous admiration. From morning till night the most flattering testimonies of his success crowded his table—from the grave tributes of the statesman and the philosopher down to (what flattered him still more) the romantic billet of some incognita, or the pressing note of invitation from some fair leader of fashion; and in place of the desert which London had been to him but a few weeks before, he now not only saw the whole splendid interior of high life thrown open to receive him, but found himself among its illustrious crowds the most distinguished object."

It is seldom that genuine poetical fame, that fame which is to last, and become an inheritance for the very land that produced it, arises so suddenly. Scott, with his easy, fresh, delightful *Lay*, rose almost as soon into the heaven of popular applause; but his can scarcely be called a genuine poetical fame; and Byron's, rapid as it was, was also complete and lasting—a fame which, as yet, though subject to the revisal of two or three generations, has not been diminished, though it has had

fluctuations like all things human. In many ways this instantaneous leap into the highest places of success was extraordinary. But for the introduction of the traveller in the beginning of the poem, the *Pilgrimage* was almost entirely descriptive of scenes unfamiliar to the English reader who had not then become the cosmopolitan wanderer he now is, and whom wars and tumults had for long shut out from the Continent. And it was written in elaborate verse, which, however melodious, is always a tax, more or less, on the faculties of the reader. When we open *Childe Harold* now, we turn instinctively to the later cantos,—those which reflect the turning point of the poet's life,—and in which there is all the excitement of real calamity and suffering. But no such catastrophe had befallen the young Byron when he set out upon his travels, and the poem in which he embodied his experiences, and which he did not think "worth the while" even of his indulgent friend and critic, was, in reality, little more than an itinerary, though of the most splendid kind. How it was that the serious sweetness of those long stanzas which celebrated nothing more moving than the praises of "august Athena," or "stern Albania's hills," should have produced so great a commotion at once in society, and among the general world of readers, is difficult to understand. Greater poems have had very much less effect, and yet have been well received;—this attained in a moment the universal attention, and dazzled all who beheld it,—springing suddenly like a comet out of the vapours.

It is difficult, we have said, to understand this instantaneous fame; but, indeed, it is evident enough upon what it was founded. The secret of its power was in the hero who traversed vaguely those classic countries, giving a certain mystery and interest even to scenes in which his figure was imagined rather than seen—and in

the revelation of him which occupied the beginning cf the poem: a brief effective sketch, original and captivating to the popular imagination, which never in English literature had met with anything like this embodiment of youthful tragedy before. René had preceded him in France, and Werter in Germany, but *Childe Harolr* was different from both. He was the symbol less of revolt against established laws than of that personal grievance which is felt so bitterly in youth, when things do not go as we wish. Not the loss of a Lotte or a Mary, but wild despite at his own insignificance, a fierce disgust with the world which did not do him homage, nor cared very deeply whither he went or came, was in every line of the picture. It is a picture of youth awakening from its first wild burst of enjoyment and confidence in itself, to the bitter sense that its pleasures are naught, and itself of no particular importance in the economy of the Universe. The pang with which he gazes wildly round to see the indifference of gods and men to his weal or inclination, the calm routine which goes on unmoved, howsoever the young hero may suffer and even if he sinks altogether in his struggle to have everything and enjoy everything, is, in its astonishment, its fury, its pathos of self-pity, a very real pang; and the force of tragic superiority to the cruel world and all its ways, even the pretence of having earned that world's anathema by guilt as mysterious as the suffering, is comprehensible enough to the heart, a natural refuge for pride deeply wounded and mortified feeling. But the image was new to the age, and affected it in a powerful way. It was the first time this young misanthrope, this mysterious cynic, this proud and scornful rebel, sufferer, and outcast, had been put in bodily shape before the world. And its attraction was increased by the fact that, amid all its truth to nature, there was a subtle half-conscious fiction running through

every line. No despair could have been so black and profound that did not conceal a secret consciousness of unlimited hope behind, and the very grandeur with which that sublime melodramatic figure averted his eyes from all delights, made it more certain that, when he chose to "take a thought and mend," all these delights were yet well within his reach. Thus the mingling of the fictitious and the real, the sincerity and good faith of present passion with all the casuistry and artifice of fictitious sentiment, gave an additional attraction. The guilt, and grandeur, and hopeless misery were all alike sham, yet the feeling was true: and this artificial character, if we may be permitted to employ a paradox, made the conception more real, and helped, as nothing else could, to express the strange chaos of wilfulness and waywardness, of suffering and satisfaction, the complacent masquerading and genuine misery which are involved in the first tragedy of youth.

This publication changed life and the world to Byron. It was in February 1812 that it took place, and all doors were thrown open to him. In 1815 he married. In 1816, a year after, he left England, separated from his wife, a broken man, with neither hope nor possibility left him, so far as appeared, of ever making up with the world or presenting himself again in society. Thus his entire career in England was limited to four years, beginning in total obscurity and ending in general reprobation. As it is almost incredible that a young man of his rank, not to speak of his genius—for that was at the time unrevealed—should have been so friendless and forlorn to start with, so it is hard to understand his entire abandonment afterwards. He was not without partisans to offer pleas in his favour, and breathe for him all the commonplace and well-worn excuses which are supposed to account for the follies of genius. But the general

impression was as entirely against him as ever public opinion was; and this brief space of unbounded applause, and equally boundless disapprobation, represented all his life in England, the entire cycle of his rising and falling. A more extraordinary career could not have been imagined. The violent onslaught which, while still utterly unknown, he had made upon almost every famous individual of his contemporaries, had been generously and fully forgiven to the author of *Childe Harold's Pilgrimage*, with a magnanimity which, so far as we know, is quite unrivalled in history. The most royal pardon had been granted to him with acclamation, and the fairest chance a man could have, fully accorded. Society, which had been coldly unconscious of his existence, opened its doors wide to the young poet who had so many claims on its consideration. Without entering in a manner totally inconsistent with our purpose into the scandalous chronicles of the time, which was as unlovely a moment as can be found in social history, we cannot give the reader any account of the life of Byron in this brief epitome of his existence. It was a lawless life, bound by no rule of principle, full, it is to be supposed, of enjoyment, full of remorse, of pecuniary miseries and wild expenditure, of passions and separations, all headlong, unregulated, prodigal. In no way is the picture of the young poet an attractive one. Moore says everything for him that a counsel retained for the defence could say, but never is able, evidently, to divest himself of the sense that his client has a very poor case, and that in reality there is very little to be said. His own letters and journals seem to us superficial in the highest degree, and give little idea of anything but the froth of a restless nature. They are a mere record of events, and full of the hurry-scurry of society, the chatter of a noisy circle in which there is nothing great but the names that appear and reappear, but show little of either

thought or feeling above the level of a frivolous young man of fashion. We are unaccustomed in these days to the discretion which casts out everything purely personal, and hides under asterisks every allusion that might wound or grieve, and it is difficult in the face of the damaging revelations which of late have soiled some great memories, to object to the reticence which, by this time, to readers unacquainted with contemporary talk and scribblings, envelops the whole question of Byron's life and relations before his marriage in a mist. It seems doubtful which is best, and whether entire silence would not be better than either indecent candour or tantalising concealments.

This at least we know, that Byron lived a life capable, perhaps, of excuse, but not of justification; that after having dissipated the ordinary prospects of existence on that high level, he had another chance in marriage—and somehow, more dolorously, more shamefully still, failed in that also, and so far as England was concerned in life altogether. There are times in which concealment is the worst injury that can be done a man, as there are also cases in which disclosure is a crime. We are incapable of saying in which category Byron's story is to be placed. His wife is one of the greatest mysteries of recent times. Admired and almost worshipped by an adoring circle for the greater part of her life, she was at the crisis of her story regarded with fierce indignation by her husband's partisans, and at the end of her life sank into something like the contempt, as well as execration, of the greater part of the public. The world will never know the rights —or wrongs—of the question. The woman in the end has had the worst of it, as women generally have in such a conflict. In some particulars there can be no doubt she was brutally treated, but her incapacity for carrying a secret long guarded to the grave with her, has done more harm to her memory than if she had told that secret at

the moment, supposing it to be true; if it is all an invention, then words cannot express the wickedness of the deed. One moral of the whole miserable story would seem to be that candour about every event, while the parties are alive to defend themselves, is after all the best, since it seems beyond the range of human faculties to keep silence for ever, and some blabber, sooner or later, is sure to let the most unsavoury revelation out.

During these four years which comprise his life in England, the young poet, in the midst of all his loves, his frivolities, and his embarrassments, produced a succession of poems, written with the greatest rapidity, and with a total absence of the study or retirement hitherto thought necessary for such composition. In the heart of London society and a hundred intrigues, he managed to pour forth canto after canto and couplet after couplet, glowing and hot from a heart which he did his best to represent as worn out, misanthropical, and disgusted with the world. The *Giaour*, the *Bride of Abydos*, the *Corsair*, *Lara*, the *Siege of Corinth*, and *Parisina*, were all the product of this time. They raised the reputation he had gained into an overwhelming flood of praise and admiration. They are all Eastern in subject, and all penetrated, more or less, by the same character which had enchanted the world in the first sketch of *Harold*. The *Giaour* indeed, is too fragmentary to afford any clear view of character at all; and the *Bride of Abydos* has a virtuous and excellent youth for its hero; but these are the only exceptions. The *Corsair* and *Lara* out-Harolded Harold, and fixed upon the public mind the lineaments of that mysterious personage, gloomy and grand, wrapped in his cloak, and self-separated from all the world, with dark brow and darker shadow, awing the Universe—a being abstracted from any human connection save one. So far the *Corsair* improved upon

the *Childe*. He had one love which linked him to humanity. But, whereas Childe Harold was guilty of nothing but dissipation, Conrad was a pirate chief, familiar with blood and crime, and Lara under some still deeper, shameful stigma, which it was worth his while to hush up by murder. These were the heroes whom the new poet introduced to the world; and while one half of the critics were admiringly shocked by his majestic criminals, the other half were delightfully stimulated by this new conception of the sublime. The idea that he himself was the model from whom he drew, increased the feeling on both sides, and between the people who were shocked and those who were pleasingly startled into a new sensation, his fame swelled higher than ever fame had swelled before. He did not himself at all discourage the idea that his subject was himself. "He told me an odd report—that I am the actual Conrad, the veritable Corsair, and that part of my travels are supposed to have passed in piracy Alas! people sometimes hit near the truth, but never the whole truth," Byron says, with a smile of complacency one can imagine about his mouth—"Wrote to * * the 'Corsair' report," he says, in another place, "she says she don't wonder, since 'Conrad is so *like*.' It is odd that one who knows me so thoroughly should tell me this to my face. However, if she don't know, nobody can." Thus he adopted the popular fancy, not without pleasure, and the identification of poet and hero added indefinitely to the effect, and raised his fame higher and higher. The poems were read eagerly to throw more light upon the man; the man's antecedents, and all the gossip that could be collected about him, were studied and talked of, in order to add a little to the revelations of the poem. The poetry was fine—and it was scandal at the same time: what society could resist two charms so potent, mingled so skilfully and so well?

But to find any special human features now in this melodramatic type is an achievement beyond our powers. Harold, upon the deck of his ship, looking back bitterly upon the land in which he has wasted his youth and his chances, pretending to scorn, yet in reality keenly affected by the circumstances of his self-banishment—has a certain amount of humanity in him, and might very naturally be supposed to reflect the being of his creator; but the Corsair, though he may be but the same impersonation heightened and wrapped in stage clothes and draperies still more gloomy, has lost all individual features, and is a mere symbol of the conventional sublime.

> "That man of loneliness and mystery,
> Scarce seen to smile, and seldom heard to sigh;
> Whose name appals the fiercest of his crew,
> And tints each swarthy cheek with sallower hue;
> Still sways their souls with that commanding art
> That dazzles, leads, yet chills the vulgar heart.
>
> . . . . . .
>
> But who that Chief? his name on every shore
> Is famed and fear'd—they ask and know no more.
> With these he mingles not but to command;
> Few are his words, but keen his eye and hand.
> Ne'er seasons he with mirth their jovial mess,
> But they forgive his silence for success.
> Ne'er for his lip the purpling cup they fill,
> That goblet passes him untasted still—
> And for his fare—the rudest of his crew
> Would that, in turn, have pass'd untasted too;
> Earth's coarsest bread, the garden's homeliest roots,
> And scarce the summer luxury of fruits,
> His short repast in humbleness supply
> With all a hermit's board would scarce deny.
>
> . . . . . .
>
> Thus prompt his accents and his actions still,
> And all obey and few inquire his will;
> To such, brief answer and contemptuous eye
> Convey reproof, nor further deign reply."

And here is Lara, who is popularly supposed to be the

Corsair grown older, and returned out of his wild career into the paternal halls, where his fierce and troublous life of adventures is unknown :—

"That brow in furrow'd lines had fix'd at last,
And spake of passions, but of passion past:
The pride, but not the fire, of early days,
Coldness of mien, and carelessness of praise;
A high demeanour, and a glance that took
Their thoughts from others by a single look;
And that sarcastic levity of tongue,
The stinging of a heart the world had stung,
That darts in seeming playfulness around,
And makes those feel that will not own the wound;
All these seem'd his, and something more beneath
Than glance could well reveal, or accent breathe.
Ambition, glory, love, the common aim,
That some can conquer, and that all would claim,
Within his breast appear'd no more to strive,
Yet seem'd as lately they had been alive;
And some deep feeling it were vain to trace
At moments lighten'd o'er his livid face.

. . . . . .

Around him some mysterious circle thrown
Repell'd approach, and show'd him still alone;
Upon his eye sat something of reproof,
That kept at least frivolity aloof;
And things more timid that beheld him near,
In silence gazed, or whisper'd mutual fear."

To assert that any human being, with individual habits of his own, is "so *like*" this conjunction of abstract qualities is as curious as any other particular of the history. There was indeed one point in which Byron distinctly resembled the Corsair, but that was not a point of character. The poet, like his hero, ate "earth's coarsest bread, the garden's homeliest roots," and little or nothing more; but this was from a most unpoetical reason; and could we imagine that Conrad, like Byron, used this regimen in order that he might not grow fat, the finest poetry would not save him from that ridicule which is

death to sentiment. All, or almost all, the enchantment which once surrounded the hero has vanished, and a profaner public smiles at the gloomy grandeur and self-absorbed conscious sublimity of this mysteriously guilty personage, who, under pretence of concealing his remorses and despairs, wears them conspicuously as his livery. But the sincerity of the poet himself in setting forth so theatrical a figure, his genuine admiration of it, and inability to perceive any possibilities of ridicule, is proved by the constant repetition, in tale after tale, of the same wonderful creation, sardonic, mysterious, and grandly superior to the crowd. Byron, it is evident, was never himself weary of the one type of being which he had evolved. It satisfied his vanity, which was great, and his imagination, which, notwithstanding his great genius, was not great, but limited and somewhat formal, if we might even dare to say vulgar, delighting in strong effects, and indifferent to the more delicate gradations of nature. The other personages in these early works are entirely vague, indistinguishable, mere names and little more. But his generation received every *replica* with acclamation. They were transported by the sombre charm of those dark looks and tragic gestures. Not even the critics reproached the poet with the monotony of his central figure. In the full illumination of the nineteenth century the sham-heroic pirate chief was to them as a revelation from heaven.

This is, perhaps, the most wonderful evidence ever given to the force, and beauty, and intense vitality of a literary medium. These are not the words we would naturally employ to describe the divine stream of great poetry; for even the poetry of Byron's tales is not of a divine kind. It is full of splendour, and strength, and brilliant adaptation to the subject. The impression of mingled force and smoothness in it is admirable; but

it is not the highest strain of poetry; it is a fine and powerful literary vehicle, brilliant, effective, and forcible. Glancing over these tales, after a long interval, the reader will be surprised to find how few passages in them have fallen into universal use. That triumphant criticism of the simple-minded which pointed out that Hamlet was nothing but a mass of quotations, could never be applied to the *Corsair* or his peers. The beautiful passage in the *Giaour* beginning—

> "He who hath bent him o'er the dead,
> E'er the first day of death is fled,"

is one of the few exceptions. But though it seldom reached the point at which verse thus falls into the popular heart, it was so full of force and harmonious movement, so living in every line, so rapid in narrative, so intense in sentiment, that the monotony of the one oft-repeated impersonation was not only forgiven but delighted in. In such a case reproduction is either a weariness or an additional and cumulative charm. In pure fiction of the higher class, it is one of the greatest pleasures of the reader to meet again in one story with the friends he has acquired in another; but poetry has seldom permitted such a repetition. Here, however, the license was fully awarded. It gave the world a thrill of pleasure to re-find the wandering and weary Harold, with his bitter smile intensified, and his disgust with men and life accounted for, in the guilty, and gloomy, and mysterious Corsair, the hero of "one virtue and a thousand crimes;" and then once more to trace him in *Lara* with gloom ever deepening, and mystery ever increasing, the dark and proud chieftain, full of secret remorse, yet unconquerable—confronting gods and men with haughty defiance. And these were all Byron! and nobody of his generation had swept onward in such a resistless current

of song. Scott, indeed, had led the way in this fashion of poetry, but Scott's fresh fountain of verse was greatly inferior in passion to the fervid strains of his young competitor. There is a comparison made by Byron himself of a passage of his *Parisina* with a passage in *Marmion*, which makes this wonderfully clear. "I fear there is a resemblance," he says, "though I never thought of it before, and could hardly wish to imitate that which is inimitable." The passages in question are descriptions of the guilty heroines of the two tales—Parisina and Constance—at the crisis of their fate. We give that of *Marmion* first:—

> "Her look composed, and steady eye,
> Bespoke a matchless constancy;
> And there she stood, so calm and pale,
> That, but her breathing did not fail,
> And motion slight of eye and head,
> And of her bosom, warranted
> That neither sense nor pulse she lacks,
> You might have thought a form of wax
> Wrought to the very life was there;
> So still she was, so pale, so fair."

This is Constance on her trial—the betrayed and betraying maiden—victim and instrument of wickedness—on the verge of a doom which destroys her alone. The other is Parisina, more, yet less, sinful—contemplating, not her own, but her lover's fate:—

> "She stood, I said, all pale and still,
> The living cause of Hugo's ill;
> Her eyes unmoved, but full and wide,
> Not once had turn'd to either side—
> Nor once did these sweet eyelids close,
> Or shade the glance o'er which they rose,
> But round their orbs of deepest blue
> The circling white dilated grew—
> And there with glassy gaze she stood,
> As ice were in her curdled blood."

Nothing could better show the range of the two poets. Scott's picture is pathetic, and moves the reader with a sentiment of tenderness and pity, such as the sufferings of innocence, rather than guilt, should call forth. Constance appears to us as a victim—almost a martyr; but in Byron's companion sketch, the half-stupefied yet all-conscious stillness of doom, the awe, the anguish, the horror, affect us with something of the same overwhelming cessation of thought and sense as has befallen the miserable, beautiful creature, standing dumb, in agony ineffable, to see destruction overtake the sharer of her sin. The very background glows with a pale flame of passion behind her head, and those wide-opened, motionless eyes. Constance breathes and moves, but Parisina's whole being is arrested like a frozen stream.

Another characteristic which helped to secure Byron's instantaneous triumph was one which we have already noted in respect to Scott—his intelligibility—the entire absence of the mystic in him. None of those gleams of secret insight into the depths of nature which fill with enthusiasm the sympathetic and understanding, but confuse the crowd, ever flash from the genius of Byron. The mysteries with which he deals are purely material, capable of explanation, and affording an easy exercise to the fancy in making them out. This is one of the greatest and most marked distinctions between one class of poetry and another. When we introduce a simple intelligence, say that of a child or an entirely uneducated person, to the wonders and glories of song, there must always be a great deal at which the untrained intelligence will make momentary pause, perplexed by something which has not occurred in the phraseology and thoughts of every day. Who could explain the *Ancient Mariner*? The soul divines, and he that hath an ear to hear, hears and understands: but Scott and Byron, the one in a

tame, the other in a grander sense, are both cheerfully intelligible, explainable, making no impossible demand on the faculties of the reader. Nothing could be more mysterious than the *Corsair*, but we can hold our breath and guess at those secrets of his with much of the satisfaction which accompanies our ordinary researches into the secrets of our neighbours. There is nothing in them which reaches that region beyond sight, that darkness round us and within, which it is the highest function of the poet to divine, the highest exercise of the mind to search into, catching such glimpses as our faculties will allow. On this, Byron has no communication to make, no light to offer. He is as profane and ignorant as any one of us. When he himself risks a wondering question before these dark portals, it is with that despairing levity which is the resource of those who fear and know nothing, not of those who love and ponder and by moments see. There is no kindred with the mystic and unknown in the range of his genius; he belongs entirely to the solid earth, and his mysteries are those of the theatre and the tale, nothing greater or more.

We need not enter farther into the incidents which caused his departure from London and the entire breaking up of his life. With these the world would have had little to do at the time had he not taken it into his confidence: but at this distance, when both the chief actors are dead, the story is one which is open to the discussion of all, and cannot be ignored. Domestic convulsions, even when they reach the height of tragedy, can scarcely be without many petty elements. Byron's *Farewell* to his wife, which was in everybody's mouth at the time, is a piece of sentimental comedy added on to, and making a pitiful commentary upon, the really tragical crisis which made England and reasonable existence impossible to him thenceforward. That he should have arrived at so

terrible a turning point, and, ruined in fortune, bankrupt in reputation, doubted by all and condemned by most of his contemporaries, should have celebrated the conclusion of this tragic episode of life in a strain so commonplace and unreal is as extraordinary as any other of the confusing events of that extraordinary moment. He who took up the interrupted song of *Childe Harold* with so much genuine feeling, how did he, how could he, interpose the sentimental and theatrical *romanza* of an offended *primo tenore* between himself and human sympathy? We are told that the manuscript was blurred with his tears, and that there is every reason to suppose him to have been in earnest in the superficial pathos of his appeal to the wife whom he never seems even to have pretended to love—a fact which makes the confusion all the greater, since it is difficult to imagine any serious emotion expressing itself in such verses. But Byron's imagination was, as we have said, much inferior to his genius, and he wanted both good taste and that critical discrimination which has so much to do with personal dignity as well as with excellence in art. He could not divine how such an effusion would be regarded by his contemporaries, and was not even aware of its unreality until, with an angry illumination afterwards, he discovered the folly of it and perceived too late, through other people's eyes, what he had failed to perceive with his own. But, indeed, the interested reader will hail with a certain relief this crisis in Byron's career. His after life was wild and reckless enough, but it was not so miserable as the forced and fictitious life in London, where ruin lurked at every corner, and the semblance of prosperity and happiness was scarcely skin-deep. It ended in an inevitable explosion, all the elements having worked towards this since the wedding-day on which he had called his new-made wife Miss Milbanke with an absence

of mind almost incredible in a young bridegroom. When we read the journal, so full of fictitious liveliness, yet pain, so matter-of-fact, so commonplace, so angry and wretched, with still the same record of trivial things and talk, warped and made miserable by splenetic and reckless sentiment, and the chaos of an unregulated soul, it is with actual satisfaction that we see the end come. When the smoke and ashes clear off, and the passionate pilgrim storms away again over land and sea, leaving the failure and the misery behind him, our minds are eased from a painful burden. The gates of society may be closed against him, but again there seems a chance for him in the wider world.

CHAPTER. IV.

BYRON—SHELLEY.

WHEN Byron was reaching the stormy climax of his career in London, another poet, younger in years, whose beginning in life had been almost as wayward and unfortunate, though far less guilty, had appeared and disappeared again, not in the brilliant illumination of society, but among the struggling makers of literature in the other end of London. Percy Bysshe Shelley was born, more like a fairy changeling than an ordinary British infant, in a handsome country house in England in 1792, when Byron was but four years old in Aberdeen. The family of the younger child of genius belonged to that rural aristocracy which has produced many men of note and a great deal of respectable stupidity, but few poets; and from the beginning of his life he seems to have been out of tune with everything about him. His father, his family, and surroundings, were as opposite to him in character, hopes, and prejudices, as it is possible to conceive. Where it was that the respectable squire's son imbibed the ideas which dominated his life there seems no record; but he was a revolutionary born, a freethinker from his cradle, atheistical and democratical, in everything going contrary to all the traditions of his race, of which he was the heir and representative by a strange irony of fortune, a position which made steady-going

orthodoxy and conservatism almost necessities of existence. Young Shelley's rebellion against all that was, seems to have pervaded everything else that is known of him. By the time he went to Eton, if we may credit his own record, he had already come to recognise, in the hum of voices proceeding from the schoolroom, "the harsh and grating strife of tyrants and of foes," and to find in every little fret of schoolboy life marks of the chains in which free-born nature was bound. The small oppressions of fagging, the little round of punishment and obligation, were in his eyes evils large enough to fill the soul with bitterness:

> "Nothing that my tyrants knew or thought
> I cared to learn,"

he says, with a sentiment not indeed uncommon with boyhood, but differing much from the schoolboy's usual light-hearted perversity. There was not a laugh in him throughout his life, nor had his hot young enthusiasm any conception of the happy calm of ordinary youth. His young life is a record of strife and resistance; but it is so wildly dreamy and mystical, and the facts all through are so confused with fictions and heated interpretations of the real, that it is hard to know what to receive and what to reject. He believed himself to have been expelled from Eton; but there does not seem the slightest evidence that such an event took place. At Oxford, however, it did occur; he was sent away from University College on account of a pamphlet called *The Necessity of Atheism*, which he considered it his duty not only to publish, but to send, with serious intentions of instructing them, to the heads of his College. One of his biographers speaks of this as a mere boyish freak; but another treats it with much grandeur, declaring that "Percy Shelley had as good a right to form and expound his opinions on theology as

the Archbishop of Canterbury," an assertion somewhat appalling to all who have the charge of persons of nineteen, an age at which no Archbishop ever promulgated doctrine. Thus one more youth of genius was cast out of her bosom by the University, that *Alma Mater* who has so little kindness for the poets. Young Shelley ran wild after this severance of all legitimate bonds. His father was angry, and made that feint of casting him off in which bewildered and angry fathers so often take refuge, and he was left to his own foolish devices at this momentous moment of his life. His sisters, who were soft-hearted and anxious to help him, sent him aid by he hands of a schoolfellow, a foolish romantic girl, who by a series of accidents was thrown upon Shelley's companionship and into his power. They were both very young, utterly inexperienced; and he had wild views about the relationships between men and women as well as upon most other subjects, in which she was perfectly willing to follow. In these circumstances it is very much to the credit of the lawless young man that, though somewhat embarrassed and bewildered by the overpowering trust which Harriet showed in him, he married her, and gave the reckless foolish girl all the safeguards which the most carefully guarded bride could have required. He was not twenty when (in the year 1811) this marriage took place, and it completed the wild confusion of his life; since the poor young pair were equally inexperienced and unwise, though one of them had the lamp of genius, not to guide, but to mislead them on their devious way. They wandered vaguely about after this, in Scotland one time, in Wales the next, meeting with all kinds of tragi-comic adventures, and living a life which was never more than half-real. It was in this phase of his existence that we find him starting up suddenly in the path of Southey, who gives his opinion of the young wanderer as follows :—

"Here is a man at Keswick who acts upon me as my own ghost would do—his name is Shelley. Beginning with romances of ghosts and murder, and with poetry at Eton, he passed at Oxford into metaphysics; printed half-a-dozen pages which he entitled *The Necessity of Atheism;* sent one anonymously to Copleston, in expectation, I suppose, of converting him; was expelled in consequence; married a girl of seventeen, after being turned out of doors by his father; and here they both are, in lodgings, living upon two hundred which his father allows him. He is come to the fittest physician in the world. At present he has got to the Pantheistic stage of philosophy, and in the course of a week I expect he will be a Berkleyan, for I have put him upon a course of Berkeley. It has surprised him a good deal to meet, for the first time in his life, with a man who perfectly understands him, and does him full justice. I tell him that all the difference between us is that he is nineteen and I am thirty-seven."

Excellent Southey! He did not suspect how absolutely out of all possibility of resemblance were his own well-ordered conservative character and this wild spirit of the clouds and elements, the fantastic delicate Ariel of poetry. How sternly different his opinions became afterwards will be apparent farther on.

Of Shelley's momentary repose amid the quietness of the lake country we know little more than this. Soon he was away again, as changeful as summer lightning, flashing now here, now there, unrestrained and irresponsible. His extreme youth adds a pathetic touch to the record of fitful misadventures, unhappinesses, panics, and quarrels, which in itself could scarcely be other than ridiculous. It was in 1813, a year after Southey formed this opinion of him, that *Queen Mab* was printed—a strange poem which he did not after care to reckon among his works, and which shows traces of something like the influence of Southey in its measure and structure, though so completely unlike in everything else. Mab, a fairy queen most un-Shakspearian, carries off the soul of Ianthe—for no particular reason the poet knows of—to show her the past and present of the earth: that is to say, the horrors

that Religion and Government have wrought, with side glimpses into the miseries inflicted by kings, and the supreme tyranny of the God whom Christianity has imagined. It is a rhapsody, an impassioned embodiment of that fervent creed of Atheism which in those days had here and there a prophet, as again in our own. Shelley thought, like other enthusiasts, that the world was to be freed of all its troubles by the recognition of his tenets of faith, or rather, as it was in his case, of no faith—its abrogation of God, and law and rule. He had begun to correspond with Godwin while he was at Keswick, and the doctrines of *Political Justice* had taken hold on his congenial mind. It appears by some authorities that *Queen Mab* was begun at a much earlier period of his career; but the verse with which the poem opens bears very distinct marks of *Thalaba* about it:—

> "How wonderful is Death!
> Death and his brother Sleep—
> One pale as yonder waning moon
> With lips of lurid blue;
> The other rosy as the morn
> When, throned on ocean's wave,
> It flashes o'er the world:
> Yet both so passing wonderful!"

Out of this Southeyan echo, however, the young poet falls after a while into dignified and melodious blank verse, even in this early and chaotic utterance, which neither in sentiment nor poetry is very much worth any one's while. It is said that Shelley, who printed it for private circulation, sent a copy to Byron with a letter, in which he enumerated all the accusations he had heard against his elder brother in poetry, with a demand to know if they were true; as, if false, he wished to make Byron's acquaintance. Altogether, it is evident that the young poet, in the elation of his genius, felt himself full

of power, and in a position to influence and almost command. Among other enterprises, he went solemnly to Ireland to assist in Catholic emancipation, strong in that unbounded belief in reason, and in himself as the expositor of reason, which a young man may be pardoned for entertaining at nineteen. He was still under twenty when he became a father, his poor little wife being still younger. Their life was one of perpetual difficulties of all kinds, as well as of restless and continual wanderings. Sometimes Shelley got an allowance from his father, sometimes lived precariously on the help afforded by Harriet's family and a sister of hers, who after a while came to live with them, and tyrannised over the pair of foolish wedded children. Leigh Hunt asserts that his position as heir of entail made it possible for him to secure from the Jews an income of a thousand pounds a year, upon the security of his future prospects, which seems feasible, since even a poet cannot subsidise and pension his friends unless he has some money to do it with; but this may have been at a later period. He married his poor young wife a second time in March 1814, at St. George's, Hanover Square, lest there should be any question of the legality of their Scotch marriage and in order, it appears, to secure to her quite certainly in case of his death the portion to which the widow of Sir Timothy Shelley's son would be entitled. This cautious step had scarcely been taken when the pair seem to have separated. It is not necessary to enter here into the much discussed and much questioned dates of these incidents. Shelley had begun to visit Godwin, with whom for some time he had kept up a close correspondence, and for whom he seems to have conceived a reverential attachment, in the beginning of this year; and in Godwin's homely house, in the parlour behind the bookseller's shop, in the midst of the mixed family which consisted of Mary Wollstonecraft's daughter and the existent Mrs

Godwin's daughter, besides Godwin's own children, the young poet had seen a fair and serious girl of seventeen, full of philosophies and fancies like himself, and with a charm for him which Harriet had never possessed; for Harriet, it is supposed, had loved Shelley more than Shelley ever loved her, and had by this time fully convinced him that happiness with her was impossible. The story is altogether wild and strange, like his own mind. Whether he separated with a certain formality from his wife, whether he went off suddenly, leaving her with her two babies and fourteen shillings in her pocket, no one seems able to decide. The only thing certain is, that meeting with Mary Godwin suddenly "one eventful day in St. Pancras Churchyard by her mother's grave," he declared his love to the enthusiast girl, who had been brought up to believe in no necessary restraints upon such a passion. He told her his story "how he had suffered, how he had been misled, and how, if supported by her love," says the sympathetic historian, Lady Shelley, "he hoped in future years to enrol his name with the wise and good, who had done battle for their fellow-men, and had been true through all adverse storms to the cause of humanity. Unhesitatingly she placed her hand in his and linked her fortune with his own." No doubt the poet had eloquence at his command, and that the girl, so young and come of such a race, believed not only fervently in "the cause of humanity," which he intended to serve, but in her own power to support him by her love. A mother's grave seems a strange place for such a declaration; but not in this case, for no one would have been so ready as Mary Wollstonecraft to acknowledge the claim of love, and to dispense with the sanction of law. To neither of them did marriage seem either sacred or necessary. Harriet did not satisfy the poet; she was not enough for him: he had ceased to love her; what more

was there to say? Such was the creed of both. "Unhesitatingly" they linked their lives together. The verses which he addressed to her, probably in the moment of doubt before the decision was come to, do more to soften our hearts than any other particular in the tale:—

> "Upon my heart thy accents sweet
> Of peace and pity fell like dew
> On flowers half-dead; thy lips did meet
> Mine tremblingly, thy dark eyes threw
> Their soft persuasion on my brain,
> Charming away its dream of pain.
>
> "We are not happy, sweet! our state
> Is strange, and full of doubt and fear—
> More need of words that ills abate.
> Reserve or censure come not near
> Our sacred friendship, lest there be
> No solace left for thee or me.
>
> "Gentle and good and mild thou art,
> Nor can I live if thou appear
> Aught but thyself, or turn thy heart
> Away from me, or stoop to wear
> The mask of scorn, although it be
> To hide the love thou feel'st for me."

It is wonderful to think of this young pair, with all their feelings and impulses warped into a wrong way, calling good evil, and evil good, and believing that the indulgence of their inclinations was a sort of duty, setting out together in defiance of all law and sacred custom and constancy, without sense of guilt or feeling of shame. The elopement took place in July 1814, only a few months after the re-marriage. Shelley was only twenty-two even now, and Mary not seventeen. The deserted wife, left behind with her two children, came between the other two in age, and was still under twenty. They were little more than children, fantastic, wayward, and self-willed, playing with the mysteries of life, and not knowing what

they did. It is half pitiful, half ludicrous, to hear the account of this wild and criminal journey, which is like the freak of a couple of truant children running away from school, if it had not been for the tragical climax that was to follow. Godwin believed in marriage as little as they did, and had both written and spoken against it as one of the slaveries of the race; but he was a respectable London citizen, a sort of John Gilpin in his way, notwithstanding all his lofty theories, and that his young visitor should thus carry off his child did not please him any more than it would have pleased a much less philosophical parent. It is curious to note how indulgently the world has judged the actors in this wild drama. Neither then nor now has any harsh judgment been passed upon Mary Shelley. That offence which people are so fond of saying is always cruelly visited upon the woman, scarcely seems to have told against her. When the event occurred which turned the tale of lawless love into a tragedy, when poor Harriet, forsaken, took away her own life, no one concerned has any strong feeling in the matter except one of pity for Shelley and his new companion. We are almost required to regard the suicide as an ill-natured act towards these two innocent people on the part of the third, whose existence, indeed, was sadly in their way, but whose death was a reproach to them: so strangely do human partialities colour the events of life.

Before this terrible interruption of the curious irresponsible self-pleasing life of the young poet, there had, however, been an interval, in which many events occurred. Shelley was not much less an unsettled wanderer with Mary than he had been with Harriet; but under the great trees in Windsor Park, on the edge of which he lived for some time, and afloat upon the soft-flowing Thames, the great tide of poetry, which had already moved within him in broken impulses, rose full in his mind.

The first of his poems, which really was worthy of his powers—*Alastor*—was written in the first year of this union. It is the first real indication of the new voice which had awakened in English literature. It was like nothing else then existing; nor do we know to what to compare it in the past. Shelley had no story to tell, no character to disclose; his was pure poetry, music such as charmed the ear and filled the mouth with sweetness. Never was poet so eager to teach, or with so many wild assertions to make, or so strong a conviction of the possibility of influencing humanity and changing the world; but the soul of his poetry was the same as that of music, not definite, scarcely articulate, only melodious, ineffably sweet. *Alastor* was ushered into the world with a somewhat pompous preface, in which it is described as "allegorical of one of the most interesting situations of the human mind," the search of the poetic spirit, which has exhausted every form of intellectual enjoyment, for something better, for the ideal, which he seeks in vain to find in another human being. "The picture is not barren of instruction to actual men. The poet's self-centred seclusion was avenged by the furies of an irresistible passion pressing him to sudden ruin." But the reader never pays much attention to the directions which prescribe to him what he is to understand and admire; and probably no one now thinks of looking at the preface, or even asks, as he reads, what *Alastor* means; for, indeed, the meaning is wholly lost in the music of the words. "Actual men" have nothing to do with it; and it conveys no lesson, nor anything that is within the reach of the practical. This was not the intention of the writer; to his own thinking, he was nothing if not a teacher.

The simplicity of the primitive moral which Coleridge by poetical caprice chose to affix to his *Ancient Mariner* reappears, in still less feasible connection with anything

that has gone before, in the new strain. Probably it was the example of that poem which suggested to Shelley the idea of putting a moral to his rhapsody. "Those who love not their fellow-beings live unnatural lives, and prepare for their old age a miserable grave," he says, from his pulpit as it were: and then plunges into the word-music, the soft fleeting of melodious syllables, descriptions of what never was in earth or air. Here is the first striking of the key-note, more definite than anything that follows :—

"Earth, ocean, air, belovèd brotherhood!
If our great Mother has imbued my soul
With aught of natural piety to feel
Your love, and recompense the boon with mine;
If dewy morn, and odorous noon, and even,
With sunset and its gorgeous ministers,
And solemn midnight's tingling silentness;
If autumn's hollow sighs in the sere wood,
And winter robing with pure snow and crowns
Of starry ice the gray grass and bare boughs;
If spring's voluptuous pantings when she breathes
Her first sweet kisses, have been dear to me;
If no bright bird, insect, or gentle beast
I consciously have injured, but still loved
And cherished these my kindred; then forgive
This boast, belovèd brethren, and withdraw
No portion of your wonted favour now!

"Mother of this unfathomable world!
Favour my solemn song, for I have loved
Thee ever, and thee only; . .

. . . . . .

And though ne'er yet
Thou hast unveiled thy inmost sanctuary,
Enough from incommunicable dream,
And twilight phantasms and deep noonday thought,
Has shone within me, that serenely now
And moveless, as a long-forgotten lyre
Suspended in the solitary dome
Of some mysterious and deserted fane,
I wait thy breath, Great Parent, that my strain

> May modulate with murmurs of the air,
> And motions of the forests and the sea,
> And voice of living beings, and woven hymns
> Of night and day, and the deep heart of man."

This aspiration was as near fulfilled in Shelley's verse as poetical prayer could be; not his was Wordsworth's lofty religious use of nature and her sacred sights and sounds; not his the mystic revelations which Coleridge found in the unseen: but a voice modulated "with murmurs of the air and motions of the forests," with all the inarticulate harmony of being, with those fragmentary thoughts that give a soul to the musings of the solitary, and those profound sensations which move the heart, all the more deep for being undefined. The old-fashioned harp had come back to the hands that could touch it. The instructors, the prophets, the seers, even the minstrels had a different office. Shelley was song embodied. In vain did he pour forth miles of verses, his *Alastor*, his *Revolt of Islam*, his wild politics and wilder morals upon the world, believing in his inmost soul that this was his mission, to convince men that their God was a Fiend and their laws tyranny, and that Godwin's *Political Justice* was the new gospel. Mankind has instincts which are wiser than genius. We have rejected, some with horror, but more with a smile, his vain teachings; but we have not rejected Shelley. So long as he stands before the world and sings, we will listen though his subjects be to us as folly and his meaning as madness. No matter what he says—even the *Witch of Atlas*, even the *Epipsychidion*, which the multitude can only listen to with a bewildered sense of something melodious but no clearer notion—contain such a soul of harmony as beguiles the sternest critic. It is like that voice which Wordsworth heard in the harvest field. We do not even ask to know what it is about—

"Whate'er the theme the Maiden sang,
As if her song could have no ending.

. . . . .

I listen motionless and still;
And as I mounted up the hill,
The music in my heart I bore
Long after it was heard no more."

After the composition of *Alastor*, Shelley, with his Mary and the young woman who had accompanied them on their first flight, Jane Clairmont, the daughter of Mary's stepmother, went to Switzerland in the early summer of 1816; and here it was that Byron, setting out, sick with trouble and discovery, and a disorderly life, upon the second tragical round of his pilgrimage, encountered the other poet and his belongings in the neighbourhood of Geneva. In opposition to the story that Shelley had sent *Queen Mab* to Byron with a sort of indictment against him and desire to know if these things were true, it is said by some that Shelley now sent to Byron an account of the sins attributed to himself, and desired his acquaintance if he thought fit to bestow it on knowing all that was said against him. However that might be, the two met at the inn, where they both lived, and formed instant acquaintance. There is as much in common among poets as among craftsmen of a humbler kind. Coleridge and Southey first, Coleridge and Wordsworth afterwards, had come by freemasonry of genius and youth into instant friendship and mutual communication to each other of all poetical properties some twenty years before. What a wonderful difference between that frugal and poor brotherhood, pure, honourable, and unknown, in all their flush of youthful ardour and high thought, and this other two, perhaps more splendidly endowed, richer, of higher fortunes, and far more unhappy! The former held their position against all the pinches of need, in face

of the outcry of the world. What could the world do to them? Coleridge, indeed, exposed himself to much painful criticism and comment, especially in the latter part of his career; but the others lived such upright and simple lives, as took all possibility of a sting out of every evil tongue, and vindicated the high office of poetry over all the world. They preached the sacredness of love, the wonder and mystery of life, the nobleness of duty, the loveliness of self-devotion. Strange contrast! The younger brethren proclaimed a different, an altered code. Duty to them had no existence, nor authority, nor the restraints of nature grave and chaste. Their principle was that of self-will, the satisfaction of desire, the destruction of control, the perfect liberty of doing, not as they ought, but as they would. To Shelley's fantastic soul, the fact that a certain thing "ought" to be done made the doing of it an offence against human freedom. It was not that he loved evil, for, notwithstanding his desertion of one woman for another, there is no evidence in him of a nature impure. But immorality, as we name it, was to him a matter of principle, and the wish of the moment a sacred impulse which it was duty to obey. Byron, a thousand times less innocent, was without this visionary philosophical preference for the forbidden, and while he sinned was ever conscious of a tremor of conscience; but with Shelley, all instincts were good, and that self-will which Christianity insists shall be subdued, was the only god and potentate he acknowledged. Byron, so far as appears, had no philosophical code, but he was a man of unbridled self-regard and what we call passions—and when he wished for anything secured it when that proved possible, without proclaiming it right to do so, yet with a preponderance of fleshly appetite to which the sectary beside him was a stranger. To carry out the contrast, this second group and brotherhood of poets on the banks of another lake fell into a manner of united

living which controverted not only the laws and customs of society, but all that the common consent of mankind has considered necessary for the well-being of the race. The strange code in which the children of Godwin's house had been trained, and which the three wilful young souls who composed Shelley's irregular party, held with combative ardour, saw little harm in the idea that the friend-sister who had accompanied Mary should become to Byron what Mary was to Shelley. It is possible even that they may have believed this connection a possible way of reclaiming and saving Byron, as Shelley congratulated himself on having been saved. As for Byron, a soul far more polluted, he plucked without hesitation a flower where he could find it, and in the desperation of his soul, after the catastrophe which had made all pretences at respectability useless to him, was ready to plunge into any and every such excitement. Thus license reigned in one company of the poets, to whom, the one philosophically, the other sensually, inclination and passion were the powers that swayed existence—a wonderful contrast to the stainless living and lofty teaching of the elder brotherhood among the colder lakes and mountains of the north.

This joint life lasted for about four months, a whole wonderful (but wet and stormy) summer. The Shelleys took a smaller house near to the greater one inhabited by Byron. They were both poor enough; but it was the reckless pennilessness of a wealthy class always capable of procuring luxuries, and not the thrifty and limited existence of the really poor. Their life was spent in a succession of refined and delightful amusements, in boating parties on the lake, in moonlight wanderings, in parties of poetic conversation prolonged far into the night, which sometimes made it expedient that one household belated should encamp under the roof of the other: all was indulgence, pleasure, society, without any of those limits

which ordinary life enforces. Once the two poets set out together round the shores of the lake, going over the scenery of Rousseau's great work with enthusiasm and emotion indescribable. Shelley had never read the *Heloise* before, which was so happy a chance! They lingered about "sweet Clarens, birthplace of deep Love," and strayed through the "bosquet de Julie" silent, moved almost to tears, glad that no vulgar spectator was by to see their emotion: and felt that Rousseau had not chosen for uses of fiction this wonderful landscape, but that it was the very "scene which passion must allot to the mind's purified being." It is to be feared that most of us nowadays find the Lake Leman somewhat prosaic, remembering little and caring less about Julie and St. Preux, unwholesome lovers; but to Byron and Shelley they were divine. Off the rocks of Meillerie they were once caught in a storm, and for the moment looked for nothing but destruction. All this may be seen reflected in the third canto of *Childe Harold*, which is little more than a poetical narrative of the musings and wanderings of that summer holiday. Shelley would seem to have been passive for the moment, receiving all these images into his mind without immediate use of them: but Byron was in full tide of creative power, roused by the great storm of his life into restless energy and force. He could not be still or keep silence in that flood-tide of his genius. His passions, his wild impulses, his wrongs, surged high within him and quickened every faculty. "Agitation or contest of any kind," he himself says, "gives a rebound to my spirits, and sets me up for the time." Perhaps, too, though the breaking up of his life contained so much that was miserable, it was a relief to him to get rid of the unreal and wretched existence which he had been leading in London, in forced subjection to rules which he hated, and in companionship with a woman whose inspiration, in

every point, was at variance with his own. And Shelley, too, had wrongs and profound grievances, which sometimes burned within him, and somtimes overflowed in expressions of anguish. They were both miserable and injured because the world would not permit them, unchecked, to do as they would, and retained to themselves the privilege of railing, with high indignation and poetic fervour, against that world and its restrictions, even while emancipated from its jurisdiction, and following their own pleasures triumphantly as the rule of their life. Strange contrast and pendant to the poetic life of Grassmere and Keswick, with all their pieties and solemnities, the grave simplicity, the laborious calms, the mountain stillness, and voices of the cataract from the steeps! On Lake Leman the two young pairs talked endless sentiment, shed tears of voluptuous emotion, talked through the warmth of summer nights, floated in their boats on the warm bosom of the luxurious lake; or were awed by the semi-grand, semi-theatrical artillery of the storm among the mountains, and in the midst of their enjoyments gave themselves up to corresponding storms of injured feeling, of reproach and fiery outcry against earth and heaven. What had earth and heaven done to them? Objected to let them have their own way—that, and little more.

The third canto of *Childe Harold* has a warmth of individual life in it, an emotion and power which the vaguer miseries and wanderings of the previous portions of that poem share in a much smaller measure. Everybody remembers the address to Ada with which it opens, and which is so much more genuine and real than the theatrical commonplace of Byron's *Farewell*. Nor is the key of real emotion, thus strongly struck, ever altogether lost through all the changes and variations of the strain. Some of his finest rhetorical passages, some of the tenderest touches of musing, of which by times his fiery soul was

capable, are to be found here. The description of the night before Waterloo is now what people call hackneyed —the strongest evidence of its splendid force and effect which could be offered—since no poem is ever hackneyed which has not gone straight to the popular heart. It has embodied for us the wonderful excitement of that historical scene as few historians could do, setting before us as in a picture, as in a vision, the stern marching columns, the dark preparations and readiness underneath, with that light glowing brilliant scene in front of it suddenly arrested, the mirth turned to horror and dismay, the gay sounds into a silence of tragic suspense and despair. It is so breathless, so full of movement and excitement, that the reader has no time to consider its claims to poetical excellence. He is swept away by the force of it, as if he had heard it glowing from the lips of the spectator: it is eloquence of the highest kind. On the other hand, those pictures of natural scenery which in Byron's earlier days had been somewhat vague and conventional, have taken a new intensity and reality of life. The following landscape, the very background of land and water upon which the life of the two poets was set, we select almost at random among many. Everything is in it, sound and sight, and the sentiment of the summer night with all its exquisite sensations and associations.

> "It is the hush of night, and all between
> Thy margin and the mountains, dusk, yet clear,
> Mellowed and mingling, yet distinctly seen,
> Save darken'd Jura, whose capt heights appear
> Precipitously steep; and drawing near,
> There breathes a living fragrance from the shore
> Of flowers yet fresh with childhood; on the ear
> Drops the light drip of the suspended oar,
> Or chirps the grasshopper one good-night carol more;
>
> "He is an evening reveller, who makes
> His life an infancy, and sings his fill;

At intervals, some bird from out the brakes
Starts into voice a moment, then is still.
There seems a floating whisper on the hill;
But that is fancy, for the starlight dews
All silently their tears of love instil,
Weeping themselves away, till they infuse
Deep into nature's breast the spirit of her hues.

"Ye stars! which are the poetry of heaven,
If in your bright leaves we would read the fate
Of men and empires,—'tis to be forgiven,
That in our aspirations to be great,
Our destinies o'erleap their mortal state,
And claim a kindred with you; for ye are
A beauty, and a mystery, and create
In us such love and reverence from afar,
That fortune, fame, power, life, have named themselves a star.

"All heaven and earth are still—though not in sleep
But breathless as we grow when feeling most;
And silent, as we stand in thoughts too deep:
All heaven and earth are still:—from the high host
Of stars, to the lulled lake and mountain-coast,
All is concentred in a life intense,
Where not a beam, nor air, nor leaf is lost,
But hath a part of being, and a sense
Of that which is of all Creator and defence."

If it were not that the soft purity and sweetness of this picture is invaded and disturbed beyond remedy by the other features of the story, we might be tempted to forgive all that was included within the framework of this lovely scene; and, putting aside the ugly facts of the story, the intercourse of these two young poets, their prolonged and endless talk, the mutual stimulation of minds so extraordinary, has an interest which nothing can take from it. They were both in the earliest chapter of manhood, though one of them had already wrecked the prospects of his life, and the other set himself at variance with every authority, and transgressed at least one primary law of nature. Lawless and defiant of all rule, yet hot

and indignant that the society they outraged should have pronounced against them, they stood beneath the pitying heavens, the most nobly endowed of all their generation —two rebel angels, beautiful, fortunate, unhappy ; everything in nature ministering to them, offering of its best ; with faculties within them rich enough to atone for every privation, yet enduring none—proud voluntary outcasts, revolted kings of men.

On one of these wanderings, detained for a couple of days by rain and stormy weather in little Ouchy by the waterside, not far from the sober coquetries of Lausanne, where Gibbon has left his formal memory, Byron wrote the *Prisoner of Chillon*, one of the most perfect and purest of his poems, but perhaps the least like his of anything that ever came from his hand. It is the one grand tribute which the great rebel of the age paid to Wordsworth, its greatest yet most strongly-resisted influence ; and why that shadow should have touched and stilled his spirit just at this tumultuous moment who can tell ? It is one of the strangest caprices of his genius. Chillon, where it stands projected into the silent blueness of the lake, with its oubliettes, its dungeons, and those gloomy openings into the water that suggest many a nameless victim, has no doubt a dark and eventful history ; but this little poem is its record to the world, and nobody, now at least, asks further. No one of Byron's poems is so purely narrative, or has such a unity of lofty and tender interest, uninterrupted by a single distracting image. But this very perfection makes it tame and cold among the heat and animation of the rest : it is the only one in which Byron is left out. No Harold smiles or strides between the massive pillars. For once the conception of a being, who is not himself, has entered his mind, an atmosphere of love and reverence and acknowledgment of the sanctities of human affection. We might

be beguiled into a speculation whether some wavering of the compass towards virtue and truth, some vague comprehension of the secret of a higher happiness had come to him from that calm of nature ; but there is no record elsewhere of any such pause in the force of the torrent which was his life.

Byron was not always in this chastened and purified mood ; but he was in great intellectual activity during this period, his mind thrilling with new life and passion. He composed *The Dream*—that curious picturesque sentimental review of his own life, and insinuation of a remote and inadequate cause for all its imperfections—at the same time ; and also the address *To Augusta*, and several other detached poems, all eloquent, animated, and fine. On the other hand, it would not be difficult to find episodes which are full of glittering rhetoric and little more. Of these is the well-known description of the storm among the mountains :—

"The sky is changed !—and such a change ! Oh night,
And storm, and darkness, ye are wondrous strong,
But lovely in your strength, as is the light
Of a dark eye in woman ! Far along,
From peak to peak, the rattling crags among,
Leaps the live thunder ! Not from one lone cloud,
But every mountain now has found a tongue,
And Jura answers, through her misty shroud,
Back to the joyous Alps, who call to her aloud !

"And this is in the night :—Most glorious night !
Thou wert not made for slumber ! let me be
A sharer in thy fierce and far delight,—
A portion of the tempest and of thee !
How the lit lake shines, a phosphoric sea,
And the big rain comes dancing to the earth !
And now again 'tis black,—and now, the glee
Of the loud hills shakes with its mountain-mirth,
As if they did rejoice o'er a young earthquake's birth."

Another curious production of the two poetic house-

holds must here be noted. Lewis, popularly known as Monk Lewis, paid Byron a visit at his villa, and became one of the little society, which was often confined within four walls by the rain, and eager after every new excitement, as people imprisoned in a country house so universally are. They told each other ghost stories, and tales of mystery and wonder under the inspiration of the kind little inoffensive romancer, who was then master of that branch of the arts; and he or some one else suggested that they should all write for their mutual diversion tales of this character. The only one who carried out the suggestion was Mary, the youngest of the party, a girl not yet eighteen, notwithstanding the turmoil of life into which she had been plunged. That a young creature of this age should have produced anything at once so horrible and so original as the hideous romance of *Frankenstein*, is one of the most extraordinary accidents in literature; and that she should never, having made such a beginning, have done anything more, is almost equally wonderful. Byron is said to have begun a similar sketch, entitled *The Vampyre*, which his physician-attendant, Polidori, afterwards added to and printed; but none of the detailed records of the time inform us what were the feelings of excitement and terror with which the little company, thrilled by the tales of Lewis, listened to the portentous and extraordinary production with which the fair small girl, with her big forehead and her sedate aspect, out-Heroded Herod. Mary Shelley's individual appearances afterwards are only those of a romantically-desolate widow, pouring out her grief and fondness in sentimental gushes, which look somewhat overstrained and ridiculous in print, whatever they may have done in fact; but to hear her read, with her girlish lips, this most extraordinary and terrible of imaginations, must have been a sensation unparalleled. It is one of the books adopted into the

universal memory, which everybody alludes to, and thousands who can never have read it understand the main incidents of — which is a wonderful instance of actual fame. That this should be merely stated as a fact in the history, and no one pause to wonder at it, is another odd instance of the insensibility of contemporaries.

Shelley and his companions left Switzerland in the end of August 1816, breaking up this poetical society, and returned to England. Byron stayed longer, until other friends—his always faithful brethren, Sir John Cam Hobhouse and Mr. Scrope Davies—joined him: and went on in October to Italy. There he settled, in Venice, where his life is said to have been such as scandal itself dislikes to dwell upon. His letters are of the same lively and superficial character as before, but, when any evidence of feeling breaks out, there is nothing but disappointment and misery in the record. "My day is over," he says to Moore. "What then? I have had it. To be sure, I have shortened it"— and he describes the poems he had sent home from Switzerland, especially the third canto of *Childe Harold*, as "a fine indistinct piece of poetical desolation." "I was very mad during the time of its composition," he adds, "between metaphysics, mountains, lakes, love inextinguishable, thoughts unutterable, and the nightmare of my own delinquencies. I should many a day have blown my brains out, but for the recollection that it would have given great pleasure to my mother-in-law." Amid this levity it is hard to understand how much real feeling there was. His "love inextinguishable" was no doubt the passages with Miss Clairmont, which lasted but a little time; but that there is a kind of madness in the headlong and irregulated life which avoids all pauses for thought, and keeps itself intoxicated with something—mountains and moonlight, or light loves, or

grosser stimulants—no one will deny. Unfortunately it is not the poet only who applies such opiates to a troubled conscience and a broken life.

The third canto of *Childe Harold* had expressed the more manly moods of Byron's mind, and the more wholesome interests of his life; but all the time, while he floated about the lake and climbed the hills and composed those melodious stanzas, another poem of a different order was shaping itself in his mind. From the often noble musings of *Childe Harold*, and the grave tenderness and dignity of the *Prisoner of Chillon*, he threw himself back upon the old stage-hero, upon that theatrical sufferer of the past, the Conrad, the Lara, of former years, and made him into a shape still more tragic and solitary. It is curious to read all the tranquil extracts from his Swiss diary, which are quoted as notes to *Manfred* by way of showing how much real observation and study of nature was in that poem, and to perceive how carefully all the images that struck him at the moment are saved up for use, and how the scenes of his careless journey, cheerfully recorded and made in the congenial company of friends, are made to serve and heighten the solitary sufferings of the self-tormented hero. *Manfred* has passed, we think, in great measure, from the mind of the reader. The number of students who read an author through, and know everything he has written, is always few. The greater part of the world makes instinctive selection of what is immortal, and leaves the rest, if not to perish, at least to freeze and crystallise, without any living soul of human remembrance to keep it fresh. But at the moment when these works are getting published, nobody can tell which it will be that posterity will choose: and when we read Jeffrey's awe-stricken applause and Wilson's enthusiastic appreciation, and find that even such an authority as Goethe declares Manfred's mouthings of mock despair

to be an improvement on Hamlet's soliloquy, the extraordinary mistake takes away our breath. The one idea of Byron's limited imagination had been worked hardly enough in the previous tales, which made no such claim upon the reader. Subdued and enshrined in the fine poetry of *Childe Harold*, it has been added to the permanent population of the world; but to place this conventional form among the mighty mountains, and to surround him, in emulation of greater witcheries, with the vapoury visions of an unseen rather more vague and pyrotechnic than himself, was a rash and unfortunate experiment. The subject is one which only the most exceptional merit in the poetry could make tolerable; and the poetry is not exceptional, but below the highest level of Byron's power. To compare his *diablerie* with that of Goethe, or the songs of the spirits whom Manfred evokes, with the melody of Shelley's responses in the *Prometheus*, is to put him at an extraordinary disadvantage. Mr. Matthew Arnold has selected several of these dialogues between the magician and the powerful creatures of the air and elements whom he is supposed to call forth, as instances of Byron's dramatic power; but the dramatic meaning of these passages is surely of the smallest. The following fragment of a scene, after a laboured representation of the court of Ahrimanes, and the turbulent spirit-courtiers who endeavour vainly to make Manfred do homage to their ruler, does for one brief moment thrill the reader. After failing in all his demands upon the aërial potentates, he requires that the dead should be raised, the spirit of his love and victim, that from her he may understand the final mysteries. "Speak to me," he exclaims, when the vision stands silent before him—

> "Yet speak to me! I have outwatch'd the stars,
> And gazed o'er heaven in vain in search of thee.
> Speak to me! I have wander'd o'er the earth,

And never found thy likeness—Speak to me!
Look on the fiends around—they feel for me:
I fear them not, and feel for thee alone—
Speak to me! though it be in wrath;—but say—
I reck not what—but let me hear thee once—
This once—once more!
Phantom of Astarte. Manfred!
Man. Say on, say on—
I live but in the sound—it is thy voice!
Phan. Manfred! To-morrow ends thine earthly ills.
Farewell!
Man. Yet one word more—am I forgiven?
Phan. Farewell!
Man. Say, shall we meet again?
Phan. Farewell!
Man. One word for mercy! Say, thou lovest me.
Phan. Manfred!"

In this scene there is great force and an almost awful pathos. The impossibility, even when the highest spells have been spoken and the most terrible dangers run, to receive any satisfying token from beyond the grave: and the anguish of the man's appeal to a being so far beyond his reach, who has so entirely escaped him, yet was once his, is very powerful and effective. In a very different way, and with a sudden rupture of continuity and every dramatic rule, the description of the moonlight night and of the Colosseum in Rome may be called fine poetry: but nothing could be more entirely out of place in the soliloquy of a racked and tortured spirit on the brink of destruction. "'Tis strange that I recall it at this time," Manfred himself acknowledges in the very spirit of Mr. Puff and his critics. And it seems very unnecessary to create a highly endowed and intellectual spirit for the purpose of singing a song like this;—

"Mont Blanc is the monarch of mountains,
They crowned him long ago,
On a throne of rocks, in a robe of clouds,
With a diadem of snow."

Dr. Watts could have done it quite as well.

Byron lived in Venice for nearly four years. It would be out of place here to enter into the history of his life. He seems to have been delivered from the grosser indulgence of his senses by a real love, as he understood it, for the Countess Guiccioli, to whom he was deeply attached, yet of whom he wrote to his English correspondents with a levity which is little appropriate to a woman adored. In Venice he wrote *Manfred;* the concluding canto of *Childe Harold;* various shorter poems, which count for little among his works; *Mazeppa;* and at the same time made a beginning in a new order of verse and new kind of subject, in the airy gallop and original gaiety of *Beppo;* afterwards ripening into the longer and more impassioned strains of *Don Juan*, two cantos of which were written and published during the year 1819, his last in Venice. After this he went to Ravenna, following the lady whose fortunes were henceforward linked with his, and who was faithful and devoted to him, although in a lawless way. It requires no great strain of charity, we think, to pardon Teresa Guiccioli. She was married at sixteen to an old man, according to family arrangement, as was usual; and had scarcely married when she met the fascinating English poet, about whom all Venice was raving, and who was young and noble and unfortunate, an object of romantic interest everywhere. It was according to the morals of her time and country to permit a lover, the tie between the old husband and young wife in a *mariage de convenance* being so unnatural that permitted license has always been the consequence. This Italian girl had never been taught nor known better, and no hero of romance could have exercised a more powerful spell upon a young creature full of romance and sentiment, yet shut out from all legitimate indulgence of the poetry of youth. All that Italian

morality required of her was a discreet audacity in the management of the situation. To English feeling, on the other hand, the rashness of self-devotion is a plea for forgiveness rather than a crime; and the woman who is unable to *ménager* the claims of her husband and her lover has a hold upon our regretful sympathy which a wiser sinner can never claim. We will not be thought to approve an immoral connection in attempting to say a word of tenderness and pity for the sweet and tender Italian girl from whose lips there never falls an unwomanly word, and whose breast was pure of all interested and worldly motives. She deserved far better than to be spoken of with disrespectful levity as la Guiccioli, and discussed by her lover with his publisher and his friends, in tones which probably do little justice to his feeling for her, but are part of the unpleasant garb of levity in which he thought proper to present himself even to those he esteemed most.

During the two years Byron spent in Ravenna he continued at full pressure of work, producing, except *Don Juan*, nothing upon which posterity has laid hands with any passion of approval, but at least one work, which once more set England and the critics by the ears. This was *Cain*, the wild and singular drama in which all the rebellious heroes of Byronic inspiration ascend, so to speak, to their origin and source. The first sceptic, the first doubter, the first rebel, a definite personage in whose difficulties we can at least see reason, attracts more of our sympathies than any weird recluse, or mysterious bandit. It is difficult to understand why, but for the reputation of the author, and a sort of scriptural prejudice against the art which could endeavour to interest us in that first criminal, so great an outcry should have been aroused by this poem, in which there is no real profanity. The sentiments of Lucifer, it is true, are not such as would

become a churchwarden, but they are no more than we should expect from the individual in question. We have all been brought up upon Milton's Satan, and taught to consider his gloomy grandeur, not only as a lawful subject of our regard, but an edifying and religious one. Byron's Lucifer is not nearly so splendid, but he is not more opposed to Christian feeling; his assertion of power equal to that of God is more modern and shallow than Satan's nobler claim; but this vague self-assertion, and his failure to promise anything that can be called happiness as the reward of disobedience, and the tragical issue that follows, have a moral rather than an immoral tendency. What is a great deal more unfortunate is that Byron here falls into the temptation to use big words and swelling syllables to an extent unknown in anything else he has produced: and that Cain's sullen instinct of rebellion, his refusal to worship, his churlish assertion of the fact that he has been brought into the world without being consulted upon the subject, and that gratitude to the power which has bestowed such an equivocal favour as life upon him is by no means a necessity—in themselves sufficiently legitimate subjects of study—is couched in language too big and high sounding for poetry. Here is one of his speeches and not the most grandiloquent:—

"Oh, thou beautiful
And unimaginable ether! and
Ye multiplying masses of increased
And still increasing lights! what are ye? what
Is this blue wilderness of interminable
Air, where ye roll along, as I have seen
The leaves along the limpid streams of Eden?
Is your course measured for ye? Or do ye
Sweep on in your unbounded revelry
Through an aërial universe of endless
Expansion—at which my soul aches to think—
Intoxicated with eternity?"

This is not poetry, whatever it may be; and Byron's philosophy was far from being his strong point. *Cain* is intended for the intensified and primal type of all the *Manfreds* and the *Laras;* but he is inferior to them in language and even dignity. His original attitude of passive rebellion is sulky, and himself churlish and ill-tempered. The primitive rebel and misanthrope wants the draping of the melodramatic cloak and sable plume, the furniture of mystery, in which his predecessors, yet descendants, have the advantage over him.

Of the dramas produced at the same period it is not necessary to say much. They are full of fine passages, and the subjects are worthy the genius of a great poet; but Byron's genius was not dramatic, and political passions, however tragic, do not furnish the individual note which it was in his power to strike. What old Faliero and old Foscari might have been in the hands of Shakspeare, who can say? but even to Shakspeare, who made choice of the "foolish, fond old man," the deceived and mistaken Lear, to produce his highest tragical effect, the intellectual and stoical Venetians would have given a difficult task. Byron acquitted himself creditably of a fine undertaking; but he did not stir the heart of the reader, or add any charm to the enchantments of that city, which has fewer personal associations than any other historical place, and reigns by right of its own beauty solely. The description of Venice given by Lioni in *Marino Faliero*, and which has been quoted to weariness, is perhaps the one passage which has found a place in the popular memory. It would be difficult to find a more beautiful picture, or more true to the scene; but the young noble, leaning over his balcony, and painting for us with so fine a touch the ideal portrait of his beautiful town, is entirely out of place dramatically, and if the interest were stronger, not the most beautiful poetry could

justify such an arrest and hindrance of all the movement for the sake of anything unconnected with it. *Sardanapalus* is more in the poet's way: the effeminate reveller whom the touch of necessity can turn on the moment into a hero-king, might indeed have afforded a noble subject to a poet perhaps still capable of the same transformation. But none of these works have any right to count as foundations of Byron's fame. If they do not detract from his greatness, that is all. His real titles to immortality lie in *Childe Harold* and *Don Juan*, the two great supporters of his poetic skill.

Mr. Matthew Arnold has characterised poetry as "a criticism of life." It is not, we think, a sufficient definition, but it is just so far as it goes. Poetry has other and, we think, higher qualities. In its creative aspect it reveals new chapters of life to our criticism, and new creatures to run their little round like us, but in a concentrated and perfected circle for our example, not only as commentators, but chief and splendid actors, more great than we. But no poetry has ever more clearly carried out and justified the definition of this writer than that of Byron. His great poems are both criticisms of life, investigations within a limited range of its course and incidents. In *Childe Harold* the poet passes in review all civilised nations, all the scenes of exceptional beauty which have been dearest to mankind—the art that has illustrated and immortalised them, the history which has filled them with undying associations. Man and nature, and knowledge and beauty, all pass before him; or rather it is he—supreme observer, narrator, spectator, of all, heir of time, and lord of creation—who glides by all that has been and that is, made for our instruction, like the types and the prophecies in which even the prophets themselves saw darkly, a meaning to be unfolded only in after generations. In *Don Juan* the situation is somewhat different; the

hero is no longer a spectator, but yet the poet, in him and through him, threading a maze of incidents and innumerable digressions and commentaries, carries on the most lively, profane, unscrupulous criticism of life on which man or poet has ever ventured. Both these critics are, so to speak, on the outside of the subject, fathoming the heart and its deeper mysteries little, yet penetrating social pretences with scornful levity and indignation, with fierce laughter and contempt. The life they comprehend is limited, and their insight is limited; but, so far as it goes, keen as the lightning and recklessly unmerciful. The reader, perhaps, will exclaim against this assertion, taking Byron, as he is so often taken, for the poet of passion, the impersonation of all that is most unbridled and unlimited in human feeling: and we must endeavour as best we can to justify our opinion. It will be necessary, first, however, to indicate what seems to us the essential division which exists between the two theories of life which all poetry, all fiction, and indeed literature in every sphere, has to illustrate and set forth.

And we cannot better illustrate our meaning than by turning back once more upon our comparison of the Wordsworthian and Byronic group—the two great poetic tribes of the period. Nothing can be more different than the two aspects of life of which these poets, on one side and the other, are the critics and expositors. Each has his natural band of sympathisers and disciples. The distinction between them is regulated to some degree by the influence of external position; those who are exempted from their birth from the vulgar burdens of humanity are more likely to enter into the views of the one, those who have their share of toil and privation into the other. But no such external influences hold universally, and many a hardworking soul has found a relief in leaping into the freedom and individualism of Byron's heroes; while to

some, amid all the softnesses and leisure of life, Wordsworth's revelations of supreme and lowly Duty have been a refreshment and renewal of the soul. But the distinction is as clear as that between night and day. He who contemplates life with the eyes of the latter sees men and women bound by a hundred ties, burdened by weights not of their making, under command of duties and of circumstances, and as incapable of extricating themselves from the hands that cling to them, and the exertions that are required of them, as a soldier at his post is incapable of asserting the freedom of a savage to follow his own devices. And a great part of humankind are of the opinion that the career of a man thus burdened—his vindication of truth and honour amid all trials, his steadfast standing at his post, his subordination of himself and his wishes at all cost of pleasure and comfort, and even of existence, to those for whom he is responsible, and the office he has to fulfil—is the worthiest object of regard, of admiration, and sympathy. But the others take a different stand. To them the individual, detached from all other individuals, is the object of supreme interest. The adventures he passes through, the intrigues in which he is entangled, his pleasures, and the price he pays for them, are considered as means of education for himself, and fulfil their highest object in maturing and completing that separate being whose progress, as he moves across the stage of life, without ever losing himself in the crowd or stopping short in his individual career, has a charm which is never exhausted. Whether he sweeps recklessly along upon the tide with Byron, or picks his way through the lessons of experience, like Goethe, he maintains always his isolation, his complete independence, taking what he wants or wishes out of the various groups he passes through, but owing no debt or responsibility to them in return. Life is the study of both schools of poetry, but how different the life! In

the one case full of all the complications of humanity, those liens upon natural freedom which most men have to accept, the burdens that love and pity bind upon the soul, the noble restraints of duty, the inextricable minglings of social existence; in the other an individual career in which these bonds are either eluded or defied, and which, though it gains in unity what it loses in breadth, must always be exceptional—a prodigy and wonder in a world full of confused and interlacing interests. How it is that the progress of such an isolated soul towards perfection, or towards satisfaction—or towards that exhaustion of hope and weariness of soul which the first great poet who handled it has proclaimed with such force in the solemn sadness of Ecclesiastes—should be rather through vices than through virtues, it is hard to tell. But so it is. When a man has fathomed all things, and finds them vanity, it is almost invariably the sinful indulgences, the license and excitement of evil-doing, through which he makes his essays. The art which selects for its sphere this development of individual mind is not necessarily immoral; but it is almost bound to deal with the immoral for the sake of the freedom which is indispensable to its operations, just as the other, which places its ideal in the high fulfilment of duty, must be moral by the mere exigencies of art.

Byron is the chief and greatest British exponent of this classic independence and individualism. Childe Harold and the other more active repetitions of that hero, are presented to us in the stillness of their gloomy self-completion, after they have investigated life and found it nought—like Solomon, a vanity of vanities. But in *Don Juan* we are presented with the process itself, according to the poet's conception of it. And what an extraordinary process it is! This poem, in which Byron has poured out a force and fulness of life which it is hard to find a

match for, spontaneous as running water, rapid, eloquent, extraordinary, full of the vulgarities and pettinesses of the meanest mind, and of sentiments and perceptions worthy of the highest, is a web of reckless and heartless licentiousness from beginning to end. His hero lacks the charm which other and inferior bearers of the name have possessed in that dauntless gallantry and bold confronting of whatever offers—hell and its mysteries, as well as all lesser penalties of the flesh—which have always given the spectator a thrill of admiration for the daring cynic, the splendid criminal of the original legend, the Juan of Molière, even the Giovanni of the opera. Byron's Juan in himself is a mixture of an amiable and pretty youth with a mischievous and elvish spirit. He is no more at best than a dissolute page, to whom vice is partly fun, a depraved Cherubino, an impudent and shameless boy, too trifling to be guilty. After the tragic death of Haidee, which has roused the poet to a higher art, and moved him for the moment into impassioned and genuine poetry, the hero skulks off like a whipped schoolboy. If he had robbed an orchard or a cupboard he could scarcely have been less dignified in his punishment, or more easily cured of his smarting. The heartless and soulless young scapegrace has nothing whatever to do with any higher penalty or consciousness. His whipping over, he goes forth again an impudent young rover once more. It is possible that it pleased the angry spirit of Byron to put forth to the world which he regarded so bitterly, and which he believed had wronged and injured him, a worthless image like this as the quintessence of youth and romance; but it is just as likely that it was the mere recklessness of composition, and that he put down Juan as printers in their proofs sometimes put a hieroglyphic in the place of a much-used letter, to save him the time and trouble necessary for the creation of a worthier hero. And the hero is fitly set in

the greater part of those moral or immoral reflections in which the poet, shameless as himself though so much greater, chooses to frame his rambling story. Criticism of life! Lord Byron is not the first who has dignified the hackneyed fable of uncleanness with that name; but it is strange with what ease it has always been accepted as such, as if life were limited to one combination and confined to the narrow span of existence in which "passion" so called, bears sway.

It would be easy, however, if this were all, to dismiss *Don Juan* as something like the insult to his language and his country which, at the first appearance, to judge by the universal assent of all contemporary writers, it was felt to be. But this strange poet, this cynical commentator upon vice, this critic of wives found out and husbands made ridiculous, of confidential maids and complaisant duennas, and all the frowsy paraphernalia of debauchery, would not have been the wonder he is had there been no admixture in the strain. But when the reader, disgusted, turns the leaf, from where the laughing devil on one page flouts at vice alike and virtue, he finds an angel, all unabashed by such company, unconscious of it, on the next. Imagine the man who, in the midst of his filthy story, drawing breath for a moment to enable him to pile the excitement higher, glides unaware into verses like these:—

> "We'll talk of that anon.—'Tis sweet to hear
> At midnight on the blue and moonlit deep
> The song and oar of Adria's gondolier,
> By distance mellow'd, o'er the waters sweep;
> 'Tis sweet to see the evening star appear;
> 'Tis sweet to listen as the night-winds creep
> From leaf to leaf; 'tis sweet to view on high
> The rainbow, based on ocean, span the sky;
>
> "'Tis sweet to hear the watch-dog's honest bark
> Bay deep-mouth'd welcome as we draw near home;

'Tis sweet to know there is an eye will mark
  Our coming, and look brighter when we come;
'Tis sweet to be awaken'd by the lark,
  Or lull'd by falling waters; sweet the hum
Of bees, the voice of girls, the song of birds,
The lisp of children, and their earliest words."

Still worse, still more wonderful, is the contrast between the nasty repetition of an oft-told tale in the discovery of Julia's sin by her husband, and the letter of noble and devoted love which, introduced and followed by the most cynical banter, the poet makes his vulgar *intriguante* write to his impudent boy-lover. Nothing before leads us to expect it, nothing after justifies it. Genius, grown sick of its own wilful self-desecration, and of all the filth about, flings out into this sudden caprice, and in a moment, and for a moment, vindicates itself. Was it, one wonders, the appeal of some pure glance, the clearness of some reproachful sky, that shamed his reckless spirit? Thus for page after page the riotous brilliant stream runs on, full of everything we hate, yet dazzling us with its sparkle and impetuous flood, which here and there changes, is stilled, and reflects no more vile earth and its most debasing passions, but catches through the tangled shadows in their rank growth overhead, a sudden bewildering glance of heaven.

This redeeming touch, if we may call it so, only added to the natural indignation of the better critics of the time, who were revolted by the introduction of refined sentiments in unworthy mouths, and pure and noble feeling, even a fragment of it, amid the steam and fermentation of impurity. The first two cantos appeared alone in 1819, without the name of either author or publisher, a foolish attempt at mystery which warranted the common reproach that both were ashamed of the production. Mr. Murray, most respectable of publishers, very likely was so; but Byron was not to be concealed. He watched the effect

from his Venetian palace, withdrawn out of reach of all the clamorous voices which hailed it with almost universal reprobation, with something of mingled bravado and alarm, like that of a man who has thrown a bomb and waits to see its effect; and though he professes the utmost indifference to that effect, there would seem little doubt that it did move him. The after cantos contain nothing like the story of Haidee for beauty and tenderness; but neither are they so bold in offence. The poet runs away in the voluble easy rattle of his commentary upon the surface of society. Long ere we have got to the end of the stream it has run into a delta of mud and sand, in which the rills of story are lost; and the end is confusion, without either force or meaning of its own, or any connection with what has gone before. The shipwreck and the siege stand out from the midst of the dalliance with all the force of contrast. Few verses have been more constantly quoted than the description of the former, which presents us, when in the midst of a great deal of somewhat grim laughter it touches tragedy, with a very forcible and splendid piece of rhetorical narrative. It is scarcely necessary to allude to the savage onslaught upon the poets of the other school, and especially upon Southey, into which he breaks from time to time, or to the supposed fiercely satirical description of his wife under the character of Donna Inez, with which the poem opens. This is in every respect indefensible, both morally and as a work of art. No poem in the English language that we are aware of, so long and so important, is so unworthy; but its vigour and vitality are as unequalled as are its perversity and cynicism, its fierce abuse and unbridled impurity. There is scarcely a pause or stop in the impetuous and brilliant torrent which pours forth adown plain and hollow, as if from burning springs. It has fallen now into the still current of general literature, and rouses at

least no personal passions; but such was not the case at the moment of its appearance. Byron's best friends in London sat in grave committee upon the manuscript, and shook their heads and would have suppressed it altogether, as they afterwards suppressed his autobiographical remains. But the impetuous poet would not listen to them. He was greatly wounded and offended, it is evident, by the comments of "my cursed puritanical committee," as he calls them. "If you had told me the poetry was bad," he says "I would have acquiesced; but they say the contrary, and then talk to me about morality." He threatens therefore that he will write his best book in Italian, though "it will take me nine years more thoroughly to master the language," and declares that he cares nothing for the English public. "I have not written for their pleasure," he cries; "I have never flattered their opinions nor their pride; nor will I. Neither will I make 'ladies' books' *al dilettar le femine e la plebe.* I have written from the fulness of my mind, from passion, from impulse, from many motives, but not for their sweet voices." This passionate disclaimer is so clearly that of a man in the wrong as to require no commentary. It is not the man indifferent to popular applause who protests with such heat that he does not seek it. No one was ever more susceptible to it. At a later period he tells the long-suffering Murray that "the things I have read and heard," after the publication of the first two cantos, "discourage all further publication, at least for the present," and offers pettishly to return the price of the copyright. Disapprobation took the heart out of him. "They have not the spirit of the first," he says of the later cantos. "The outcry has not frightened, but it has hurt me; and I have not written *con amore* this time. It is very decent, however, and as dull as the last new comedy."

The composition of *Don Juan* was stopped half way, at the prayer of Madame Guiccioli, but afterwards resumed. Probably it was intended to be much longer, or at least the poet did not intend that his Pegasus should run away with him into those wide digressions of sharp wit and superficial philosophy, abuse, and scandal, which form the greater part of the poem, and had meant to make his hero illustrate the life of various countries in a much longer succession of adventures. But though his genius had not failed, his life had begun to flag; and to all appearance he let himself be carried away on the current of facile and brilliant verse without taking count where he was going. Probably he was aware that he had lost himself and his purpose, and therefore stopped abruptly with the sudden sensation of impatience and self-disgust which overtook easily a mind so little assured of itself, though so rash and obstinate by times. The graver composition of the plays went on at the same time, and so did the heavy and solemn *Prophecy of Dante*, and his translation of an unreadable Italian poem the *Morgante Maggiore* of Pulci, to which, with his usual strange misapprehension of his own powers, he attached the greatest importance. Pulci was, in his own opinion, the fountainhead from which he got that new spring of poetry which he had essayed in *Beppo*, and made famous in *Don Juan*. It was the rhyme of Hookham Frere's poem of *Whistlecraft*, already referred to; but Byron would not consent to follow the inspiration of Frere. "Pulci," he says, "is the parent not only of *Whistlecraft*, but of all jocose Italian poetry." He did not succeed in interesting Englishmen in this great original, but he made the "light horse gallop" of the measure to be supereminently successful for the discursive treatment he loved, and this was a better demonstration of its merits than any obsolete Italian could have given.

According to all the rules of growth and development, it should have been *Juan* who came first out of the burning fermenting brain of the young poet, and *Childe Harold*, which followed later, out of his maturing mind and calmer intelligence. Had it been so, Byron might perhaps have lived and expanded into greater work and better fame; but this, unhappily, was not the course of his genius. We have already spoken of the early cantos of *Childe Harold* which brought him at a bound to the very pinnacles of fame. If these first bursts of a poetry still vague and half awakened had so great an effect upon the public mind, what must have been the sensation produced when, flying from real ruin and overthrow, the catastrophe which ended all better hope for him, and made him doubly defiant of a world which he believed had used him so hardly—the passionate pilgrim dashed forth once more over the sea into the unknown, full of anguish and resistance, but with every power heightened, and life itself running doubly strong in his veins? In the third canto, the new beginning of this great poem, Byron attains his climax. He has never been so near our sympathies, never so near the deeper secrets of life. For the first time he comes within the range of influences more penetrating and sacred than the passions and semi-fictitious despair of his youth. The air is tremulous about him with a possible conversion. It seems to hang on the poise of a breath, whether the perverse, headstrong, capricious, undisciplined soul may not seek refuge, with its wounds and smarting sense of wrong and misery, amid the soft ministrations of nature, in the grateful stillness of hills and waters, of simplicity and peace. Now and then this possibility seems so near that it is all but realised. The contrast of the "clear placid Leman" with the wild world he has abandoned—

"Warns me with its stillness to forsake
Earth's troubled waters for a purer spring."

He feels the infinity stir around him as he stands in that solitude where he is least alone; "the quiet sail is as a noiseless wing" carrying him away from all impure distractions. "Are not the mountains, waves, and skies a part of me and of my soul?" he asks in that musing mood, which never was so profound and tender:

"And thus I am absorb'd, and this is life;
I look upon the peopled desert past,
As on a place of agony and strife,
Where, for some sin, to sorrow I was cast,
To act and suffer, but remount at last
With a fresh pinion; which I feel to spring,
Though young, yet waxing vigorous as the blast
Which it would cope with, on delighted wing,
Spurning the clay-cold bonds which round our being cling."

The poet never realised these wavering possibilities. Other influences were too many for him. He went back to the wretched elements of life, and sank down from those dawnings of a higher soul to vulgar passion and vulgarer trite cynicism and philosophy. But we have the best of Byron in the last half of the *Pilgrimage*. Everything is stimulated in him: his perceptions, his natural feelings, his capability of thought, and the more liquid and larger music of his verse.

CHAPTER V.

SHELLEY—BYRON.

SHELLEY and his companions left Lake Leman in the end of the summer of 1816, leaving Lord Byron there to pursue his course southwards a little later. In November of that same year the tragic incidents to which we have before alluded threw gloom and additional reproach upon the life of the younger poet. Harriet, his young wife, whom he had abandoned nearly two years before, and who in the interval had not lived too wisely or purely, according to the vague accounts given of her by the biographers of Shelley, committed suicide. That this miserable event gave him intense pain almost all agree; as indeed it is impossible to imagine that a being so sensitive could have been indifferent to such a catastrophe. But it certainly cleared his path of an incumbrance, and in six weeks after, his connection with Mary Godwin was legitimatised by marriage. Thus the theory of Godwin's philosophical sect against marriage as an institution was finally disposed of. Godwin himself had married more than once, notwithstanding his opinions. Shelley, in honourable superiority to them, had married Harriet when she put herself in his power; but the daughter of Mary Wollstonecraft, already his unwedded companion, might have helped him to maintain his theoretical standard of superiority to all bonds of law, if ever woman could. The

pair, however, visionary as they were, followed the beaten way of law and order, against which they had rebelled, as soon as it was open to them ; and in this act the last spark of energy and meaning which remained in the lawless little band of sectarians died out. Sacred or not, the institution was too necessary, too expedient, to be rejected when the penalties of rebellion were fully realised.

Even in his grief for the catastrophe which swept poor Harriet out of his path, Shelley, it is said, maintained his innocence of all blame in respect to the poor girl who had thus taken her fate in her own hands. They were all pitifully young, which is almost their only excuse—that and their philosophy together. For youth is cruel, without meaning it, notwithstanding that it is easy of access to all emotions. Its own affairs bulk so largely, its own feelings preoccupy it so entirely, that it is hard to give due consideration, from any other point of view, to the obstacles in its way. A little later occurred an incident to which more importance has been attached by all Shelley's biographers and apologists than the death of poor Harriet. "Meanwhile," says Mr. Rossetti, the last of these defenders of the poet's memory, with fine irony, "a Chancery suit had been commenced to determine whether Mr. Percy Bysshe Shelley or Mr. Westbrook (Harriet's father) was the more proper person to elicit such intellectual or moral faculties, as the ruling power of the universe might have gifted the poet's two children with. In the eyes of a bandaged Justice the retired hotelkeeper proved to be clearly better fitted for this function than the author *in esse* of *Alastor* and *in posse* of the *Triumph of Life*." From this inflated statement of the case the reader will derive little real information. Harriet had left two children : one a little girl a year old at the time her husband forsook her, the other a boy born after their separation, and whom Shelley had never seen. The chil-

dren had lived with their grandfather all their little lives, and been supported by him; and in the eyes of the ordinary spectator and of common equity, their father, who did not know them, who had never shown any interest in them, who had been the ultimate cause of their mother's wretched life and suicide and who had just married that mother's supplanter, was evidently anything but a likely guardian of two innocent little mortals, between whom and himself there could be nothing but the mere formal bond of blood. Almost everybody who has mentioned the circumstance has represented it as a rending of the poet's heart, a cruel separation from his offspring; and no event in domestic history has been more bitterly denounced, or with more passion. Yet these are the circumstances, plainly stated. In the case perhaps of no other pair living would a man's mistress, newly married to him on the death of his wife (which is the plain and brutal way of stating the circumstances), be considered a proper mother and guardian for that wife's daughter; and it is ludicrous to speak of any real paternal feeling on the part of Shelley towards children whom he never seems to have even inquired about till this moment of conflict. It seems unlikely that any Judge would come to a different decision now than that which Lord Eldon has been devoted to all the infernal gods for pronouncing in 1817. Shelley had to make an allowance of £200, or some say £120 yearly, for the maintenance of the children, and never saw them after. Heaven and earth have rung with proclamations of the injustice of this decision: but it is hard to see in the circumstances wherein its cruelty lay. It half moved Byron to withhold *Don Juan* from the press, lest that publication might throw obstacles between himself and his child, should he ever be in a position to claim her; but the motive was not powerful enough, though it was an effective thing to say.

At this time the Shelleys lived at Marlow, where the poet spent much of his time upon the river. It is a pleasure to the imagination to contemplate him out of all the vulgar strife and passionate hot complaints of injustice—to find him here quiet and in obvious ease, though he gave away his money wildly and lived an unthrifty life—floating about the kind and genial Thames, under the shadow of the Bisham woods, among the knotted tangles of the water weeds and floating lilies, his boat floating too in rhythmic leisure and gentle movement, noiseless with the flowing of the water, a soft accompaniment both to life and song. It was on some cliff of Bisham overlooking the river that the *Revolt of Islam* was chiefly written, and there is a wonderful appropriateness in the scene. Something like the flowing of a river is in its linked sweetness long drawn out, an endless gurgling of melodious verse. Time and space, and character and fact, and all limitations, float away as the poet sings his song. It is beautiful; it is heavenly sweet; it is vain as the blowing of the summer air which ruffles the foliage without motive, without meaning, yet is sweet as any sound in heaven or earth. Laon and Cythna are the ideal devoted pair who are to free their race from oppression; but what that race is, or how it is to be freed, no one can tell. The young hero is taken in his first effort and imprisoned high upon a mystic rock, where he has horrible visions. The maiden, escaping from a wonderful cavern under the sea, in which she too has been confined, takes his place and works a momentary victory through the women of the land; but, too magnanimous, they spare the tyrant, who lives to plot and plan and overthrow their work — and at the end perish together upon a great funeral pile, to which envy and fierce prejudice and bigotry drag them, on pretence that the sacrifice of the pair will propitiate Heaven and stop the pestilence. Here

indeed, they perish; but next moment open their eyes upon a lovely landscape, and find themselves seated upon "the waved and golden sand of a clear pool," and are finally carried off in a pearly boat steered by a child angel, who turns out to be the child of which Cythna had become the mother in her cavern—to the island of the blessed. Nothing can be more vague and visionary than the story, or more musical than the manner of telling it. The reader who attempts to fathom what it means must wade through shallow oceans of sweetness till he is dazed with melody; but even then will bring but little away. The landscape is like nothing human; it is made up of every image of beauty that can be heard of or discovered; and the revolutions that take place in bewildering succession are equally beyond the reach of the common understanding, which loses itself in the maze. As the two fair spirits disappear in the mystic boat, the river over which the poet's rapt eyes were gazing as he wove his song perhaps touches his mind for a moment, and, though with decorations unknown to Thames, steals into the concluding strain:—

"A scene of joy and wonder to behold,
That river's shapes and shadows changing ever!
When the broad sunrise filled with deepening gold
Its whirlpools where all hues did spread and quiver,
And where melodious falls did burst and shiver
Among rocks clad with flowers, the foam and spray
Sparkled like stars upon the sunny river,
Or when the moonlight poured a holier day,
One vast and glittering lake around green islands lay.

. . . . . .

"Sometimes between the wide and flowering meadows,
Mile after mile, we sailed, and 'twas delight
To see far off the sunbeams chase the shadows
Over the grass; sometimes beneath the night
Of wide and vaulted caves, whose roofs were bright
With starry gems we fled, whilst from their deep
And dark green chasms, shades beautiful and white,

Amid sweet sounds, across our path would sweep,
Like swift and lovely dreams that walk the waves of sleep.

"And ever as we sailed, our minds were full
Of love and wisdom, which would overflow
In converse wild, and sweet, and wonderful;
And in quick smiles whose light would come and go
Like music o'er wide waves, and in the flow
Of sudden tears, and in the mute caress—
For a deep shade was cleft, and we did know
That virtue, though obscured on Earth, not less
Survives all mortal change in lasting loveliness."

This stream of poetry is one which need never end; it flows on, finding new images at every turn of the lingering unmeasured way. There is no need that anything should come of it; that there should be incident, or moral, or even meaning. Shelley was always fond, even when his song reached a fuller music, of the "did know," "did spread," "did burst," which jar a little in the melody, but yet do not furnish discord enough to harm the cadence. The *Revolt of Islam* is the longest of all his poems, and the last which any but a student is likely to turn to now.

In 1818, Shelley and his family went to Italy, and among other wanderings the poet visited Venice and Lord Byron, renewing the friendship which had been begun on Lake Leman. Of this visit the poem called *Julian and Maddalo* was one of the results. It was not the first essay he had made in narrative poetry, which seems to have attracted him at this period of life, but it was a much higher flight than *Rosalind and Helen*, which preceded it. These two tales, if tales they can be called, stand alone in his poetry. Perhaps they were a conscious attempt in a new channel, perhaps the fruit of some suggestion; but, whatever was the cause of their production, it is evident that this medium did not please him, and he returned to it no more. *Julian and Maddalo* is inter-

esting from the glimpse it gives us of the two poets in their second meeting. There is no record in verse of Byron's estimate of the companion and fellow-traveller of whom, at a moment of his life so important in his history, he had seen so much; but there was a link of connection between them in the little person of the poor baby Allegra, Miss Clairmont's child, who in her infancy had been sent to her father in Venice, and who, happily for her, closed her existence in a very few years, and thus got rid of a maze of unhappy circumstances which must have overshadowed her bitterly enough had she lived. It was upon some business connected with this infant that Shelley went to Venice, and she, too, comes into the story. "Whilst I waited, with his child I played," the poet says—

> "A lovelier toy sweet Nature never made,
> A serious, subtle, wild, yet gentle being,
> Graceful without design and unforeseeing,
> With eyes—oh speak not of her eyes!—which seem
> Twin mirrors of Italian heaven, yet gleam
> With such deep meaning, as we never see
> But in the human countenance: with me
> She was a special favourite, I had nursed
> Her fine and feeble limbs when she came first
> To this bleak world; and she yet seemed to know
> On second sight her antient playfellow,
> Less changed than she was by six months or so."

It is, however, the description of Byron and the picture of one of his best known habits which is specially interesting, bringing before us the scene with all its enchantments, and the two poets in the central light, young and with so many of the richest gifts of nature, yet so little satisfied or happy:—

> "I rode one evening with Count Maddalo
> Upon the bank of land which breaks the flow
> Of Adria towards Venice: a bare strand
> Of hillocks, heaped from ever-shifting sand,

Matted with thistles and amphibious weeds,
Such as from earth's embrace the salt ooze breeds,

. . . . . .

This ride was my delight. I love all waste
And solitary places ; where we taste
The pleasure of believing what we see
Is boundless, as we wish our souls to be :
And such was this wide ocean, and this shore
More barren than its billows ; and yet more
Than all, with a remembered friend I love
To ride as then I rode ;—for the winds drove
The living spray along the sunny air
Into our faces ; the blue heavens were bare,
Stripped to the depths by the awakening north ;
And, from the waves, sound like delight broke forth
Harmonizing with solitude, and sent
Into our hearts aërial merriment.
So, as we rode, we talked ; and the swift thought,
Winging itself with laughter, lingered not,
But flew from brain to brain—such glee was ours,
Charged with light memories of remembered hours,
None slow enough for sadness : till we came
Homeward, which always makes the spirit tame.

. . . . . .

Our talk grew somewhat serious, as may be
Talk interrupted with such raillery
As mocks itself, because it cannot scorn
The thoughts it would extinguish :—'twas forlorn,
Yet pleasing, such as once, so poets tell,
The devils held within the dales of Hell
Concerning God, freewill and destiny :
Of all that earth has been or yet may be,
All that vain men imagine or believe,
Or hope can paint or suffering may achieve,
We descanted, and I (for ever still
Is it not wise to make the best of ill ?)
Argued against despondency, but pride
Made my companion take the darker side.
The sense that he was greater than his kind
Had struck, methinks, his eagle spirit blind
By gazing on its own exceeding light."

The rest of the tale is supposed to illustrate the vanity

of Shelley's sanguine view of life, and the justice of the gloomier aspect under which it appeared to Byron. No doubt it is a real reminiscence of many a discussion of the kind, when Shelley, an eager optimist, ardent in easy plans of liberating nature, and still keeping a longing hold upon the gospel according to Godwin, met with the cynicism of the elder poet, the man worn with dissipation and many a downfall, and glad to attribute to fate and necessity the evils which he could not escape from. The description of Venice which follows is singularly beautiful, most finely touched in liquid clearness and light, in all its glow of sunset colour and quick-falling magical light.

This year and the two or three following were the climax of Shelley's genius, as indeed they were all that remained to live of his disturbed and unsettled life. He wrote in rapid succession his greatest poems one after the other—the *Prometheus*, in some respects the most perfect work of the age; the *Cenci;* the *Epipsychidion*, and many others. We are not aware of anything in the English language that can be fitly placed by the side of the great ideal drama, beautiful as a vision, glowing with imagery and song, yet great and imposing as the marbles of the gods, which came suddenly forth from amidst the Alastors and Laons, and their swamps and marshes of verse, and set itself at once in the high places above criticism. Something, no doubt, of the old perversity of the boyish Atheist, who was never content save when hurling defiance at the heavens, was in the poet's choice of the rebellious Titan, the god-defier and vanquisher, as his hero. Though it is but an official god that is to be dethroned, yet the idea is dear to him; and even in the aspect of imperial Jove, the cloud-compeller, the king of gods and men, there is nothing to conciliate the intellectual iconoclast, to whom the very idea of law and rule is obnoxious. But though this lurks in every line of the suffering Titan's challenge

and stern disdain of all his enemy can do, yet there is no commonplace blasphemy in the poem. Prometheus, upon his rock immovable, capable of nothing but suffering and constancy, cowing his victor even while he endures all the agonies that Jupiter sends, is a magnificent conception. He is comforted by the melancholy and dignified voice of the Earth, the great mother for whom he suffers, and by the softer pitying presence of Ione and Panthea, who sit by him through his vigil veiling their lovely faces in their wings, when the furies dart upon the silent sufferer and torture him; but yet Prometheus is alone, all-enduring, resolute as the rock on which he is bound. His figure rises with all the effect of a noble picture against the lurid sky, full of fiery and cruel light. "Ah me, alas! pain ever, for ever!" This opening overawes and absorbs even the reader least disposed to understand an ideal representation so far beyond and above the forces of humanity. The Thalabas and Kehamas, even the Manfreds and Cains, vanish before a conception so great, clothed in verse so melodious and noble. It is like nothing that had ever been seen before in the poetry of the north. There is a veil over our perfect understanding in many cases. The spirits and their voices, though beautiful, are confusing; they are too like each other, or our faculties lack clearness to keep the threads of being separate. In classic times, when the earth ran over with visionary life, and wild and lovely intellectual creatures lurked in every brook and every tree, character and individuality had not begun to be needful. This is the greatest drawback to the modern mind in comprehending the visions of classical antiquity, or rather those modern adaptations of them, in which a consciousness of this difficulty always lurks. But the group of Prometheus commends itself to the eye as well as to the ear. It is cut out for us as in living marble, and the high and noble

verse in which the heroic Titan utters his soul seldom falls below the tragic dignity of the situation. On the other hand, the sweetness and devotion of the great woman-spirit remind us more of the theories of those religious enthusiasts who believe in divine duality and a mother-God than of the mere softnesses of the classic nymphs. Asia has the greatness and power which become a divinity: and even her sister-spirits are above the dimensions of the human. These grand outlines are somewhat vague; they are too little concise, too unlimited in speech, for even the ideal drama. Indeed, there is scarcely a single dramatic element in the great Mystery, as it rises slowly amid ethereal music, with one great voice pealing by times in stately sweetness above all artifices of oratory, between us and the skies. This is the part of the poem which, to our thinking, is the greatest; but its lyrics still stand unrivalled in the language. Sometimes there is a touch in them of the quaint and delightful no-meaning of some of Shakspeare's snatches of spirit-song, but in most cases the lovely melody still retains a thread of intellectual power, and the soft cadences as they fall carry an echo of thought. To compare them with the hymn-book choruses of *Manfred* would be to throw into almost ludicrous light the *banalité* and laborious matter-of-fact of those productions. The song of Asia, so often quoted, conveys so true a picture of the character of Shelley's poetry altogether, and its effect upon the sympathetic reader, that we extract it, not so much as an example of beautiful verse as for the description it contains:—

> "My soul is an enchanted boat,
> Which, like a sleeping swan, doth float
> Upon the silver waves of thy sweet singing;
> And thine doth like an angel sit
> Beside the helm conducting it,
> Whilst all the winds with melody are ringing.
> It seems to float, ever, for ever,

Upon that many-winding river,
Between mountains, woods, abysses,
A paradise of wildernesses,
Till, like one in slumber bound,
Borne to the ocean, I float down, around,
Into a sea profound, of ever-spreading sound.
Meanwhile thy spirit lifts its pinions
In music's most serene dominions,
Catching the winds that fan that happy heaven;
And we sail on, away, afar,
Without a course, without a star,
But by the instinct of sweet music driven,
Till through Elysian garden islets,
By thee most beautiful of pilots,
Where never mortal pinnace glided,
The boat of my desire is guided."

"This poem," Shelley says, in prose almost as ornate as his poetry, "was chiefly written upon the mountainous ruins of the Baths of Caracalla, among the flowery glades and thickets of odoriferous blossoming trees, which are extended in many widening labyrinths upon its immense platforms and dizzy arches suspended in the air. The bright blue sky of Rome, and the effect of the vigorous awakening spring in that divinest climate, and the new life with which it drenches the spirit to intoxication, were the inspiration of the drama." Unless it had been written in the groves of Ida, on the slopes of Olympus, it could not have had a more fitting scene.

This great work was followed at a short interval by the terrible and impassioned drama of the *Cenci*. That Shelley should have chosen so horrible a story shows how curiously his musical genius and tender soul were disposed towards the most fantastic and incredible glooms of imagination. He could not bear to see or think of pain, but his mind had an unnatural pleasure in horrors which are beyond the common range of criminality altogether, and cruelties too black for merely human conception. There is something in the primitive simplicity and abso-

lutism of such a nature, rejecting all modifications, and dealing only with first principles, which makes it compatible with the most sensitive gentleness to impute the fiercest capabilities of crime to those who disagree with it. No Puritan had ever a keener vein of bigotry in him. He would not have burned or beheaded, but he did worse: he thought the enemies of freedom and of free thought were capable of pursuing himself relentlessly, and attempting his assassination in real life: and in poetry it was his pleasure to imagine, as easy and delightful to the minds he hated, such unnatural crimes as make the hair stand upright on our heads. Probably he believed, in all sincerity, that a worshipper of the God whom he regarded as cruel and merciless, the God of punishment and wrath, He who commanded the destruction of the Canaanites and the slaying of Agag, was capable of any monstrous outrage upon human nature. In pursuance of this wild theory he makes the hideous reprobate Cenci, not a mocker or false believer, but pious after a fashion, imploring God's curse upon his knees, and believing it will come. Besides this polemical impulse, which never deserted him, his mind had a natural inclination towards extremes. The contrasts which he preferred were darknesses as of hell in alternation with the sunny noonday—not mere passing clouds and vapours. No doubt it was those natural tendencies which made the most revolting of historical incidents attract him. The pain and freezing horror of it will keep the drama of the *Cenci* from ever being popular; but few readers will have any difficulty in granting the claim made by Shelley's disciples, that it is the finest tragedy of the age. To tell the truth, this is not saying much, for the age was poor in dramatic art, as England has continued to be.

But there is nothing poor or feeble in this wonderful production. It is totally unlike anything that Shelley

produced either before or after. The self-restraint which banished from its nervous dialogues so much of his natural exuberance of detail and imagery, shows a power with which we should not have credited him but for this example, and nothing in his previous work could have prepared the reader for the distinctness of conception, such as it is, with which these terrible figures are framed. It would be hard to say they are natural; there is little humanity in them; but the extraordinary image of the father burns against the background with a diabolical force and determination which is indescribable. We know of no such bad man in all poetry. Shakspeare's Richard holds a very different position in the world of imagination; he is curiously fashioned, shadowed out and rounded against the troubled scene with all his subtle gifts, his specious arguments, and fine pretences. But Cenci is unprovided with any of these gradations. He has not even the excuse of a great ambition. His ghastly triumph in the news that his sons are dead has no sufficient purpose; nor has the worse outrage upon his daughter. It is evil for evil's sake that he gloats in, and derives a fell enjoyment from, and the highest gratification he anticipates is working such utter debasement of soul in his victims, that the crime he forces them into will become an inspiration to them also. Cenci himself has never known what innocence was. His early friend has no recollection of him save one of wickedness:—

> "I stood beside your dark and fiery youth,
> Watching its bad and bold career, as men
> Watch meteors; but it vanished not. I marked
> Your desperate and remorseless manhood: now
> Do I behold you, in dishonoured age,
> Charged with a thousand unrepented crimes."

Such a creation can scarcely be called human: it is the symbol of guilt which pleases the primitive mind,

without relentings, without complication, all bad and black and absolute; but it has a hideous ideality and life. Beatrice, on the other hand, resembles little the sad, half-childish half-heroic martyr of Guido's picture, which in its wonderful anguish of spent tears and exhausted hope, is one of the most touching images Art has handed down to us, and one of the best known. The outraged heroine of Shelley is a far more passionate and powerful spirit. There are no softenings in her, no shrinking from the vengeance, which her unimaginable wrong demands. And indeed the mistake in her is, that she is too strong to make it possible for us to believe in the outrage at all. Such a woman would have resisted to the death, and would not have been overcome. This is the flaw in the conception, the failure which the reader feels in spite of himself. Her proud and fiery spirit, however, is no type of excellence, but bears the oil in it of being Cenci's daughter. The scene in which she overawes the actual murderer, and forces him, by the power of her constraining eyes and indignant eloquent address, to withdraw the confession extorted by the rack, and (falsely) to declare her innocent, is fine and exciting, but degrades Beatrice from any ideal eminence. The only expedient for a heroic woman in such circumstances would have been to stand strongly upon the justice of her cause and vindicate her act. She might have been moved by the impulse of self-defence at first, and faltered; but in cold blood could never have sent her tool to death with a lie on his lips. Putting aside these defects, however, all that she says is poured forth with noble fire and energy. Beside her all the other personages of the drama grow pale—the shrinking attendants, the gentle Lucretia, the vacillating Giacomo, the deceitful Orsino, are weak and ghost-like: but her mien is ever grand, and her utterances powerful. The *Cenci* stands by itself in the intensity of its gloom and passion; a work to be read once

with excitement and awe, but which the general reader would be little apt, for his own pleasure, to turn to again. It is far more like the Greek drama in the unity of its single purpose and movement than the rich and irregular variety of Shakspeare. Shelley was of the former, not the latter world. His sympathies with men were all theorétical; he had no brotherly insight into their ways, or appreciation of their wants, though he would have bought justice for them and freedom, according to his conception, with his blood—or anybody else's. But his world was the absolute, not the real. Sometimes this raised his poetry into a confused but lovely empyrean far above the comprehension of the general; but sometimes, too, led him to failure, and to substitute a lower creation for a higher, as in the case of Beatrice, who, such as she is, a pale and terrible figure, stands distinct against the poetical firmament with an altitude and bearing entirely her own.

Among the poems which followed there are several of which it is very difficult to speak. Such strange yet beautiful rhapsodies as *Epipsychidion* and the *Witch of Atlas* defy all the comments of the critic. The former is a strain of impassioned love addressed to "a beautiful soul," the noble Italian lady who would seem to have inspired Shelley with a spiritual passion. Whether it were only spiritual, it is needless to inquire. The language of passion is always subject to mistaken interpretation; but the reader can scarcely help reflecting that the bond of marriage, which neither husband nor wife thought necessary, was a very useful safeguard to Shelley and Mary. So far as a meaning can be traced through the sweet wilderness of verse, the poet would seem to identify in his Emilia the ideal which he has been pursuing all his life—the one perfect woman of his dreams. Their opportunities of meeting were few; but their letters were of the most impassioned description,

and this poem is one long hymn of adoration to the "Spouse! sister! angel!" "too late beloved, too soon adored," whom he describes as the "Pilot of the fate whose course has been so starless." The passion in the poem, however, is too abstract to offend the most sensitively moral, and it is beautiful as running water, or the sound of his own *West Wind*, or any other inarticulate melody. Amid its indistinct loveliness, however, here is one curious little passage, which shows the confusion of Shelley's own mind as to ordinary human ties:—

> "I never thought before my death to see
> Youth's vision thus made perfect. Emily,
> I love thee; though the world by no thin name
> Will hide that love, from its unvalued shame.
> Would we two had been twins of the same mother!
> Or, that the name my heart lent to another
> Could be a sister's bond for her and thee,
> Blending two beams of one eternity!
> Yet were one lawful and the other true,
> These names, though dear, could paint not, as is due,
> How beyond refuge I am thine. Ah me!
> I am not thine: I am a part of thee."

There must have been no inconsiderable heartache among the little group at Pisa, however it was distributed, when these lines were written; although, perhaps, in the fragmentary lyrics of the poet's last days there was matter still more dangerous; but we need not inquire into the sentiments which save in these beautiful verses have left no other record. Love, even when expressed in the loveliest poetry, is less lovely when it breathes forth devotion to a number of adored objects. The *Witch of Atlas* is more mysterious still than the anthem of passion which is inscribed to Emilia Viviani. There are readers who will understand—or at least who will be so carried along the stream of poetry, like Asia in her enchanted boat, that they will seem to understand these beautiful

utterances of mystery; but no critic could define them, and it is unnecessary to add anything to the many expressions of admiring bewilderment which already exist. Other poems of varying beauty and splendour we must be satisfied to name in the same way—the *Triumph of Life*, a fine unfinished allegorical dream, the confused dramatic sketch called *Hellas*, and many more. In *Adonais*, which is an elegy to the memory of young Keats, just dead in Rome—the *avant-courier* preceding into the unseen this young and brilliant group of short-lived poets—we have the thread of meaning which many of the other productions of this period want so much. Shelley was not, according to his letters, so great an admirer of Keats as he seems in his verse; but his indignant spirit had been roused by the common idea of the time, that the poor young poet was the victim of a review—

> "And that the soul, that very fiery particle,
> Had let itself be snuffed out by an article,"

as Byron says, with somewhat cruel levity. This idea fired the revolutionary, to whom critics were but another kind of tyrants oppressing the free-born, and in the flame and fire of his sudden partisanship and wild grief over the slaughtered, this poem was written. It is worthy of a more perfect inspiration. If it has not the succinct splendour of *Lycidas*, it counts next after that wonderful lament, and is a fitting and noble monument to the young poet. Though it was somewhat hard to assail a harmless reviewer as "a deaf and viperous murderer," and though the foundation of all this scathing denunciation was a mistake, yet the verses which enshrine the memory of that gifted boy are as beautiful as if they had sprung from pure love and sorrow:—

> "Peace, peace! he is not dead, he doth not sleep—
> He hath awakened from the dream of life—

'Tis we, who lost in stormy visions, keep
With phantoms an unprofitable strife,
And in mad trance, strike with our spirit's knife
Invulnerable nothings.—*We* decay
Like corpses in a charnel ; fear and grief
Convulse us and consume us day by day,
And cold hopes swarm like worms within our living clay.

" He has outsoared the shadow of our night ;
Envy and calumny and hate and pain,
And that unrest which men miscall delight,
Can touch him not and torture not again ;
From the contagion of the world's slow stain
He is secure, and now can never mourn
A heart grown cold, a head grown grey in vain ;
Nor, when the spirit's self has ceased to burn,
With sparkless ashes load an unlamented urn.

" He lives, he wakes—'tis Death is dead, not he ;
Mourn not for Adonais.—Thou young Dawn
Turn all thy dew to splendour, for from thee
The spirit thou lamentest is not gone ;
Ye caverns and ye forests, cease to moan !
Cease ye faint flowers and fountains, and thou Air
Which like a mourning veil thy scarf hadst thrown
O'er the abandoned Earth, now leave it bare
Even to the joyous stars which smile on its despair !

" He is made one with Nature : there is heard
His voice in all her music, from the moan
Of thunder, to the song of night's sweet bird ;
He is a presence to be felt and known
In darkness and in light, from herb and stone,
Spreading itself where'er that Power may move
Which has withdrawn his being to its own ;
Which wields the world with never wearied love,
Sustains it from beneath, and kindles it above."

These lines do not sound much like the production of one who had signed himself "Atheist" in the levity of a traveller's book, and on every more serious occasion when an opportunity was offered him ; but it does not seem that Shelley doubted immortality, though he doubted God : and poetical ethics are always vague. "That

Power which wields the world with never-wearied love" is the hardest of all things to keep out of true poetry, which, in its very nature and essence, turns towards the divine, whatever its possessor may think or say.

There remains to notice only that portion of Shelley's poetry which is his most indisputable title to fame—those lovely little lyrics which are dear to all. If Shelley's productions were all swept out of the world except those which are preserved in Mr. Palgrave's admirable little book, the *Golden Treasury,* we doubt much whether the loss would seriously or generally affect his claims to immortality. The *Ode to the West Wind*, the *Skylark*, the *Spirit of Delight*, the *Lines written at Naples*—"in dejection," as the title goes—those which were composed among the Euganean Hills, and many a nameless snatch of song, breathing infinite suggestions of melody and thought, are, of all he has left us, the most dear to the common heart. Fanatics may prize Shelley's mystic utterances, and students do their best to fathom them for ages, without making the least impression upon the wider human audience; but the heart and the ear which are closed to the charm of these shorter lyrics are dull indeed, and unworthy the effort of a poet; the memory is unfurnished in which they do not lurk to sweeten solitude and give expression to many a wistful thought and dreamy fancy. Some of them embody the very soul of pensive thoughtfulness:—

> "We look before and after,
> And pine for what is not;
> Our sincerest laughter
> With some pain is fraught—
> Our sweetest songs are those that tell of saddest thought."

It is hopeless to attempt to indicate one after another these beautiful songs of the imagination and heart; the reader wants no guide nor introduction here.

The life Shelley spent in Italy in these fertile and abundant years was full of friends, and though also full of agitations, would seem to have had its share of happiness. The curious correspondence which is to be found in the volume, published since these pages were written, of Southey's letters to Caroline Bowles, comes in strangely in interruption of the softer record. It seems almost cruel to remind so irresponsible a being as Shelley, once he had escaped the atmosphere of real life which, more or less, is always to be found in England, of the tragedy of poor Harriet and the misadventures of his early life, as Southey does with a stern virtue which, in any other circumstances, we should approve. The elder poet did not know how soon the inexorable shadows were to close round that young and visionary life, which at all times had played with its existence, nor ever fathomed the real meaning of the phantasmagoria with which it surrounded itself. But as a matter of fact, we do not love Shelley the less for his old friend's somewhat pitiless indictment. We cannot think of him indeed, with our knowledge of all that was going to happen, without so pitiful a sense of approaching fate, that our forgiveness of all his vagaries is secured beforehand. And yet it is difficult to blame Southey, who was right also from his point of view; and sadly disappointed besides in the youth whom he had loved and considered in the shortsightedness of man as another self, whom he could understand and help over his difficulties. This little episode of severe condemnation comes like the visit of a gloomy seer, alarming in momentary solemnity, yet soon got over, into the records of the little Italian coterie, where all was wild and astray, yet full of enjoyment and of the pleasurable yet sometimes almost tragic inquietude of youthful life.

In 1821 Shelley went to Ravenna to visit Byron, and induced him to join the little company of friends at Pisa.

One consequence of this renewed intercourse was an invitation sent to Leigh Hunt, a poor man with a family of children and a sick wife, who had been one of Shelley's warmest friends in his early days in London, and to whom he had already done innumerable kindnesses, to come to Italy, for the purpose of joining Byron and himself in a literary enterprise, the idea of which they had struck out between them. It is difficult to disentangle the rights of this story from the three or four versions of it which are given by the different actors in the transaction. By one we are told it was Byron's idea; by another that the suggestion was first made by Shelley, with a view to benefit Leigh Hunt; by Leigh Hunt himself, that it was to be a joint undertaking, Lord Byron being the originator of the scheme: and by Byron, that he was himself drawn (we think he does not hesitate to say inveigled) into it by the brothers Hunt for their own profit. This is one of the literary misunderstandings which are most unpleasant to read of and least edifying to investigate. The plan was to start a quarterly review or magazine, to be called the *Liberal*, and published in London, though written in Italy, and which was to afford a medium for the poems and speculations and ideas of the poetical brotherhood and their retainers. Shelley seems to have had but little to do with the scheme, but it was he who invited with eager kindness the friend whom he had already served so often, and with whom and his family both Mary and he were on the most intimate and cordial terms. The Shelleys and their friends, Captain Williams and his wife, with whom they formed almost one household, had gone to the village of Larici, on the eastern Riviera, for their summer quarters, when the Cockney poet and journalist arrived, after a long and miserable voyage, at Leghorn. Shelley and Williams had a short time before been made happy by the acquisition of a pleasure boat, "a small

schooner," which they called the *Don Juan*, and in which they had sailed about those happy coasts like two schoolboys, full of delight in their new toy, through May and June, in the lovely Italian summer, rash and joyous, with one sailor boy for their crew, and all the temerity of ignorance. The two set out "in high spirits" in their little cockleshell, coasting along the most beautiful shore in the world, to busy Leghorn, to meet the stranger—whom Shelley installed in his own house at Pisa, and welcomed with enthusiastic kindness. After a few days' delay to see his friends established, and renew the talks and confidences of old, Shelley and his companion set out together in their boat, to return to their temporary home. The description given by Captain Trelawney, one of the members of this intimate society, of the evening on which they set sail, reads almost like a bit out of one of the many narratives of imaginary voyages which Shelley delighted in. Just so would he have painted the fatal evening on which Alastor or Laon, the heroes of his youth, set out to meet an evident fate.

"It was almost dark, though only half-past six," Trelawney says; "the sea was of the colour, and looked as solid and smooth as a sheet of lead, and covered with an oily scum. Gusts of wind swept over without ruffling it, and big drops of rain fell on its surface, rebounding as if they could not penetrate it. There was a commotion in the air, made up of many threatening sounds coming upon us from the sea. Fishing craft and coasting vessels, under bare poles, rushed by us in shoals, running foul of the ships in the harbour. As yet the din and hubbub were that made by man: but their shrill pipings were suddenly silenced by the crashing voice of a thunder-squall that burst right over our heads. For some time no other sounds were to be heard than the thunder, wind, and rain. When the fury of the storm, which did not last for more than twenty minutes, was in some degree cleared, I looked to seaward anxiously, in the hope of descrying Shelley's boat——"

But the reader knows that in that blast Shelley's wayward, beautiful, and wealthy genius, not yet fully de-

veloped, had taken flight, and was lost to all mortal mediums of communication for evermore.

Strange stories are told of supernatural warnings and intimations which had been made to him during that early summer, of impending fate. He saw, or thought he saw, the appearance of the little Allegra, who had died a few weeks before in her Venetian convent, rise out of the sea, and smiling, clap her hands at the sight of him. He had been called from his bed by a cloaked figure, which, leading him into another room, threw back its hood and disclosed his own features. On another occasion some of his friends saw Shelley, to all appearance, walking near them, when he was certainly in another place; as Sir Robert Peel is said to have seen Byron in London streets, when he was in Venice. Those curious indications of instinctive faith in the supernatural seem strange in a man who had so gloried in his unbelief—but to be sure it was God, and especially the Christian God, whom he disbelieved, and not the unseen. What is perhaps more extraordinary is the constant disappearance in a boat of all the creatures of his fancy. Generally it is a dream river up which they thread their course as they disappear from mortal sight; but whether it be death or translation, this is always the medium. In his own case it was the quickly excited, soon allayed *tourment* of that soft Italian sea, by which he made an instantaneous transition from warm youth, and life, and poetry, and friendship, into the unknown.

It is unnecessary to linger upon the oft-told tale of the burning of the recovered bodies, when weeks after the sea gave up its dead. It was said at first that those funeral rites were exacted by the authorities, but this does not seem to have been the case, and the high-flown ultra-poetical spectacle was evidently the suggestion of some one among the excited band of young men, distracted

by the shock and horror of the sudden catastrophe, yet not without a certain theatrical sense that their heathen rites were the finest tribute that could be paid to the poet. Leigh Hunt gives a painful picture of a scene which was too much for the highly strained nerves of spectators so sensitive and excitable. He relates how Byron and himself fell into wild mirth as they drove away, with that flame still scorching their eyes, and their souls harrowed by the unprecedented sight; they laughed and shouted to the reproachful night in the wild half madness of pain, trying to forget the horror of it. Thus, by sea and by fire, what had been Shelley was scattered to the elements, of which his eager tremulous nature, his soul alit with wandering lights, his wild rebellious spirit, his tender heart, and the poetry which embodied every tone of natural music and every strange turn and twist of spiritual caprice, might have been framed.

The connection between Lord Byron and Leigh Hunt was short-lived, and in every way unhappy. In all the letters of the former he makes it appear that his connection with Hunt and his periodical was not of his seeking, an impression which seems to be quite contrary to the facts of the case; but it was a painful position for both —the friend who united them being thus snatched from between them a few days after the arrival of the poor and harassed man of letters, whose faithful friend Shelley had been for so long. The *Liberal* failed completely, notwithstanding the publication in it of Byron's *Vision of Judgment*, and other poems by his hand: and of all that Leigh Hunt himself could do—and though an unthrifty man, he was never unpopular as a writer. But Byron, too, was now at the end of his poetical career. He had poured forth his soul in various ways, and in many an unaccustomed channel; he had ranged over the whole gamut of poetical utterance, from the dialogues of the loftiest angels

to the rattle of *mondain* commentary, modern politics, and scandal, and he had not in any found the satisfaction for which his soul craved. He believed that his popularity in England was forsaking him, and the universal voice of criticism which had been raised against the immorality of *Don Juan* had, even while it flattered, shaken deeply a mind which, though rashly self-willed and venturesome, never had any real confidence in itself. That the public had sustained a shock in its fidelity to a poet who, notwithstanding moral disapproval and all the social persecution which he supposed he had been subjected to, had secured above any other its steadfast allegiance, seems to be proved by the fact that his *Vision of Judgment*, the fierce satire with which he annihilated Southey, found no publisher, and had to see the light in the *Liberal*, along with the tedious translations from Pulci in which he took a perverse pleasure. All this quickened the discontent, the restless desire for some new excitement—or nobler determination to make a new beginning and do something in the world of more actual effect than poetry—which was fermenting in his mind. "If I live ten years longer, you will see that it is not over with me—I don't mean in literature, for that is nothing—but you will see that I shall do something, the times and fortune permitting, that, like the cosmogony of the world, will puzzle the philosophers of all nations," he writes. And it was now that those proposals were made to him by the committee of Greek sympathisers in London which decided his fate.

Here seemed, indeed, the new opportunity he wanted. Byron had little sympathy with those who were his immediate social inferiors at any time. From the day when a schoolboy at Harrow he protested against the flogging of a comrade because he was a lord, till his latest breath, a love of peerages and titles which goes the length of

vulgarity, and which makes the great poet in certain phases cruelly resemble the British snob, that revelation of modern genius, had been strong in him. But this did not interfere with a practical liking for "the people" as represented by servants and dependants, and a theoretical interest in the emancipation of oppressed countries, and the restoration of freedom to such classic races as the Italians and Greeks, both of which were then under the yoke of other powers. He had joined the Carbonari some time before, and had gone through an interval of anxious expectation, looking for a rising, and fully disposed to lend his aid in every way to the hoped-for revolution. That project had come to nothing; but the time seemed to be ripe for the deliverance of the Greeks, and every generous impulse was in favour of that race, from which all our traditions of art and poetry and wisdom have come. Weary of all things, and disgusted with most, seeing, as he thought, his very fame slip from him, with some real enthusiasm for the cause and an eager desire for a new opportunity of distinguishing himself, Byron threw himself into this romantic expedition. He went out like a new crusader to conquer and set free the sacred lands of poetry and freedom. All that was in him, both good and bad, was roused for this undertaking. It was a great, noble, romantic enterprise, worthy of his rank, and transferring to another and, he thought, more splendid sphere the superiority which his genius had achieved: and there was at the same time a touch of melodrama in it which pleased the other part of him, the weaker part of the author of the *Corsair*. It is needless to enter into the sad tale. He went away in a kind of masquerade of greatness on which approaching fate and genius throw to us nowadays a dignifying solemnity, notwithstanding the mock heroics that were in it. But his constitution was broken and his days numbered, and after a most distress-

ing illness, mismanaged and miserable in every way, he died at Missolonghi in April 1824, about two years after the scarcely more sad catastrophe which ended the life of Shelley. His last words, inarticulate and not understood, indirectly concerned the tragedy of his life; the names of his child, his wife, and sister, were made out by his distracted attendant, without anything more of the final explanations or last messages which his spirit, confused among the mists of death, intended to send to them. And thus, in loneliness and trouble and sorrow, this being so wonderfully endowed, and who might have had so glorious a career, passed away into the darkness. A more sad conclusion could not have been imagined. On his thirty-sixth birthday, which occurred less than three months before, he had written some verses, not on his highest level, but with something of the same sentimental-romantic cast to which he had given vent at the greatest crisis of his life, anticipating for himself "a soldier's grave." But even this was not granted to his ambition, and all that he could do for Greece was to soothe in some degree intestine clamours and sacrifice a great deal of money. No outburst of new power, no blaze of new fame, was permitted to the tried spirit to make up for the failure of its life.

Thus ended the second group of the poets who were the glory of the generation preceding our own, and who formed with their elder brethren such an epoch of literary greatness as has seldom crossed the severer path of history. The young Keats, of whom we have yet to give an account, and whose connection with this greater pair is accidental more than real, had glided out of the world before them, like a pale herald or page to announce the coming of the princes. The elder men who had preceded them in the world of letters, and lent them, if not inspiration, at least the genial suggestion which woke their individual voices, outlived them long, seeing them rise

and fall like meteors. We will not attempt to make any further comparison between the two bands of poets; they were essentially different in genius, and bore up each a separate side of that poetic crown which, next to the Shakspearian, distinguishes this age as the greatest in the history of our language. It is a favourite pursuit with many students of history to trace the high tides of intellectual energy to the immense stimulation of such a political event, for instance, as the French Revolution, and much has been said of the effect of that extraordinary crisis in human affairs upon the development of so great a school of poetry in England. But we are unable ourselves to see the connection, so far as the earlier group is concerned. Wordsworth, Coleridge, Southey, and the lesser minds who were connected with them, felt, indeed, the momentary influence which a great contemporary event must inevitably exercise upon sensitive spirits; but their minds were cast in an entirely different mould, and save that Wordsworth probably got from his Revolution experiences, the fine theory which runs through much of his poetry, as to the uses of misery and suffering, and their beneficial, if painful, agency on the world, it is impossible to point to any effect which the convulsions of political life had upon them. But Byron and Shelley were the children of the Revolution. The spirit of wild discontent on one side and wilder visionary longing for a new system and form of life on the other had got into their veins. Obedience, discipline, and order, and all the established sanctities of home and family, of law and government, were to them tyrannical prejudices of the past. Their minds were restless all their life long with that fever which they had sucked in at their birth, which so many secondary circumstances account for, yet which may well be believed to have taken its origin from the wild ferment in the air, the hot and fiery commotion, the blood and

flames that reddened earth when those angels of divination, confused yet receptive, first lighted upon it and took their earliest survey of its affairs through wondering childish eyes. They did not know what they would be at, any more than the populace did which found a vent for its blind misery in spreading the like around it, and exacted a wild vicarious atonement indiscriminately from the innocent, for the wrongs done by the guilty. To both these uneasy souls the conditions of Revolution lasted all their lives long: they never got out of that fatal atmosphere. Wildly rejecting all guidance, without leader or following to steady them upon their way, they had but their own uncertain instincts, their own wild impulses, to guide them; and to glorify these impulses, and make of them the only divine guides, was the object, so far as they had an object, of much of their poetry and of the greater part of their lives. Even what they loved became repulsive to them when it was associated with the idea of duty. The fantastic freedom of a classic Faun, to roam where it would, to enjoy as it would, to dart away at every impulse, was in Shelley's ethereal nature, only half human and altogether irresponsible: though his intellect tangled him in theories of political justice, in fantastic schemes for the amelioration of the race, and his child's heart of pity and tenderness made him incapable of denying kindness or help to any supplicant—save those who had a lawful claim upon his service. Byron was of the earth earthy—a totally different kind of being. He did not stand upon the right of doing wrong, like his companion spirit; he followed the law of his appetites and senses, without any doubt on the point that it was bad to do so, but a braggart's pleasure in the badness, as a proof of his courage and power of rebellion against heaven itself, which he was never unwilling to appease privately by acknowledgment of his insubordination. His was in every

way the lower side of the great rebellion. He had all the restless uneasiness, all the sense of a world out of joint, of wrongs to be avenged, and bitter opposition to all authorities and exactions of duty; but he was a cynic where Shelley was an enthusiast, and hoped nothing from the race, to which, notwithstanding he too showed a contemptuous prodigal pity when any individual pang came under his eyes.

Peace tc their troubled spirits! The heart bleeds to contemplate them, so young, so full of noble gifts, dropped so early out of all operation of those experiences of life which might have brought a higher development and perhaps a nobler element of tranquillity and satisfaction into their lives. We are far from believing in such waste of genius as that their noble faculties are lost. By this time, perhaps—who can tell?—these changed and perfected voices, in fullest harmony and measure, are preparing for us the songs to be sung in heaven.

CHAPTER VI.

JOHN KEATS.

THE youngest of this young group, connected with Shelley by natural links of congenial spirit and temperament, as well as by some actual acquaintance and kindness, but fiercely thrust aside and disowned by Byron, cannot be dissociated from their larger and, young though they were, maturer figures. The distance between twenty-four and thirty is not very much in years, but it makes a marvellous difference in development, and even to Shelley Keats was not much more than a boy full of ambition and promise. John Keats was born in 1795, and was consequently three years younger than Shelley, and seven years younger than Byron. He was not like them, born, as people say, "a gentleman," but belonged to that middle class which, in those days, kept itself much more closely within its own boundaries, and did not invade the high places as now. His family had much respectability and a little money, but the parents both died early, leaving their children to the care of strangers, and bequeathing a delicate constitution to two at least of their sons. One of his brothers died at a still younger age than the poet, and he himself seems to have been always a delicate youth, accustomed to much care and anxiety about his health. "The publication of three small volumes of verse, some earnest friendships, one profound passion, and a premature death,'

are, as his kind and sympathetic biographer, Lord Houghton, touchingly says, "the only incidents in his career." His poems, though they have held their ground from that time to this, are more preludes and overtures in poetry than anything else, and he had little time to show what manhood was in him, and had not that command of money and leisure which enabled his contemporaries to emancipate themselves from the ordinary bonds of life. Byron was a ruined peer, and Shelley a rich man's prodigal son: but even the poverty of wealth is better than the well-to-doness of the humble, and confers a certain fine superiority to fate. Keats was in no way superior to fate. His friendship with Leigh Hunt brought him within the little literary coterie of which that gentle journalist was the head: and he had met Shelley in its little assemblies, where poetry was the great subject, and the neophytes babbled perpetually of green fields. The epithet of the Cockney school bestowed upon this band by the sharp-tongued critics, was not without reason, for Leigh Hunt's enthusiasm for everything that was green and growing has a tone of exaggeration in it which sounds like that of a man whose garden was a flower-box in a window, and his extravagances of furnishing and decoration—though far enough, no doubt, from what a minor poet would think necessary now — afforded contemptuous amusement to the stalwart writers of the Blackwood school. No doubt this pale youth, with his angelic blue eyes and long hair, flitted out and in of that lower circle of society in London which we have attempted to indicate. He attended Hazlitt's lectures on the poets, and wrote long letters about them to his friends, several of whom were poets like himself, as they all thought in those days,—but not like Keats as it turned out:—and he had the freedom of Haydon's studio, who was then a rising painter, with, as everybody thought, all the world before him, to

whom even Wordsworth, as well as the younger fry, addressed sonnets. The occupation of young Keats in those days was that of a medical student, and he seems to have gone manfully through the preliminary work of the profession to which he was destined, though it revolted him, as may be easily imagined. To thrust a worshipper of beauty such as he was, while still so young and always so sensitive, into the dark revelations of disease and the horrors of anatomy, must have been to subject him to an ordeal almost unendurable: and all the advantage his studies eventually gave him was the painful enlightenment by which he could decide on his own case, and foresee the inevitable end of his first attack of illness. But poetry and perpetual poetical communion with so many who were like-minded sweetened his uncongenial toil. Once, it is said, he met Coleridge while walking with Leigh Hunt, no doubt in one of the suburban lanes between Hampstead and Highgate. After a little cursory talk, during which, probably, the modest stripling stood silent, they parted: but a minute after, Keats, his enthusiasm bursting through his shyness, rushed back to beg that he might shake hands with Coleridge. No doubt it was a thin and hot and humid hand which was thrust into that of the elder poet; for he said, "There is death in that hand," as the young enthusiast rushed away.

Keats, however, was not Cockney in his inspiration. Though he was no scholar, his mind was Greek rather than English. It is not wonderful that a highly educated youth, fed upon Greek poetry from his earliest dawn of perception, should turn back upon the classic ages as the true and only fountains of poetical loveliness and truth. But Keats knew these glories only at secondhand, and the fulness of understanding with which he jumped at them looks almost like divination. His mind answered to the far-off touch of the ancient divinities before he

knew what they were. He has left in his sonnet on Chapman's Homer an admirable description of the effect produced upon him by his first introduction to the Greeks and their divine fables—

> "Oft of a wide expanse, had I been told,
> That deep-brow'd Homer ruled as his demesne:
> Yet did I never breathe its pure serene,
> Till I heard Chapman speak out loud and bold:
> Then felt I like some watcher of the skies,
> When a new planet swims into his ken;
> Or, like stout Cortez, when with eagle eyes,
> He stared at the Pacific—and all his men
> Look'd at each other with a wild surmise—
> Silent, upon a peak in Darien."

This great new sea of inexhaustible story and vision which the young reader "shouted" with delight to discover was the very element of his soul. He flung himself into it with a comprehension and feeling which few of its profoundest investigators ever attain. Had he found his inspiration in his own century, in the atmosphere which he and his contemporaries were breathing, we, for our part, would have thought the choice wiser. But such was not the bent of his genius. He turned from the confusions of his own age, which he had neither strength nor inclination to fathom, to the calm and distant land of shadows, where gods and goddesses came down to men, where Endymion wooed Diana, and the Sun-god was superseded on his throne—with the relief at once of physical weakness and natural disposition. He was not robust enough for political strife, or to struggle as his contemporaries were doing with noisy questions about the Regent's morals or manners, or the corruptions of the State. It was so much easier and more delightful to escape into the silvery brightness, the magical dreams and dews of Olympus, even as reflected in dim mirrors of English, and amid the commonplace surroundings of our

latter days. From the first glimpse we have of him in his letters, amid the weak boyish jokes and banter which are not worth preserving or reading, there occur continual references which show how early poetry had become his chief object in life. Those whom life endows more abundantly with other interests may play with their inspiration, feeling towards that divine gift as, according to Byron, men do towards a scarcely stronger passion—

> "Man's love is of man's life a thing apart,
> 'Tis woman's whole existence."

This was the case of Keats in respect to the heavenly gift, which was all that redeemed his dim existence to him. In poetry his was the woman's part—it occupied all his thoughts. "I find I cannot exist without eternal poetry," he says at a very early period; "I began with a little, but habit has made me a leviathan. I had become all in a tremble from not having written anything of late; the sonnet overleaf did me good—I slept the better last night for it." There is something hectic in this eagerness, as if the fervid boy already divined how little time he had in the world to exercise his gift.

He had made considerable progress in his medical studies when, either the need of poetical expression became so urgent or the encouragements of his friends led him to believe that he had in his genius a means, not only of delight but of feasible occupation. Early in 1817, when he was twenty-two, he went to the Isle of Wight, in order to "be alone and improve himself," as he says, and evidently with the intention of testing his powers in some greater effort than he had yet attempted: and here *Endymion* was begun. His mind was full of the importance, almost solemnity of this outset. "I have asked myself so often why I should be a poet more than other men, seeing how great a thing it is, how great things are

to be gained by it, what a thing to be in the mouth of fame, that at last the idea has grown so monstrously be yond my seeming power of attainment that the other day I nearly consented with myself to drop into a Phaeton," he writes to Leigh Hunt in the midst of a trifling letter full of the usual semi-poetical chatter of the coterie. But he seems at the same time to have held himself aloof from the perpetual discussions, criticisms, and laudations with which such a society receives the productions of its members, and retained his independence. "If poetry comes not naturally as the leaves to a tree, it had better not come at all," he says, and with the true spirit of an artist adds a little later, "I am anxious to get *Endymion* printed, that I may forget it and proceed." This is like anything rather than the puling boy which he was once represented to be.

The story of *Endymion* does not require any description here. The poet leads us through endless glades, through enchanted ravines, by fountains and streams of fairy beauty, with his love-lorn youth, who is devoured by an overpowering passion for an immortal, far greater and more beautiful than any earthly maiden. The charm of the mystery, and the intoxication of a love almost too great for mortal faculties, absorbs and abstracts altogether the shepherd prince, who is not yet worthy to join his lady in the skies, and who does not even know which of the divinities it is who has raised him to this dizzy elevation of visionary passion. The development of romantic life which the poet has given to the pair of lovers and their secret meetings is just such a filling out of the old fable with the new existence of modern genius, as gives the legend a delicate human charm. It never attains to the melody of Shelley's verse; but remote as the subject is from human experience, it is a little nearer the solid ground than the adventures of Laon and Cythna: for Keats never loses hold of his little silvery thread of

narrative, and keeps all his descriptions and musings within a certain relation to it. *Endymion* is not a great poem. It is not perfect in its melody even, but full of numberless little jars and breaks of poetical discord. The oft-quoted line with which it begins, and which has become a sort of copy-book commonplace by dint of usage, is Leigh-Huntish, and a perfect emblem of the sentimental half-sham half-slang used by the little poetical tribe who decorated their parlours with green boughs and statuettes, and considered themselves priests of beauty and nature. "A thing of beauty is a joy for ever:" it is the very sentiment of those little meetings where all was melody and nonsense and poetical definition and ornament, and where art was not, nor nature. But the poet goes far beyond his keynote, and in the leisure of youth lingers over lovely images, half complete, and glimpses of the divine—not indeed of the spiritual kind, nor embodying a noble moral, or any elevation of the human towards a sublimer sphere—but the divine of classical dreams and visions in which personal bliss and the soft intoxication of pleasure were all that was dreamed of as perfection. The sweet and aimless song has no theories in it such as Shelley was bound to interweave in his wildest wandering visions. Keats, though he was so little apart from his great contemporary in age, was no child of Revolution. He wanted nothing but to roam about the unimaginable tangles of the dewy woods and meet his goddess, humouring his humanity by long despondencies and privations of her presence, till it flashed upon him in a moment, with that sudden note of joy and sudden bursting of the darkness into light which makes every darkness suggestive, and every corner a hiding-place beyond which rapture lurks, to the instinct of youth. It is this which makes Keats the favourite of young readers. His song is the song of youth and natural delight.

This artless utterance had but a harsh welcome from the world. The hot animosity which politics excited, and the prejudice with which the little community of the suburbs, in all its mingled criminality of sentiment and sweetness, of Radicalism and impecuniosity, was regarded, found vent upon the boyish production of a young man who cared little about politics and had but a transitory connection with the coterie. Why Wilson, in all his genial bigness, should have foamed at the mouth over Leigh Hunt it is wonderful to imagine, save that there is a kind of soft pretension which irritates more than greater sins : but the poor young poet, supposed to be a disciple of his school, was still more savagely used by the censors of literature on all sides. *Blackwood*, in a cruel mood, advised him to go back to his gallipots, and sneered at the starved apothecary after a brutal fashion of the time which has happily disappeared from our usages now-a-days. And no one treated him more contemptuously than Byron, who could not find epithets nasty enough to vent his disdain in, and who, when Jeffrey generously stepped into the field to maintain the cause of the unfortunate youth, declared with bitter spitefulness that he himself no longer cared for the applause which he shared with such a being. So far did all these assaults go, that it was the common belief of the time that Mr. Gifford, in the *Quarterly* (the poet of Anna), had killed Keats—a supposed guilt which called forth the fierce and eloquent denunciation of Shelley in the *Adonais*. But this was not true, though no doubt the critic deserved what he got for some other iniquity, if not for that. The young poet bore these attacks with manly and modest firmness. He was "far more annoyed" by the cool indifference of Wordsworth—who remarked only, "It is a pretty piece of Paganism," when the *Hymn to Pan* was read to him—than by the more public abuse with which he was assailed.

"I begin to get a little acquainted with my own strength and weakness," he says with dignity to some anxious sympathisers: "my own domestic criticism has given me pain without comparison beyond what *Blackwood* or the *Quarterly* could inflict." And here is a vindication of his youthful work which it would be difficult to surpass in candour or manliness. The reference is to a letter which had been published in the *Morning Chronicle* in defence of the young poet.

"J. S. is perfectly right in regard to the 'slip-shod Endymion.' That it is so is no fault of mine. No! though it may sound a little paradoxical, it is as good as I had power to make it by myself. Had I been nervous about it being a perfect piece, and with that view asked advice, and trembled over every page, it would not have been written; for it is not in my nature to fumble. I will write independently. I have written independently *without judgment*: I may write independently and with judgment hereafter. The Genius of poetry must work out its own salvation in a man. It cannot be matured by law and precept, but by sensation and watchfulness in itself. That which is creative must create itself. In *Endymion* I leaped headlong into the sea, and thereby have become better acquainted with the soundings, the quicksands, and the rocks, than if I had stayed upon the green shore and piped a silly pipe, and taken tea and comfortable advice."

Keats neither responded to his critics by savage retaliation like Byron, nor broke a bloodvessel as he was reported to have done, but continued on his way with a composure and lofty meaning very remarkable in so young a man. "I will assay to reach to as high a summit in poetry as the nerve bestowed upon me will suffer," he says. "The faint conceptions I have of poems to come bring the blood frequently into my forehead. . . . I feel assured I should write from the mere yearning and fondness I have for the beautiful, even if my night's labours should be burnt every morning, and no eye ever shine upon them." "This is a mere matter of the moment," he writes a little later to his brother in America; "I think I shall be among the

English Poets after my death." Few men have stood with firmer self-possession yet humility, to receive the often maddening sharpness of those critical spears which hurtled through the air with virulence so uncalled for.

Keats had a harder blow to sustain some time after in the death of his brother, "poor Tom," the consumptive youth over whom he had watched for long. The seeds of the same disease were evidently in himself before, but it was in the spring, after Tom's death, that he returned one evening to Hampstead, where he was living with a friend, very ill and much agitated. He had driven there on the outside of the stage-coach, and had caught cold. "Getting into bed, he slightly coughed and said, 'That is blood; bring me the candle,' and after gazing on the pillow, turning round with an expression of sudden and solemn calm, said, 'I know the colour of that blood, it is arterial blood; I cannot be deceived in the colour. That drop is my death-warrant. I shall die.'" A more touching scene could scarcely be imagined. He was twenty-three, and the first fascinations of a most passionate love had caught hold upon him. "If you would have me recover," he said pathetically to the friend, Mr. Charles Brown, with whom he was living, "flatter me with a hope of happiness when I shall be well." The object of his love lived in the next house, and in a collection of letters to her, recently published,—a very pitiful but perhaps unnecessary publication,—there is a series of touching little notes, imploring her from his sick-bed, sometimes to come to him, sometimes not to come, as the fluctuations of sickness demanded. "I will wait patiently till to-morrow," he says. "Send me the words 'Good-night,' to put under my pillow." "I read your note in my bed last night, and that might be the reason of my sleeping so much better. Send me every evening a written Good-night." "If I am to recover, the day of my recovery shall see me by

your side, from which nothing shall separate me. If well, you are the only medicine that can keep me well." The fluctuations of this bitter drama are heartrending. After a while the poor sick lad began to feel himself a clog upon the girl he loved, and was stunned by the news that she was about to leave home, and that they were to be separated; and though unable to conceive how he shall support such a blow, "I must be patient," he says pathetically, "and in the meantime you must think of it as little as possible." When this danger is abated, he follows her in his imagination as she moves about. "You will have a pleasant walk to-day. I shall see you pass. I shall follow you with my eyes over the heath. Will you come towards evening instead of before dinner? When you are gone 'tis past. If you do not come till the evening I have something to look forward to all day." Poetry could not express more powerfully than these simple words the longing of the sick heart for the object of its love.

Before this melancholy time, which was indeed the beginning of sorrows, Keats had written the *Pot of Basil*, *The Eve of St. Agnes*, *Lamia*, and several of the smaller poems, which are to our thinking the noblest of all: and the fragment of *Hyperion*, which is generally acknowledged as his greatest effort. The latter production has been the subject of extravagant praise. Byron, the poor poet being dead, describes this poem vaguely but grandiloquently as seeming to be "actually inspired by the Titans, and as sublime as Æschylus," and Shelley describes it as "surely in the very highest style of poetry." It is very different from the easy grace and irregular sweetness of *Endymion*. The subject of *Hyperion* is the dethroning of the ancient gods, a grand and sombre theme, in which we might have supposed a certain relation to the *Prometheus* of Shelley, had not the production of the younger poet preceded that of the elder. There is something of the same marble

stateliness and grandeur in the first presentation of the subjects of the poem. How great was the progress which the poetic youth had made from the time of his pretty sentimentalising about "the thing of beauty" will be seen at once in the noble opening of this great fragment.

"Deep in the shady stillness of a vale
Far sunken from the healthy breath of morn,
Far from the fiery noon, and eve's one star,
Sat grey-haired Saturn, quiet as a stone,
Still as the silence round about his lair;
Forest on forest hung about his head
Like cloud on cloud. No stir of air was there,
Not so much life as on a summer's day
Robs not one light seed from the feather'd grass,
But where the dead leaf fell there did it rest.
A stream went voiceless by, still deaden'd more
By reason of his fallen divinity
Spreading a shade: the Naiad 'mid her reeds,
Press'd her cold finger closer to her lips.

Along the margin-sand large foot-marks went,
No further than to where his feet had stray'd,
And slept there since. Upon the sodden ground
His old right hand lay nerveless, listless, dead,
Unsceptred; and his realmless eyes were closed;
While his bow'd head seem'd listening to the Earth,
His ancient mother, for some counsel yet.

It seem'd no force could wake him from his place;
But there came one, who with a kindred hand
Touch'd his wide shoulders, after bending low
With reverence though to one who knew it not.
She was a Goddess of the infant world;
By her in stature the tall Amazon
Had stood a pigmy's height: she would have ta'en
Achilles by the hair and bent his neck;
Or with a finger stay'd Ixion's wheel.
Her face was large as that of Memphian Sphynx,
Pedestall'd haply in a palace-court,
Where sages look'd to Egypt for their lore.
But, oh! how unlike marble was that face,

How beautiful, if sorrow had not made
Sorrow more beautiful than beauty's self.
There was a listening fear in her regard,
As if calamity had but begun,
As if the vanward clouds of evil days
Had spent their malice, and the sullen rear
Was with its stored thunder labouring up.
One hand she press'd upon that aching spot
Where beats the human heart, as if just there,
Though an immortal, she felt cruel pain:
The other upon Saturn's bended neck
She laid, and to the level of his ear
Leaning with parted lips, some words she spake
In solemn tenour and deep organ tone:
Some mourning words, which in our feeble tongue
Would come in these like accents; O! how frail,
To that large utterance of the early gods!"

This is in a very different strain from the languorous melody of *Endymion.* To Keats himself it appeared too like Milton. "I have given up *Hyperion,*" he says; "there were too many Miltonic inversions in it." But we do not think the reader now will think the similarity very great. Fine as this is, however, the young warmth and fanciful luxuriance of the earlier poem has perhaps a stronger hold upon the general mind, which understands a love-tale, even when the beloved maiden is a goddess, better than the sentiment of Godhead dethroned.

It is not, however, even upon *Hyperion* that Keats's best title to fame is founded, at least with the general reader. The beauty of his lyrics is, above everything else, the charm that endears him to the popular mind; and we might say once more, that if all his works, except those preserved in Mr. Palgrave's delightful little volume, were to die out of recollection, his *Ode to a Nightingale,* that to *Autumn,* the loveliest embodiment of the "season of mists and mellow fruitfulness," that *On a Greek Vase,* which contains so wonderful a description of the immortal life of the past, arrested in a moment of fullest activity and pre-

served for ever by art: would still secure his immortality. These verses are above criticism, and cannot be read but with a gentle rapture, that supreme satisfaction of ear and mind which makes us linger and repeat and part unwillingly with the liquid lines. "The admirable *Ode to a Nightingale*," says Lord Houghton, "was suggested by the continual song of the bird that, in the spring of 1819, had built her nest close to the house, and which often threw Keats into a sort of trance of tranquil pleasure. One morning he took his chair from the breakfast-table, placed it on the grass-plot under a plum-tree, and sat there for two or three hours with some scraps of paper in his hands. Shortly afterwards Mr. Brown saw him thrusting them away as wastepaper behind some books, and had considerable difficulty in putting together and arranging the stanzas of the ode." So true was it, that as he himself says, his love of the beautiful would have made him write even without the stimulus of publication. This was at the moment when his heart was most full, and everything within him at the highest tide of feeling. His young brother was dead; the sole passion of his life had begun: love and grief had touched the depths within him; and he himself, alas! though he did not know it, had begun to falter upon the edge of his premature grave.

It was in the end of 1818 that his brother died. In the summer following his letters to the lady whom he loved so passionately began; but it was not till early in 1820, after the fatal chill which has been described, that these letters began to reflect the miserable certainty which was creeping upon him, that his love was one of those which could never have an earthly close. The *Letters to Fanny Brawn*, which have been published very recently, have all the makings of a tragic poem in them. "Health is my expected heaven, and you are the Houri," he says, when recovery seemed still possible. "My mind," he

writes in another letter, "has been the most discontented and restless one that ever was put into a body too small for it. I never felt my mind repose upon anything with complete and undistracted enjoyment—upon no person but you. When you are in the room my thoughts never fly out of the window; you always concentrate my entire senses." When he improves a little, he tells her of his impatience, which increases as he feels himself on the borders of health, and that she has made him think more seriously of his illness than it deserved: for "how horrid was the chance of slipping into the ground instead of into your arms—the difference is amazing, love!" In one little note he cries out with enthusiasm that he could build an altar to her for staying at Hampstead to be near him; yet in the next more soberly assures her that she is wrong in supposing that he is displeased because she has gone to town and not stayed at Hampstead after all. "God bless my sweet love!" he adds—"illness is a long lane; but I see you at the end of it, and shall mend my pace as well as possible." As summer advanced his health improved. His last volume, containing *Isabella*, *Lamia*, and several of the shorter poems, was published, and he began to think of settled occupation. But ere long all his prospects were darkened again; the spitting of blood, which had been his brother's chief symptom, returned, and the doctors ordered him to a warmer climate for the winter. "They talk of my going to Italy," he cries in despair to his Fanny. "'Tis certain I shall never recover if I am to be so long separate from you;" though in the same breath he breaks out into wild reproaches that she does not know what it is to love: "I have heard you say that it was not unpleasant to wait a few years," he cries with passionate wonder over such a sentiment. The letters that follow grow more and more miserable in their passionate dissatisfaction:—

"Every hour I am more and more concentrated in you," he says; "everything else tastes like chaff in my mouth;" but he adds in the same letter—"For all this I am averse to seeing you; I cannot bear flashes of light and return into my gloom again. . . . If my health would bear it, I could write a poem, which I have in my head, which would be a consolation for people in such a situation as mine. I would show some one in love, as I am, with a person living in such liberty as you do. Shakspeare always sums up matters in a sovereign manner. Hamlet's heart was full of such misery as mine is when he said to Ophelia, 'Go to a nunnery—go, go!' Indeed, I should like to give up the matter at once; I should like to die. I am sickened at the brute world which you are smiling with. . . . The world is too brutal for me; I am glad there is such a thing as the grave. I am sure I shall never have any rest till I get there."

By this time the poor young poet had got jealous of his dearest friends; suspicions that Fanny's thoughts were divided between himself and Brown, and wild imaginations of the freedom with which she would move about and enjoy herself, while he was suffering and far away, made his soul sick. At last he seems to have started quite suddenly, accompanied by the young painter Severn, who risked his whole career by his determination to accompany the ailing and miserable young man to Rome. "Keats did not even give notice to Brown, "though at this moment I should be without pence were it not for his assistance." His jealous, wounded, hopeless heart took a kind of consolation in bursting all bonds that linked him to his former life. He plunged into the unknown, like Byron's strong swimmer, who plunged into the sea to forestal fate. They set out quite suddenly with some show of cheerfulness on the part of the sufferer, though the ink was scarcely dry of the letter in which he had poured forth the burden of his misery. "Keats," Severn wrote, "looks very happy; for myself (in the delight of his heroic friendship) I would not change with any one." They sailed from London to Naples, one of those terrible

lingering voyages which are now no longer a necessary aggravation of the always dismal journey in search of health. On shipboard the unhappy young poet wrote to the friend whom he suspected—let us hope without cause—of being his rival, yet whom he still believed in, and could not forsake without a sense of wrong:—

"I wish to write on subjects that will not agitate me much. There is one I must mention, and have done with it. Even if my body would recover of itself, this would prevent it; the very thing which I want to live most for will be a great occasion of my death. I cannot help it; who can help it? Were I in health it would make me ill; and how can I bear it in this state? . . . I wish for death every day and night, to deliver me from these pains, and then I wish death away, for death would destroy even those pains, which are better than nothing. Land and sea, weakness and decline, are great separators, but death is the great divorcer for ever. . . . I seldom think of my brother and sister in America; the thought of leaving Miss —— is, beyond everything, horrible—the sense of darkness coming over me. I eternally see her figure eternally vanishing. Some of the phrases she was in the habit of using in Wentworth Place during my last nursing ring in my ears. Is there another life? Shall I awake and find all this a dream? There must be; we cannot be created for this sort of suffering."

Thus the poor young fellow wrote, tormenting himself by endless thought, seeing miserable visions, unable either to reconcile himself with life and love, or to make up his mind to their abandonment. Then in an interval of the sickening storm within and without, when the winds and the waves lulled a little, on some night when the sky was blue, and his soul at wistful rest, no longer swept by angry clouds—he for the last time lifted up his trembling voice between heaven and earth—

"Bright star! would I were steadfast as thou art,
Not in lone splendour hung aloft the night,
And watching, with eternal lids apart,
Like Nature's patient sleepless Eremite,
The moving waters at their priest-like task
Of pure ablution, round earth's human shores;

Or gazing on the soft new-fallen mask
   Of snow upon the mountains and the moors;
No!—yet still steadfast, still unchangeable,
   Pillow'd upon my fair love's ripen ng breast,
To feel for ever its soft fall and swell,
   Awake for ever in a sweet unrest;
Still, still to hear her tender-taken breath,
And so live ever—or else swoon to death."

Thus the troubled and anguished human creature, driven by the winds and tossed, like the never-resting water, he who had made so many songs in his little day of all lovely things, has fixed for us for ever the calm impartial shining of this star, last light of earth that penetrated the growing darkness. One more terrible letter came from Naples, as soon as the forlorn travellers landed, always about *her*, and the misery of being parted from her. "There is nothing in the world of sufficient interest to divert me from her for a moment," he says; "Oh, that I could be buried near where she lives. I am afraid to write to her, to receive a letter from her—to see her handwriting would break my heart, even to hear of her anyhow; to see her name written would be more than I can bear. . . . My dear Brown, for my sake, be her advocate for ever. I cannot say a word about Naples. I do not feel at all concerned in the thousand novelties around me. I am afraid to write to her. I should like her to know that I do not forget her. Oh, Brown, I have coals of fire in my breast. It surprises me that the human heart is capable of containing and bearing so much misery." He ends by imploring his friend, when he writes, "If she is well and happy put a mark thus x." A few weeks later another letter came from Rome, with an attempt at cheerfulness and a kind of pathetic ghostly banter. "If I recover, I will do all in my power to correct the mistakes made during sickness, and if I should not, all my faults will be forgiven." . . . Then he adds

with the fleeting tearful smile of weakness, "I can scarcely bid you good-bye, even in a letter. I always made an awkward bow. God bless you.—JOHN KEATS."

Apparently these were the last words he ever wrote. This was in November 1820, and he lingered painfully till February 1821. At the very end of his days there came a letter from the too much beloved, a mere glance at which tore him to pieces; it was put unread into his coffin. And thus ended life and love together, so far as mortal eyes can see.

This wonderful passion, so hectic and feverish, so devouring and unsatisfied, was the only human influence that helped to kill the young poet. Love, and not Mr. Gifford in the *Quarterly*. It was not even she that did it, but the horror of being forced from her, and the want of faith in her faithfulness. But love is a more seemly and a more dignified slayer than a critic,—if it were possible to look thus lightly at a conclusion so full of anguish. He directed that the words "Here lies one whose name was writ in water," should be put on his grave. But he was more right in the earlier youthful confidence with which he pronounced that he should be among the poets of England after he died, than in this mournful sentence on himself. No poet who has done so little bears a higher fame.

JOHN KEATS, born 1795; died 1821.

Published Poems, 1817.
Endymion, 1818.
Hyperion, Isabella, etc., 1820.

CHAPTER VII.

MOORE—MONK LEWIS—THE SMITHS, ETC.—PEACOCK—THEODORE HOOK—JOHN GALT.

We have done perhaps some injustice, if not to the permanent position, at least to the contemporary fame of Moore by giving him so small a place in this record. Whether Byron and Shelley were perfectly sincere in their expressions of admiration it would be difficult to divine, for there is perhaps a certain exaggeration permissible and natural in one poet's expressed opinion of another poet who is his friend and admirer, especially when the younger man and newer songster is referring to a previously established reputation. "Lord Byron has read me one or two letters of Moore to him, in which Moore speaks with great kindness of me, and, of course, I cannot but feel flattered by the approbation of a man my inferiority to whom I am proud to acknowledge," says Shelley; and Byron throughout writes to his friend, the only one of all his literary contemporaries for whom he owns any warmth of affection, with perpetual expressions almost of enthusiasm for his poetical powers. These appear very strange to us now when Moore's reputation has dropped from the highest to a very subordinate place in literature, and when all his confectionery compositions, his Eastern tales,—and even the contemporary satires which were effective in their day, have alike fallen into the limbo

whence there is no redemption. His songs still retain, and will always retain, a certain place in the popular memory, but we dare not venture to say that this would have been the case had they not been linked to the beautiful national melodies with which he was so well inspired as to connect them. He belongs to the number of those writers who, like Dives in the parable, had their good things while they were living: and, no doubt, with his gay temper and gentle epicureanism, Moore himself would have much preferred this to the meagre living and posthumous praise of greater poets. Many of his melodies are touching and tender, many of them full of sparkling gaiety and life. There is scarcely any one who does not know the first line, probably the first verse, of scores of those facile and graceful compositions. It is scarcely needful to recall them to the reader; and though in this age of classical music, the simplicity of the ballad has fallen out of fashion, yet the taste for it is too widespread and too natural to be more than temporarily in abeyance. Even now, in the height of a musical renaissance, there are thousands of people who will be moved by one of Moore's songs, sung with feeling and expression, against the hundred connoisseurs who will think it beneath their notice.

> "She is far from the land where her young hero sleeps,
>   And lovers around her are sighing,
> But wildly she turns from their gaze and weeps,
>   For her heart in his grave is lying.
>
> "She sings the wild song of her dear native plains,
>   Every note which he loved awaking,
> Ah! little they think who delight in her strains,
>   That the heart of the minstrel is breaking.
>
> "He had lived for his love, for his country he died,
>   They were all that to life had entwined him;
> Nor soon shall the tears of his country be dried,
>   Nor long shall his love stay behind him.

"Oh! make her a grave where the sunbeams rest,
When they promise a glorious morrow,
They'll shine o'er her sleep, like a smile from the West,
From her own lov'd island of sorrow."

This is the perfection of verse for the poet's purpose—to be sung, not read. Its meaning needs no second thought, it is full of picturesque and tender suggestion, yet never overbalances the air by too much poetry. A pathetic story and a passionate national sentiment are concentrated in it with exquisite grace and smoothness. The Irish singer may be excused if he feels that he has done something for his country when he sings such a refined epitome of its woe. But beyond this there is little to say, and Moore had no revelation of his race to give, to bring it near to the general heart. He had enough nationality for this pathetic sentiment, and for a poetical appreciation of the hopeless wrongheaded heroism of those poor young Irish rebels who flung themselves against the strength of England like children against a locked and bolted door. But he had nothing to tell of his country, no insight into it or means of interpretation. Many have been the wrongs of Ireland, and her disabilities in the march of human progress; but none greater than this, for which Providence alone is responsible, that in the allotment of genius she got, instead of Burns and Scott, only Tom Moore and Miss Edgeworth, excellent artists both, but with the thinnest burden of prophecy, the most limited revelation. If Scotland had been endowed no better, it might not, perhaps, have affected her manufactories (but even for this we should not like to undertake to answer), but it certainly would have modified her position most strangely, and restricted her development. Burns made the face of his country luminous, and carried the songs of its peasantry, the loves of its cottages, into the sympathy and friendship of the world. But Moore's communications

were of a strictly drawing-room character, and Ireland might have been lost in the mists of the South Seas for anything he has to tell us of her inner heart and being. St. James's and polite society were heaven to the sociable little Dublin beau, who would not for the world have had the ladies suppose that he knew anything of Paddy save his jokes and lightheartedness, the conventional drapery that has hid him for ages. The great poet who is born a peasant is little likely to do much for himself in the present, or perhaps in any conditions of the world. But how much he is able to do for his country! Ireland, however, as yet, has never had the smallest promise of a Burns.

It is evident, however, that Moore's faculty was thought very highly of by his contemporaries. The terrible Jeffrey, chief slaughterer of the innocents, against whom every great writer of the age had a grievance, descends from his throne of darkness almost to plead for the aid of Moore in the great review—a most remarkable testimony to his powers. The sugary bubbles of *Lalla Rookh* brought him in no less a sum than £3000, and his *Irish Melodies* seem to have procured him, for many years, an income of £500 a year. These are substantial proofs of popularity. His *Life of Byron* will always remain the most trustworthy and genuine of the poet's records. Even in its partiality it is never false, and we doubt if any one could have held the balance more steadily, or discriminated with sounder sense, the wonderful gifts of genius, and the dangerous tendencies of character which made his friend and hero so great and so miserable. His connection with Byron altogether is one of his chief claims upon the recollection of posterity. In the beginning of that connection Moore certainly gave as much or more than he received of social distinction and semi-patronage, and all that Byron did for him in later years was to involve him

in a painful debt and still more painful discussion. When Moore visited Venice in 1819, Byron presented him with an extraordinary mark of regard in the shape of his own autobiography, a precious packet of manuscript, full of the most intimate experiences of that stormy life about which the world was so curious. Moore, no doubt, like so many other people, was in want of money, which perhaps, Byron was expected to help him to—for there is repeated reference to the fact that this precious packet, which would have excited public curiosity to the utmost, was excellent security, upon which Murray would not refuse to make an important advance. With the condition that it was not to be published till after his death, Byron seems to have contemplated with satisfaction the publication of these memoirs and the commotion they would produce, and afterwards added, on several occasions, to the MS. in Moore's hands, or rather in the hands of Murray, whither they had been transferred as security for £2000 advanced to Moore. When the poet died so prematurely and with so little warning, this MS. naturally became the object of many eager and anxious thoughts. Some conflict about the property and Moore's right of redeeming it from the hands of the publisher we need not enter into. As a matter of fact, Moore paid back the £2000, and reluctantly, as may well be supposed, but honourably, submitted the manuscript to the examination of a sort of small committee, representing Byron's wife and sister, by whom it was destroyed. Many regrets and some vituperations have been spent upon this act. Lord John Russell assures us that he read the MS., and that the sacrifice of it was but a trifling loss to the world. In the face of many admirers of Byron's letters and personal revelations, it may seem a bold thing to say that we should be little surprised if this were strictly true. To ourselves it has always seemed that the letters and

journals, so far as they have been published, were far too hurried and superficial, too full of levity and the swing and haste of the moment, to be at all worthy of so great a poet: nor can we imagine that his reputation would be increased by any further accumulation of such material, putting aside altogether the likelihood that what he had to reveal might have been little conducive to either public or private advantage. Anyhow, it was Moore and not the wealthier friends—the rich wife and relations—who bore the expense of this holocaust, which is a wonderful testimony to his high spirit and honourable feeling. On the other hand, we may allow that his *Life of Lord Byron* made up in some degree for his sacrifice. It brought a substantial recompense in money, and added to his reputation—and those results would, no doubt, have been in a great measure prevented by the stronger interest of any personal chronicle issued with the authority of Byron's name.

Moore wrote a life of Sheridan in the earlier part of his career, and also a memoir of Lord Edward Fitzgerald, and executed a considerable amount of miscellaneous literary work. He lived to be an old man, dying so late as 1852; and for the expiation of any literary sins he may have perpetrated, left his own hapless memory to the care of Lord John Russell, who, too busy in the affairs of State to spend much time in the execution of such a commission, shovelled up all the unfortunate poet's scraps and notes into a sort of wastepaper-basket of eight volumes, where they lie for the investigation of any reader, who may think it worth his while to produce for himself, out of these incoherent materials, some idea of the lively intelligence and good-humoured genial character of the author of *Irish Melodies.* These everyday jottings and familiar communications are always kind, affectionate, and cheerful, and give us the utmost satisfaction as to

Moore's moral and domestic character: but they are trivial, as the sweepings of any man's study would probably be. Had he dealt unkindly by Sheridan or Byron, this treatment would have been poetic justice. But he did not do so. His own work is always conscientious and careful. The friendly and sensible little man did his very best for his heroes, so that the cruelty with which he has himself been treated is all the greater. It is a lesson to poets to resist the allurements of social ambition, and rather to trust a brother hack in literature than a statesman and a noble peer.

It is almost vain to attempt a reproduction of all the lighter figures which embellished Society at this period, and made literature fashionable. The larger shades of Mackintosh, Brougham, and Hallam, who gave dignity to the assemblies at Holland House, have been already mentioned, and demand treatment more serious. But in the general London world there is no appearance more characteristic and amusing than that of the quaint little magician, with his trifling countenance and his mask of horror, Matthew Gregory Lewis, known to everybody in his own time and ours as Monk Lewis, though in these days not one reader in a thousand has any acquaintance with the romance which earned him that name. He was the son of a rich man who held a lucrative post under Government, and had abundant private means, and of a pretty fantastic fine lady, fond of fine company, of music and musicians, and all the curiously mixed and heterogeneous society which fashion and the arts make up between them. The boy was brought up in his mother's drawing-room, giving his childish opinions with quaint precocity upon every subject, from a classical sonata to a lady's headdress, and keeping his mother's friends in amusement. When he was still a schoolboy, quarrels arose in his home, which resulted in a separation between

his parents, and the pretty, proud, frivolous mother, left her husband's house. Henceforward, the precocious boy became her affectionate friend, protector, and champion, dividing his schoolboy means with her, when her thoughtless expenditure had exhausted her own, writing her long tender letters about all that was going on, sympathising, guiding, deferring to her opinion, confiding all his plans, literary and otherwise, to her. A more touching picture could not be than that of this curious pair, in themselves so imperfect, the faded, extravagant, foolish, but loving mother, and her fat little undergraduate, so sensible, so tender, so constant, so anxious to anticipate all her wants, scarcely betraying the consciousness that these wants are sometimes unreasonable, and while he pours out all his heart to her, still remaining loyally just and faithful to the father, whose liberality he will not hear impugned. At sixteen the youth had already written a farce which he hoped Mrs. Jordan would think worthy of her acting, and two volumes of a novel, though neither of them seem to have seen the light: and from that time his pen seems never to have been laid down. His play of the *East Indian* was actually accepted and acted when he was very little older, the profits of it being intended as a present for his mother, who managed this part of his business for him, having apparently kept up her connection with actors and the artist world generally. "Should I not obtain a farthing from the *East Indian*,' he says, however, "I trust I have a much surer prospect of making you a little present than depends upon the humour of a gallery. The volume of poems of which I spoke to you in my last letter are now completed, and by July I trust I shall get them copied out fair and in a fit manner to put them into the hands of a publisher. I have no doubt of selling it. . . . Whatever this work produces, you may reckon upon every farthing of it as

your own. If the *East Indian* succeeds, I shall set about arranging *Adelaide* for representation. The opera of *Felix* could easily be brought out upon the strength of my first play. In short, I have a number of irons in the fire, and I think some of them must answer my purpose." The young man was nineteen when he set this catalogue of productions upon paper, and cheerfully confident in his powers. *The Monk* was written when he was twenty. It had been begun some time before and laid aside, but when the young author read the *Mysteries of Udolpho*, which he considered "one of the most interesting books that has ever been published," he resumed his interrupted work, and in two weeks produced the "romance of between three and four hundred pages" upon which his future fame was built. *The Monk* was published in 1795. Mrs. Radcliffe's books had given the public a taste for wonder and mystery, and this had special piquancies of its own to refresh the jaded appetite. It leaped into immediate fame. "This singular composition," says a contemporary critic, "which has neither originality, morals, nor probability to recommend it, has excited and will continue to excite the curiosity of the public, such is the irresistible energy of genius!" Such, we may add once more, are the inconceivable delusions of contemporaries; but Monk Lewis's genius was at least as much the laughing-stock of his generation, as an object of admiration to them. By some good people the production, however, was taken so seriously, that the Attorney-General of the day was "instructed by one of the societies for the suppression of vice, to move for an injunction to suppress its sale." We should be disposed to say now that it is hardly up to the mark of a "penny dreadful," even in point of literary merit. The horrors are of the crudest description, and there is neither character nor force of writing to redeem them. Mrs. Radcliffe is incomparably

superior. There must have been something in the contrast between the fat little boyish person, blubber lips and beady eyes, of the author, and the atrocities he lisped forth so innocently, which tickled Society. It is scarcely possible to conceive any more serious reason for his fame.

A year after *The Monk* came the *Castle Spectre*, a drama of the same description, which once more was received with great favour by the public, and was followed by many other plays, one of them an extraordinary composition, which the author calls a monodrama, *The Captive*, in which the stage is held by one sole performer, representing a lady unjustly confined in a madhouse, whose frantic appeal to her gaoler, and afterwards her long soliloquy to herself and hearers, to prove that "I am not mad, I am not mad," interrupted only by dumb show, the attempt of a frantic madman to get into her cell, and finally the arrival of her deliverers, when she has almost raved herself into real madness—produced the most extraordinary effect upon the audience. "Never did Covent Garden present such a picture of agitation and dismay. Ladies bathed in tears, others fainting, and some shrieking with terror—while such of the audience as were able to avoid demonstrations like these, sat aghast with pale horror painted on their countenances." The temerity of the young author of twenty-one who could venture on such an innovation is as extraordinary as the effect produced, which no doubt was owing to the powers of the actress, and the melodramatic force of the situation.

The family history of the Lewises was shortly after disturbed by an incident which plunged them into unimaginable terror. The mother, separated from them, yet not shut out from their kindness, and to whom Matthew clung with so much devotion, took a step which threatened to sever all the ties still left between them. She wrote

a novel! When this terrible fact was known, her son with a panic almost beyond words, rushed to pen and ink, to implore her to suppress it. By every motive which can move a woman, he abjures her to make this sacrifice. To be sure there were reasons why it might be doubly painful to such a household to be brought under the criticism of the time, to which personal gossip was delightful; but the horror with which her son contemplates the mother's authorship is doubly amusing at the present moment, when to write novels has become so common an accomplishment.

"I do most earnestly and urgently supplicate you, whatever may be its merits, not to publish your novel," he says. "I cannot express to you in language sufficiently strong, how disagreeable and painful my sensations would be were you to publish any work of any kind, and thus hold yourself out as an object of newspaper animadversion and impertinence. I am sure every such paragraph would be like the stab of a dagger to my father's heart. It would do a material injury to Sophia; and although Maria has found an asylum from the world's malevolence, her mother's turning novel writer would, I am convinced, not only severely hurt her feelings, but raise the greatest prejudice against her in her husband's family. As for myself, I really think I should go to the Continent immediately upon your taking such a step. . . . Be assured the trade of authoress is not an enviable one. In the last letter I had from poor Mrs. K——, she said that if she could but procure for her children the common necessaries of life by hard labour, she would prefer it to the odious task of writing."

This is a sermon which would greatly surprise an intending novelist of the present moment. Mrs. Lewis gave in to the terrible penalties thus set before her, and sacrificed her work, which no doubt—as would probably be the case with a great many competitors for fame—was the best thing she could do. "I always consider a female author as a sort of half-man," her severe counsellor goes on to say. Poor lady, though he is so kind to her, he does not spare any little literary vanity of which she may

have been possessed. "I never before heard of you being accused of having written *The Monk.* This goes more to put me out of humour with the book than all the fury" with which the critics had assailed it; and he adds with disdainful irony, "I am quite of your opinion when you say that it would be better for you, as a woman, to write dull sermons than *The Monk*, not merely on the score of delicacy, but because *a dull work will prevent its author being much talked of*, a point, in my opinion, of all others the most desirable for a woman to attain." To see this little cock-sparrow of two-and-twenty thus laying down the law is very comic. These were the days when Mr. Collins in Miss Austen's novel declared that he was aware no "elegant female" ever accepted a proposal at the first asking, and when it was still popularly accepted as a rule that it was no disgrace to a woman to be clever or instructed, so long as she did not show it—"a tragedy *not* intended for publication," even the severe "Monk" had no objection to.

But though he objected to her authorship, Lewis was very tender to his mother, and the story of their constant intercourse, and the reversal of positions which is natural when a precociously sensible, cool-headed, and affectionate boy becomes the protector and guardian of a flighty parent, is pretty, and amusing, and touching in a breath. He was a foolish little fellow upon the outside, frothy and fictitious in his work, which was always more laughable than impressive; but in his domestic relations, and, later, in the larger duties which cost him his life, he was a little hero.

In 1801, out of the midst of all the finest society in London, and travelling with the Duke of Argyle in his landau, as he describes to his mother, he came to Scotland, and encountered in Edinburgh young Walter Scott, a Scotch advocate, on his promotion, newly married and

happy, but as yet undistinguished, fond of old ballads, and trying his skill in translations from the German. Scott told Allan Cunningham, years after, that he had never been so elated as when "the Monk" asked him to dinner at his hotel. The odd little Englishman, with his round projecting eyes and boyish person, "the least man I ever saw," was that wonderful thing, a successful and famous author, and his notice was something to be proud of. Lewis was eager to get contributions for the *Tales of Wonder* which he was then collecting, and of which he informed his new acquaintance "a ghost or a witch was a *sine qua non*;" and they seem to have formed at once a cordial acquaintance, with something in it—save the mark!—of patronage and genial condescension on the part of the visitor. Lewis would seem to have carried his kindness so far as to set on foot negotiations for the publication of Scott's translation of *Goetz von Berlichingen*. What was more remarkable was the correspondence which passed between "the Great Unknown," as he may well be called in such a conjunction, and his literary patron, whom he describes as "a martinet in rhymes and numbers." The idea of Monk Lewis schooling Scott in style and versification is highly comic; and the lectures were "severe enough, but useful eventually," the amiable giant says. Scott's "first serious attempts in verse" were thus brought to light. *The Eve of St. John*, *Glenfinlas*, and several other of his early poems, were published in Lewis's collection. But by this time the temporary fame of *The Monk* had begun to fail, and, nobody knowing the mightier figure which was thus conjoined with this, the *Tales of Wonder* created no particular impression upon the mind of the public. This collection contained the famous ballad of *Alonzo the Brave*, which, as the majority of readers nowadays have, we fear, entirely forgotten, was written as a serious and awe-inspiring poem, and not as a burlesque

Lewis had been living in great comfort during three years of literary activity, with a pretty cottage at Barnes full of all sorts of dainty nicknacks, in which he received the fashionable world, and even entertained, if not angels, princesses—and chambers in the Albany, luxuries such as few men of letters had any chance of. But in 1812 his father died, and he became at once a rich man. Many delightful stories are told of his kindness and beneficence. The little man with his round eyes went about like Haroun Al Raschid, seeing miseries which nobody else saw, and enjoying, no doubt, the excitement of sending an anonymous bank-note with all the suddenness and unfettered liberality of a gift from heaven. There is one instance of the kind showing his readiness both in wit and charity, which we may permit ourselves to tell. He was passing through a country town in which was a company of strolling players, whom he went to see. A young actress of the company, hearing who he was, took the somewhat audacious step of calling upon him at his inn and begging something from him, "any trifle" unpublished, to give *éclat* to her approaching benefit. Lewis promised her a little piece called the *Hindoo Bride*, for which she was to come next day; but, on looking through his papers, found that he had not got it. Not knowing what to do, he went out for a stroll to think over the dilemma in which he found himself, and was forced to take shelter from a shower in a little shop, through the door of which he heard a conversation going on in an adjoining room. He recognised the voice of his petitioner, and listened. The actress was telling her mother what she had done, and it appeared from the conversation that she was the support of the old lady, who on her part, though gratified by the result, feared that the girl might have exposed herself to remark by her boldness. Lewis went back to his inn, and put up a fifty pound note in a letter, in

which he informed his visitor that the *Hindoo Bride* was not to be found. "I have had," he said, "an opportunity of witnessing your very admirable performance of a far superior character in a style true to nature, and which reflects upon you the highest credit. I allude to a most interesting scene in which you lately sustained the character of 'The Daughter!' Brides of all denominations but too often find their empire delusive, but the character you have chosen will improve upon every representation." He left the town the same night, avoiding all thanks and explanations.

No one could be better qualified to understand and appreciate the filial virtues. One of his pleasures on coming into his fortune was to establish his mother in a pretty house, decorated to the last inch of its space, not perhaps in what we should consider as good taste nowadays; but different opinions prevail in different periods as to that indefinable quality. In the little entrance-hall of this "white cottage," opposite the door, there was a cupboard, made by "some matter-of-fact person," one of those admirable conveniences which it is now the fashion to admire. But the new inhabitant had a soul above cupboards. She turned it into a bower of painted roses and honeysuckles, encircling "a magnificent mirror," beneath which "was represented a low white gate, half open, disclosing a winding path and shady perspective of wood and water." This was what was thought the finest of decoration in the beginning of the century. Lewis and his mother would have painted the panels of the cupboard door with bristling perpendicular daisies or lilies had they done their decorations now.

Part of the property left to Lewis by his father consisted of estates in Jamaica, and the kind and conscientious little man had always determined to make himself acquainted with this portion of his possessions, which at

that time meant so much more than it does now. He went to Jamaica accordingly in 1816, and his account of his arrival and residence there, and of the tumultuous simple joy of the negroes whom he could not bear to hear calling themselves his *slaves*, is a far more interesting and worthy recollection than his bleeding nuns and mysterious monks. On his return he visited Italy and Switzerland, and it was on this occasion that we find him with the poets on the Lake of Geneva. Of that meeting, as the reader will recollect, one remarkable literary token remains in Mrs. Shelley's *Frankenstein*, called into existence by his suggestion, in the wet summer days they spent together. There is another relic of the occasion, which has an interest of its own of a different kind. It is a codicil to Lewis's will, framed in the interest of the slaves who had gained his heart. Convinced that they could not be fitly protected unless under the eye of "their proprietor," he resolves to secure their safety "to the very utmost of that power which the law allows me," leaving upon his heirs the obligation of spending three months in Jamaica every third year, of preserving intact all the privileges and regulations which he had given and made for the advantage of the negroes: and forbidding the sale of slaves. All this is laid down in the most stringent and solemn words, with directions that the succession shall pass over every one who refuses to fulfil these conditions, and "solemnly branding with the names of robbers and usurpers of property not belonging to them" any who may endeavour to set aside the will, or to avoid the performance of its obligations. This document is signed, as witnesses, by Byron and Shelley both; and it is a memorial of their meeting which is of the very highest interest. Lewis went back to Jamaica a very short time after, and left the island to return home in May 1818; but he died on the passage, a sacrifice to his

own humanity and sense of duty. Thus nobly ended the life of the butterfly of society—a bad poet and indifferent romancer, but kind and honest and true, a good son and master, resolute to do his duty by all dependent on him. He might have written better verses without being worthy of so much praise.

Another pair of writers to whom society owed a great deal of amusement were brought to the knowledge of the world by a contemporary incident, which would not at first sight have seemed a likely one to produce so much fun and frolic. Drury Lane Theatre, which had been, like most theatres, burnt down, was completed and about to be reopened in October 1812. The directors thought that an ode from some of the many poets of the time would be an appropriate feature in the ceremonial of the opening, and they were so far before their age as to bethink themselves of the fine expedient of putting up the privilege of writing this address to public competition. It is not likely that any of the poets whose names have survived to this time would avail themselves of such an invitation, and consequently, among the huge number of addresses received, not one was found good enough for the purpose. The situation struck the lively wits of two mirth-loving young men, great in fugitive verses both, but with little idea of serious authorship—James and Horace Smith, the sons of a wealthy solicitor, himself of literary tastes and some reputation. Some one suggested the publication of a supposed selection from the condemned poems, and the brothers caught at the idea with glee. There was but six weeks to prepare the volume; but this did not discourage them, and they hastily divided between them the authors whose peculiarities they thought most fit for the purpose. The result was a little book which, written at first as a mere *jeu d'esprit*, has held its ground for the last half century, and is perhaps more generally

known now than many of the great poets, whom, with a keenness and lightness of touch which was never dulled by ill nature, it held up to the genial laughter of the lookers-on. The writers give an amusing account, in their preface to an edition published in 1835 — more than twenty years after — of the difficulty they found in getting their joke into print after having hurried through its composition. The caution of the publishers had nearly spoilt their fun and ours. "'What have you already written?' was his first question, an interrogatory to which we had been subjected in almost every instance;" they tell us in their description of this difficulty. The young authors had no answer to give, and in consequence of this the *Rejected Addresses* were themselves over and over again rejected. But at last one more discriminating than the rest was found—as that wise man generally is found—to take the risk; and the success was so rapid and decided that the authors themselves were unfeignedly astonished. The idea tickled the public; and the imitations were very good, better sometimes than the models they copied. Scott was even more delighted than was the general reader with the parody of his own style. "I certainly must have written this myself," said that fine-tempered man. Lord Byron wrote to Mr. Murray with unusual benignity—"Tell him I forgive him, were he twenty times our satirist." And Mr. W. Spencer, a name well-nigh unknown to our days, but not considered then so much below the level of Scott and Byron, declared that the audacious versifier was the man of all others he wished to see. There was consequently no drawback upon the pleasure of the amusing little performance, which in all its airy malice pleased everybody. It it impossible to refuse a laugh to the imitations of Wordsworth, Coleridge, and Southey, or not to admire the admirable dexterity with which the peculiarities of Scots

and Crabbe were caught. As was inevitable, the collection includes several parodies of poets whose style has long ceased to be known to any one: but that is not the satirist's fault.

Those light-hearted wits did little afterwards to justify the sudden and wide reputation they had thus acquired. The younger, Horace, strayed into prose writing, and was the author of at least one novel, *Brambletye House*, which acquired a good deal of reputation; but James, though he wrote a great many verses in the same jocular vein, never progressed again beyond mediocrity. It was not indeed, his intention to seek the public ear again. "James," says his brother, "implicitly adhered to his favourite position, that when once a man has made a good hit he should rest upon it, and leave off a winner. . . . Having won the prize which seemed to him the only worthy object of contention—a welcome reception wherever he went, and a distinguished position in society—he wanted all motive for further and more serious exertion." He wrote at a later period several dramatic sketches for Charles Mathews, for which he was paid £1000. "A thousand pounds for tomfoolery," he says himself with admiring wonder, adding what Mathews had said, "You are the only man in London who can write what I want—good nonsense." Sometimes, however, the nonsense James Smith wrote was not over good, for writing nonsense is a very fatiguing operation. But he was always genial and kind: "his good sayings were heightened by his cordial good-nature, by the beaming smile and the twinkling eye." And he was always fond of society, and above all of the society of persons of distinction. He loved a lord, like most Englishmen, and still more he loved a lady. When Keats met the two witty brothers at dinner, they did not harmonise with his youthful gravity. "They only served to convince me

how superior humour is to wit," he says tartly. "These men say things which make one start without making one feel: they are all alike, their manners are alike, they all know fashionables, they have all a mannerism in their very eating and drinking, in their mere handling a decanter. They talked of Kean and his low company. 'Would I were with that company instead of yours,' I said to myself." But Keats was jaundiced, and probably did not from his cold heights of poverty and deprivation understand the well-off and peaceful people down on the sunny level of wealth and comfort. And youth is slow to understand wit. James Smith was one of those genial and amiable old bachelors who are always so popular in society. We know most of him, because Horace outlived him and affixed a brief biographical sketch to his *Memoirs.* Otherwise the merits of their great work seem to have been pretty equally divided between them. James contributed a large share of the best of the compositions; but Horace was the author of the *Tale of Drury Lane, by W. S.*, which is perhaps the first of all.

The brothers were fond of the brilliant little coterie established by Lady Blessington at Kensington, not very far from the supreme arbiters of taste and fashion at Holland House. Lady Blessington herself was a fashionable novelist of some pretensions, and so was Lady Caroline Lamb, another of the beauties of the period, whose novel *Glenarvon,* an extinct performance, attracted a little attention then, the hero of the piece being supposed to be Byron, who had disastrously crossed the poor lady's life in the period of his brief glory in London. Lady Blessington also contributed something to the Byron literature, manifold as it was. But these light and passing butterflies of literature, ephemera of a moment, can scarcely be reckoned as belonging at all to its history. Their names cling to those of the greater persons to whom some chance associ-

ation attached them, but that is all that can be said. Lady Morgan is a name of somewhat greater importance, and her *Wild Irish Girl* has some right to the honours of a national story. But she too and most of her works have vanished from the permanent acquaintance of the country, as so many others have done who were notable enough in their time. Spencer, Luttrel, Sotheby, Lord Thurlow, and many another, where shall we find any record of them now?

Of a very different order was the writer who, though appearing little in fashionable society, is connected so closely with one of the last group of poets that his place must fall somewhere near Shelley's in the records of literature. Thomas Love Peacock, one of the friends to whom Shelley did the kindest service at a moment when he was in no superfluity of wealth himself, became acquainted with the poet in 1812, when he was living in Wales with his young wife Harriet, shortly after their marriage. Peacock was some seven years older than Shelley, a young man whose education had been irregular, and (as usual) without the University brand, but who was an accomplished scholar, of a keen intellect, and much eccentric satirical power. How a man with so clear an eye for the follies of his neighbours should have formed so warm a friendship with the enthusiast boy, so wayward and visionary, it is difficult to make out; but he did so, and continued so much the trusted friend of the poet that he was named the executor of his will, though they had not seen each other for some years before Shelley's death. He has left us a record of that much-vexed and discussed period of Shelley's life, the time of his separation from Harriet and elopement with Mary, and all the events that flowed from these acts, into which it is not necessary now to enter, save to say that it is perhaps the most unimpassioned and impartial account, doing justice to the

unfortunate Harriet, though without any breach of his friendship with Shelley. Peacock's reputation, however, rests upon the curious series of novels, if novels they can be called, *Headlong Hall*, *Nightmare Abbey*, *Crotchet Castle*, etc., which he has left behind him, books which are scarcely stories, though there is an artificial and whimsical thread of narrative to link their often brilliant conversations and discussions together. These, we were about to say, are unique in literature; but they have served as a model in our own day to other productions of a similar character, not so incisive and terse, and far from being so amusing. But Peacock was for many years alone in the curious vein of satire which he discovered. His method is somewhat artificial; and we can imagine the dismay of the ordinary novel-reader who should suddenly find himself confronted by the caustic fun and amusing dialogue of *Headlong Hall* or *Nightmare Abbey* when in search of an innocent romance. Perhaps it requires the zest of a consciousness, that were we not somewhat superior ourselves, we should not enjoy them, which has disposed such as have come under his spell to regard Peacock with something like enthusiasm. His first book, *Headlong Hall*, published in 1816, introduces us to a curious company, in which each individual is the representative of a theory, and shapes his talk accordingly—one being a "perfectibilian," another a "deteriorationist," and another a "statu-quo-ite,"—very rude symbols indeed of what can scarcely be called types of character so much as abstract figures representing each an opinion which each feels to be triumphantly proved right by every new change of circumstances. Among these oddities, Dr. Gaster plays the moderating part indicated by his name, and carries a savoury odour of good cheer through all the sharp repartees and bold assertions of the antagonists; while Squire Headlong—who, when it is suggested to him that it is his duty to marry and

continue his noble race, cries out with cheerful readiness, "Egad! that is very true; I'll marry directly"—furnishes a most amusing figure. This kind of satire is very easy and impersonal, and leaves the withers entirely unwrung of society in its usual forms; and it is absolutely artificial, and like nothing that ever was seen among mortals. But the fun is very skilful, sometimes dazzling, and always eccentric and amusing. *Nightmare Abbey* is still more wildly unlike anything that ever was in heaven or earth; but here we have what is intended for a sketch of Shelley in the hero of the piece, Scythrop Glowry by name, the only son of the master of Nightmare Abbey, and of a race given up to gloom. Gloom, however, is not the characteristic of the heir, but rather a confused energy and restlessness of mind and imagination, often very amusingly described, though we cannot but think it must have been a considerable test of Shelley's friendship for the writer to accept it as a joke. Here is an introductory sketch:—

"Scythrop proceeded to meditate upon the practicability of reviving a confederation of regenerators. To get a clear view of his own ideas, and to feel the pulse of the wisdom and genius of the age, he wrote and published a treatise, in which his meanings were carefully wrapped up in the monk's hood of transcendental technology, but filled up with hints of matter deep and dangerous, which he thought would set the whole nation in a ferment; and he awaited the result in awful expectation, as a miner who has fired a train awaits the explosion of a rock. However, he listened and heard nothing, for the explosion, if any ensued, was not sufficiently loud to shake a single leaf of the ivy on the towers of Nightmare Abbey; and some months afterwards he received a letter from his bookseller, informing him that only seven copies had been sold, and concluding with a polite request for the balance. Scythrop did not despair. 'Seven copies,' he thought, 'have been sold. Seven is a mystical number, and the omen is good; let me find the seven purchasers of my seven copies and they shall be the seven golden candlesticks with which I will illuminate the world.'"

The vagaries of this visionary youth, and how he

compels his father's consent to his engagement with an ineligible young lady, by appearing before him with a skull in his hand, supposedly filled with some fatal liquid, which he vows he will drink if his petition is refused; but when the consent is given, and the father, rushing in, disturbs an agitated interview by a sudden "Bless you, my children!" and suggests the naming of the wedding-day, responds with an embarrassed "Really, sir, you are so precipitate"—is most whimsically and cleverly told; and so is his final embarrassment between the conflicting claims of two ladies, with both of whom he is in love:—

"He could not dissemble to himself that he was in love at the same time with two damsels of minds and habits as remote as the antipodes. The scale of predilection always inclined to the fair one who happened to be present; but the absent was never effectually outweighed, though the degrees of exaltation and depression varied according to accidental variation in the outward and visible signs of the inward and spiritual graces of his respective charmers. Passing and repassing several times a day from the company of the one to that of the other, he was like a shuttlecock between two battledores, changing its direction as rapidly as the oscillations of a pendulum, receiving many a hard knock on the cork of a sensitive heart, and flying from point to point on the feathers of a super-sublimated head. This was an awful state of things. He had now as much mystery about him as any romantic transcendentalist or transcendental romancer could desire. He had his esoterical and his exoterical love. He could not endure the thought of losing either of them, but he trembled when he imagined the possibility that some fatal discovery might deprive him of both. The old proverb about two strings to a bow gave him some gleams of comfort; but that concerning two stools occurred to him more frequently, and covered his forehead with a cold perspiration."

This is a bold picture to make of a friend, and one who, at the moment, was standing in a much more tragic position of the same kind between his Harriet and his Mary. But it throws a curious light upon the character of Shelley, in which there certainly was—notwithstanding his great genius—something elvish and

faun-like, with starts of sudden boldness and timidity like a wild creature.

Character however, is not Peacock's forte—his personages are all abstract, and harp upon their one string with wonderful cleverness often, but with the monotony which is inseparable from the literary puppet. In his two later works there is a difference in this respect. Dr. Folliot, in *Crotchet Castle*, carried out and continued in Dr. Opimian in *Gryll Grange*, is a well-defined personage: the old-fashioned acute man of the world, in the shape of a squire-parson, a scholar, and a gentleman, with a caustic wit, and a great taste for and comprehension of the good things of this life—disliking all innovations and novelties, and very ready to meet any antagonist in the warfare of words, a conflict in which, however antiquated his opinions may be, his wit and readiness of resource are as like as not to have the best of it. The author himself would seem to have resembled in many things this favourite character. His mixture of fine understanding and prejudice, of brilliant dialectic skill and pugnacious wrongheadedness is as remarkable as his power. These were days in which men were not ashamed to give their prejudices full scope, and to characterise their enemies with unscrupulous vigour. And Peacock had all the hostilities of his literary sect—with a furious contempt for the critics, especially Jeffrey and his brotherhood, and a hatred still deeper for the excellent Southey, who—one scarcely can tell how—seems to have been singled out as the recipient of all the vials of their wrath.

Of the many verses with which these eccentric stories are studded, we must quote a portion of one, which is to be found in the *Misfortunes of Elphin*, a Welsh romance of vague chronology, of the times of Arthur, which is told with admirable humour and mock gravity. The

first lines of this *War Song of the Dinas Vawr* will be found, if they chance to strike the reader's ear and fancy, to be one of those utterances of genius which prove applicable to all the circumstances of life.

"The mountain sheep are sweeter,
But the valley sheep are fatter;
We therefore deemed it meeter
To carry off the latter.
We made an expedition,
We met a host and quelled it,
We found a strong position,
And killed the men who held it.

"On Dyfed's richest valley,
Where herds of kine were browsing,
We made a mighty sally,
To furnish our carousing.
Fierce warriors rushed to meet us,
We met them and o'erthrew them;
They struggled hard to beat us,
But we conquered them and slew them.

"As we drove our prize at leisure,
The king marched forth to catch us;
His rage surpassed all measure,
But his people could not match us.
He fled to his hall pillars,
And ere our force we led off,
Some sacked his house and cellars,
While others cut his head off.

. . . .

"We brought away from battle,
And much their land bemoaned them,
Two thousand head of cattle,
And the head of him that owned them.
Ednyfed, King of Dyfed,
His head was borne before us;
His wine and beasts supplied our feasts,
And his overthrow our chorus."

In this ironic banter and *reductio ad absurdum* Peacock has no superior. His books themselves will probably

seem tedious to the hasty reader, but even he will find in them innumerable suggestions which subsequent writers have made capital of. His wine and beasts have helped us to many feasts since his day.

Peacock held for many years an important post in the India House, in which he succeeded James Mill. And when he retired, he was succeeded by that stern philosopher's son, John Stuart Mill, whose fame is still fresh among us. These were all much greater men than Charles Lamb, the beloved Elia, who scribbled so many years away at a humbler desk under the same roof.

Another name which stood high among contemporaries, and occupied, in the opinion of many men, a position entirely different from that which would be allowed to him now, was Theodore Hook, a novelist of much temporary reputation, a successful journalist, and what was perhaps of more importance to his reputation than either, a wit and epigrammatist of the highest acceptance in his day.

"That the author of *Sayings and Doings* stands in jeopardy of passing away rapidly from the memory of man, cannot indeed for a moment be believed," writes his biographer. "So long as taste for the higher works of fiction endures, *Maxwell*, *Gilbert Gurney*, etc., must ever take high place and precedence on our shelves; and we have no more doubt that a century hence the spectre of *Martha the Gipsy* will haunt the imaginations of our great-grandchildren, while endeavouring to trace out, in the area of some gigantic Grand Junction Railway Station, the site of what once was Bloomsbury Square, than that the narrator of the tale himself would have readily given his last half-crown to any red-cloaked old lady who might have happened to solicit alms after nightfall in that neighbourhood. His literary fame is safe."

Alas! Bloomsbury Square still remains in unblemished respectability, but who knows anything of *Martha the Gipsy?* It was no earlier than 1848 that these words were written, not much more than thirty years ago; but

the literary fame which the writer flattered himself was so "safe" has disappeared like last year's snow. Hook made his appearance in the world, at a very early age, as the author of some farces of the lightest description.

> "Gods! o'er those boards shall Folly rear her head
> Where Garrick trod, and Siddons lives to tread?
> On those shall Farce display Buffoon'ry's mask,
> And Hook conceal his heroes in a cask?"

says Byron, sparing nobody in his *English Bards.* Hook had been at Harrow with the noble poet. He lived, as his biographer delights to think, to pay back this satiric line tenfold in the criticisms of the *John Bull.* But in the meantime his youth was in itself a farce in innumerable scenes, full of frolic and mischief, and every wild device by which a young madcap could keep himself and his friends in laughter. His jokes sometimes had issues which were more disagreeable than ridiculous, but he never cared very much for that, and they were innocent enough so long as he was merely a dare-devil boy, balancing on the edge of society, and playing innumerable pranks, in which there was perhaps some serious intention of getting himself into notice as well as the pleasure of the folly itself. In 1812, when he was twenty-four, he got an appointment to a responsible post at the Mauritius, which, but that there was a good income involved, must have evidently been as unsuitable for him as any appointment ever was. But the days of patronage were not then over, and the young scapegrace gaily undertook the office, in which, as a matter of course, from sheer carelessness and incapacity to understand business or anything else that was serious, he fell into great trouble before long. It was natural enough that he who could not manage his own small financial concerns, should soon be proved unable to manage those of a colony, and the failure was so great that he was sent home in half-a-dozen years as a

prisoner, under military escort. This alarming action on the part of the authorities came to little when he got back to London, except a burden of indebtedness which weighed him down for years; but which he managed to shake off somehow or other, though it reappeared like a spectre in his life from time to time. He came back in 1819, and a year after had so far recovered his spirits and freedom that we find him in the full excitement of a new newspaper, the *John Bull*, of which he was partly the originator, and which he conducted at first in mysterious hiding, but afterwards openly for many years. *John Bull* did not originate in a very lofty inspiration. These were the days when Caroline of Brunswick, the shabbiest and least reputable of injured queens, was fighting her poor cause against her still less reputable husband, with a great expenditure of feeling and sympathy on the part of the people, founded rather on horror of him, than any real love for her. The *John Bull* was begun for the purpose of maintaining the cause of the King, by very unsavoury methods, against this unfortunate Princess, who stood in royal George's way; and Hook was in no way superior to this degrading office. When any lady ventured to show herself at the shabby little court where Caroline held such state as was possible, she instantly became a mark for the arrows of this band of shabby assassins. Where all is so pitiful, King and Queen, defenders and assailants, it is hard to know how to characterise this odious mission. All that scurrility and scandal could do was aimed at every individual who entered the doors of Brandenburgh House, so that when at length the unhappy Queen died, and got free of her troubles, the *John Bull*, a full-grown London newspaper, tottered in its career and felt its occupation gone. It is not a very noble beginning, neither was the nature noble of the man who thus rushed into the lists in such a cause. But it is difficult for us now to

enter into the fierce and coarse polemics of this conflict, which does not enlist our sympathies on either side—for the Queen was as unattractive a victim as the King was an unelevated oppressor. Hook's novels are not of much higher class than his journalism. They abound in caricature, not even the caricature of invention, but that of actual portraiture, all his broadest sketches being easily identified by those who knew him, and by society in general. They were clever enough to be largely read at the time, but nothing can be more entirely dead than these galvanically vivacious productions are now, nor is there enough even of contemporary life in them to make it worth while to recall them to the reader.

Theodore Hook was distinguished among his contemporaries, still more than by his novels or his journalism, by the curious gift of improvisation which he possessed, and by a taste for the broad farce of mystification, practical jokes played upon all sorts of people, which it needed a dauntless impudence as well as a great deal of ready wit and unbounded cleverness to carry out. Thus he would go and force his way into a dinner party in a house where he was absolutely unacquainted, by the cleverest subterfuges, making himself, as soon as he had got a footing, so amusing and delightful to his host and the party, that the impertinence was more than condoned. All this was very amusing in the doing, and somewhat amusing in the telling, though it soon palls upon the reader; but it is not a very elevated or satisfactory mode of amusement, and few lives could be less dignified or worthy than that of this poor man of letters, this Yorick of infinite fancy and frolic, whose existence was good to nobody, not even to himself. Never was there more festivity and apparent enjoyment, more fun and noise and frivolity, but seldom an existence so barren, with so little to show for the gifts which nature had lavished, and which were but so many more means of

failure to the unfortunate upon whom they fell. He died in 1841 at the age of fifty-three, pitifully pursued by debts and embarrassments to the very edge of the grave.

It has been somewhat difficult to find a place for one of the most characteristic of Scotch novelists—John Galt. With the literary circles in Edinburgh he had not the remotest connection, nor, if we except the moment in which this odd and vulgar Scot, pushing his devious way about the world, crossed the path of Byron, had he any literary associates at all. The early part of his life was spent in what is vaguely called "business," and in processes of self-culture such as go on among young clerks and working-men of a superior order, and which, though admirable in themselves, rarely qualify the groping student who has thus to stumble along the paths of knowledge without guidance, to instruct the world. Galt was not successful in his early attempts in his office in Greenock, nor does he seem to have been more so in London, whither he removed early in the century, when a young man of five or six and twenty. His account of himself in his *Autobiography* is by no means clear, but gives us a confused picture of commercial embarrassments, meetings of creditors, and other unpleasant accompaniments of failure, amid which his own attitude of cleverness and self-confidence is always pleasing to the narrator. A self-opinionated Scotsman of the vulgar type, shrewd yet reckless, self-admiring, knowing nothing better than his own little world of the Mechanics' Institute, or local library committee (for perhaps it was too early as yet for Mechanics' Institutes)—how such a man could have been admitted to the ranks of literature at all would puzzle extremely the reader who, without knowing anything more of Galt, should stumble upon this dull record of himself. When trade failed, however, he took to book-

making, and, travelling for the purpose it would seem—as he might have travelled for the purpose of getting orders in drysaltery, a more likely occupation—met Byron in the East on several occasions by the chances of the road, and formed an acquaintance upon which, at a later period, he presumed to write a life of the poet. This was some time about 1810, when the first cantos of *Childe Harold* were being written. Afterwards Galt went to Canada as agent of a company, and there worked for a number of years, colonising and founding townships, and encouraging emigration, but always thwarted and disapproved of by the authorities at home. It was on his return from this undertaking, unsuccessful as before, when he was about forty and considerably worn by knocking about the world, that he fell, by chance as it would seem, upon the vein of rich metal in his disorderly intellectual possessions.

Up to this time, with a mind little cultivated but full of self-consequence, and an obtuse Scottish incapacity to perceive the things which he could not do, he had written besides his travels, only dramatic productions, which Scott, notwithstanding his constant kindness, characterises as "the worst tragedies that ever were seen." But at last it seems to have occurred to the always active-minded adventurer to turn his eyes back to the life with which his youth had been familiar—the homely coteries of his native country, the village groups among which he had been born. By what extraordinary magic it was that the man who, writing his own life in precisely the same localities and among the same classes, produces nothing that is not vulgar, wearisome, and commonplace, should the moment he got into the realm of fiction find means to put before us the quaintest group of characters, all real, lifelike, and original, racy of the soil and true to nature, but not vulgar at all—is the most extraordinary

literary miracle: but so it was. The *Ayrshire Legatees*, the *Annals of the Parish*, *The Entail*, and even *Sir Andrew Wylie*, though the humour of the last is broader and the atmosphere less pure, are in their way wonderful representations of the national life in out-of-the-way corners of Scotland, impossible to be omitted in the literary annals of the country. Galt was not, like Scott, a master of his art; he had none of the genial breadth of observation, the noble comprehension of humanity, which belong to great minds. But what he did know he knew minutely and by heart. His was the simple realism with which imagination has scarcely anything to do; not a record of life read by lights of higher perception and insight, but of facts scarcely modified at all save by the machinery of story-telling. His Mrs. Pringle could, no doubt, have been identified to the very ribbons on her cap: and all the little individualities, so minutely set forth, of every simple but guileful actor on the little scene, belong to the very certainty of primitive life, in no way elevated or idealised, true, yet with a lower kind of truth than that with which the imagination has to do. This sort of portrait-painting, in which there is little harm, perhaps, when the subjects are found in Scotch villages, is in most cases a dangerous craft, and a very poor expedient to replace art. Fortunately it neutralises its own mischievous tendencies by being very rarely successful. But in Galt's best work the imitation of nature is so close, and the life so thoroughly penetrated and known, that the picture almost reaches the higher level of real art.

As was to be expected, the author himself conceived his best efforts to be of a kind more ambitious. His is no fiery spirit intolerant of criticism, and he is willing to accept as much praise as any one will bestow on the simplicities of his Ayrshire stories; but he is still a little wounded that *Ringan Gilhaize*, the story of a martyr-

covenanter, of which he says with an injured tone, "My memory does not furnish me with the knowledge of a novel of the same kind," should not have gained the appreciation which he feels sure it deserved, and that the *Majolo*, a book in which he had endeavoured to make his hero "feel precisely what Buonaparte is reported to have felt," should have been "absolutely neglected" by the public. On the other hand, his "amiable friend the Earl of Blessington" paid him "perhaps the most pleasing compliment" he ever received, by remarking upon the character of Lord Sandford in *Sir Andrew Wylie*, that "it must be very natural, for in the same circumstances he would have acted in a similar manner," without seeming to have "the least idea that he was himself the model of the character." This was the principle of his work throughout. But the simple wonderment of his group of country folk with their sudden accession of fortune, amid the sights of London—the current of their thoughts, all moulded in the narrowness of the parish, the gleams of mother wit, sometimes ludicrous, sometimes wise, the background of honest goodness never too good, and the unfailing store of "pawky" humour and sense — are in their way as good as anything can be. The miracle is, as we have said, that the very same people are intolerable bores and vulgar nuisances in the real story of his life, whom here in fiction he makes the most amusing companions. Nothing more flat and vulgar than the autobiography, nothing more genuine, humorous, and original than the stories. In this way Galt is a greater wonder than Scott himself.

We will not even attempt to put upon record the number of trashy publications to which Galt's name is attached. Travels, biographies, tragedies, books without number rattled from a pen so commonplace save in one direction, that it is inconceivable why they were published at all;

but among all this dross the one clear streamlet, like a burn in his own homely, tuneful country side, the district which brought Burns into the world as well as this strangely-gifted humourist, goes on with a cheerful tinkle ever worthy the attention of the passer-by, and ever pleasant, fertilising, adorning. A man who has done so much as this has the best of claims upon his country to have all the rest forgotten.

We have omitted to notice among the writers of Scotland a name which, however, like Galt's, is but little connected locally with Scotland, though no more genuine Scot could be, either in his works or sentiments, than Allan Cunningham, "honest Allan," one of those men, peasant-born and but barely educated, who, by dint of something which we must call genius, though not great enough to reach an exalted rank, have made their way out of the fields and workshops into the world of literature. Nothing but that spark of a divinity uncontrollable and subject to no laws, which, like the winds, goes "where it listeth," could account for the appearance here and there of such a simple and stalwart figure, in regions so different from those which brought him forth. Allan Cunningham was all the more remarkable that he not only brought out of a gardener's cottage enough of the faculty of Song to find him a place in the poetic records of his country, but also out of the stonemason's yard some perception of art which made him capable of becoming the trusty assistant and head workman of a great sculptor. His connection with Chantrey is still more remarkable than his connection with literature, for art exacts a harder apprenticeship than has ever been required for authorship. Perhaps it was the faithfulness of the man, and steady devotion, that made him capable for this post, rather than any insight into art. He was the author of several songs which are not unworthy of a place in the

language of Burns, and a great deal of hard-working composition, *Lives of Painters*, and other respectable productions, a *History of Literature Biographical and Critical*, with some novels which will not bear much criticism. "Honest Allan," says Sir Walter Scott of him, "a leal and true Scotchman of the old cast. A man of genius besides, who only requires the tact of knowing when and where to stop, to attain the universal praise which ought to follow it." The sight of such a man in the haunts of authors and artists in London, with his shepherd's plaid over his shoulder, his rustic breeding, and flavour of the soil, is one of the most remarkable in all the circle of strange sights. He had much intercourse with Sir Walter, and with many others of the best men of the day, and was adopted fully into that world so foreign to his race. His songs are the chief things that remain of him. This most simple, but by no means most easy branch of poetical composition has always been a special gift of Scotland, where, at the same time, many voices kindred to "honest Allan's—those of Lady Nairne, whose fame, like that of Lady Anne Lindsay, depends on one song, of Motherwell, and Tannahill, and several other congenial spirits—were then flourishing. It is with an apology for previous omission that we mention them here. And on the same argument, we may add the name of another Scot of other pretensions, William Tennant, a man of education and literary skill who was not so fortunate as Allan, but lived and died a poor schoolmaster, without ever issuing out of his little native sphere. A long poem in the measure of *Whistlecraft* and *Don Juan*, but preceding both, the subject of which is *Anster Fair* and the heroine Maggie Lauder, could scarcely be carried into fame or the general knowledge except by the greatest gifts of genius. And these Tennant certainly did not possess. But his verse has much of the freedom and flow of the greater productions

in which the same medium was adopted, and has power enough to make the chance reader regret that it had not a little more—enough at least to raise such a skilled manufacture to something more than merely local fame. Where Tennant got the measure we are not informed. That he should have drawn it direct from Pulci and the Italians seems unlikely; but it is at least remarkable that a form of poetry which was afterwards to become so famous should have first stolen into English in this humble and unnoticed way.

THOMAS MOORE, born 1779; died 1852.

Published Translation of Anacreon in 1800.
Little's Poems, 1801.
Odes and Epistles, 1806.
Lalla Rookh, 1817.
The Fudge Family in Paris, 1818.

WILLIAM TENNANT, born 1785 died 1848.

Published Anster Fair, 1812.

CHAPTER VIII.

MARIA EDGEWORTH—JANE AUSTEN—SUSAN FERRIER.

THERE is a curious symbolism in the names which stand at the head of this page—three women representing with great fitness the three countries that form Great Britain, all writing the same language, and embodying to a great extent the same ideal, yet revealing each the characteristics of her race in a manner as amusing as it is instructive. Miss Ferrier, the youngest of the group, was somewhat cast into shade by the apparition, close beside her, of the greatest of novelists, yet, nevertheless, kept her place and reputation notwithstanding Sir Walter. The others held undisturbed possession of the field, and were each supreme on her own ground. Novel-writing—though we are apt to say that it never attained such general extension as now—has always been a popular art, and perhaps at no period since literature began to have a history, did it ever happen that the story-teller was absent from the beadroll. But there had been a lull after Richardson and Fielding, and their successor Smollett. The two latter, we presume, making every allowance for the change of manners, never could have been considered suitable for domestic reading: and the gradual development of an ever-increasing audience brought necessities with it which probably had some occult power in quickening the feminine imagination, and calling into being that pure-minded and delicate art which

was found to the amazement of all beholders to be capable of delighting and amusing the public without infringing the finest standard of morals. Richardson had meant well —he had supposed and everybody had said that *Pamela* was the support of virtue, an example for womankind. But neither Fielding nor Smollett was solicitous about virtue. They were "robust" masters of the art of fiction, with no sort of affectation about them; their books were not meant for the women—and probably at that period women were not very much considered in the audience to which writers in general addressed themselves. But a change had evidently come about in this respect at the end of last century. Whether it was Rousseau and the French Revolution who did it, or whether it was the waking up in divers places of such genius among women as creates its own audience and works its own revolution, it is difficult to tell. Mary Wollstonecraft, who was the most likely to be influenced by these foreign powers, wrote bad stories in the old style, and probably Maria Edgeworth and Jane Austen knew very little of Rousseau. It is as hard to decide how they were produced as it is to trace any other awakening of a new thing in poetry or art. They were as much a new source of life and meaning as were the poets their contemporaries, and arose—because it was in them—mysteriously out of the gentle darkness, each a particular star.

It is curious to note the difference between their contemporary Mrs. Inchbald and these ladies of the new light. The *Strange Story*, with its graceful talent and individuality, belongs to the eighteenth century altogether. It deals with no definable development of human nature, and has in it no real study of life. It is a surprise to us to realise that *Pride and Prejudice* was actually written earlier than that curious romance, though it did not till some time after see the light. Mrs. Inchbald is of the

past, and her production is almost archaic; but Jane Austen belongs to humanity in all periods, and Miss Edgeworth is even more clearly natural and practical. The life of average human nature swept by no violence of passions, disturbed by no volcanic events, came suddenly uppermost in the works of these women as it had never done before. Miss Austen in particular, the greatest and most enduring of the three, found enough in the quiet tenor of life which fell under her own eyes to interest the world. Without ever stepping out from the shelter of home, or calling to her help a single incident that might not have happened next door, she held the reader, if not breathless, yet in that pleased and happy suspension of personal cares and absorption of amused interest, which is the very triumph of fiction. She had not even a new country to reveal like Miss Edgeworth, or a quaint and obscure region of odd manners and customs like Miss Ferrier. She had nothing to say that England did not know, and no exhibition of highly-wrought feeling, or extraordinary story to tell. The effect she produced was entirely novel, without any warrant or reason, except the ineffable and never-to-be-defined reason of genius which made it possible to turn all those commonplace events into things more interesting than passion. It would be difficult to find anything nearer witchcraft and magic. Why we should be so much amused and delighted by matters of such ordinary purport, and why a tiresome old woman or crotchety old man, whom, in real life, we would avoid, should become in print an exquisite diversion, is one of the most unaccountable of literary phenomena. But so it is. And as we mark the growth and rise of the new flood of noble poetry at the meeting-point of the two centuries, we should be negligent of one of the first duties of a historian if we did not note likewise the sudden development of purely feminine genius at the same great

era. Female writers have never been wanting. In the dimmest ages there has always been one here and there adding a mild, often a feeble, soprano to the deeper tenor of the concert. How it is that these have never risen to the higher notes and led the strain, as the feminine voice does in music, we need not inquire. Women are very heavily weighted for any race, but it can scarcely be that circumstances account for an inferiority so continual. But the opening of an entirely feminine strain of the highest character and importance—a branch of art worthy and noble, and in no way inferior, yet quite characteristically feminine, must, we think, be dated here in the works of these three ladies. Women's books before had either been echoes of those of men, or weakly womanish, addressed to "the fair" like so many productions of the eighteenth century. The three sister novelists who came to light in the beginning of the nineteenth, were, in their own way, as remarkable and individual as Scott or Fielding, and opened up for women after them a new and characteristic path in literature.

Miss Edgeworth was the first to appear in the field, and she had the advantage of an altogether new and untrodden ground. She was born in 1767, the eldest child of the gay young philosopher referred to by Miss Anna Seward, the husband of the beautiful Honora Sneyd, and of various other charming women, but whose chief distinction is that he was the father of his daughter. Maria was the child of his first marriage—a marriage contracted before he was twenty, and soon ended. Three wives and three families followed, and the house at Edgeworthstown was a very full one; but Mr. Edgeworth and his eldest daughter seem to have been each other's most tender and faithful friends through all the many incidents of his life. He was a man full of whims and crotchets and boundless self-confidence, fond of writing, and occupying himself

busily in systems of education and benevolent conspiracies of all kinds for the public good. Byron, when he met the great novelist and her father in London, gave vent to a witty saying which characterises them very cleverly. *She* looked, he thought, the simplest of ordinary little women, as if she could scarcely write her own name, while *he*, on the contrary, looked as if nothing else was worth writing —an admirable description. One or two somewhat laborious treatises, on *Practical Education*, on *Irish Bulls*—are said to be the joint production of father and daughter, and Miss Edgeworth herself has left it on record that she had recourse to her father's ready wit and invention in all her difficulties. "I am sure," she says, "that I should never have written or finished anything without his support." Many of her books are introduced by a little address from him full of genial self-complacency, as of a man who felt himself the author not only of the books but of the mind that produced them, and consequently deserving of double credit. "My daughter," he says with an evident roll of satisfaction in his voice, "asks me for a preface to the following volumes: from a pardonable weakness she calls upon me for parental protection: but in fact the public judges of every work not from the sex, but from the merit of the author." The crow of the cock, stepping gallantly out in front of his womankind, has been not unfrequently reproduced by proud yet semi-apologetic relatives introducing the works of female authors to the world.

Maria Edgeworth was a half-grown girl, at the moment when observation is most vivid, when she was taken from England, where she had been born, and up to her thirteenth year educated, to her home in Ireland; and no doubt the contrast struck her with wonderful keenness and force. It is a scene she is fond of repeating. Lord Glenthorn in *Ennui* and the young Lord Colambre in the *Absentee*, are both led through the amusing experiences

of an arrival, from all the prejudices and decorums of England into the very heart of the reckless, thriftless, contented, witty, scheming, and faithful population of the unknown country; from which they both have derived their means without any knowledge of either the land or the people. No doubt her own recollections gave force and animation to the picture. It was not, however, through the means of a youthful hero and captivating Irish heroine—personages whose charms literature has always been ready to acknowledge—that Miss Edgeworth first opened up this unexplored and novel region to the public. Her first work had no enlivening of youthful love, no cheerful hopes of amelioration to recommend and soften the picture. *Castle Rackrent,* which was her first publication (in 1801), and which is one of the most powerful and impressive of her books, is devoted to the miserable story of improvidence, recklessness, and folly, by which so many families have been ruined, and which is linked with so much that is attractive in the way of generosity and hospitality and open-handedness, that the hardest critic is mollified unawares, and the sympathetic populace, which is no adept in moral criticism, admires with enthusiasm while he lasts, and pities, when he has fallen, the culprit who is emphatically nobody's enemy but his own.

The story is told by an Irish retainer, faithful to his master to the very death, and though heartbroken when ruin comes, as proud of the lavish prodigality and beneficence of the house, and even of its wild waste and profusion, as if these had been the chief claims of "the family" to honour. It was a bold proceeding upon the part of a young author to stake her fortune upon a book in which there was neither love nor marriage, nor any of the well-worn romantic expedients for holding the reader's attention. It is the story of the ruin of a family, gradu-

ally worked out as it descends from generation to generation with a power which is at once amusing and tragical. There are incidents in the story which it is to be hoped were not common even in the worst state of Ireland, such as that of the imprisonment in her own house of Sir Kit's wife, but this powerful picture has been generally accepted as a true rendering of the miserable existence and downfall of many a house. The "family" is one of high descent and pretensions, with a very good estate in possession, and the *éclat* of a much finer one which had been theirs, and which still gives them a right to think themselves the first people in the district. It is free of the usual inconvenience of a large number of sons and daughters, for the prevailing recklessness of the race, and its constant need of money, leads one representative after another into a loveless or repugnant marriage, and not an heir is born so long as we follow its history in the ungenial house. From first to last an endless and aimless prodigality is the rule, with the one exception of the second baronet to whom we are introduced, Sir Murtagh, who represents the reverse sin of avarice, and who with his wife is continually grinding and crushing the people, exacting every kind of gift and profit from them. This pair are remorselessly drawn. "This for certain," says Old Thady, the hanger-on who tells the tale, "the new man did not take at all after the old gentleman: the cellars were never filled after his death, and no open house, or anything as it used to be, the tenants even were sent away without their whisky. I was ashamed myself, and did not know what to say for the honour of the family, but I made the best of a bad case, and laid it all at my lady's door, for I did not like her anyhow, nor anybody else. . . . I always suspected she had Scotch blood in her veins." Sir Murtagh and his lady manage their estate in a manner which affords an excellent contrast to the dissipation of the others, and

throws also a curious light upon the habits of the period The description reads something like the exactions of a grand seigneur in France before the Republic. The table at the castle was kept provided with "duty fowls, duty turkies, and duty geese . . . for what with fear of driving for the rent, or Sir Murtagh's lawsuits, they (the tenants) were kept in such order, they never thought of coming near the hall without a present of something or other."

"As for their young pigs, we had them, and the best bacon and ham they could make up, with all young chickens in spring; but they were a set of poor wretches, and we had nothing but misfortunes with them, always breaking and running away. This, Sir Murtagh and my Lady said, was all their former landlord, Sir Patrick's fault, who let 'em all get the half-year's rent into arrear. There was something in that, to be sure. But Sir Murtagh was as much the contrary way; for let alone making English tenants of them, every soul, he was always driving and driving, and pounding and pounding, and canting and canting, and replevying and replevying, and he made a good living of trespassing cattle; there was always some tenant's pig, or horse, or cow, or calf, or goose trespassing, which was so great a gain to Sir Murtagh that he did not like to hear me talk of repairing fences. Then his heriots and duty work brought him in something, his turf was cut, his potatoes set and dug, his hay brought home, and, in short, all the work about his house done for nothing; for in all our leases there were strict clauses heavy with penalties, which Sir Murtagh knew well how to enforce; so many days' duty work of man and horse from every tenant he was to have and had every year; and when a man vexed him, why, the finest day he could pitch on, when the cratur was getting in his own harvest, or thatching his cabin, Sir Murtagh made it a principle to call upon him and his horse; so he taught 'em all, as he said, to know the law of landlord and tenant."

This was in the happy days when Ireland had a parliament of her own, and home rule was unbroken: and under a landlord native to the soil, a descendant of the old kings, one of the same race and same creed as the unhappy dependants whose blood he sucked. But with all these exactions and robberies the landlord did not

thrive. "He used to boast that he had a lawsuit for every letter in the alphabet," and out of forty-nine suits "he never lost one, but seventeen," which was his way of throwing away his substance. Sir Murtagh died of passion in a quarrel with his wife "about an abatement," and his younger brother reigned in his stead. "A fine life we should have led," says Thady, "had he staid among us — God bless him! He valued a guinea as little as any man; money to him was no more than dirt, and his gentleman and groom, and all belonging to him, the same." Sir Kit, however, found Castle Rackrent dull, and "went off in a whirlwind to town," leaving everything to his agent, and keeping up a continual demand for money. "He had the spirit of a prince, and lived away, to the honour of his country, abroad, which I was proud to hear of." The state of things under the rule of the agent, and the constant drafts for money of the owner, are described as follows:—

"He ferreted the tenants out of their lives; not a week without a call for money, drafts upon drafts from Sir Kit; but I laid it all to the fault of the agent; for, says I, what can Sir Kit do with so much cash, and he a single man? But still it went. Rents must be paid up to the day, and afore; no allowance for improving tenants, no consideration for those who had built upon their farms: no sooner was a lease out, but the land was advertised to the highest bidder, all the old tenants turned out, when they spent their substance in the hope and trust of a renewal from the landlord. All was now set at the highest penny to a parcel of poor wretches, who meant to run away, and did so, after taking two crops out of the ground."

Amid all this Miss Edgeworth gives scarcely any indication of disturbance among the peasants, or secret societies, or any attempt at agitation. To be sure, there was an insurrection breeding, the unfortunate attempt of '98, during the period embraced by her story, of which she gives some small incidental account in another work,

representing the country folk, however, as but little and very superficially agitated, and the tremendous burdens upon them in respect to their occupation of the land as wholly inoperative in the matter. Whether she is a competent authority or not on this point we cannot tell; but she was an eye-witness, and knew what she was talking about.

Sir Kit got out of his difficulties by marrying an ugly Jewess, whom he shut up in her room for some years, because she refused to give up her jewels to him; till he was finally shot in a duel, to the great grief of the whole country side. "He was never cured of his gaming tricks; but that was the only fault he had, God bless him," says the pious Thady. He was succeeded by Sir Conolly (or Condy for short), who was "the most universally beloved man I had ever seen or heard of," and whose story of wild waste at once of money and affections and life is so complete, and the gleams of honourable feeling that flash out of the wretchedness of his bankrupt condition, so affecting—that the reader is touched by the pitiful tale, and notwithstanding his whisky punch, the smell of which revolts his unloved wife, and the madness of his hopeless career altogether, regards with a pang the miserable end of the spendthrift, who falls a victim at last to whisky and misery in a wretched little house, whither he has retired, after making over his castle to Jason O'Quirk, the too-quickwitted son of old Thady, who has grown upon his master's misfortunes, as wicked attorneys do everywhere. The reckless poor gentleman, who forestalls his inheritance, by advances, before he has got it, and begins a great deal worse than nothing: who is swept into a marriage he has no desire to make, and which is decided at last by the toss of a halfpenny: and who will not be troubled about his expenses or about anything else in the world, but floats on helpless to

destruction, and dies at last of a drunken bet, is contemptible enough from every moral point of view; but the love and admiration and sorrow of the faithful old retainer, who tells the tale—the remnants of a higher nature in the victim—and the utter misery and tragic sweep of fate with which he is carried away, have a heart-rending effect.

> "There was none but my shister and myself left near him of all the friends he had. The fever came and went and lasted five days; and the sixth he was sensible and said to me, knowing me very well, 'I'm in burning pain all withinside of me, Thady.' I could not speak, but my shister asked him would he have this thing or t'other to do him good? 'No,' says he 'nothing will do me good now;' and he gave a terrible screech with the torture he was in—then again a minute's ease—'Brought to this by drink,' says he. 'Where are all the friends?—Where's Judy?—Gone, hey? Ay, Sir Condy has been a fool all his days,' said he; and this was the last word he spoke, and died. He had but a poor funeral after all."

The young author who began her career by a tragedy so homely yet so profound as this must have been as courageous as she was able. It was a revelation of the deepest of national disabilities, a type of character so wayward yet so winning, so hopelessly facile, so obstinate and immovable, so generous and so selfish, that the moralist could but stand by in despair and feel the impotence of all exertion. In her other Irish stories which followed, Miss Edgeworth took advantage of a more attractive plot, and of the more ordinary *motif* of romance—the perennial love-story. In *Ennui* we have a number of pictures more cheerful but equally characteristic, the humours of the peasant being more entertaining, and even in his worst development of thriftless *insouciance* never so hopeless as the follies of his master; while in the *Absentee* we are permitted to hope for a remedy of all evils, and rapid substitution of a heaven upon earth for the wretchedness

of the agent's remorseless sway, by so easy an expedient as the return of the absentee family. The novelty of the circumstances set before us in these studies, and the dissimilarity of many points in the Irish character to the experiences of the English reader, never hinder our recognition of the life and nature which make the whole world kin. The shiftless careless cotter, sitting content with the squalor of his lot, and embarrassed only by the botheration of all attempts to better it: full of gratitude, affection, and faithfulness to all natural ties: far happier in the dash and daring of a hairbreadth escape than in national security and good order; touched with instantaneous impulses for good or evil, ready in understanding and still more ready in wit—who has for all this time been our favourite type of the Irish peasant, is chiefly Miss Edgeworth's creation; and nobody before her had revealed the fine gentleman, gallant, handsome, and manly, but as indolent of mind as the cotter, and letting everything go with still more fatal facility, whose pitiful consciousness of something better in him is never extinguished even by the low vices and degraded company to which he falls, but never does anything more for him than gild the ruin of his hopes and prospects. Nor has this exponent of national character failed to see the stealthy treachery which is the reverse side of the instinctive, spaniel-like, uncritical devotion of the race, or the bitter avarice and grasping acquisitiveness which varies the profusion and prodigality of the spendthrift. What Miss Edgeworth failed in was the gift of throwing a romantic and elevating interest over her country as Sir Walter did for his. She interests and excites the reader, but sets before him no picture which he longs to see, no society which he would like to join. There are no historical associations to attract him, and little but the painful problems of social misery to solve. Though she

writes with genuine love for her country, she communicates no enthusiasm for it. To be sure, enthusiasm had little or no existence in her own perfectly well-balanced and over-educated soul.

The Tales in which Miss Edgeworth took upon her to expound the world of fashion are less successful than her national sketches, but many of them are well worth reading; and if it is difficult to believe in the grossness of the dandy as shown in some of her sketches of a period so recent as the beginning of this century, the sprightly graces of her heroines, and the admirable good sense which they display in all the entanglements of their respective stories, are always agreeable. Her *Tales for Children* and *Parent's Assistant* enjoyed an enormous popularity, which has not lasted, we fear. Probably the virtues of the model young persons whom she holds up to the admiration of the youthful world are too matter-of-fact to please a young imagination. Our sympathy perversely goes astray from Ben, who buys a comfortable greatcoat, to Harry, who chooses a green and white archery uniform instead; and we are less angry with Rosamond for admiring the purple jar in the chemist's window than with her mother for permitting the child to buy it. Good sense and practical education are admirable things, but they may be carried too far. It was the lot, however, of Maria Edgeworth to be trained in one of those somewhat appalling family seminaries of all the virtues, where nothing escapes the system of education, and everything is made subservient to the moral discipline of the house. It is scarcely fair, however, to assert —as is so often done—that her imagination is deficient, that she has no enthusiasm, nor anything more elevated in her than the dominion of plain sense, and the honesty which is the best policy. We have already indicated the tragedy of *Castle Rackrent*, where she has succeeded,

amid details of petty and even vulgar vice, in giving such touches both of pity and terror as raise the miserable drama to poetic rank. She never again strikes quite so high a note, but the picture of King Corney in *Ormond* is as striking and full of pathos as that of Sir Condy. Perhaps her admirable papa, who cut and carved her manuscripts at his will, declaring that to write was her part, and to amend and criticise his, may have subdued her tragic vein.

But nothing can be more pleasant than the picture she has left us of the close communion and partnership which existed so long between her father and herself. Sometimes it was he who invented the stories, and she who wrote them down—as was the case in respect to her tale of *Patronage*, it must be allowed one of the least successful of her productions, and the most open to the charge of flatness and matter-of-fact treatment. But ordinarily it was she who brought her skeleton tale to her father, to be by him considered and weighed in the critical balance. She lived at home in all the freedom and cheerfulness of the large and full household; seeing wife succeed wife in the government of the mansion, and family after family fill up the many rooms. The younger daughters, children of Mrs. Honora or Mrs. Elizabeth, were married or died in their bloom; but Maria still lived peacefully on, her father's companion and counsellor, growing quietly into maturity, till, no doubt, in her gentle and ripe maidenhood, she became the elder of the two, a sort of indulgent senior to that ever energetic, ever active personage who was capable of so many loves, and renewed his youth periodically in a new marriage. They must have got to be something like brother and sister as she grew old and he young, marrying at fifty-four a lady who was younger than Maria. But nothing seems to have impaired their tender union, or the warm and cheerful placidity of the family life.

Her books were received with great favour, and her reputation at once reached the highest place. "Without being so presumptuous as to hope to emulate the rich humour, pathetic tenderness, and admirable tact which pervade the works of my accomplished friend," said Sir Walter Scott in the preface to the *Waverley Novels*—when, after so long a period of concealment, he at last revealed himself publicly to the world which had guessed his secret so long—"I felt that something might be attempted for my own country of the same kind with that which Miss Edgeworth so fortunately achieved for Ireland—something which might introduce the natives to those of the sister kingdom in a more favourable light than they had been placed hitherto;" and he describes "the extended and well-merited fame of Miss Edgeworth, whose Irish characters have gone so far to make the English familiar with the character of their gay and kindhearted neighbours, that she may truly be said to have done more towards completing the Union than perhaps all the legislative enactments by which it has been followed up," as one of the inducements which led him to complete and publish *Waverley*. The sincere compliment of imitation could not have been paid in a nobler way; and one of the prettiest episodes in the too-hospitable life at Abbotsford is the visit of Miss Edgeworth to her great contemporary.

"The next month—August 1823—was one of the happiest in Scott's life," writes Lockhart. "Never did I see a brighter day at Abbotsford than that on which Miss Edgeworth first arrived there. . . . The weather was beautiful, and the edifice, and its appurtenances, were all but complete; and day after day, so long as she could remain, her host had always some new plan of gaiety. One day there was fishing on the Cauldshields Loch and a dinner on the heathy bank. Another, the whole party feasted by Thomas the Rhymer's waterfall in the Glen—and the stone on which Maria that day sat was ever afterwards called Edgeworth's Stone. A third

day we had to go further afield. He must needs show her, not Newark alone, but all the upper scenery of the Yarrow, where 'fair hangs the apple frae the rock;' and the baskets were unpacked about sunset, beside the ruined chapel overlooking St. Mary's Loch: and he had scrambled to gather bluebells and heath-flowers, with which all the young ladies must twine their hair,—and they sang, and he recited, until it was time to go home beneath the softest of harvest moons. Thus a fortnight was passed—and the vision closed; for Miss Edgeworth never saw Abbotsford again."

While Maria Edgeworth was growing into maturity in her Irish home, frightened by the rebellion, but never losing her faith in her countrymen, a younger girl in an English rectory in Hampshire, with nothing about her beyond the calmest everyday circumstances, began, quite unprovoked by outward stimulation, to exercise a gift still finer and more subtle than that of her Irish contemporary. Jane Austen, who was born in 1775, was eight years younger than Miss Edgeworth. She was a shy and quiet girl, with the keenest insight and gently cynical penetration, hidden under a pretty humour and softly trenchant banter. The way in which she tenderly laughs at, and turns outside in, the young nephew to whom she addresses some pretty letters, published in the little anecdotical memoir not long since given to the world, betrays her use in private life of the keen and exquisite derision which is one of her favourite weapons in her art. She was only about twenty in her sheltered and happy life at home in the end of the old century, when she wrote what might have been the outcome of the profoundest prolonged observation and study of mankind—what is, we think, the most perfect of all her works—*Pride and Prejudice.* It must have been in her father's parish, in the easy intercourse of village or rural life, that she saw, probably without knowing she saw, so many varieties of human nature. No feasible inducement was before her to bring this strange endowment to

life; no hothouse training in moralities and the creed of universal instructiveness; no restless literary papa to set her an example; no unknown society or manners to reveal An excellent ordinary strain of honest gentlefolks, peaceably tedious and undistinguished, and anxious to make it apparent that their Jane knew nothing of literary people, and was quite out of any possibility of association with such a ragged regiment, was the family that give her birth. She wrote—no one can tell why—out of native instinct, preferring that way of amusing herself to fine needlework,—telling stories, as Burns rhymed, "for fun," with no ulterior views. She was pretty, sprightly, well taken care of—a model English girl, simple, and saucy, and fair. It is almost impossible to imagine that she who traced all the vicissitudes of long and faithful love in the delicate and womanly soul of Anne Elliot can have been entirely without such experiences in her own person; but if so, her life shows no trace of the hidden episode, and all is plain and unexciting and matter-of-fact in the little record. Her success in her lifetime is said to have been small, and her own eagerness about the reception of her books scarcely rises above the little girlish excitement of a successful mystification, as when *Pride and Prejudice* is read aloud to a serene rural auditor, without any hint of the authorship, and Miss Jane exults in the interest aroused. The girlishness of her own estimate throughout is as amusing as any of her characters. "Fanny's praise is very gratifying," she writes. "Her liking Darcy and Elizabeth is enough; she might hate all the others if she would." How Miss Austen would have delighted to draw with delicate malicious touches the pretty young authoress, careful of the effect to be produced by her lovers, and quite unconscious of the superiority of "the others," the wonderful Bennet family, the

ever-to-be-remembered Mr. Collins, and all the infinite humours of that little world! At the same time there is this warrant for that innocent bit of sentimental preference, that Miss Austen's lovers, at least in this book, have a character and individuality much superior to most of the *jeunes premiers* we meet in fiction. Darcy is not a mere walking gentleman or Elizabeth a featureless angel; but it brings us very near to the young woman who, in her girlish innocence, must have been little more than the handmaiden and secretary of her own genius, to find her pretty Elizabeth, the high-spirited bright girl in whom, no doubt, her own young ideal was expressed, so near to her heart. "I must confess," she says, "that I think her as delightful a creature as ever appeared in print, and how I shall be able to tolerate those who do not like *her* at least, I do not know."

These lines were written when the book was published, when Miss Austen had reached the maturity of thirty; but the work itself was written before she was twenty-one, and no doubt had been frequently lingered over during those eventful ten years of life in which the story of youth and romance is generally lived through one way or other. *Sense and Sensibility* followed immediately, then *Northanger Abbey*. We doubt much whether three such works, so full of natural insight, and what, for want of a better title, we call knowledge of human nature, were ever produced at so early an age by any other writer, male or female, since the world began. Jane Austen, the rector of Steventon's daughter, could not have any knowledge of the world. She must, no doubt, have paid at least one visit to "the Bath," and seen with lively bright youthful eyes John Thorpe driving about in his high gig, and sat through a wistful evening by the side of some good-humoured chaperon, who wished, like Mrs. Allen, that they knew somebody; but

this little experience probably was the extent of outdoor knowledge possessed by the country girl. And who can tell by what witchery it was that she divined the rest?

"She had no separate study to retire to," says her biographer, "and most of her work must have been done in the general sitting-room, subject to all kinds of casual interruptions." Thus it was a very different scene from that of the Irish mansion, full of children and systems of education, where everybody was being trained from morning till night, and where Maria Edgeworth carried the skeleton of her tales to her father to be approved of, or handed the MS. over to him to be pruned and cut down—in which this young Englishwoman let loose her youthful genius. In the Rectory parlour, where Mrs. Austen and Cassandra sat at their needlework, and all the little parties of the neighbourhood would be discussed, and the girls' new bonnets settled upon, Jane, at her "little mahogany writing-desk," at one side of the table, was in the full tide of all the little nothings that make up the gentle tenor of daily life in the country. No doubt, she was the first to see, glancing up in the middle of a sentence, Miss Bates coming up the little avenue with her budget of village news—and would stop and play with her pen, and make her little caustic remark, with glee in her eyes, as the good woman ran on with a hundred breaks and lapses: or pause and come back out of the midst of the Bennets to join in the discussion soon reproduced in her manuscript, as to whether the horses could be spared to take the ladies into the little town, with a full sense of the seriousness of the question. Can any one doubt that Jane had to run away from her desk and leave the half-written page to be fluttered by the sweet-smelling air blowing in from the garden, to do a dozen little errands, that her sister might not be disturbed in the middle of her fine buttonholes, or at the crisis of a

piece of fancy-work? The girl might have taken to worsted work instead, and probably there would not have been much difference in the two pursuits, so far as anybody knew; but by and by it would begin to be understood that it was amusing to hear what Jane had been writing, and how far Darcy and Elizabeth had got in their affairs. She would do a little dressmaking by intervals, and work a bag for a present, with a pretty housewife full of silks and needles in it, and a little copy of verses in the pocket, so neatly written out that it was a pleasure to see. No doubt the rector's wife was vexed at first that the child should be so idle, scribbling instead of doing her needlework — but always so ready to look up from her writing and nod her pretty curls, and set them laughing with those little merry speeches of hers, and her sweet little laugh at everybody, who could find fault with her? Probably when it came to be ascertained that a book was the issue of all these harmless scribblings, this, after the first movement of incredulity, would be the best joke of all. It seems very likely that a feeling on the part of her parents that publishing a book would be something of a stigma on their young daughter, kept *Pride and Prejudice* in manuscript for ten years. It is not so stated, but in these days publishing a book was a doubtful advantage to a rector's daughter, and might have been looked upon in the county society with no favourable eye.

The character of these books is too well known to require description. Of Miss Edgeworth, whose fame in her life was greater, we feel at liberty to indicate several special points in her stories; but who needs to be told about the Bennets in that wonderful, dingy, old-fashioned country house, with the father in his library, slipshod but caustic, contemptuous of his silly girls and their still more silly mother: and Mrs. Bennet, so ready to espouse

the cause of the silliest, too opaque to understand her husband's jeers, but not to feel the grievance of them: and stolid Mary, always ready to oblige the company with another song; and Mr. Collins, who thinks it incumbent upon him, as heir of entail, to marry one of the Miss Bennets, and who understands so well that no elegant female can be expected to say yes at once? The whole little landscape rises before us—the country town where the officers are so constant an object of interest, the girls' delight in watching them from their aunt's window, the muddy country roads, the little entertainments, the new people who laugh at the rustics, and all the flutter and chatter and speculation about young Mr. Bingley and Miss Jane. Miss Bingley and her sister are a trifle vulgar,—the only approach in the book to that danger,—and probably reflect some town intruders, whom the rector's daughter had noted with keen enjoyment in their condescending notice of her friends and herself. Everything is told with the most delightful impartiality and good humour, but with a pleasure in the exhibition of all these follies, which is not perhaps so amiable as the young writer was. Except in Elizabeth, and her favourite sister Jane, the too-sweet and pliable heroine, no ideal figure finds a place in this young woman's work. She takes her fun out of the father and mother without a scrap of hesitation, and laughs at everybody all round, even her hero, who deserves it, though he comes at the end so nobly out of his troubles. One wonders whether there was anywhere about, near Steventon, a Lady Catherine, who permitted the parson to make up her card-table, and insulted him and all his belongings. We are driven back to search for the real originals, who probably never existed, of these characters, out of sheer inability to conceive how the country girl of twenty could have found such varieties of human mind and temper in

her own young imagination. *Sense and Sensibility* is perhaps not so difficult. The gushing girl is never far to seek, and though it is almost impossible to imagine anything so utterly rash, and unpractical, and deluded as Marianne and her mother, yet there is much less that is wonderful in the production of such a tale of sentimental complications in the parlour of Steventon Rectory than in the brilliant and varied picture of character and life which preceded it.

Northanger Abbey is once more on the higher level. Such a picture of delightful youth, simplicity, absurdity, and natural sweetness, it is scarcely possible to parallel. Catherine Morland, with all her enthusiasm and her mistakes, her modest tenderness and right feeling, and the fine instinct which runs through her simplicity, is the most captivating picture of a very young girl which fiction, perhaps, has ever furnished. Her biographer informs us that when Miss Austen was very young she amused herself with writing burlesques, "ridiculing the improbable events and exaggerated sentiments which she had met with in sundry silly romances." It is to be hoped that he did not rank the *Mysteries of Udolpho* among these silly romances; for certainly it is with no ungenial criticism that the young author describes the effect upon her Catherine's ingenuous mind of the mysterious situations and thrilling incidents in the books she loves. It is, on a small scale, like the raid of Cervantes upon the books of chivalry which were so dear to him, and which the simple reader believes, and the heavy critic assures him, that great romancer wrote *Don Quixote* to overthrow. Miss Austen makes her laughing assault upon Mrs. Radcliffe with all the affectionate banter of which she was mistress — the genial fun and tender ridicule of a mind which in its day had wondered and worshipped like Catherine. And she makes that innocent creature

ridiculous, but how lovable all through!—letting us laugh at her indeed, but tenderly, as we do at the follies of our favourite child. All her guileless thoughts are open before us—her half-childish love, her unconscious candour, her simplicity and transparent truth. The gentle fun is of the most exquisite description, fine and keen, yet as soft as the touch of a dove. The machinery of the story is wonderfully bad, and General Tylney an incredible monster; but all the scenes in Bath—the vulgar Thorpes, the good-humoured Mrs. Allen—are clear and vivid as the daylight, and Catherine herself throughout always the most delightful little gentlewoman, never wrong in instinct and feeling, notwithstanding all her amusing foolishness.

These three works were the productions of Jane Austen's youth. Out of timidity or fastidiousness, or the reluctance of her family to identify her with anything so equivocal as authorship, they were not published for nearly ten years, the first appearing in 1811. Whether they passed through her hands again during this interval there is no information. The wonderful polish and finish of the work would make any amount of revision seem possible; but we think it very doubtful that there was much revision. It does not accord with what we know of the circumstances that she should have been turning over, refining and re-refining, all in the family parlour with the common life around her at every point and on every side. Indeed, it would seem that the first manuscript was cautiously offered to a publisher so early as 1797, but was declined; and still worse, that *Northanger Abbey* was sold to a bookseller in Bath for £10: "But it found so little favour in his eyes that he chose to abide by his first loss rather than risk expense by publishing such a work!" and kept our beloved Catherine in a drawer till the author, having achieved her first modest success, bought the manuscript back again. Probably it

was these discouragements after all which kept the books in her hands for so many years.

After a long pause, however—during which she was more in the world, living in Bath and Southampton, and presumably occupied with positive existence more than with imagination—the publication of her first work, and her settlement once more in the country, seem to have re-awakened the dormant faculty; and between 1811 and 1816 she wrote *Mansfield Park*, the longest, and, we think, least valuable of her books, and the far more admirable *Emma* and *Persuasion*, both masterpieces. *Emma*, perhaps, is the work upon which most suffrages would meet as the most perfect of all her performances. It is again the story of a girl, full of mistakes and foolishness, but of a girl very different from Catherine Morland. That delightful little maiden was very young, very simple, at the age when life is all one sweet wonder and surprise to the novice; but Emma is more mature and her own mistress, used to a certain supremacy, and to know her own importance and feel herself a power in her little world. Perhaps the author has scarcely the same sympathy for her that she had for her younger heroine, for some of Emma's mistakes are sharply punished, and her own movements of self-reproach and self-conviction are very keen; but then her errors are of a graver kind altogether, and involve the comfort of others, as only the actions of an important personage with some responsibility on her shoulders could do. But Emma's wilful womanhood, and her busy schemes and plans for the settlement of other people's fortunes, are scarcely less attractive than the infantine freshness of Catherine: and the group round her are drawn—we would say with greater perfection of experience and knowledge of the world, did we not remember that *Pride and Prejudice*, the first of the series, was as wealthy and varied in character.

But, at least, if *Emma* is little advanced in power of conception from that wonderful work, there are traces of a maturing mind in the softened medium through which the author contemplates her *dramatis personæ.* In her earlier work, excepting and not always excepting her pair of lovers, she has an impartial and amiable contempt for all, and laughs at every one of them with a soft cynicism which sees in the world chiefly an assemblage of delightfully absurd persons, who lay themselves out to ridicule, turn where you will and from every point of view. Even Darcy himself, though he imposes upon her by his grandeur and heroic qualities, is not always safe from her dart of keen and smiling derision, and nobody but Elizabeth, who occupies in the book something of her own position, escapes her amused perception of universal weakness. But by the time she reaches the length of *Emma,* those eyes full of insight have acquired a deeper view. Amusement is no longer the chief inspiration of her observant vision. She laughs still, but it is in another key. Mrs. Bennet was vulgar and heartless, despicable as well as ridiculous; but Miss Bates, though we laugh at her, excites none of the feelings of repulsion which move us for almost all Elizabeth Bennet's family, except Jane. The broken stream of talk, the jumbled ideas, and everlasting repetitions of the village busybody, touch us with an affectionate amusement. We are never so angry with Emma as when, in her irritation after one of her failures, she is unkind to Miss Bates This good woman is managed with such skill and tenderness that she cannot be too diffuse and wandering, too confused and tedious, for the kindness we have for her. Her author laughs too, but softly, with a glimmer of moisture in those keen eyes which had no sympathy to spare for the Bennets; and in all Mr. Woodhouse's maunderings there is the same touch of humorous charity. They are

respectable to her in their weakness, as their predecessors were not. It is no longer saucy youth, remorseless, amused with everything, picking up every human creature about on the point of its dazzling spear for the ridicule of the world—but a sweeter, chastened faculty, not less capable of penetrating and divining, but finding something more to divine and penetrate than is dreamt of in the philosophy of twenty. With such a deepening and ripening of moral perception, what might we not have had if this wonderful observer of the human comedy had lived to the full extent of mortal life? But this is a vain question, and we may console ourselves with the belief that the supply of living energy in us is proportioned to the time we have to use it in.

Persuasion stands by itself among the busy chapters of common existence in which so many of the humours of life are exhibited to us, as a story with one sustained and serious interest of a graver kind. To be sure there are abundance of amusing characters and sketches, but Anne Elliot herself, pensive and overcast with the shadow of disappointment and wistful uncertainty, fixes our regard from beginning to end with a sentimental interest which is not to be found in any other of Miss Austen's works. Nothing can be further from a love-lorn damsel than the serious and charming young woman whose vicissitudes of feeling we follow with so much sympathy; but this is the only exclusively love-story in the series, far more distinctive as such than the duel between Darcy and Elizabeth, and intellectual trial of strength which ends in the mutual subjugation of these two favourite figures. Anne is introduced to us in her dignified and sweet seriousness, always very courageous and cheerful, and in full command of herself, but paled out of her first bloom, and with a little tremor of anticipation and wistful wonder whether all is over, continually about her in the very air. And to us

too is transferred that sense of suppressed anxiety and mute fear and hope. We follow her about always with our ears alive to every sound, amused in passing by the other people's eccentricities, but most occupied with her and with what is going to happen to her. Miss Austen is not a sentimentalist—love in her books takes no more than its proper place in life. Never from her lips would that artificial creed "'Tis woman's whole existence" have come. One can fancy the glow of lambent laughter with which she would have demonstrated the foolishness of any such melodramatic dogma. But her little cycle of clearest life-philosophy would not have been complete had she not once given its full importance to this most momentous of human sentiments. Nobody knew better that Anne Elliot would have lived and made herself a worthy life anyhow, even if Captain Wentworth had not been faithful; but there would have been a shadow upon that life—the sky would have been overcast, a cloud would have hung between her and the sun: and as step by step we get to see that her lover is faithful, the world cheers and lightens for us, and we recognise the divinity of happiness. It is the least amusing of Miss Austen's books, but perhaps the most interesting, with its one *motif* distinct and fine, the thread that runs through all.

These works had no dazzling or instant success—but they made their way quietly into the esteem of the public. Oddly enough, of all people in the world, the Prince Regent admired these purest of domestic romances, and there is a semi-ludicrous episode narrated in Miss Austen's biography concerning a certain secretary of the Prince, who showed her over Carlton House, and intimated to her that if she wished to dedicate her forthcoming book to his royal master, the permission to do so would be graciously accorded to her. Poor Miss Austen! it was an embarrassing honour, and we may easily imagine that the last

patron she would have chosen was precisely this royal admirer. But there were others more worth such a woman's while, who gave her the tribute that was her due. "Read again, and for the third time at least, Miss Austen's very finely written novel of *Pride and Prejudice*," says Sir Walter, always generously open to every excellence. "That young lady had a talent for describing the involvements and feelings and characters of ordinary life, which is to me the most wonderful I ever met with. The Big Bow-wow strain I can do myself like any now going; but the exquisite touch which renders ordinary commonplace things and characters interesting from the truth of the description and the sentiment is denied to me. What a pity such a gifted creature died so early!"

She died in 1817 at the age of forty-two—a life long enough, but for the mysterious blank of ten years in it, to have accomplished much more. But what she has left us is perhaps more perfect workmanship in all than the work of any of her contemporaries. The change of manners is great since her day, though it is not so very far off. When we think of the comparatively small incomes with which she endows her rich men, and all that they seem able to do with their money, the difference makes us sigh: but in other points of view there are perhaps improvements to be recorded. Miss Austen, like every other writer of fiction, is fond of the picturesque position of a country clergyman, with which, indeed, she must have been thoroughly acquainted; but nowhere in High or Low or Broad Church could we find now-a-days the very secular persons who do duty in her pages under that character. That was the time when to obtrude religion upon your neighbours, or indeed any subject of the kind, save in the pulpit, was the worst of bad taste, and you were supposed to keep your views strictly to yourself on this matter though no other. And it cannot be said that

clerical or lay, there is much strain after the ideal in the minds of her various personages. They are generally very well satisfied with the good things that fall to their share, and do not waste their time in any foolish endeavours after the better. The deep vexation of Fanny Price over the vulgarity and shabbiness of her father's house, and her longing after the superior grace and beauty of Mansfield Park, where she was brought up as a dependant and very hardly treated, are almost servile, and give an unpleasant if very likely true impression of the way in which even a fine spirit may be beguiled by external advantages. Miss Austen herself thinks this very natural, and thoroughly justifies Fanny : but it is not an elevated point of view. Actual existence, however, as she sketches it, and all the amusing and delightful human creatures whom she introduces, in the warmth of natural life and humour, are more worth than the finest sentiments or the most skilful machinery : and in these points Miss Austen has no superior, and very few that can be called her peers.

The third representative woman fitly embodying her country by the side of the Irish and the English was Susan Ferrier, a little younger, and a much less voluminous writer : that is to say—for the epithet is as inapplicable to Miss Austen as to Miss Ferrier—where her English contemporary produced six books, she wrote but three, a trifle to Miss Edgeworth, who far exceeded both put together. Needless to say that in our own days none of these really great writers could be so much as named, if quantity were the chief distinction, beside a score of little names which have deluged their age. *Marriage* and *The Inheritance*, indeed, are almost the sole pillars of Miss Ferrier's fame, for her last work, though it has occasional gleams of fine humour, and the group in the chief's house is as good as the best of her productions, is not of great

quality as a whole. It is not generally supposed that mirth is characteristic of Scotland, but certainly there is more laughter to be got out of Miss Ferrier's three books than out of the voluminous series produced by Miss Edgeworth. It is on this ground that she is strong: her heroes and heroines are a little too excellent for flesh and blood, while her foolish and fashionable ladies, the butterflies of London society, whom she is fond of introducing to spread confusion and dismay into a primitive Highland society, are almost too foolish, artificial, and heartless for belief. But she has no sooner brought in one of these fine ladies into the house, be it the limited dwelling-place of a small laird, or the castle of a Highland chieftain, than her eye glows with fun, and all the absurdities of the position flash out before us in a light of genial humour, satirical yet kind. Lady Juliana has made a love-match in the most absolute and silliest ignorance of what she is doing, and her handsome soldier carries his bride to the tall gray house among the moors, which he has not himself seen since his childhood, and of which he thinks as a boy thinks of his home—and straightway there opens before us the homely unlovely house, full of fussy homely people, an old laird fresh from his fields, a host of anxious maiden aunts all eager to be of service—Miss Jacky, who is superior and sensible; Miss Nicky, who is the housekeeper; Miss Grizzy, the tender-hearted one, who is all kindness through and through. Their little formalisms, their alarm and surprise at the beautiful creature whom all their simple efforts cannot satisfy, their prejudices and simple conviction of the greatness of their castle and their race, all become visible in clearest vivid portraiture, each individual, but all in perfect harmony. Nobody, not Sir Walter himself, has given us a picture of the commonplace of Scottish gentry, the homely family life, the eccentricities of the old, and bashful rusticity of the young, to match

these curious revelations. Miss Ferrier wrote of what she knew. Miss Grizzy was as familiar a figure to her, evidently, as Miss Bates was to her English contemporary. And she does not spare us a detail of the shabbiness, the absence of everything beautiful, the bare and sordid aspect of life in homes out of which gallant soldiers were issuing every day, and in which, what we are accustomed to think of as the most desirable of all classes, the country gentry, were trained. The delicate satirist brings in her Lady Juliana to give the whole force of the picture by contrast. Not that the fashionable young lady, so terribly astray in such a house, is made to secure any of our sympathies, but her horror and astonishment throw a fuller light on the whole scene, and bring out all the grotesque features which familiar eyes apprehend dimly. Though we dislike the senseless little intruder, we cannot help seeing through her eyes, when she drops unprepared and incapable of understanding it, into this characteristic group. Her horror at the dreary house, rising gradually into hysterical dismay, as she reaches the prim, unused drawing-room, with its newly lighted fire, and meets the troop of grotesque women who rush to receive her with a babel of unfamiliar voices, strange accents, and language only half comprehensible, is required to bring out the humour of the scene, in which, however, the beautiful young heroine is much more odious than the perplexed and fussy old maidens, so anxious to be kind, and so bewildered by the reception given to their advances. This is a scene in which Miss Ferrier is even more trenchant than Miss Austen. She does not spare one eccentricity, or throw one ray of fictitious illumination upon the narrow minds and contracted unlovely living of the Scotch gentry whom she loved. In the house of the Bennets there were at least Elizabeth and Jane, with their pretty manners and cultivated minds to do credit to the family: but the Scottish novelist is

merciless. She makes no effort to harmonise her modern yet old-fashioned household with the tradition of Highland grace and breeding that ought to hang about an ancient race. Young and old alike are rustical, narrow, and coarse, if not in mind at least in externals. There is neither delicacy nor fine perception among them, nor any prettiness either of manner or person. The girls, indeed, are less interesting than their old aunts. Yet having done this with remorseless truth, it soon becomes apparent to us that there is a secret tenderness beneath, which is not in the touch, fine as a diamond-point, of the English writer. The Bennet ladies care nothing for any one, not even for each other, but Miss Jacky, Miss Nicky, and Miss Grizzy, with all their uncouthness, are overflowing with the milk of human kindness. Miss Grizzy, in particular, goes to the reader's heart. Perhaps it is because she is less wise than her sisters. Her bounty and liberality—with so little as she has to give!—are infinite. When she pays her famous visit to the charitable lady who is a collector of pebbles, her impulse to bestow the brooch which is Nicky's and not her own, and the alarmed struggle in her mind as to whether she has any right to be generous at Nicky's expense, and casuistical self-persuasion that Nicky would certainly do the same were she there—is such a sketch as only that mocking love which we call humour, could give. Miss Bates, who is a kind of English Miss Grizzy, had no leisure for any such self-discussion, neither would a similar impulse of generosity have occurred to her. She is perfectly honest and self-sufficing, but her custom is to receive and not to give; while the instinct of Highland generosity—the impulse of a ruling race—is strong in the ungainly bosom of the Scotch spinster. Miss Bates is far more tenderly drawn than the vulgar group of *Pride and Prejudice*, with its unredeemed pettiness and selfishness; but even that, how much below

in sympathy this picture, so heartfelt, so foolish, so uncouth, so tender and true! Miss Edgeworth has a kind of partisan kindness for her Irish peasants, of whom she is the advocate, holding a kindly brief, ready to explain away their imperfections; but Miss Ferrier loves her uncouth old heroine, and takes her to pieces with an affectionate and caressing hand.

The *bourgeois* group in the *Inheritance* is less attractive though not less amusing. Probably Miss Ferrier, in the instinctive prejudice of class, was more ready to see unmitigated vulgarity in the rich people who had sprung from a common stock than in the poor and uncultured gentry; but Uncle Adam, the cynical old bachelor, who lives the life of a retired shopkeeper in a little roadside villa of the meanest description, though he possesses a colossal fortune and a fine house close by, is again an instance of her tenderer skill; for though he talks like a peasant and lives like a retired cockney, there is the finest fund of poetry and romance in the old man's nature. He saves pennies in his little house, but he thinks the money dross when his niece wants it, and gives her a cheque for five hundred pounds as he would have given her a handful of gooseberries; and his adoration of the memory of the love of his youth is worthy of a poet. But it is Miss Pratt whom the reader will most readily associate with the name of the *Inheritance*—Miss Pratt, who is a larger and more confident Miss Bates, though without that lady's delightful incoherence, an endless commentator upon life, unmalicious and impartial, recording everything great and small, gathering up all the straws of social intercourse, and dauntlessly regardless of its prejudices. Here the author is as impartial as her creation, yielding to no sentiment, leaving us with the mere fact of this active, busy never-resting intelligence, ceaselessly occupied with other people's concerns, and shrewdly shooting at their motives

—with great success in the case of the less worthy personages of the drama, if with complete failure when the finer and more ideal natures come in her way. Miss Pratt's superiority to all the common weaknesses is as nobly displayed in her indifference to the stupid grandeur of the noble peer who tortures everybody else, but whose authority she sets at naught with bustling unconsciousness, as in her famous drive in the return hearse, which she takes advantage of in the failure of any other conveyance, with the true readiness of social genius. Nor does she stand upon her blood and breeding, when there is news to be picked up—and there is something to be picked up everywhere by so bold an observer. Whether she appears at the castle, sweeping away Lord Rossville with the torrent of her gossip, or amid the Blacks, finding out everything, universally affable and curious, there is no failure in her, she is perfectly sustained, yet quite natural from beginning to end.

Although the third of these novels is in itself less successful than its predecessors, there is perhaps nothing in either of them so perfect as the sketch of the chief's household in *Destiny* and its permanent members. Glenroy himself, the despotic, unreasoning, overbearing chief, trained to consider himself the greatest man in the district, and exacting a superstitious observance of all his will and ways; with his gentleman-in-waiting, Benbowie, the taciturn and self-contained, whose mute presence is as indispensable as that of a piece of furniture, but not much more remarkable; and the delightful, simple, beaming countenance of Mrs. Macauley, the humble cousin and housekeeper, whose perpetual good humour and satisfaction with all around her diffuse warmth throughout the picture—make a perfect group. Here we are on a very different level from that of the humble Castle of Glenfern. All the luxuries of the plains are under the noble roof, and along

with them that fading glory so infinitely pathetic in some aspects, so cruelly ridiculous in others, which is all that is left of an antiquated and outworn supremacy of race. The chieftain's unquestioning sense of his own greatness is like that of a monarch: while, like the faithful courtiers of an exiled king, the Highland gentleman and matron receive as something beyond question the commands, the hard words, the exacting requirements of their head. Some one has said that while Sir Walter depicted the last chapter of real power and greatness, the tragic and splendid ending of the reign of Highland chiefs and devotion of clans, it was Miss Ferrier's part to show the more melancholy downfall, the contempt of the modern world for what had become a mere romantic fiction, and breaking up of all reality in the obsolete position itself. There is some truth in the criticism as applied to *Destiny*. It is the reverse of that more dignified conclusion which made an end of the race of Vich Ian Vohr. The rest of the book is at once too good and too bad for nature. Never were such irreproachable instructive good people; never such reckless, frivolous, despicable bad ones. The colours of the sentimental portion of the story are far too crude and unmodified. But Glenroy, Benbowie, and Mrs. Macauley are admirable. Here was an insight in which even Sir Walter himself yields the palm to the "sister shadow" of whom he spoke so kindly. His genius went back upon ages more picturesque. Miss Ferrier contented herself with what lay under her own eye.

This gentle but powerful satirist was born in 1782, the daughter of a lawyer in Edinburgh. Her father, one of the caste of "Writers to the Signet," so largely recruited from among the poorer gentry of Scotland, and one of the most characteristic in Scotch society, was the agent of the Duke of Argyll, and spent much of his time at Inveraray, where his daughter no doubt saw among the English

visitors some types of her Lady Juliana, whom she never afterwards forgot. The details of her life, prefixed to Mr. Bentley's re-issue of her novels, afford us a little information with which the world was not acquainted. Her first efforts seem to have been inspired and encouraged by one of her companions in the noble household, Miss Clavering, a niece of the duke, in concert with whom, it was originally intended, her first book was to have been written; but this arrangement, fortunately, was soon thrown aside. It is said that the story of Mrs. Douglas in *Marriage* was from the pen of this young lady; if so, our gratitude for her withdrawal is all the deeper. It would seem by the letters now published that Miss Ferrier took advantage of the many original figures still existing in the society of the North as models for her pictures, and that a knowledge of the originals quickened the delight with which contemporaries received Miss Grizzy and Miss Jacky. When youth was over, she lived a perfectly retired life, in close attendance upon her aged father, devoting herself entirely to him; and it has been said that the seriousness of the religious views which she adopted in after life made her look with regret upon the novels of her youth as frivolous productions, unworthy her religious profession. This is, however, merely a tradition, and her appearance in the memoir of Sir Walter Scott, towards its melancholy close, is in no respect puritanical, but in every way sweet and satisfactory. She was admitted to his most private circle to help and support his daughters at the terrible moment when sickness had bowed down his noble soul and clouded his perfect temper. She was privileged to share with Anne and Sophia Scott the anxious hours of tendance, when, sick at heart to see the gathering gloom, they sat about him and heard him babble on through a hundred half-forgotten stories, painfully losing the thread of them and conscious that he had lost it. In these cases, Lock-

hart tells us, her kind help was of unspeakable consolation. "Unthinking friends sometimes gave him the catchword abruptly. I noticed the delicacy of Miss Ferrier on such occasions. Her sight was bad, and she took care not to use her glasses when he was speaking, and she affected also to be troubled with deafness, and would say: 'Well, I am getting as dull as a post; I have not heard a word since you said so and so,' being sure to mention a circumstance behind that at which he had really halted. He then took up the thread with his habitual smile of courtesy, as if forgetting his case entirely in the consideration of the lady's infirmity." He had given to her first work the warmest meed of cordial praise, as was his wont, and had cultivated her friendship always. She repaid him now in tender helpfulness, with such gentle good offices; and this is almost all that there is to tell of Susan Ferrier. The distinguished philosopher Professor Ferrier of St. Andrews, still so tenderly remembered by all who knew him, was her nephew: an interesting fact for those who believe in the oblique communication, rather than direct descent, of literary genius.

There have been more brilliant novelists, more potent writers, than these three ladies. None of them come up to the level of George Sand or George Eliot, in sentiment or philosophy; but they were of more importance in their generation than either George Eliot or George Sand, and laid open the workings of the common life as no one else had done in the three countries which they represent so well. In this point of view Miss Edgeworth, though the least attractive, is perhaps the most important of the three, as being the first to make known what manner of country Ireland was. But the others, if less vital in point of matter, were more vivid and living in their power of portraiture and representation of life, not in its extraordinary accidents, but in the most common phases

of every day. Miss Austen, who confined herself entirely to these, seeking no foreign aid of highly wrought story or dramatic incident, was the most perfect artist of the three, and has kept her place beyond all competitors. Yet there are points in which Miss Ferrier is almost superior to Miss Austen, having a touch more tender and a deeper poetic insight. There is no more interesting group in all the literary combinations of their age. There was, however, no genial link between them, no tie of association. It would not seem that they even knew each other. Jane Austen was lost in the mediocrity of that featureless English life in which the good people, with a proper pride, hold themselves aloof from all the doubtful classes. Her biographer is proud to repeat that she had no literary connections or acquaintances. A Marchioness of Something invited her on one occasion to meet some distinguished persons of that craft; but Miss Austen firmly declined the honour, which was at the same time a derogation, and held fast to the dignity, far superior to personal distinction, of that nameless gentlewomanhood in which is the quintessence of pride. The others were not so exclusive. Miss Edgeworth had a great name in her day, and was received with honour and admiration everywhere; and Miss Ferrier was famed, at least in Edinburgh—no insignificant distinction. Both of these latter names are connected with the genial glory of Scott, who gave them his friendship and generous applause. He could not do what they did, he says, with the pleasure of an entirely noble and simple mind, delighting in excellence wherever he found it.

We have already pointed out how curiously *arriéré* and of an earlier age was the *Simple Story* of Mrs. Inchbald, though it was a popular and much read book, and actually produced at the same time with Miss Austen's earliest and perhaps greatest work: the one all of the old

world, conventional, artificial, with a pretty air, if not of the Dresden shepherdess, at least of the imitations of Chelsea and Bow; the other real, living, of this day and all time, notwithstanding the old-fashioned dress of its heroes and heroines. They were contemporaries, yet the antiquated art of the eighteenth century made its bow, or rather its curtsey, with Miss Milner; and the new reign of fiction came in, in individual womanhood, with Elizabeth Bennet. Miss Edgeworth had no predecessor in her special mission, but, so far as one phase of her work went, followed in the traces of an eccentric educationalist, and formed the transition link between those quaint little gentlemen, Sandford and Merton, Master Tommy the spoilt child, and Harry the son of the soil, and the all-instructive Mr. Barlow—and the nineteenth century schoolboy, who has played so large a place in the world since then. Miss Ferrier, too, had a predecessor, though she produced little, whose essay in fiction is in a somewhat similar vein. *The Cottagers of Glenburnie*, published in 1808 by Elizabeth Hamilton, is full of insight into Scottish character, and humorous treatment of its characteristic shortcomings; but it is perhaps too distinctly a story written with a purpose, and that a very homely one, to take a high place in art.

MARIA EDGEWORTH, born 1767; died 1849.

Published Castle Rackrent, 1801.
Ennui.
Vivian.
The Absentee.
Belinda.
Leonora.
Patronage.
Harrington.
Ormond.

Published Helen.

With many lesser tales, collected as Moral Tales, Tales of Fashionable Life, etc. A collected edition was published in 1832, and again in 1848.

Northanger Abbey, Persuasion, } 1818.

SUSAN FERRIER, born 1782 ; died 1854.

Published Marriage, 1818.

The Inheritance, 1824.

Destiny, 1831.

CHAPTER IX.

LITERATURE IN IRELAND.

THERE is unfortunately but little necessity to apportion a separate chapter to the literature of Ireland. We have already remarked upon the singular absence of literary production, and of genius at all worthy to be called national, which we find at a period so rich in literary power, in the unfortunate island, which, to the great misfortune both of her neighbours and herself, is so closely connected with Great Britain. What a happy solution would it be of many problems could engineering science, which has done so much, find means to move that uneasy Erin out into the wide Atlantic, far enough off from us to give her full scope for independence and self-development! They move houses and churches in America, why not an island? Such a divorce would be hailed, we should imagine, with delight on both sides—and would afford a full opportunity for the putting forth of national effort, up to this time sadly wasted in internal agitations, and affording us no means of estimating the national genius. Great social unhappiness and political restraint do not, however, seem to furnish a sufficient reason for the absence of worthy utterance, especially in a race so generally pervaded by the lighter gifts, at least, of wit and fancy; and we can scarcely accept the Catholic disabilities and the wrongs of Ireland as enough to account

for her silence in the world. No country could be more bound in chains of iron, in political repression and corruption, than was Scotland in the end of last century. It is true that there was no dominant race holding the mastery, and that in religion the people had their own way; but they had no political power, nor freedom of self-government, and the nation was under the heel of an almost irresponsible minister, and an entirely dominant party. Yet Burns rose out of the homely fields when political freedom had no existence—and the vivacious army of the Critics at an after period burst forth from the very prison-house and coldest shade of social oppression. In Ireland a few songs and speeches, a little fiction, but even that not of the highest order, is all that we find to distinguish an age which, in both the other countries of the Union, was nothing less than a new birth. Miss Edgeworth and Thomas Moore, both of whom have already been individually treated, are the only names which we can pick out to take their place in the lists of those which are really of national importance; and the latter we feel can only be admitted on sufferance to any such classification. He is a poor creature to stand against Wordsworth, Coleridge, Byron, and Shelley—or even against Burns and Scott, who represent the smaller of the partners in the Union; but, such as he is, he is the best that Ireland has done.

It is true that Sheridan, then just waning, had been in his day one of the most brilliant figures in society, and in the lighter sphere of literary composition; but in a national point of view there was no meaning in him, any more than there was any promise of a new literary era in the fine comedies which are his only real standing ground in literature, and which belonged entirely, in spirit and scenery and sentiment, to the eighteenth century. It is scarcely possible indeed, even though Sheridan's bril-

liant wit and disorderly ways were a sort of impersonation of the conventional character of the Irishman, to record him as Irish at all, save by birth. He was educated at Harrow, and was nominally a member of one of the Inns of Court. The society, of which he was so remarkable a figure, was in London, not Dublin. His romance of early love was enacted in Bath. His great triumphs as an orator were in the British Parliament, and not even upon subjects in any way connected with Ireland. The younger but much less important orator and playwriter, Richard Lalor Sheil, was a better representative of his country. But his plays are of little or no importance, and he was absorbed in his mature days by parliamentary life, in which he never made so brilliant a figure as Sheridan. This, indeed, is the sphere in which the Irishmen have showed best, and it is a pity that we cannot find justification enough in his political pamphlets to take in the grandiose, if never entirely grand, figure of Daniel O'Connell, the great Liberator, the leader of his people, one of the best and most satisfactory embodiments of his race. The very limited niche which is all we could give him in literary history would afford no fit pedestal for a personage so important in the history of his country. Who can doubt that he had his faults? That shade of unreality which belongs to a character so expansive, so eager for popular approbation, born to please as well as born to sway, and the inextinguishable twinkle in the eye of a man who was never quite unconscious of his own art—the "blarney" supposed to be native to his race, the too-persuasive eloquence, the touch of humbug in his utmost sincerity—sadly detract from his greatness. But when all is said that can be said, there are few manly critics or generous lookers-on who would not compound for still more impefections could Ireland and we have back the Liberator with all his native bigness and large and genial

life. The contrast between O'Connell, born under circumstances which would have indeed excused any degree of national rancour and bitterness, yet so full, even in hottest fight, of the happy humour, the instinctive friendliness, and easy sentiment, which were once supposed habitual to his race, and the bitter theorists and revolutionaries produced by a later generation and in an age entirely awakened to, and eagerly trying to remedy, everything like injustice to Ireland, is extraordinary. Surely, in the meantime, that happy humour and engaging eloquence, the wit, the fancy, the diffusion of a kind of genial genius over the face of the country, which we once cordially believed in, as characteristic of Ireland, must have died away. Perhaps, indeed, O'Connell, among his other influences, possessed the power of making us take for granted the fine faculties of his countrymen, and thus was not only the glory but the glorifier of his race.

To descend, however, from this great representative of the nation, who stands, like one of her unique towers, in the midst of her, with no fit competitor near him, and whom, unfortunately, we have little pretence for introducing, we are obliged to descend into the ordinary strain of literature, making a great step downward from Sheridan to his namesake James Sheridan Knowles, a playwright of considerable pretensions and some skill, though little genius, whose plays had an enormous popularity, some of them still, in a certain degree, holding the stage. The tragedy of *Virginius* and the picturesque *Hunchback* are still among those which managers occasionally resort to, to give a prick of new sensation to jaded playgoers. There was some link of relationship, whence the name, between the more famous Sheridan and Knowles, who, however, was of a humbler strain of life—the son of a schoolmaster, and for some time exercising the same profession. "Knowles is a delightful fellow, and a man of true

genius," Wilson says of him in the *Noctes*, in respect to a series of lectures upon Dramatic Poetry which he delivered in various places both in England and Scotland. His life underwent a curious change in his later years, when the successful dramatist turned his back upon his art, such as it was, abjured the wickedness of the theatre, and began with all the violence natural to an Irish Protestant, trained in the keen polemics which close neighbourhood to any hostile system invariably cultivates, to assault Popery and the Church of Rome. He ended his life as a Baptist Minister, bitterly regretting, it is said, the time and labour which he had bestowed on the stage and the world.

A very fair and gentle representative of poetry, Mary Tighe, the daughter of a clergyman, the wife of an Irish M.P., is another of the rare instances of literary production in Ireland. She was the author of a poem called *Psyche*, an extremely sweet and melodious rendering of the classical legend, the external form of which, in a slim and sumptuous quarto, with creamy pages as thick as velvet enshrining in big margins a limpid stream of elaborate verse, gives a very just idea of its merit. It is one of those essays in art which at any time it would be cruel to judge rigorously,.all the more as it is the composition of a gentle creature who died young and knew nothing of the world—which, with a humane sense of the claims of weakness, generally does receive such gentle efforts tenderly. This lady lived during all her short life in Ireland, an invalid for a great part of it, sometimes receiving the gay and brilliant Sydney Owenson, the *Wild Irish Girl*, in her sick-chamber, but not capable of much society, if indeed there had been any of the literary kind to resort to. But we find little that is worthy the name in the lively Dublin world, which we see in Lady Morgan's recollections, where she herself stood almost alone as the representative of the lighter arts of literature. The common

reproach to Scotsmen that the first step of their progress is always to leave their native country, which was ludicrously untrue in the age we have been discussing, however much it may have been justified before or after, was strongly in force in Ireland, whence every aspiring soul in the ways of literature, except Miss Edgeworth, fled with the utmost speed, Moore giving the first example, to the centre of fame in London. The records we have of society in Dublin are few. Moore and Lady Morgan show us little but a jovial provincialism illustrated by sundry little local reputations never heard of elsewhere, while the curious and incoherent work in which Mr. Madden gives us the history of Irish Periodical literature presents little more than a chaotic record of dead quarrels, libels, and vituperations, as violent as it is uninstructive. Before the Union Dublin booksellers pirated English publications as Americans do now. Perhaps this crime against literature has something to do with the stunting of the race in literary development.

The name of Maturin has almost died altogether from the recollection of the reader, and it is with difficulty that the student can find any of the many works which he poured forth, and which, indeed, are little worth the trouble of looking for. His high-flown productions and romantic theatrical figure might, however, have thrown at least an amusing tragi-comic light upon his surroundings had any record of them been attainable. He was a clergyman of the Established Church, and lived in Dublin, "the humble unknown curate of St. Peter's," until the great good fortune happened to him of having his tragedy of *Bertram; or, The Castle of St. Aldobrand* produced at Drury Lane; where, by the influence of Lord Byron, it was played in the year 1816, bringing him a great deal of momentary reputation, and a substantial profit of a thousand pounds—five hundred of

which is popularly said to have come from Lord Byron to console the unfortunate dramatist for a fierce review. But this does not seem a very likely story, for neither then, nor at any other period, were Byron's pounds so plentiful as to have permitted such a munificence; though he says himself that he sent applause "and something more substantial" to the Irish poet. *Bertram* is a play of the most wildly Satanic character, dealing with crimes of primitive magnitude, with terrific storms and equally terrific bloodshed, to appal the terrified reader. It is difficult to imagine how it could have been put upon the stage at all. The author's intention was to introduce the highest diabolical agency. "He had our old friend Satan," says Sir Walter (by whom he was introduced to Byron), "brought on the stage bodily. I believe I have exorcised the foul fiend—for though in reading he was a most terrible fellow, I feared for his reception in public." At the same time, Scott, with his usual kindness, describes the play as possessing merits which are "marked, deep, and striking," though he confesses that its faults are "of a nature obnoxious to ridicule." Byron, however, and the public approved this preposterous tragedy: and Coleridge did it the extraordinary honour of devoting a whole chapter in the *Biographia Literaria* to its slaughter and dissection. The next drama of Maturin made, however, an end of his fictitious reputation. Byron describes it as "as heavy a nightmare as was ever bestrode by indigestion," "Maturin's Bedlam," and other equally uncomplimentary titles. One of the stage directions he quotes is as follows: "Staggers among the bodies;" and it is not a bad indication of the style of the whole.

After, and indeed before, these dramatic performances, Maturin wrote many novels. He had begun at a very early age with *The Fatal Revenge; or, The Family of*

Montorio, a work bearing some relation to the *Monk* of Lewis, one of a numerous school of tragical romances such as used to be found in the old circulating libraries now an institution of the past, and which had a certain reputation. This was followed in after years by a number of others, of which *Melmoth* is perhaps the best known. He was at the same time a popular preacher, and collected, we are told, crowds to hear him, "neither rain nor storm" keeping his admirers back. Personally he was "something of a coxcomb," with long flowing black hair, and a poet's eyes full of fine frenzy. A somewhat ludicrous description of his habits is given in Scott's Life. "Hartstonge told us that Maturin used to compose with a wafer pasted on his forehead, which was the signal that if any of his family entered the *sanctum*, they must not speak to him;" a curious tale to be told to Scott, whom everybody interrupted. "He was never bred in a writer's *chaumer*," said the great novelist. But Scott was very kind to the theatrical Irishman, and sent him money and good advice and help of every kind.

There was, however, one other poet in the island whose reputation is of a nobler and more lasting kind: Charles Wolfe, who has made an impression not easily to be effaced, upon the memory of the world, by one poem, the famous and affecting *Lines on the Burial of Sir John Moore*, which rank among the most remarkable instances on record of real poetical life, in distinction from the hundred fictitious and ephemeral lives which flutter and die, and leave no trace behind. How many volumes, nay libraries, have dropped easily into oblivion, while these half dozen stanzas have lived and lasted! No finer or more picturesque piece of verse exists in our record. It is just so much rhetorical as to give us a pleasant sense of being able to identify the region from whence it springs—with a thrill of personal emotion in

it, as if of an individual voice, proud yet sad in tuneful exultation, which sounds like a national accent: and yet even here the nationality is doubtful. Wolfe was nothing more than a young curate of the Irish Church, by his very position pronounced to be no Irishman, but one of the dominating Saxons who have no right to national honours at all. And it is most curious to see how entirely it is this class, and not the native race, which we are all ready to acknowledge as so full of genius, which has produced the little there is to distinguish Ireland in literature. Miss Edgeworth, too, belonged to it, and had no claim to be a Celt. Wolfe discharged his humble duties, such as they were, we are told, with devotion, and died at thirty, having done no more. It would seem that he had received only one inspiration, but that a noble and a true one.

The same, so far as nationality is concerned, must be said of George Croly, another nominal Irishman, who was educated at Trinity College, Dublin, and naturally goes to the credit of that country, though he too belonged to the Anglo-Irish Church, and spent the most important part of his life as a clergyman in London. His works are numberless; from sermons to novels, from political pamphlets to romantic poems. The book by which he is best known is the singular romance of *Salathiel*, embodying one of the legends of the Wandering Jew, and showing occasionally considerable power. This book made a distinct impression upon the mind of the time, and holds a fantastic place, if not on the same level as *Vathek*, at least in a similar fanciful region; but it has not, like *Vathek*, kept the reputation which in its day it obtained.

A better-known and more characteristic figure is that of William Maginn, one of the most brilliant of the band of magazine writers to whom *Blackwood* first afforded a medium—younger than the great critics of the reviews,

more dashing but less serious, who in one way never reached the level of Jeffrey, but in another surpassed and excelled him. Maginn was born in Cork, and was a schoolmaster there for some part of his early existence. At twenty-six he began to contribute to *Blackwood's Magazine*, which had then (1819) been for about two years in existence, and was in full tide of that reckless youth which permitted itself every literary liberty, and to which, indeed — notwithstanding the fires of resentment it lit everywhere, to the anguish of the victims and amusement of the public—almost every liberty was allowed. Maginn was, if anything, less scrupulous than the original coterie of Edinburgh, the compilers of the *Chaldee Manuscript*: and he had not only an excellent style, but an easy and powerful command of classical subjects, than which nothing is more effective and telling in periodical literature. A bit of brilliant translation, an adaptation from Homer, a scrap of Horace, lightly turned into contemporary use, is everything to the light gallop of a slashing article, and confers on the writer a position which the world immediately appreciates, and the less learned envy. Everybody will remember Captain Shandon, in *Pendennis*, peppering his sentences with learned extracts from old Burton. Maginn, unfortunately, had many features like those of Shandon, and like him lived a distracted life from luxury to misery, through prisons and disreputable hidings, and every vicissitude that poverty and levity and bad habits and an unstable mind produce. He was still young and full of hope, "with genius, wit, learning, life's trophies to win," as Lockhart says of him, when he went to London in 1823—abandoning any security of anchorage that he might have had at home. But his career in town was not prosperous. He was employed on various papers, and in 1830 became one of the chief writers in *Fraser's Magazine*, which then came into being, and which

moulded itself perhaps too much on the model of the already famous and firmly established *Blackwood*, of which it was the first rival. Maginn attempted in this new undertaking the part which Christopher North played in the old; but, great as was the popularity of the *Noctes*, a second effort of the same kind was a literary mistake, and the attempt showed an absence of originating power, and was probably a cause of permanent damage to the new magazine, which ought, in order to secure the success of its predecessor, to have struck a new vein. And the brilliant Irishman had not the continuance in him of Wilson. He spent himself like a fortune, and died before he was fifty, poor, suffering, and solitary. Sir Robert Peel, the one Minister of State in recent times whose heart was always open to the distresses of men of letters, and to whom it seemed a duty of the State to care for her servants in this department, was appealed to on behalf of Maginn; but too late. Lockhart's epitaph, with its jingle upon one rhyme, has a levity in it which, though probably very harmonious with the relations between them, and with the poor author's reckless and haphazard ways, must, we should think, have jarred even upon the ear of a man about town when given forth over a grave; but the description is worth quoting:—

> "He turned author ere yet there was beard on his chin;
> And whoever was out, or whoever was in,
> For you Tories his fine Irish brains he would spin—
> Who received prose and rhyme with a promising grin—
> 'Go ahead, you queer fish, and more power to your fin!'
> But to save from starvation stirred never a pin.
> Light for long was his heart, though his breeches were thin;
> But at last he was beat—"

Poor Maginn! It was his own fault, as it has been the fault of so many, that their lives are squandered and their faculties lost; but that does not make the loss less pitiful, rather more.

Francis Mahony—or, as he called himself, O'Mahony, better known as Father Prout—was a kindred spirit, with the same mixture of fun, learning, and fluency which distinguished Maginn. The fact that he was a priest, with something of an academical aspect even at his wildest, lent a certain piquancy to the strange Bohemian with his fine and delicate countenance, and the touch of sentiment which mellowed his mirth. He is called by somebody "an Irish potato seasoned with Attic salt," and the comparison has a certain appropriateness. He, too, was one of that roving band of literary irregulars, hanging on about the Press, generally finding their highest latitude in a monthly magazine, with always some scrap of literature in hand, but more enjoyment of the floating atmosphere of literary life than of the work—of whom there were so many, differing greatly from the earlier development of the Cockney school and the *bourgeois* group of writers whom we have already endeavoured to put before the reader, and indeed overlapping altogether the boundaries of time to which we have been obliged to keep. But there are so few Irishmen to whom we can give a place in this record, that chronology yields to the desire to make the best we can of our subject. Neither Father Prout, however, nor Sir Morgan O'Doherty, which was the little literary disguise under which Maginn presented himself to the world, were of a character or kind to do much honour to their native country; nor was their work illustrative of its character, or apt, like Scott's, to make it known to the world. They wrote upon all other subjects with the wit of their nation and the ready command of words which belong to the race; but they did not illustrate or open up the life of Ireland, or aim at any patriotic end. They were English writers of Irish birth, and that was all. We may quote, however, one snatch of characteristic verse, which has something in it of the

visionary home-sickness and tender longing of an exile. To have heard Mahony sing this, an old man, leaning his fine old head, like a carving in ivory, against the mantelshelf, in a cracked and thready voice which had once been fine, is a pathetic memory. Between the melodious commonplace of Moore's melodies and the wild and impassioned ravings of the Shan Van Voght, this more temperate type of Irish verse, with its characteristic broken melody, its touch of mockery, its soul of tender if not profound remembrance, is wholesome and grateful, though it has no pretension to be great :—

THE SHANDON BELLS.

"With deep affection
And recollection
I often think on
Those Shandon bells ;
Whose sounds so wild would,
In the days of childhood,
Fling round my cradle
Their magic spells.
On thee I ponder
Where'er I wander,
And thus grow fonder,
Sweet Cork, of thee ;
With thy bells of Shandon
That sound so grand on
The pleasant waters
Of the river Lee.

"I've heard bells tolling
Old Adrian's Mole in,
Their thunder rolling
From the Vatican,
And cymbals glorious
Swinging uproarious
In the gorgeous turrets
Of Notre Dame ;

But thy sounds were sweeter
Than the dome of Peter
Flings on the Tiber,
Pealing solemnly
Oh the bells of Shandon
Sound far more grand on
The pleasant waters
Of the river Lee!

"There's a bell in Moscow;
While on tower and kiosk, O,
In Saint Sophia,
The Turkman gets;
And loud in air
Calls ever to prayer,
From the tapering summit
Of tall minarets.
Such empty phantom
I freely grant 'em;
But there is an anthem
More dear to me—
'Tis the bells of Shandon
That sound so grand on
The pleasant waters
Of the river Lee."

Lady Morgan has a right to an honourable place among this small band of Irish writers. She was born Sydney Owenson, the daughter of a popular actor, and her youthful life was passed among scenes characteristically Irish, the ups and downs of the theatre—a life made up of perpetual variations between luxury and penury, and that shifty life of expedients which quickens the wits, and out of which perhaps its victims, whose sufferings we lament so much, get a degree of excitement, pleasurable as well as painful, which makes them much less miserable than we imagine. When she grew up and it became necessary for her to provide for herself, the lively and brilliant girl took up at first, as a helpless woman has to do, the life of a governess, in which she continued with

varying fortunes, until she discovered that she possessed a gift by which a living was much more easily made. *The Wild Irish Girl* was, in its way, a surprise and revelation to the world, not the less amusing in that there was a good deal of absurdity mingled with its gushing sentiment and melodramatic situations: and that the authoress was not disinclined to pose as Glorvina, and to receiv the homage of society as the original of that child of nature. After some years of a literary career, successful enough yet never without drawbacks, she became attached, vaguely, as companion or friend, to the household of the Marquis of Abercorn, among several other genteel dependants, one of whom was Dr. Morgan, who had the charge of the health of the house. The glimpse we have in her letters and biography of the queer little court there, surrounding the great people, is curious and not very pleasant. Her patrons made up a match between their two *protégés*—not without difficulty, for though the doctor fell in love heartily, the lady-in-waiting was fanciful and fastidious, and had to be brought to the point at last almost by stratagem. The bridegroom was turned into Sir Charles by the intervention of the Lord-Lieutenant, and Lady Morgan acquired a title and was launched into the world, very thankful to be free of her patrons, and to regain her independence. After a temporary residence in Dublin the pair settled in London, where Lady Morgan enjoyed and sought society, and got through a good deal of literary production. She wrote a book upon France and another on Italy, the result of journeys through both countries. Lord Byron praised the latter performance, and declared it to be true and just. But other critics were not so kind. The *Quarterly*, in particular, made her an object of attack in a way which was beneath the dignity of a great periodical, describing her style, with some truth but much uncalled-for virulence, as "slipshod

Irish." A writer of Lady Morgan's calibre might count it promotion indeed, to be taken so much notice of by a great organ of opinion now. It might have been expected that the autobiography and letters of a lively observer, however flippant and egotistical, would have thrown some light upon the Irish life of the period and society in Dublin. But we do not find, so far as Lady Morgan can tell us, that even so much of literary society as one of the coteries of the English country towns, of which we have encountered so many, existed in the Irish capital.

There is, however, a delightful and cordial sketch of this capital in the account of Sir Walter Scott's visit to Dublin in 1825, which gives us a much higher opinion of its capabilities. The distinguished persons who crowded to see him were not distinguished in literature: but the genial enthusiasm of the people for the great Scotsman is pleasant to hear of. The "demonstrations of respect which awaited him wherever he moved at the hands of the less elevated orders of the Dublin population," astonished the party. "If his carriage was recognised at the door of any public establishment, the street was sure to be crowded before he came out again," says Lockhart. "When he entered a street, the word was passed down both sides like lightning, and the shopkeepers and their wives stood bowing and curtseying all the way down; while the mob and boys huzzaed as at the chariot wheels of a conqueror." So great was the emotion that an excellent bailie of Glasgow, something akin no doubt to Nicol Jarvie, shook his head and declared that "*yon* was ower like worshipping the creature," as he looked on.

There was, at this same period, in existence a learned colony in Trinity College, which has worked more laboriously and diligently than almost any contemporary scholars at the work of collecting and editing the ancient records of Irish history, and thus made very important

contributions to the knowledge of the world. But these labours are performed with a disinterestedness of which, in spite of ourselves, we take advantage; for it is not for the unlearned to attempt to estimate the value of these researches, and the names of their workers in this rich and important field, though thoroughly well known and honoured in their own sphere, are almost unknown to the general public.

When the first quarter of the century, to which we have confined our record, was just over, a younger band of novelists had begun to appear on Irish soil. The names of John Banim, Gerald Griffin, William Carleton, and Thomas Crofton Croker cannot, any of them, be placed in the first rank—but their works were more national, more worthy of being considered as elucidations of the life of their country and the character of their race than those of any previous writers, with the exception of Miss Edgeworth. There is a sort of arbitrary connection between the repeal of the Catholic disabilities and the appearance of this little outburst of literary energy; but we feel very doubtful whether we should be justified in attempting to establish any reasonable link of association between the two. Gerald Griffin is perhaps the most noticeable of this band. He began in extreme youth, like so many others of his countrymen, by dramatic writing, and when he went to England to try his fortune like the rest, an unknown and unbefriended youth of twenty, in 1823—placed his hopes upon the tragedy of *Gisippus* which he carried with him, and which he fondly hoped was to open to him at once the glories and rewards of a literary career. But his play was rejected on all hands; and when at length it fell into those of Macready and attained a great name on the stage, the author had already passed beyond all knowledge of his triumph. The struggle of the unfortunate youth without friends or means

in London was a very hard and bitter one; but he lived through it, and his novels, especially *The Collegians*, established his reputation. This book is perhaps now more widely known by the popular play of the Colleen Bawn, which was founded upon it, than by its own attractions. But the story is the least satisfactory part of it, and the sketches of life and character to be met with in the book are infinitely more worth the reader's while than the melodramatic fate of Eily O'Connor, and the despair and misery of her lover. Not even Miss Edgeworth's account of the successive squires of *Castle Rackrent* sets forth the wild groups of Irish gentry with so trenchant a touch as that with which Griffin represents his Cregans and Creaghs in their noisy carouses: and his peasants of all descriptions are full of humour and life—more individual and displaying a more intimate knowledge than those of Miss Edgeworth. Whether it is that the country has grown duller and ruder since then we are unable to judge, but certainly the atmosphere in these novels is of a more genial kind than anything we hear of now. The country folks simple and gay, with their characteristic songs, their friendly greetings, their light hearts and ready wit, though not without the gloom of a tragedy here and there, and as ready to lend their lively faculties to the work of baffling justice as to any other exercise, are certainly devoid of the bitterness and sense of injury which seem so universal now. We naturally look in a work written before the repeal of the Catholic disabilities for some deep rankling of injured feeling, but the reader will find no trace of it in *The Collegians*. Griffin was a pious Catholic, and ended his life in a religious brotherhood; his sympathies were entirely with his race: but the picture he puts before us bears little trace either of a persecuted faith or an oppressed nationality. The tragic elements of his story are drawn, as they might have been in a tale of the

Scottish Highlands, from the exaggerated and unscrupulous devotion of a faithful servant to what in his warped and gloomy mind he thinks the interests of his master; and while we have a fine example of the astute and triumphant policy of a couple of the rudest peasants in baffling the united powers of magistrate and counsellors, it is in behalf of no political criminal, nor is any feud between landlord and tenant so much as hinted at. A good deal of this is no doubt due to the mind and tendencies of the writer and his pure and gentle genius—but something too must belong to the atmosphere of the time. We have already spoken of the great and wonderful difference between the Arch-Agitator O'Connell, he who was in reality the nursling of wrong, brought up under the shadow of a galling Protestant ascendency, and with every excuse for national rancour, and the bitter politicians of the present day. The novelist affords us a kindred example. He shows us no gloom upon the skies, no burning at the heart of his country. As we walk with him along the mountain paths every one we meet has a cheerful greeting, a genial jest, a song upon his lips—the country is gay, brighter than our fat English levels, the long-winded peasant-stories are full of a humorous contemplation both of earth and heaven. It is hard to realise that the easy lightheartedness which we meet with everywhere is the atmosphere of a country which not very long before had been rent by armed rebellion, and still more recently convulsed by a political struggle in which every element of national bitterness might have been expected to manifest itself. We have few materials for determining what is the poet's, the romancer's account of the country now—but if the daily records be trustworthy the picture would be a very different one in our own day. The following scene, though somewhat long for quotation, affords so bright a panorama of the country as Griffin saw

it, and is so little known, that we may venture to insert it here. The story which is being told by Lowry, and in which a delightfully Irish ghost does his best to make the fortune of the clever Dan who is its hero, goes on for several pages, and is too lengthy for insertion:—

"At this moment a number of smart young fellows, dressed out in new felt hats, clean shoes and stockings, with ribbons flying at the knees, passed them on the road. They touched their hats respectfully to Mr. Daly, while they recognised his attendant with a nod, a smile, and a familiar 'Is that the way, Lowry?'

"'The very way, then, lads,' said Lowry, casting a longing look after them. 'Goin' to Garryowen they are now, divartin' for the night,' he added in a half envious tone, after which he threw the skirt of his coat from the left to the right arm, looked down at his feet, struck the ground with the end of his stick, and trotted on, singing—

> "'I'm noted for dancin' a jig in good order,
> A min'et I'd march, an' I'd foot a good reel;
> In a country dance I'd still be the leading partner,
> I ne'er faultered yet from a crack on the heel.

"'My heart is wid ye, boys, this night. But I was tellin' you, Master Kyrle, about Dan Dawley's luck! Listen, hether.'

"He dried his face, which was glistening with moisture, and flushed with exercise, in his frieze coat, and commenced his story.

"''Tis not in Castle Chute the family lived always, sir, only in ould Mr. Chute's time, he built it, an' left the Fort above, an' I'll tell you for what raison. The ould man of all, that had the Fort before him, used to be showing himself there at night, himself an' his wife, an' his two daughters, an' a son, an' there were the strangest noises ever you hear, going on above stairs. The master had six or seven sarvints, one after another, stopping up to watch him, but there isn't one of 'em but was killed by the spirit. Well, he was forced to quit at last on the 'count of it, an' it is then he built Castle Chute—the new part of it, where Miss Anne an' the ould lady lives now. Well an' good, if he did, he was standin' one mornin' oppozit his own gate on the road side, out, an' the sun shining, an' the birds singing for themselves in the bushes, when who should he see only Dan Dawley, an' he a little gaffer the same time, serenadin' down the road for the bare life. "Where to now, lad?" says Mr. Chute (he was a mighty pleasant man). "Looking for a master, then," says Dan Dawley. "Why, then, never go past this gate for him,"

says Mr. Chute, "if you'll do what I bid you," says he. "What's that, sir?" says the boy. So he up an' told him the whole story about the Fort, an' how somethin' used to be showin' itself there, constant, in the dead hour o' the night; "an' have you the courage," says he, "to sit up a night, an' watch it?" "What would I get by it?" says Dan, looking him up in the face. "I'll give you twenty guineas in the morning', an' a table, an' a chair, an' a pint o' whisky, an' a fire, an' a candle, an' your dinner before you go," says Mr. Chute. "Never say it again," says the gorsoon, "'tis high wages for one night's work, an' I never yet done," says he, "anything that would make me in dread o' the living or the dead, or afraid to trust myself into the hands o' the Almighty." "Very well, away with you," says the gentleman, "an' I'll have your life if you tell me a word of a lie in the mornin'," says he. "I will not, sir," says the boy, "for what?" Well, he went there, an' he drew the table a-near the fire for himself, an' got his candle, an' began readin' his book. 'Tis the lonesomest place you ever seen. Well, that was well an' good, till he heard the greatest racket that ever was going on above stairs, as if all the slates on the roof were fallin'. "I'm in dread," says Dan, "that these people will do me some bad hurt," says he, an' hardly he said the word, when the doore opened, and in they all walked, the ould gentleman with a great big wig on him, an' the wife, an' the two daughters, an' the son. Well, they all put elbows upon themselves, an' stood lookin' at him out in the middle o' the floore. He said nothin' an' they said nothin', an' at last, when they were tired o' lookin' they went out an' walked the whole house, an' went up stairs again. The gentleman came in the mornin' early. "Good morrow, good boy," says he. "Good morrow, sir!" says the boy. "I had a dale o' fine company here, last night," says he, "ladies an' gentlemen." "It's a lie you're tellin' me," says Mr. Chute. "'Tis not a word of a lie, sir," says Dan; "there was an ould gentleman with a big wig, an' an ould lady, an' two young ones, an' a young gentleman," says he. "True for you," says Mr. Chute, puttin' a hand in his pocket, and reachin' him *twenty* guineas. "Will you stay there another night?" says he. "I will, sir," says Dan. Well, he went walkin' about the fields for himself, and when night comes——'

"'You may pass over the adventures of the second night, Lowry,' said Kyrle, 'for I suspect that nothing was effected until the third.'

"'Why, then, you just guessed it, sir. Well, the third night he said to himself, "Escape how I can," says he, "I'll speak to that ould man with the wig, that does be puttin' an elbow on himself an' lookin' at me!" Well, the ould man an' all of 'em came an' stood oppozit him with elbows on 'em as before. Dan got frightened,

seeing 'em stop so long in the one place, an' the ould man lookin' so wicked (he was after killin' six or seven, in the same Fort), an' he went down on his two knees, an' he put his hands together, an', says he——'

At this point the animated but long-winded story breaks off, and the novelist presents us with another sketch of rural life, which is as bright as it is simple—full of local colour and natural truth—

"A familiar incident of Irish pastoral life occasioned an interruption in this part of the legend. Two blooming country girls, their hair confined with a simple black ribbon, their cotton gowns pinned up in front, so as to disclose the greater portion of the blue stuff petticoat underneath, and their countenances bright with health and laughter, ran out from a cottage door, and intercepted the progress of the travellers. The prettier of the two skipped across the road, holding between her fingers a worsted thread, while the other retained between her hands the large ball from which it had been unwound. Kyrle paused, too well acquainted with the country customs to break through the slender impediment.

"'Pay your *footing*, now, Master Kyrle Daly, before you go farther,' said one.

"'Don't overlook the wheel, sir,' added the girl who remained next the door.

"'Kyrle searched his pocket for a shilling, while Lowry, with a half-smiling, half-censuring face, murmured—

"'Why, then, heaven send ye sense, as it is it ye want this mornin'.'

"'And you manners, Mr. Looby. Single your freedom, and double your distance, I beg o' you. Sure your purse, if you have one, is safe in your pocket. Long life an' a good wife to you, Master Kyrle, an' I wisht I had a better hould than this o' you. I wisht you were in *looze*, an' that I had the finding of you this mornin'.'

"'So saying, while she smiled merrily on Kyrle, and darting a scornful glance at Lowry Looby, she returned to her woollen wheel, singing, as she twirled it round—

"'I want no lectures from a learned master,
He may bestow 'em on his silly train—
I'd sooner walk through my blooming garden,
An' hear the whistle of my jolly swain.'

"To which Lowry, who received the lines, as they were probably intended, in a satirical sense, replied, as he trotted forwards, in the same strain—

"'Those dressy an' smooth-faced young maidens,
Who now looks at present so gay,
Has borrowed some words o' good English,
An' knows not one half what they say.
No female is fit to be married,
Nor fancied by no man at all,
But those who can sport a drab mantle,
An' likewise a cassimere shawl.'"

"'Boop-whishk! Why, then, she's a clean made little girl for all, isn't she, Master Kyrle? But I was tellin' you—where's this I was?'"

We should have liked to add the powerful and dreadful scene in which the dying musings of the poor huntsman Dalton are interrupted by the drunken shouts and laughter of a riotous party in the dining-room, from which there comes a message to the poor sufferer "to give them one fox-hunting screech before you go." The last shout in which his life goes, in the midst of the tumultuous chorus of the half-drunk gentlemen, and the heartless jests and laughter with which they hear that all is over, furnish a stern picture of a life far less attractive and sympathetic than that of the homelier peasant-folk. We add one of the songs which are scattered through the book, and which is full of the sweet tunefulness of the Irish melodies, with a vein of far higher feeling, and the purest natural sentiment:—

"*Gillia ma chree*,
Sit down by me.
We now are joined, and ne'er shall sever
This hearth's our own,
Our hearts are one,
And peace is ours for ever!
When I was poor,
Your father's door
Was closed against your constant lover.

"With care and pain,
I tried in vain
My fortunes to recover.
I said, 'To other lands I'll roam,
Where fate may smile on me, love!'
I said, 'Farewell, my own old home!'
And I said, 'Farewell to thee, love!'
Sing *Gilli ma chree*, etc.

"I might have said,
'My mountain maid,
Come live with me, your own true lover;
I know a spot,
A silent cot,
Your friends can ne'er discover.
Where gently flows the waveless tide,
By one small garden only;
Where the heron waves his wings so wide,
And the linnet sings so lonely.'
Sing *Gilli ma chree*, etc.

"I might have said,
'My mountain maid,
A father's right was never given
True hearts to curse,
With tyrant force,
That have been blessed in heaven.'
But, then, I said, 'In after years,
When thoughts of home shall find her,
My love may mourn, with secret tears,
Her friends thus left behind her.'
Sing *Gilli ma chree*, etc.

"'Oh no,' I said,
'My own dear maid,
For me, though all forlorn, for ever,
That heart of thine
Shall ne'er repine
O'er slighted duty—never!
From home and thee though wandering far
A dreary fate be mine, love;
I'd rather live in endless war
Than buy my peace with thine, love.'
Sing *Gilli ma chree*, etc.

"Far, far away,
By night and day,
I toiled to win a golden treasure
And golden gains
Repaid my pains
In fair and shining measure.
I sought again my native land;
Thy father welcomed me, love;
I poured my gold into his hand,
And my guerdon found in thee, love.
Sing *Gilli ma chrce*,
Sit down by me,
We now are joined, and ne'er shall sever;
This hearth's our own,
Our hearts are one,
And peace is ours for ever."

Griffin died in 1840, in the exercise of his humble duties as a member of the Christian Brotherhood at Cork. His publications were all a little after the period within which we have confined ourselves. Banim, his friend and contemporary, began his work about the same period. Carleton was still farther on in time. We give these names, and the above record of the most remarkable among them, by way of making up in some degree the vacancy in which Ireland unfortunately stands at this period. T. C. Grattan, another name of the period, was also a novelist of respectable reputation: but his scenes were not laid in Ireland, nor can he be called a national writer.

We may add that the one only, and not perhaps very dignified, public acknowledgment which the professors of literature ever receive in England was bestowed in a manner which we may call lavish on most of the members of this Irish school of fiction. Lady Morgan, Banim, and Carleton were all recipients of pensions on the Civil List, so that any advantage to be derived from that national compliment was fully accorded to the country, which nevertheless has in this way contributed so little to the common stock.

JAMES SHERIDAN KNOWLES, born 1784 ; died 1862.

Virginius was his first play, produced in England at Covent Garden, 1820.

Dramatic Works, collected 1843.

MARY TIGHE, born 1773 ; died 1810.

Published Psyche, 1805.

CHARLES ROBERT MATURIN, born 1782 ; died 1824.

Published The Fatal Revenge ; or, The Family of Montorio, 1804.
The Wild Irish Boy, 1808.
The Milesian Chief, 1811.
Bertram ; or, The Castle of Aldobrand, 1816.
Manuel, 1817.
Women ; or, Pour et Contra, 1818.
Sermons, 1819.
Fredocyno—a tragedy, 1819.
Melmoth the Wanderer—a novel, 1820.
The Universe—a poem, 1821.
Six Sermons on Popery, 1824.
The Albigenses—a romance, 1824.

CHARLES WOLFE, born 1791 ; died 1823.

Poetical Remains, 1825.

WILLIAM MAGINN, born 1794 ; died 1842.

Contributions to *Blackwood's Magazine*, beginning 1818.
,, *Fraser's Magazine* ,, 1830.
And many other contributions to periodical literature.

FRANCIS MAHONY, born 1805 ; died 1865.

Published Facts and Figures from Italy.
Reliques of Father Prout, 1836.
Many contributions to *Fraser* and other magazines and newspapers

LADY MORGAN, born 1783 ; died 1859.

Published St. Clair, 1804.
Novice of St. Dominick, 1805.
Wild Irish Girl, 1806.
Patriotic Sketches in Ireland, 1807.
The Lay of an Irish Harp and Irish Melodies, 1807.
Ida of Athens, 1809.
The Missionary, an Indian Tale, 1811.
O'Donell, 1812.
Florence MacCarthy, 1816.
France (in conjunction with her husband), 1817.
Italy, 1821.
Life of Salvator Rosa, 1823.
Absenteeism, 1825.
The O'Briens and O'Flahertys, 1827.
Woman and Her Master, 1840.
With several lesser works.

GERALD GRIFFIN, born 1803 ; died 1840.

Published Holland-tide ; or, Munster Popular Tales, 1828.
The Collegians, 1828.
And several other works and tales at later dates.

CHAPTER X.

THE HISTORIANS AND PHILOSOPHERS: HENRY HALLAM, JOSEPH LINGARD—JEREMY BENTHAM, JAMES MACKINTOSH, JAMES MILL.

HISTORY and Philosophy have always had a certain alliance. It is little possible to investigate the problems of one science without some tendency towards the solutions of the other. The great and many-coloured panorama of existence, with all those vicissitudes that seem so capricious, those successions that are so inevitable, leading the mind from generation to generation in order to catch a thread of meaning or answer a question, has but little effect upon the spectator if it does not lead him to seek some acquaintance with the constitution of human nature, the origin from which all its laws and its irregularities come. The great historians of the past have in most cases recognised the affinity of the two subjects, and the advantage of securing a larger and more comprehensive view of facts and events, by due recognition of their moral and intellectual relations. In the age which we have been discussing it is difficult to know under which heading to classify some of the most important names, since no one will deny to Hallam the title of a philosophical historian; and of Mackintosh and Mill, it is difficult to say which sphere claims them most. We will place in this record the more formal students of history first, without taking

from the others who were historians as well as philosophers their just importance in this lofty field.

The art of history is one which, like all other arts, has greatly changed in its conditions in modern times. On the face of things it would seem that the nearer a historian was to the events which he records, the more accurate and complete his information was likely to be; but it requires little thought to perceive how much that is temporary and evanescent is involved in every contemporary narrative, and how many deluding lights of individual opinion and general gossip flash about the scene, from which it is the province of the historian to choose those points of real illumination which may be reckoned on. Were the means of judging for ourselves in this very department of literature which has occupied us through these volumes taken from us, and our minds left at the mercy of the critics and historians of the period, what a curiously changed aspect would the history of literature in the beginning of the nineteenth century bear! The monarchs of the age would be dethroned to give place to petty satraps, of whom now-a-days we scarcely know the names; and even if the injustice perpetrated were less in degree, the most curious confusion of levels would remain to mar the conclusions of posterity. As it is, we are nothing but witnesses transmitting each our share of evidence to be judged by those who come after, in whose hands a continually accumulating mass of testimony is being collected. It is impossible to doubt that this has its evils too, and that the existence of the partisan-historian, he who proves his points at his will by a careful selection of so much of the evidence as suits him, is the creation of that all-examining, anxiously-weighing modern science which receives every witness with doubt, cross-examines and throws cold water upon him, and to which the easy conclusions of the past are old-fashioned and contemptible.

The close and persistent search to which we are now accustomed in all sorts of dusty archives and out-of-the-way corners was scarcely thought of in the easy days of Hume, when genius and insight were believed in more than dusty papers, letters, reports, and account-books, such as now tell so largely in history. The comfortable independence of his methods has ceased to be possible. German historians, with their gift of elaboration and the enormous patience which is so strong a characteristic of their minds and work, have made a revolution in the science. The result in England has not been that of producing impartiality; but it has enlarged and enriched our records with many individual studies, more graphic, perhaps, than a more colourless medium could have supplied. In no time could the least genial critic venture to assert that English historians have either falsified or withheld evidence, or consciously given themselves to the attempt to make the worse appear the better cause. But a man may carry out his own tendencies in his work, and prove to himself the superior excellence of his own opinions from all the lessons of the past, without infringing truth or doing intentional injustice. Even without any subservience to opinion, impartiality and a perfectly even-handed justice are impaired on all hands by individual incapacities. Nature will have her word in the most severely balanced of minds, and even the finest intelligence finds points here and there on which all the teachings of the age are powerless to enlighten it. Thus the calm and judicial Hallam, the most important historian of this period, speaks of Francis of Assisi, one of the most interesting and touching figures of the old world, as "a harmless enthusiast scarcely of sane mind," all unconscious how much he impoverishes history and narrows the sphere of human interest by this failure to comprehend one side, and that a most striking one, of life and action. This is

not so much want of impartiality as want of perception —a natural disability. Thus to the best some portion of the records of time must always remain obscure. We are not sure whether the cause of historical truth is not better served by those who set forth honestly the claims of their own side, without intentional injustice to the other, but also without any attempt to disguise the way in which their own sympathies go—than by those who laboriously endeavour to hold the balance with a steadiness which does not belong to mortal nerves.. The tendency has perhaps increased in our own times to an undesirable extent; and Macaulay's Whiggery, and Froude's antagonism to everything ecclesiastical, are in some cases almost rabid. But when Sir James Mackintosh led the way to the glorification of Revolution principles, the political tendency was rather for good than evil; and nobody grudges to the Roman Catholics now-a-days that they have a historian so honourable, so conscientious, and generally accurate as Lingard, to say the best that can be said for them. Amid the multitude of voices on the other side of the question, the individuality of the champion who though conscientiously anxious nothing to extenuate, nor set down aught in malice, has yet his eyes open to every good, and his mind to every explanation, on one side of the question, is sometimes a positive advantage.

Mitford's *History of Greece*, which, beginning in 1784, continued to be published during our period, scarcely belongs to it, being a work of the former school of historical writing, and superseded altogether by more recent studies. It was the first history of Greece in English, and a scholarly and gentlemanly performance altogether, though without those lights of more exact science and deeper research which have since become available. The same may be said of other classical histories of less importance. Such books as these, when superseded by

better information, fall naturally into the catalogue of "*books which are no books*," in which Lamb profanely includes the works of Hume and Gibbon. It is probable that this whimsical philosopher would have added to his list the large and important productions of Hallam, as well as those of his predecessors, as belonging to the class of works which are read for profit rather than for pleasure And in so far as their adaptation to be treated in a popular history of literature goes, Lamb's humorous classification is not without justice. What is to be said about a great historian like Hallam by a modest writer claiming no authority on his imperial themes? Criticism of the style which has admirably served its purpose would be inappropriate, and criticism of his subjects would involve the reader in a disquisition upon the greater part of the history of the modern world. It is another matter with the poets, the essayists, and the writers of fiction more familiar to our bosoms than those great teachers, who sit like the sages above our comments, throned in the calm of an authoritative chair, the judges of a tribunal at which the nations themselves come to be judged. Few in our country have attained this place so completely as Hallam. Gibbon's strong antichristian bias, his attacks, both insidious and direct, upon the religion of Christendom have made him vulnerable, and opened the way to his assailants; but at the same time, his brilliancy and energy of style give him an immediate influence upon his readers which the measured calm and self-controlled sobriety of Hallam do not possess. It is scarcely possible that a Constitutional History should be entertaining reading. It is, in Lamb's sense, no reading at all, but work demanding all the faculties, and the most complete strain of attention. The picturesque is rejected altogether by this severe art, and all the lesser devices with which writers of a lighter strain think no shame to attract the attention of their

readers, are entirely banished. But the value of the works in question is rather enhanced than lessened by this studied absence of the graces. Their learning, their judgment, their importance as standards of opinion, their solidity as a foundation of future researches, is all the more indisputable that no glamour is ever thrown into the eyes of the reader, and no supreme sympathy with the historian's view ever allowed to bias his judgment. There is little in these works to tempt the roving eye of the devourer of literature who reads for simple pleasure, but their style is such as to put no obstacles in the way of those who read for information and improvement. It is throughout good, clear, and lucid, with an occasional rise into something like eloquence. It is, however, very difficult to discuss in detail works of such a kind; and we cannot do better than to adopt the principle which Mr. Hallam himself sets forth as his own guide in a similar case.

"Some departments of literature," he writes in the Preface to his *Literary History*, "are passed over, or partially touched. Among the former are books relating to particular arts, as agriculture or painting; or to subjects of merely local interest, as those of English law. Among the latter is the great and extensive portion of every library, the historical. Unless when history has been written with peculiar beauty of language or philosophical spirit, I have generally omitted all mention of it. In our researches after truth of fact, the number of books that possess some value is exceedingly great, and would occupy a disproportionate space in such a general view of literature as the present."

Hallam was the son of a dignitary of the Church, the Dean of Bristol, and he lived all his life in the atmosphere of letters and classical lore. His first step in literature was made in the *Edinburgh Review*, a few years after its first appearance; but his politics were not of that complexion, though this literary tie, and his friendship with many eminent members of the Liberal party, gave a false

impression on this point, and laid him open to the assaults of the *Quarterly Review*, the natural enemy not only of its rival the *Edinburgh*, but of everything that could be supposed to belong to the opposite party, according to the fashion of the time. Miss Martineau, in one of the brilliant little sketches of her contemporaries which she contributed to the newspapers of the day, affords us some information as to the personal aspect of the great historian, in which we can more fully trust to her, than in her discriminations of character and purpose.

"The reader of his weighty (not heavy) works," she says, "impressed with the judicial character of the style both of thought and expression, imagined him a solemn pale student, and might almost expect to see him in a judge's wig; whereas the stranger would find in him the most rapid talker in the company, quick in his movements, genial in his feelings, earnest in narrative, rather full of dissent from what everybody said, innocently surprised when he found himself agreeing with anybody, and pretty sure to blurt out something before the day was done, but never giving offence, because his talk was always the fresh growth of the topic, and, it may be added, his manners were those of a thorough-bred gentleman."

"Hallam with his mouth full of cabbage and contradiction," Sydney Smith said of him when describing a dinner party. This lively, talkative, argumentative person does not fit at all into the serious image presented to us in the histories, so grave, so careful, so full of large reading and sober judgment. The same authority tells us, as an instance ot the manner in which literature leavened all his thoughts, that the political enthusiasm about Spain which rose in England at the time of the heroic resistance made by that country to Napoleon, turned the mind of the historian to the study of Spanish literature, the natural result in his mind of a new interest.

The incidents which have given interest to Hallam's life have, however, little to do with books or learning, and belong to the closest of domestic sentiments. He had a son in

whom all that a father's wishes could desire seemed embodied —a young man whom all his contemporaries unite in describing as of the highest promise, and who, indeed, is spoken of with a not unnatural inflation and exaggeration of style by those who loved him, as of one who had scarcely his equal among men. It was ill-advised, we think, and shows how uncritical love can be, that Arthur Hallam's remains should ever have been exposed to the judgment of critics less enthusiastic: for there is little in them to justify the lofty estimate of his powers formed by all his friends. But, at all events, his fate has been a rare one. Not long after this young man had completed, amid universal plaudits and approbation, his academical career, and when he was entering upon life in all the hope of highly-cultured youth, sharing all his father's tastes and pleasures, and affording him that satisfaction in his child, grown a man and a dearest friend, in addition to the natural tie, which is of all human pleasures perhaps the most perfect—he went abroad with his father upon a journey of pleasure. "At a German town he was slightly unwell with a cold, and Mr. Hallam went out alone for his afternoon walk, leaving Arthur on the sofa. Finding him asleep on his return, he took a book and read for an hour; and then he became impressed by the extreme stillness of the sleeper. The sleeper was cold, and must have been dead almost from the moment when he had last spoken." This was the calamity which produced the wonderful poem of *In Memoriam.* It places the great historian, the calm and profound scholar, the man whose lofty impersonal work was one of the glories of the time, in the very heart of pity and tender sympathy: for that must be a cold heart indeed which can hear of such a catastrophe unmoved. A similar affliction occurred twice again in the melancholy yet steadfast and courageous life of the great writer. His wife and his eldest daughter

both died in the same way. His second son, about the same age, was also taken from him. His calm life of letters, undisturbed by any pangs of poverty or agitations of ordinary trouble, full of wealth and prosperity and success, was thus made into a continual tragedy. Many men have held their own in the face of vexing anxieties and disappointments of all kinds, unable to get any satisfaction for their soul out of a hard and bitter existence. But this man had everything that life could bestow, easy success, and all the graces and sweetnesses of life—yet death with them, taking all he loved from him, a strange and terrible example of the vanity of human things. He went on courageously with his life and his work in spite of all.

The *History of the Middle Ages* and the *Constitutional History of England* were produced in the early part of his life. The former is perhaps his greatest work, and it is impossible not to admire the large and noble investigation of universal life into which the writer enters, perceiving in every change of living its after development, and tracing from step to step the bursting of successive husks, the opening out of new channels, the gradual rise and growth of the forces with which we are now familiar in their far distant origin, so much unlike, yet so closely connected with the present issues—and at the same time the dyings-off, the failures, the unproductive attempts of the past. The *Constitutional History* was the natural successor of the earlier work carrying out the narrative of the development of law and government in England from the prefatory sketch which is to be found in the eighth chapter of the *Middle Ages*. No one will seek in these volumes for the picturesque scenes, the breathless excitement of the latest fashion in history, that which, according to Macaulay's prophecy, would be "more in request at all the libraries than the last novel;" but the reader will find

in them something more consonant with the old ideal of historic teaching, the guidance of the closest investigation, the lights of boundless research, the decisions of a calm and steady judgment. The *History of Literature in the 15th, 16th, and 17th Centuries* was the occupation of a later period, of the much-tried and tragic years of which we have already told the melancholy story. Perhaps the idea of so huge a piece of work came to his mind as a kind of consolation amid all the surging returns of grief; but it would be vain to claim for this elaborate book the same rank or importance as belong to his other productions. These remain as standards of national instruction. They were of course subjected to the usual amount of criticism at the time of their publication: were considered on one side dangerous, as "dealing with deductions rather than details," and on the other as "strikingly practical;" by Southey as "the production of a decided partisan;" by Macaulay as distinguished by a "calm, steady impartiality." But now that contemporary voices are silenced, they remain standards of historical knowledge indispensable to all students, and setting forth the growth and development of the English constitution and laws on one hand, and of the gradual emergence of modern systems of law and government out of the ruins of the old world on the other: as has been done by no other hand.

And whatever critics might say of him in that brief contemporary scuffle through which every new work has to win its way to fame, the verdict of the world in Hallam's case was never doubtful. His books are not for the careless reader: but their authority and weight are undoubted, and all that honour and high appreciation could do was his, to make his existence more possible for him. And notwithstanding his many bereavements, and the quenching out for him of all the happier lights of life, he lived to be an old man, and never abandoned society

and its delights. There is a passage in his criticism upon Milton, which throws a touching light upon the chief consolation of his lonely life. He has been reminding the reader that all the classic suggestions, and even imitations to be found in Milton's poems, must have come from recollection.

> "Then the remembrance of early reading came on his dark and lonely path like the moon emerging from the clouds. Then it was that the Muse was truly his—not only as she poured her native inspiration into his mind, but as the daughter of Memory coming with fragments of ancient melodies, the voice of Euripides and Homer and Tasso, sounds that he had loved in youth, and treasured up for the solace of his age. They who, though not enduring the penalty of Milton, have known what it is—when afar from books, in solitude, or in travelling, or in the intervals of worldly care—to feed upon poetical recollections, to murmur over the beautiful lines whose cadence has long delighted their ear, to recall the sentiments and images which retain, by association, the charms that early years once gave them, they will feel the inestimable value of committing to memory, in the prime of its power, what it easily receives and indelibly retains. I know not, indeed, whether an education that deals much with poetry, such as is still usual in England, has any more solid argument among many in its favour, than that it lays the foundation of intellectual pleasures at the other extreme of life."

When we read this we can scarcely fail to think of the old man, alone in those long yet so swiftly passing years, that compose the end of life, largely surrounded by friends, and distractions, and all the lively coming and going of society, in which he himself was as lively and busy a figure as any—yet like every old man when strength began to fail him, and all that were his very own had gone from him, inevitably alone for many a lingering hour. A natural sympathy identifies the writer himself with his subject, and we cannot but feel that he too, withdrawn by age and bereavement into some such hermitage as that which his blindness made tc Milton, must have consoled himself in his solitude with "the beautiful lines

whose cadence had long delighted his ears," walking softly back as through long silent libraries, through his studies and collections of the past. The thought has in it a fine and dignified repose, a melancholy quiet, which indeed cannot but be sad, but which is better and more seemly than much that is supposed to be happiness.

We are brought back to the recollection of what we have called, without any disrespectful meaning, the Partisan-Historians, by the next name we encounter, that of the Catholic writer whose heart, no doubt, had burned within him to see the calmness of assumption with which Protestant England—then in one of her most Protestant moods—satisfied herself as to the atrocious tendencies of Popery, its monopoly of persecution and bloodshed ; and though she became rabid with terror at the very name, yet plumed herself on the scornful certainty that the Roman Catholic Church was a thing of the past. It is strange, indeed, that the members of such an ever-living and dauntless priesthood, with organisations so powerful and servants so devoted, should have let the other side so long have their way undisturbed. The subdued forces and patient waiting of the entire Catholic community for so long a stretch of time, its consent to be vanquished, and endurance of suffering and scorn, is a very remarkable feature of these times, and shows the stunning effect of its final downfall and disappointment, when the day of the Stuarts came to an end, more emphatically than anything else could do : as well as the never-dying hope and certainty of eventual triumph which has always been its inspiration. It is accordingly with a sense of pleasure that we hear the first voice rise from this humiliated community, humiliated in England almost beyond example. How it was possible that they could have endured so long all the Tests and insulting disabilities under which they lay, and that, at least in England, so little of the

bitterness of a grievance should have showed itself in their minds, is very remarkable in the records of religious endurance. John Lingard was one of the Catholic priests of the old school, trained at Douay in all the lore and traditions of a class which is universally acknowledged to have been more refined and cultivated, more liberal and less polemical, than that with which we have more recently made acquaintance. When the troubles of the Revolution arose in France, and the college was broken up, Lingard came back, with most of its members, to England. In these days there was little hope in Rome of any reconquest of this country to the old faith ; and however Catholic disabilities might rankle in the bosoms of those who had to sacrifice their rights as citizens to their faith, there had not as yet begun to arise among them either the indignation which prompts to action, or the hope of doing any good by it. It is curious, indeed, to find so little evidence anywhere, either in England or Ireland, of the bitterness which political and social disabilities ought, it would seem, to have produced. It was, as we have said, a time when Protestantism was rampant in England. There was no High Church party ; or if it existed in tradition, its habits were fox-hunting, and its religion, according to Scotch nomenclature, "moderate." All that was living and active was evangelical ; so-called Ritual was at the lowest ebb ; Popery a feeble and hopeless piece of antiquity. And when the learned and laborious priest in his Lancashire village began upon his history of England, nothing could have appeared more unlikely to any spectator or critic than that there should come a time when a large section of the Church of England herself should be pleased to contemplate history from the same point of view. Lingard held the humble position of what was in reality a dissenting minister, in the village of Hornby, far away from the great world, humbly paid

and lodged, though there would be, no doubt, among his congregation some great personage or other attached to the Catholic faith to give him a link of connection with the greater world. Here he remained all his life, unmoved by the honours which were, if he chose, within his reach, and here died, having resisted all efforts to raise his rank or magnify his position. It is said, even, that the Pope offered a cardinal's hat to the humble rural priest who was doing a work so important to the Church; but this wonderful honour, never, probably, before offered directly to a person so humble, did not tempt him. He is said to have returned the excellent answer and excuse for his refusal, that "it would quite put a stop to the progress of my history." The Papal See has seldom been so observant of humble merit.

His first work was upon the *Antiquities of the Anglo-Saxon Church*, and was received with a violent and alarmed No-Popery article from the pen of Southey in the *Quarterly*, though with some faint praises from other quarters. The *History of England* was published when the author had reached the full maturity of life after years of preparation and laborious research. How far that research extended to original documents was doubted at the time, and it would be impossible to attempt to decide the question now; but the work, on the whole, outlived all the assaults made upon it, and has always been treated respectfully in the world of letters. At a time when the easier and more graphic style of literary composition had scarcely been allowed to force its way into the solemn methods of the historic muse, Lingard used a natural and graceful diction, which is still readable after Froude and Macaulay. He was one of the first adventurers in the new epoch, pricking over the plain on his own account, instead of marching square and solid like a battalion with the force of a Hume or a Gibbon

undisturbed by other competitors in the field. Though he lived out of the world, he was no mere bookworm; but when he was assailed, could defend himself with all the vigour of a practised fighter. The *Edinburgh Review*, in the person of Allen, the medical adviser and prime minister of Holland House, fell upon him with all its ponderous force; but the poor priest, out of his little parsonage, held his own gallantly, neither crying out, like so many victims, nor flinching from the shock of arms. Not to touch upon the most difficult crisis of all, the age of Henry VIII. and Elizabeth, it would be vain to say that his treatment, for instance, of such a figure as that of Wycliffe is generous or even fair. The reader cannot fail to see that all the consequences, so unforeseen, of Wycliffe's early protest against the corruptions of the Church have got into the eyes of the historian and given a grudge to all he says. But if he imputes to the Reformer a certain dissimulation in the explanation of his own words, he attributes to him no unworthy motive, nor any political object beyond those which his champions would gladly allow—the furtherance of liberty, the abolition of local bondage, and the relief of the commonalty from taxes beyond their power of paying. The manner of the treatment is ungracious—the historian disliking the hero: but not so much as Gibbon disliked Christianity, to take an example prior to the Roman Catholic historian, or as Mr. Froude disliked Mary Stuart, to take a later instance. The student will take these partialities for what they are worth; the common reader, in all likelihood, will be little affected by them. It is a necessity of all judicial processes to hear both sides of the question, and the preponderance of testimony was so much on the other side that this honest and dignified partisan is of advantage to the decision.

And it makes an agreeable addition to the literary

records of the time to see this obscure priest, with his little flock about him, saying his mass in his village chapel: retiring among his books, interrupted, perhaps, in the middle of a chapter to carry salvation to some sickbed: putting away the cardinal's hat, with perhaps a touch of fine impatience, as an interruption to "the progress of my history:" and, after his long life, dying as he had lived, among the same village community, the director of their simple souls, before anybody had dreamed that a hierarchy could be re-established, and Cardinal Archbishops flourish again in England. There is no telling whether, perhaps, the village priest's Catholic history may not have had some share in bringing that new development about.

The works of Dr. Thomas M'Crie may claim a place on a similar line with those of Lingard—higher, in so far that his impartiality is less severely tested; not so high in national importance, since the general mind never condemned Knox and the Scotch Reformers as it had condemned the Roman Catholic champions. But it must not be forgotten that the tendency of history and opinion had been to the Royal side in Scotland, and that where Mary Stuart was the favourite heroine, John Knox was scarcely like to have his full rights as the great patriot and wise statesman he proved himself to be. And no more deadly wound could have been aimed at the national prejudices and prepossessions than Sir Walter, the pride of Scotsmen, had aimed at the heroes of the Covenant. We may flatter ourselves that it was easier to show the noble love of freedom and dauntless spirit of these rustic martyrs than to vindicate Mary Tudor and her supporters; but at least there was in it a kindred inspiration, though so different an aim.

We require to go a long way back into the old century

to pick up the philosopher whose works and thoughts made a new beginning and a separate theory in mental and political science, as distinctly as Wordsworth made a new beginning in poetry. Jeremy Bentham was twenty-two, and had just made the first step in his career by the publication of his *Fragment on Government*, when Wordsworth, the eldest of all the poetic race, was born; but he lasted out the first quarter of this century in eccentric vigour, and his system is as much identified with the age we have been discussing as the poetry itself, which distinguishes it among all ages. Bentham, like every originator, has something in him of that absence of natural lineage which distinguished the old priestly patriarch on the Chaldean plains. He is "without father and without mother" in his rank as a philosopher. His system, according to his own account of it, seems to have sprung from his perception of the necessity of a link of general principle to bring together the subjects and studies which interested him most. It is the custom of philosophy in the present day to ignore all possibility of that creation of something out of nothing which once was thought the prerogative of genius, and to trace every new line of speculation, every new development of thought, every inspiration even of poetry, to influence and training. This idea had not been thought of in Bentham's time; and though he was not of an imaginative mind or apt to reject the agency of secondary means, yet his claims as an inventor are as distinct as if it had been a piece of machinery he had put together, and not a scheme of philosophy. His dormant intelligence was fired by a suggestion found in one of Priestley's letters, he tells us; but his system was not Priestley's, nor developed out of anything that came from that sectarian thinker. The contact between the two minds was momentary; the touch was like that of fire to tinder, or rather like the

firing of the train by an accidental spark; and all that followed arose from the application of an original mind to difficulties, which many, no doubt, had felt without attempting to solve them before. Bentham's system has had the greatest influence upon the world since his time. It is sufficiently important to be considered a new departure in the world of thought; and, as such, it has received the allegiance of as devoted a band of disciples as ever surrounded any master in science or morals. The prophet was one of the oddest that ever moved humanity, a strange little being full of quips and cranks: in mind a sort of thinking machine, working up every kind of harsh material, and rolling out schemes, codes, and legislative suggestions by the mile, with an inexhaustible fertility; in habits a recluse, though surrounded by an endless flow of society, and incapable of existing, it would seem, without a little court of dependants and admirers; in all studies but his own destitute of so much as the capacity to understand—like one of those abnormal beings, the sport of science in the present day, of whom accident or misadventure has annulled one side of the brain, and who are incapable of exercising any but one set of faculties. It is true that our impression of him is chiefly derived from the descriptions of his old age, with its shrill gaiety and eldritch affectionateness; his laugh, which is something between a cricket's chirp and the cachinnation of a pantaloon; his babble of superannuated fondness for the naughty or good boys (according as they pleased him), who bore names so provocative of kindness and fondling as those of Henry Brougham and Daniel O'Connell, both of whom were supposed to sit on the knee, and to be fed with pap by the spoon of the cackling old patriarch. It is difficult, with the picture of this chuckling and chirping grandfather in his chair, amid all the oddities of his philosophical workshop, with his band

of adorers about him, all distinguished by titles of jocular abuse or drivelling fondness, and all, so far as appears, responding with never a snarl to his requirements, to remember that Jeremy Bentham was not always an old man, and that the fashion of him was different in his youth. But there was nobody in his youth to give us any record of the dry and industrious student whose curiously keen faculties, knocking up against the walls of tradition and legal fiction on one side, and burrowing at the roots of law and metaphysics on the other, could not rest till they had offered substitutes for all the antiquated wisdom of the ages, and replaced every time-honoured expedient with a novelty. His own recollections of the past, carefully collected by Dr. Bowring from the conversations which, under the tender title of Bo, and amid much petting and fondness, he held with his master —are rather gossip about other and chiefly unknown personages, than revelations of himself. From these, however, we gather that he began his consciousness of life as a frightened little boy, cultivated into the proportions of an infant prodigy by a vain father, who was proud of his babyish proficiencies, and pounced upon every sign of faculty, even in the way of dancing and drawing, both pursuits odious to the child, with an eagerness which drove young Jeremy into childish secretiveness, and shut his heart (if he had one) against his too admiring parent. He was educated at Westminster School and Queen's College, Oxford, where he was entered, a dwarfish weak-kneed boy, at twelve and a quarter, carrying with him a high reputation and the nickname of the little philosopher. He took his degree at sixteen, and was hurried through his terms at Lincoln's Inn with all possible celerity. But it would seem that the father's love or vanity was, at first, grievously disappointed when the results of this rapid training were

looked for. We are able to fish out from a mass of irrelevant matter the following account of the first step he made in life. It occurs in a statement of his horror and dismay at finding that his father had betrayed the secret of his authorship of the work in question, his complaint on which subject occupies far more space than the novel little bit of self-disclosure which follows.

"For some time before the publication of the 'Fragment,' I had been regarded in the light of a lost child; despair had succeeded to the fond hopes which something of prematurity in my progress had inspired. On my being called to the bar I found a case or two at nurse for me. My first thought was how to put them to death, and the endeavours were not, I believe, altogether without success. Not long after, a case was brought to me for my opinion. I ransacked all the codes. My opinion was right according to the codes; but it was wrong according to a manuscript unseen by me, and inaccessible to me—a manuscript containing the report, I know not of what opinion, said to have been delivered before I was born, and locked up, as usual, for the purpose of being kept back or produced according as occasion served. . . . My optics were to such a degree disturbed, that to my eyes the imperfections of this phantom rule of action seemed only errors calling for an easy remedy. I had not learned how far they served as sources of wealth, power, and factitious dignity. I had contracted—oh, horrible!—that unnatural and at that time almost unexampled appetite, the love of innovation. . . .

"The reader cannot have gone through the first sentence in the 'Fragment,' without having seen the passion that gave rise to it—the passion for improvement—I mean in these shapes in particular in which the lot of mankind is meliorated by it, a passion which has been rekindled by recent incidents, and is not likely to be extinguished but with life; a passion for improvement in every line, but more particularly in the most important of all lines—the line of government. At an age a few months before or after seven years, the first embers of it were kindled by Telemachus. By an early pamphlet of Priestley's, the date of which has fled from my recollection, light was added to the warmth. In the phrase 'the greatest happiness of the greatest number,' I then saw delineated, for the first time, a plain as well as a true standard for whatever is right or wrong, useful, useless, or mischievous in human conduct, whether in the field of morals or politics. It was, I think, in my twenty-

second year that I saw in it the foundation of what seemed to me the only correct instruction or encyclopædical arrangement—a map or chart of the field of thought and action. It is the same map which stands in the work entitled 'Chrestomathia.' I felt the sensation of Archimedes when I committed the first rough and imperfect outline to one side of a half-sheet of paper, which, not entirely useless, served, I hope, to kindle a more substantial flame.

"No sooner had my farthing candle been taken out of the bushel than I looked for the descent of torches to it from the highest regions; my imagination presented to my view torches descending in crowds to borrow its fire. Of disposition, in the midst of such excellence with which, as all pens and all voices concurred in assuring me I was so abundantly encompassed, I could not suspect any deficiency; for clearing away the imperfections which still remained in government, all that was wanting was a few of those lights which, I could not tell how, had happened to take my mind for their first visiting place."

The astonishment with which he discovered that this was not the case, that nobody wished to be enlightened by him with those new lights which were to banish all darkness, gradually worked further discoveries in Bentham's mind. But, in the meantime, his position outwardly was not a comfortable one. His father, though deriving some satisfaction from the publication of the *Fragment*, which, being brought out anonymously, was attributed to various great personages until his vanity betrayed the secret and stopped the sale—was disappointed and angry, "always out of spirits for my want of success." "Mine was truly a miserable life," Bentham says. "I had been taken notice of by the great when a little boy at Westminster School; for I was an object of praise from the earliest time of which I have any recollection. *That* filled me with ambition. But I met with all sorts of rebukes and disappointments till I was asked to Bowood."

It was the appearance of the *Fragment* which procured him the notice of Lord Shelburne, afterwards Lord Lansdowne, and this invitation to Bowood which was so

great a crisis in the life of the thrifty, industrious, self-occupied, young philosopher. He got rid of his father's constant visits and importunities about his work, which galled him greatly, for the elder Bentham (not unnaturally, some people will think) made frequent investigations as to how the *Policy of Punishment* or the *Observations on the Hard Labour Bill* were going on; and it restored him to that notice of the great for which, philosopher as he was, he seems to have pined. The letters from this place form a curious record of the gossip of the time, and of the place which a man of inferior position, however distinguished, inevitably takes in a great house; and the flatteries and complacencies, the growing conviction that heaven and earth hold nothing so important as this noble family, the pride with which every new privilege is noted, furnish a strange commentary upon the philosopher's higher pretensions and impartial survey of mankind in general. What could the delights of science and learning give that was equal to admittance into Lady Shelburne's dressing-room, and all the talks and pleasantries and music that went on there, the ladies so austere and dignified, very prudes to other people, all sweetness and complaisance to him? Here, it appears, to give the scene its last seduction, Bentham found the only, and entirely hopeless, love of his life. The Miss F—— of his letters is a very easily deciphered hieroglyphic. She was inexorable, it would appear, and still inexorable when after sixteen years' separation they met again, and it became apparent that Bentham had not got over his passion. His biographer informs us that to the very end of his life "I have often heard him speak of that lady with tears in his eyes." One can scarcely help feeling that the hopelessness of the love must have been one of its attractions; for to imagine old Jeremy Bentham with his little train of followers, the queer little antiquated celibate, as

grotesque as anything that ever came out of the fancy of Dickens, in the position of a married man, the companion of a fair and fastidious lady, is beyond the power of mortal imagination.

His friendship with Bowood and all its sirens lasted some four or five years; and whether it was brought to an end at last by the presumption of a proposal on the part of the tame philosopher, whose very privilege of *entrée* to my lady's dressing-room no doubt signified that he was perfectly safe as an inmate, and not sentimentally dangerous to the most susceptible imagination, cannot be told—but it seems very possible that it may be so. He went to Russia afterwards with my lord's blessing and strenuous recommendations, and with a fine aim in the way of carrying with him every kind of possible amelioration and improvement for Russia, "under the auspices of Prince Potemkin, in whose service his brother was then engaged." The improvements came to little, so far as Russia was concerned; but Bentham, with the aid of his brother, there worked out a wonderful scheme called Panopticon, which for several years after his return was foremost in his thoughts. It was a design for a model prison of very peculiar construction, partly the invention of General, afterwards Sir Samuel Bentham—who had a great deal of genius in this way, and was also the inventor of a new kind of vessel called the vermicular, which Bentham was sanguine would work an entire change in navigation. The Panopticon was to be an immense circular building, with a great well in the middle, from which the gaolers were to superintend the whole range of convicts in the cells, where each was to work alone, one side of the cell being entirely open towards the centre, fully lighted night and day, and exposed to the continual inspection of the watchers in the middle. Minute details of the watching and regulations outside,

and of the manner of employing the prisoners within, were added to the scheme. And some of the details are curious enough. From the calculations given, it is clear that Bentham intended to feed his criminals chiefly or entirely upon potatoes. In point of clothing he considered stockings unnecessary unless on Sundays; shirts are also rejected as unnecessary, and the shoes were to be of wood, not leather. The most extraordinary feature in the plan was the system of continual inspection,—the unhappy prisoners being understood to be under the eye of their guardians constantly, sleeping and waking,—but the other details were likewise novel and startling, and the principle of providing for and maintaining the prisoners by contract, instead of by the indiscriminate use of the public money through public functionaries, was, to the mind of Bentham, a still more important one. The curious fact is that he all but carried his scheme, and was actually entrusted, by an Act of Parliament, with a thousand convicts to test it, when the king himself, whom Bentham had offended, stepped in and arrested the proceedings by giving his veto against the scheme. So far had matters gone that Bentham obtained from a subsequent Parliament the immense sum of £23,000 as compensation for the losses he had undergone in connection with it. Bentham himself had undertaken to be the contractor, the chief gaoler living among his prisonful. The importance of this plan could not be further proved than by the great sum thus granted as compensation. Notwithstanding that the existing system of prison management has been largely influenced by Bentham's suggestions, the fundamental idea strikes us as very extraordinary now, as well as many of the minor details —such as his hope to make the chapel, which was to be also in the centre of the building, on Sunday "a sort of place of public entertainment suitable to the day, like

that afforded by the Magdalen and the Asylum," a place where people could come to stare, like Asmodeus, at all the unhappy wretches whose life, in every detail, was gone through under an inspector's eye.

It must not be forgotten, however, that Howard had but lately opened the whole question of prison management, and given his heroic life to the cleansing and reformation of the dismal dens in which criminals were left to rot and die in body, and to corrupt each other mutually in mind. The light and air and publicity which were thus to be poured upon the place where felons bore their punishment was part of his system, and he had regarded the latter particular as a special safeguard against the evils of the old *régime*. Whether, however, Howard contemplated carrying publicity to such a pitch as to keep his unfortunate clients, night and day, under the inspection of their keepers, we are not informed. Bentham repeatedly asserted that but for George III. he should have had the management of all the convicts of England, and after them, of all the paupers, in his hands.

But this strange scheme came to nothing, as so many other benevolent enterprises of the kind have done. That it should have been so near success seems to us the most wonderful feature in it. It appears to have been one of the chief interests in Bentham's life for a great number of years. The plan was originated in 1788, propounded to Government in 1792, and only finally settled in 1811 by the payment above mentioned. Wilberforce speaks of Bentham's strong feeling on the subject and profound disappointment at its failure—a disappointment which certainly was of a generous kind; for the life he had proposed to himself as chief gaoler of a huge prison, living in his central chamber, in the midst of the most hardened and debased of criminals, is as unlike the scheme of existence which could have proved satisfactory to a philo-

sopher, as can be conceived. But he was very tenacious and slow to relinquish any plan he had formed.

Bentham's attempts at the consolidation of the laws and formation of a penal code, were as unsuccessful, in a practical point of view, as his Panopticon. He neglected no opportunity of pressing his services upon every newly-formed or revolutionised nationality, from France—by which in the palmy days of the National Assembly he had been adopted as a citizen along with half-a-dozen other Englishmen—Russia (of which he had great hopes), and America—to such smaller sections of the world as Venezuela, to which he had a great mind to emigrate under the protection of Miranda, for the purpose of making it into a Utopia of political economy and philosophical legislation. But in the latter as in the former cases difficulties intervened, and the ever ready code, which he was continually retouching and perfecting, was nowhere adopted. At the very end of his life he wrote to one of his foreign correspondents, "I am alive though turned of eighty-two; still in good health and spirits, *codifying like any dragon.* Thus with a chirrup of obstinate fidelity as dauntless as any trumpet note, the old man stuck to his lifelong occupation, undaunted by the fact that all the world had refused his help in this particular. What he did succeed in was in sowing principles, suggestions, knowledge, broadcast among the classes of which legislation is the natural trade, perhaps as effectual a way of influencing the world as if he had been allowed to codify like a dragon, potentially as well as in his closet. Bentham was not one of the writers who have to wait long and wearily for recognition. His first *Fragment* gained him, as has been said, the happiest influence of his life, the friendship of Lord Lansdowne; and his reputation as an authority upon questions of law and political philosophy seems to have taken root from that period, and to

have remained unquestioned even by those who agreed the least with his views. He was not much over forty when the French Assembly conferred the honour of French citizenship upon him, "considering," as the patent sets forth with characteristic grandiloquence, "that at the moment when a National Convention is about to fix the destinies of France, and probably those of the human race, it belongs to a generous and free people to welcome all intelligence, and to grant the right of access to this great work of reason to men rendered worthy of it by their sentiments, their writings, and their valour!" What magnificent sentiments were these! and what an opportunity for Bentham, had he been able to take advantage of it! All that came to him from his offers of enlightenment to France was, however, the appointment of a committee of the Convention to report upon his Panopticon scheme, which never came to anything. But that his name and fame had travelled far is very apparent.

It is curious, however, to note in his case the benefits of patronage, as conferred by this short episode of Bowood. It made him acquainted with people whose acquaintance was in itself a kind of fame. It gave him his great disciple and expositor Dumont, a Frenchman who had been tutor to Lord Lansdowne's sons, and who, when once made acquainted with the philosopher, attached, like himself, to that noble house, made himself, for a great part of his life, the interpreter and high priest of Bentham, merging his own powers in those of his master, and communicating to France, with curious self-devotion, a better and more readable version of Bentham's principles than Bentham himself was able to give to his own country. Dumont was the most serviceable of the many retainers whom Bentham attached to himself; but he had other disciples to whom his service was as that of a feudal superior. Notwithstanding the weird and uncanny aspect

of the old man, as he is revealed to us by Dr. Bowring, in his shrill levity and cheerfulness, there must have been attractive qualities in him. It is evident that he had an instinct like that of the Ancient Mariner, for the men who were born to hear and understand him, and great readiness in adopting into his affections every new notability whom he approved of. Mill, the sternest of thinkers, was for a considerable time his henchman and attendant; and he received an amount of service and devotion, which few of the greatest of mankind have gained from their fellow-creatures. It may be that his own entire detachment from family and natural ties had something to do with it, besides his power of helping in his turn, young men who gave up their time and independence to him; but it requires more than this to induce men of education and ability to undertake even the personal service of their philosophical master, as his young disciples who lived in his house, always two of them on duty, seem to have done —at least it is a return to mediæval fashions of discipleship with which we are little acquainted in the nineteenth century.

The reader will find some account of Bentham's system of philosophy farther on. It involves, directly in one group with him, the gentle and noble figure of James Mackintosh who assailed it, and the stern and harsh one of James Mill, who, with equal vigour and unmannerliness, made himself its champion. They were both Scotsmen, and Bentham did not like Scotsmen. But they were as unlike as it is possible to conceive. Before, however, passing on to these antagonists yet fellow-workmen, we must add a word or two to this record of their master. There is no notable person of his generation who is more open to ridicule. His excessive activity made him thrust into every difficult situation with an absence of that perception of absurdity which saves many men from open

folly. Perhaps there was a touch of chivalry, a remnant of the romantic courage which prompted a knight to offer himself as the champion of his country, as well as a wonderful amount of vanity and misapprehension of magnitudes in the philosopher's mind, when he proposed to Wilberforce (like himself a French citizen by patent of the National Assembly as one of the heroes of humanity) that they two should go to France as ambassadors to re-establish friendly relations between the two countries. The claims which he puts forth for himself in proof of his eligibility to this office are—1st, The order by the Assembly to print the Panopticon plan; 2d, An invitation from Talleyrand to go to Paris with the idea of setting up a Panopticon; 3d, The "flaming eulogiums of some extracts from my papers on the judicial establishment," printed in periodicals directed by Mirabeau and by Brissot; with other exquisite reasons. Wilberforce quashed the scheme in a very brief note. "There is much in what you urge, and I will turn it in my mind; but I doubt if anything can be made of it"—but Lord St. Helens, to whom it was also referred, took the trouble to enter into an elaborate explanation of the impossibilities of the plan. This was probably a mere bubble of the combative and active mind of the philosopher, but it has a very grotesque aspect among the many restless offers and schemes of his life. The prodigious letter, or rather pamphlet, in the form of a letter (sixty-one pages) which we find in another place addressed to Lord Lansdowne, and taking his patron to task for not putting him into Parliament as Bentham understood him to have promised to do, is another proof that some impulses of ambition, apart from his science and his schemes of public improvement, legislative and otherwise, occasionally crossed his mind. The following statement, however, of the relative position and importance of his own and the philosophical systems which

preceded his, reaches a much higher point, and may be reckoned as the very sublimation of self-applause.

> "What Bacon did was to proclaim *Fiat experimentum;* but his own knowledge of natural philosophy was ignorance.
> "What Locke did was to destroy the notion of innate ideas;
> "What Newton did was to throw light on one branch of science.
> "But I have planted the tree of Utility—I have planted it deep and spread it wide."

Of his opinions on literature in general not much is to be said. "What I read of Socrates is insipid," he says. "I could find in him nothing that distinguished him from other people, except his manner of putting questions." Coming down to an age more near our own, he informs us, "I never read poetry with enjoyment. I read Milton as a duty. Hudibras for the story and the fun;" so that, presumably, as poetry, Lycidas and Hudibras ranked on about the same level in the philosopher's mind. And his mention of Milton at all was, perhaps, suggested by the fact that it was Milton's house in which he was living, a fact which had induced the old Jeremy, Bentham's father, to buy a portrait of the poet, and put up an inscription in the garden to his memory. When discoursing of his contemporaries, Bentham speaks of the "servile poet and novelist Walter Scott," and the "ultra-servile sack-guzzler Southey." "I shall laugh heartily to see your figure in the neighbourhood of those reptiles Scott and Southey," replies his correspondent the mild-mouthed and modest Parr. Thus the philosophers communed together. On the other hand, we must add a few words of a more genial kind, an old man's summing up of his philosophy, which exhibits him in a very different light. It was written for a lady, who wished for his autograph a few months before his death.

> "The way to be comfortable is to make others comfortable.
> "The way to make others comfortable is to appear to love them.

"The way to appear to love them is to love them in reality.

"*Probatur ab experientiâ* per Jeremy Bentham, Queen's Square Place, Westminster. Born 15th February anno 1748; written 24th October 1831."

This little matter-of-fact periphrasis of the great Christian rule puts the philosopher in a happier light. But the queer figure of the old man shuffling about his garden, his white hair streaming from under a straw hat, legs and arms muffled up in shapeless woollen: or "vibrating" round the platform upon which his table and chairs and bookcase were placed, indoors, his teapot "Dick" singing over the lamp, his confidential friend in waiting, attended by two young secretaries—"reprobates" in the quaint language of the house—makes one of the strangest of domestic pictures. It is far more like a picture out of Dickens than a scene of actual life. While the guests were still present the queer little old man was undressed, by one of the disciples, his nightcap tied on, his old eyes bathed—his old voice running on all the time in a perpetual shrill chatter of elaborate jokes and chirrupings. Never was a stranger comic-tragic figure, yet nothing solemn in it, more like an ape of genius chattering and tricksy, than one of the great minds that inspire an age. But such he was, in his strange all-laborious way.

The name of James Mackintosh is one which possesses more of that personal attraction in which, curiously enough, the figures of the past vary as much as do those of our personal acquaintances, than either of the historians and philosophers already noted. He was one of the men never so successful as they seem to have a right to be, who awaken great expectations, and now and then attain great though evanescent triumphs, but by some failure of fortune, or absence of faculty, never rise to the height which appears their due, or get any consolidation of this fluctuating and

never fully accomplished fame. He was the son of a Highland laird, and himself the heir of a little northern property, with which, however, he soon parted by that almost inevitable process of getting rid of what they have, which young men born to a small fortune so generally go through. He was full of faculty and genius from his earliest years—the fact that it must be Jamie Mackintosh being at once recognised in the countryside, when a learned stranger told the story of his encounter, on a country road, with a remarkable boy. He was a "spontaneous child," some old observer said of him, and there could not be a more attractive description. And he was a dreamer as well. "I used to fancy myself Emperor of Constantinople," he says. "I distributed offices and provinces among my schoolfellows, I loaded my favourites with dignity and power, and I often made the objects of my dislike feel the weight of my imperial resentment. I carried on the series of political events in solitude;"—and he adds that this habit continued with him all his life, not in the more common way of imagining success and triumphs for himself in his proper pursuits, but in weavings of imagination as far removed from reality as the crown of Constantinople was from the schoolroom at Fortrose. "I have no doubt," he adds, "that many a man surrounded by piles of folios, and apparently engaged in the most profound researches, is in reality often employed in distributing the offices and provinces of the empire of Constantinople." But this dreamer was no inactive boy. The spontaneous life in him poured forth in all channels. When he was but thirteen he got up a debating society in his school, and harangued the Inverness-shire lads "till his soprano voice failed." "One day he was Fox, another Burke, or some leading member of the Opposition; and when no one ventured to reply to his arguments, he would change sides for the moment, personate North, and

endeavour to combat what he conceived the strongest parts of his own speech. I was greatly surprised and delighted with his eloquence in his character of Fox against some supposed or real measure of the prime minister." Thus the little actor conned his mimic part, little thinking how soon he was to find a place among those he imitated.

At fifteen Mackintosh went to Aberdeen to college, and there fell into a course of reading which helped to direct many of his after efforts. Warburton's *Divine Legation*, he thinks, perhaps "tainted my mind with a fondness for the twilight of historical hypothesis; but certainly inspired me with that passion for investigating the history of opinions, which has influenced my reading through life." Here he met Robert Hall, the future great preacher, and the two ardent boys, both golden-mouthed and full of dawning eloquence, living together in the same bare half-furnished house, walking together on the sands, in the roar of these northern seas which half drowned their eager young voices, discussed and reasoned of every subject on earth and heaven. The young Englishman was orthodox in the straitest sense of the word, the young Scot, who at fourteen had been "the boldest heretic in the county," a daring speculator and questioner: and the subjects upon which they differed were much more numerous than those on which they agreed. During one winter they met at five o'clock every morning in the cold and dark "to read Greek"—a third youth, no doubt one of those devoted and admiring retainers who are always to be found on the path of the young heroes of the universities, getting up to make coffee for them: and this early meeting: the two youthful faces over their books, most likely by the light of one poor candle, the friendly ministrant coaxing his fire into brightness, the fumes of the boyish cookery—and, no doubt, the little interval of jest that would come into the midst of Plato or Herodotus, as

the three youths warmed themselves with the smoking coffee, furnishes us with a pleasant scene. The future statesman and the future preacher struggled and wrangled and were never still, loving and confuting each other with all the warmth of fervid youth. To Hall, Mackintosh always appeared to have "an intellect more analogous to that of Bacon than any person of modern times;" while to Mackintosh, a somewhat careless youth, with a warm love of pleasure and no very straitened creed, "the transparency of his friend's conduct and the purity of his principles" inspired a respect which he describes as awe. Altogether there could not have been a more interesting conjunction.

Mackintosh left college at nineteen, having taken his degree—a course more rational surely than the long extended preliminary training of the present time: and though he would have preferred the bar or to be a bookseller (an idea which filled his advisers with consternation), he became neither, but began his studies for the medical profession. It was in this capacity that he went to London, a lively young man of twenty-three, more distinguished in all the debating societies than in the schools, although there, too, his comprehensive genius held its own. It was not, however, as a physician but as a speaker, in the ferment of the political societies which were universal at the time, that Mackintosh made his first success in London. It is clear that nothing attracted him so much as that art of oratory which, in his then circumstances, he could practise only as a relaxation. This kind of relaxation, however, combined with others less legitimate, swallowed up altogether the life of the young man, who, though a Scotsman, was as prodigal, lavish, and incautious as most of the young Scotsmen whom we have previously encountered in these volumes have been. At the moment when he was thus afloat in London, with no settled pros-

pects, his little Highland estate, newly come into his hand on the death of his father, already beginning to melt away in his careless keeping, Mackintosh took a step which to most wise people would seem the most imprudent of all, but which immediately replaced him in the way of salvation. He married and returned to the hopes and possibilities of more practical life. It was not very long after this event that he won his spurs in literature, suddenly leaping into the midst of the fray and striking upon the shield of no neophyte like himself, but of the most distinguished of warriors, the great Burke, the most eloquent and potent champion against whom young assailant ever tried his powers—as if a young Lovaine with maiden arms had defied Lancelot himself. The occasion was that centre of all the excitement and commotion of the time,—the French Revolution: against which Burke had arisen at once to denounce with half-prophetic force, and at the cost both of friendships and traditions, its dangerous tendencies. So strong was the feeling, and so many were the sympathisers in favour of the new outburst of freedom and popular rights, that answers came forth on all sides to this attack. Among these was the well-known *Rights of Man* by Thomas Paine. Neither the great Burke nor his violent adversary belongs to our period: but when James Mackintosh, young, unsettled, and not knowing what to do with himself, full of the ardent hopes and strong political feeling of his generation, seeing in the great events on the other side of the Channel the self-emancipation of a heroic nation and the beginning of a new era of freedom and life, came forth before the world with his *Vindiciæ Gallicæ,* his apology and justification of the Revolution, which as yet had not dipped its garments in blood, he was as true an embodiment as could have been found of the new age, full of hope and warm idealism and that certainty of being able to better the world, and

turn evil into good, which is one of the finest characteristics of noble youth.

The *Vindiciæ* was an eloquent and glowing defence of the French nation and its leaders, and of the spirit, as yet all undeveloped and apparently containing in it the germ of every heroic quality, of the new revolution. Its arguments are not without suspicion of sophism and special pleading, but its generous inspiration and hot and eager championship, made up of the natural English desire to see fair play, and the warm enthusiasm for liberty of the young England of the moment, are very potent and attractive. The impression made by it was great. The first edition was published in April 1791, and by August of the same year the third had been called for. It was from the obscurity of a cottage at Little Ealing, where the young medical man, who certainly had not been successful, nor perhaps had much tried to be successful, in that profession, had retired for economy and quiet, and very likely with the intention of weaning himself from the temptations of town—that this generous plea for France and freedom, and the hopes of a new world, came forth. His young wife, no doubt with many an anxiety in her mind, not only for the bread of the children who began to gather about the rash pair, but for the vindication to the world of those powers which had as yet been little more than wasted upon political societies and fruitless debates—sat by him silent as a mouse, not permitted even the resource of that endless needlework which a young mother, in those days, had more completely upon her hands than now, scarcely turning the pages of her book lest she should disturb him as he worked. One can scarcely help feeling that her presence meant a certain moral compulsion and guardianship to keep him to his work, which, it is allowed, he needed in those days.

But this was an end of the obscurity and unsuccess of

the young Scotsman. His book was received with applause everywhere. Fox, who had separated himself from his brother-in-arms in consequence of the *Reflections*, to which it was an answer, and Burke himself, who was magnanimous enough to appreciate the writer's admiration and respect even through the fervour of his attack, both praised his performance; and young Mackintosh stepped at once out of his obscurity into the acquaintance of the world. Perhaps it was the new vigour given by success which prompted him more definitely to abandon the profession of medicine, for which it is evident he never felt any enthusiasm, and to adopt that of the law, which was much more congenial to his mind. He was called to the bar in 1795, and by that time had fully entered upon the craft of literature as well. The nature of the man is well exemplified in the fact that within four or five years after the production of the *Vindiciæ Gallicæ*, his frank and reasonable soul, unfettered by those artificial bonds of consistency which a young man is so often afraid to break, had owned the rashness of his own plea, and abandoned the uncompromising defence of France, which, possible in 1791, was no longer possible after the Terror. His reviews of Burke's subsequent publications on the same subject, brought him to the personal knowledge of the great writer and statesman, to whom he made haste to express his profound regard and veneration. "From the earliest moment of reflection your writings have been my chief study and delight," he says. "For a time, indeed, seduced by the love of what I thought liberty, I ventured to oppose, without ever ceasing to venerate, that writer who had nourished my understanding with the most wholesome principles of political wisdom. . . . Since that time a melancholy experience has undeceived me on many subjects in which I was then the dupe of my own enthusiasm. I cannot say (and you would despise me if I dissembled)

that I can even now assent to all your opinions on the present politics of Europe. But I can with truth affirm that I subscribe to your general principles." This is deeply interesting as affording us an example, very rare in the literature of the time, of the effect produced upon candid and generous minds by the downfall into blood and outrage of the first fair hopes of the Revolution. But Mackintosh carried a peculiarly sensitive mental thermometer, and was always ready to admit those modifications of opinion which life, whether we admit them or not, is sure to bring.

He had not long been called to the bar when he appeared before the world in a series of *Lectures on the Law of Nature and Nations,* delivered, after some demur on the part of the benchers, in the Great Hall of Lincoln's Inn, of which he was a member. It is not to be wondered at that a serious and conservative body should have hesitated before permitting the defender of revolution and of that nation which, for at least one terrible moment, had abrogated law altogether, to discourse upon such a subject under its sanction and authority. But the result justified the confidence which, not without trembling, they had put in him; and his lectures were received with large approval and admiration. His setting forth of the two great institutions of property and marriage as the foundation of relative duties afforded a contrast which men who had lately risen from the first exciting perusal of the *Political Justice* of Godwin would feel in its fullest extent; and his definition of Liberty must have solaced many troubled imaginations, blown up and down by the wild philosophies and still wilder events of the age. "Men are more free," he wrote, "under any government, even the most imperfect, than they would be if it were possible for them to exist without any government at all. They are more secure from wrong, more undisturbed in the exercise of

their natural powers, and therefore more free, even in the most obvious and grossest sense of the word, than if they were altogether unprotected against injury from each other." But this was a wonderful departure from the ideas and hopes of the dawning of Freedom. His disgust with the further developments of contemporary history has all the warmth of disappointment in its strong expression.

"There is nothing in public matters to speak of," he writes in 1800, when the Consulate had just been established, "except the last extraordinary revolution in France, which has rooted up every principle of democracy in that country, and banished the people from all concern in the government, not for a season, as former usurpers pretended, but for ever, if this accursed revolution is destined to be permanent. . . . It is my intention, in this winter's lectures, to profess publicly and unequivocally that I abhor, abjure, and for ever renounce the French Revolution with all its sanguinary history, its abominable principles, and for ever execrable leaders. I hope I shall be able to wipe off the disgrace of having once been betrayed into an approbation of that conspiracy against God and man, the greatest scourge of the world, and the chief stain upon human annals. But I feel," he adds, "that I am transported by my subject to the borders of rant."

The warmth of this revulsion, however, again troubled him when, looking back from a distance and from comparative tranquillity upon all the agitations of this period, he confides to a friend the final form of his matured ideas, "As a political philosopher," he says, "I will not say that I now entirely approve the very shades and tones of political doctrine which distinguished these lectures. I can easily see that I rebounded from my original opinions too far towards the opposite extreme; I was carried too far by anxiety to atone for my former errors." These changes of a sensitive soul, disturbed out of all the traditions of well-balanced thought by the extraordinary events happening around him, are more interesting and instructive to the distant spectator than all the dogmas of consistency;

though at the same time we cannot but admit that such candour has its dangers too, and that the position of a man always conscious that there is much to be said on the other side, has an element of insecurity in it. There were people, of course, who said that James Mackintosh's recantation was brought about by interested motives; it is one of our greatest advantages in the present day that such imputations are rare, and that writers of honourable feeling are slow to suggest a dishonourable motive. The variations of his sensitive mind, as he was thus driven from one side to the other, take an altogether different aspect when we read how they appeared to Bentham looking on with cynical, yet not unkind spectatorship:—

"When I saw you," says the elder philosopher, "enlisted in the defence of a castle of straw, which I had turned my back upon as fit for nothing but the fire, I beheld with regret what appeared to me a waste of talents so unprofitably employed. When I heard of you being occupied in teaching the anatomy and physiology of two chimeras, the same sensation was again repeated. A crowd of admiring auditors of all ranks—and what was it they wished or expected? Each of them some addition to the stock of sophisms which most of them had been able to mount by his own genius, or pick up by his own industry, in readiness to be employed in the service of right or wrong, whichever happened to be the first to present the retaining fee."

After the lectures, which had attracted a great deal of attention, Mackintosh made his way into the more usual honours of his profession. He tells his wife in a letter, of a great speech he had made, which he felt to be full of commonplaces, but which filled "the whole county of Norfolk," assembled at Norwich, with rapture. "Half the court was drowned in tears," and the attorneys, deeply impressed, rushed round him with briefs. Some time after he made a still greater and more important appearance in London, where he defended a certain M. Peltier, an *emigré*, and the editor of a furious little paper called

the *Ambigu*, in which the First Consul had been fiercely attacked. The great Erskine wrote to compliment the comparatively unknown young barrister upon his "most powerful and eloquent speech;" and the counsel for the prosecution began his own address with the expression of a fear that "after the attention of the jury had been so long riveted to one of the most splendid displays of eloquence he ever had occasion to hear," his speech would have but little chance. Immediately after, while the firmament was still ringing with these plaudits, Mackintosh accepted an appointment as Recorder of Bombay, which seems to have been a rather rash and unwary proceeding—a sort of sacrifice of the birds in the bush to the one in hand, which poverty and impatience combined, so often force a man into. It would have been natural to expect that such brilliant appearances would have instantly increased his profits at the bar, and opened a career to him in his profession at home; but, whatever his motives were, the decision was made, and in 1804, with the usual knighthood which distinguishes a judge, but not without misgiving, he banished himself from the scene of all his triumphs to the never congenial sphere of India. "I am waiting," he says, in his last letter written from England, "in hourly expectation of the ship which is to convey me far from those scenes of civilisation and literature in which I once, in the fond ambition of youth, dreamt that I might perhaps have acted a considerable part. Experience has refused my ambition . . . and reason informs me that there is no country in which I may not discharge a part of the debt which I owe to mankind. I do not, however, affect to leave my country without pain." So engaging is Mackintosh's character, and so easy seems the impulse that might have turned him to a better and more glorious path, that vain as is the reflection, it is scarcely possible for the reader not to feel a pang of regret at his rash

abandonment of the field, and a pained and impatient sense of what might have been had he not taken so fatal a step. He was in India seven years, which was so much time lost in respect to his career, a period full of possibilities never to be recovered. He seems to have felt, through all his time of banishment, a sense of the mistake he had made, and there is a kind of sigh in the following note, made on his voyage home, which is more touching than many louder lamentations :—

"It has happened by the merest accident that the *Trial of Peltier* is among the books in the cabin. But when I recollect the way in which you saw me opposed to Percival on the 21st of February 1803 (the day of the trial), and when I compare his present situation, whether at the head of an administration or an opposition, with mine, scanty as is my stock of fortune, health, or spirits, in a cabin nine feet square on the Indian Ocean, I think it enough that I am free from the sourness of disappointment, and I need not conceal from my other self that I feel some surprise."

It was little wonder that he should feel surprise at such a contrast. To be a statesman at the head of imperial affairs instead of a superannuated Indian judge, many men would have accepted the sad and sudden end which put so startling a conclusion to the happier rival's career. Mackintosh came back with a pension of £1200 a year, broken health, and a general separation from all the ways of advancement. A faint possibility, however, that something worthy of his powers might yet open upon him, existed at first. He was offered by Percival, immediately on his arrival in England, a seat in Parliament (the words read curiously nowadays), with a prospect of further promotion afterwards. But he declined to come into the House as a Government nominee on account of his opinion on the Catholic Disabilities. Percival's murder occurred at the very moment when his reply to this offer was written, and none of the political leaders who followed took any trouble about Mackintosh. He found

an independent seat in the House of Commons some time after; and at a later period was made a privy councillor. But this empty honour and the privilege of having right honourable to his name was all he ever came to. Vague intentions of service and much general admiration and well-wishing attended him, beside the appreciation of society for one of the most brilliant and entertaining of its members; but this was all. In 1818 he became Professor of Law and Politics in the Indian college at Haileybury. After his brilliant beginning, and the place which he always occupied in public life, it is strange to see the fine pleader, the experienced politician, the admired conversationalist, a name continually recurring in all the highest records of the national life, drop into such an appointment at last as would not have been too much for him to expect when he started from Edinburgh thirty-five years before, in all the brilliant faculty and hope of youth.

We cannot pass over without notice the friendship which existed between Mackintosh and Madame de Staël, and which associated him constantly for a time with that remarkable woman, whose appearance wherever she went alarmed and excited the men of letters of her day in the most curious way, with a whimsical mixture of panic and dislike. Mackintosh, it is evident, felt nothing of this amusing terror: and the lady proved her discrimination by a warm preference for his society. "She treats me," he says, "as the person she most delights to honour. I am generally ordered with her to dinner, as one orders beans with bacon." She, on her part, made no secret of her regard: "*C'est très ennuyeux de dîner sans vous, et la société ne va pas quand vous n'êtes pas là,*" she writes, and even in Paris finds no one equal to him. It is evident, however, that Madame de Staël had fathomed his character as well as she appreciated it. We find her writing to

Lady Mackintosh of a favourite plan she had, which was to induce Sir James to settle, like Gibbon, on the Lake of Geneva to finish his history. "Que pensez-vous de ce projet ?" she says. "Sir James est un peu incertain de sa nature, et je ne crois point à son histoire si vous n'êtes pas le pouvoir exécutif de cette enterprise." When we read this we cannot but remember the young wife who sat by Mackintosh's side, not venturing to turn the leaf lest she should disturb him while he wrote his *Vindiciæ Gallicæ.* It was a second Lady Mackintosh to whom the brilliant Frenchwoman wrote, and she, though evidently a most congenial and faithful companion, does not seem to have had the strength or patience to be thus the "pouvoir exécutif."

Between the early blaze of eloquence and enthusiasm which dazzled the world in the *Vindiciæ Gallicæ*, and the later works which retain a more permanent place in the literature of the country, there is a long, and we can scarcely help thinking, a painful interval. The *Dissertation on Ethical Philosophy* was not completed till 1830, two years before his death. His history, of which he had begun to compose stray pages during his voyage from India in 1812, changed in form and scope, and, shorn of much of its intended importance, did not begin to appear till the same year. And his most important historical work, that in which his whole powers were put forth, and where he had full opportunity for the development of the philosophy of history, his favourite study, was one which he did not live to complete, and which, so much as was completed of it, was given to the world after his death, without the revision or correction which he would certainly have given, and by hands altogether destitute of his skill and genius. The Revolution of 1688, which was the beginning of a new era in the national life, had thus occupied in turn two of the greatest minds among English politicians and

statesmen at the very end of their career, a curious and touching coincidence. The subject, which had dropped from Fox's dying fingers, fell also from those of the successor whom Fox applauded in his youth, and who, after the struggles and disappointments of a lifetime, took up the half-executed task, only to leave it in his turn a noble fragment, a preparation for greater things. It is hardly possible to think of this but as the filling up of that measure of disappointment, of unfulfilment, which was the lot of James Mackintosh. Had he been able to accomplish this, a certain compensation for wasted life and fruitless hopes might have been his; he would have done what it had been the ambition of the noblest of his party to do, and set forth with all the force of a philosophical inquirer those principles which had changed the face of England and established a new rule, the rule of modern civilisation and reason; through many drawbacks and the absence of all poetic grace, over all the romantic traditions, sentiments, and attractions of the old. It would have been, one might have thought, a way of making up for so many things which had failed in his life and to his hopes. But it was not so. This last and greatest work came imperfect, with burial wreaths about it, maimed and incomplete, to the world: and thus the last word of unaccomplished hope, of a success never so great as it should have been, of efforts balked and labours unfulfilled, was said.

For the sake of the succession and inheritance which followed, we may quote what Macaulay says of his great predecessor.

"We have no hesitation in pronouncing (in the *Edinburgh Review*, July 1835) this fragment decidedly the best history now extant of the reign of James II. It contains much new and curious information, of which excellent use has been made. . . . We expected to find, and we have found, many just delineations of character

and many digressions full of interest, such as the account of the order of Jesuits, and of the state of prison discipline in England a hundred and fifty years ago. We expected to find, and we have found, many reflections breathing the spirit of a calm and benignant philosophy. But we did not, we own, expect to find that Sir James could tell a story as well as Voltaire or Hume. . . . The most superficial reader must be charmed, we think, by the liveliness of the narrative. But no person who is not acquainted with that vast mass of intractable materials of which the valuable and interesting part has been extracted and condensed, can fully appreciate the skill of the writer. Here, and throughout the work, we find many harsh and careless expressions, which the author would probably have removed if he had lived to complete his work. But, in spite of these blemishes, we must say that we should find it difficult to point out in any modern history any passage of equal length, and, at the same time, of equal merit. We find in it the diligence, the accuracy, and the judgment of Hallam, united to the vivacity and colouring of Southey. A history of England written throughout in this manner would be the most fascinating book in the language. *It would be more in request at the circulating libraries than the last novel.*"

As the utterance of the writer who, taking up Mackintosh's subject, exactly fulfilled the prophecy of the last sentence, there is an amusing appropriateness in the quotation. Macaulay, though he belongs to a younger generation, with which at present we have nothing to do, was in this, as in some other respects, the reverse of all that has been said of Mackintosh, a man born to success as the latter was to disappointment.

We began by remarking upon the curious personal attraction which even through the medium of a somewhat dull biography, one figure out of the past, among many who touch us not at all save intellectually and historically, will exercise upon the reader. In this way a tender radiance glows about the name of a man who was not one of those magicians who have a natural spell over our hearts, who was no poet but a philosopher, lawyer, and politician, and who has been set before us by no skilful hand, such as that of those biographers who have made a

distinct revelation of their subject, from great Plato to little Bozzy. Mackintosh had not even this advantage. He shows forth dimly through the opaque medium of his memoirs, or in the merest momentary gleam in the recollections of his contemporaries, but never without the attraction—perhaps of that same quality, first of all, which the keen-sighted old Scotswoman noted, who called him a "spontaneous child." He is always natural, unaffected, answering to the influences of his time, without *parti pris* or thought of his consistency, or of himself at all. We may add from the same critic whom we have already quoted, a few lines full of feeling and affectionate regard, written after Mackintosh's death.

"All the lines of that venerable countenance are before us, all the little peculiar cadences of that voice from which scholars and statesmen loved to receive the lessons of a serene and benevolent wisdom, are in our ears. . . . In his most familiar talk there was no wildness, no inconsistency, no dreaming nonsense, no exaggeration for the sake of momentary effect. His mind was a vast magazine admirably arranged; everything was there. . . . It would have been strange indeed if you had asked for anything that was to be found in that immense storehouse. The article which you required was not only there; it was ready. . . . He was singularly mild, calm, and impartial in his judgments of men and of parties."

James Mill was of the same country as Mackintosh—a Northern Scot, though not of Celtic race. This latter circumstance may partly account for the difference between them, which was as great as if half a world had lain between their places of birth. To come suddenly out of the genial presence of the one into the gloomy companionship of the other involves a greater shock of difference than could we pass in a moment from Italy to Iceland. Mill was one of the sternest and most rigid representatives of that northern race which, notwithstanding the very different qualities of the names which make it illustrious, has so continued to retain its con-

ventional character for harshness and coldness that we are almost forced to believe there must be some truth in the imputation. There would be so if the Devil's advocate could produce many such men as James Mill to counterbalance Scott and Mackintosh as specimens of the character of their countrymen. He was the son of a humble family in the district of Angus; and, as many other promising lads have done, attracted the attention of those about him by his early abilities, and was sent to college to be trained for the ministry of the Scotch Church —the one outlet in which rustic genius was sure of finding an opening. The peculiarity in his case was, that it was not his own family who pinched and scraped to procure him an education, as so many have done, but that he owed his training to a gentleman of the neighbourhood, Sir John Stuart, who divined his powers. When his education was completed, he found himself unable "to believe the doctrines of that or any other church," his son informs us; and though "licensed as a preacher," this grim and formidable intellectual agent never in any way carried out the purpose of his education. After a few years which he spent in the work of a tutor, he boldly launched himself upon London. In one of Bentham's rambling recollections, he describes himself as having "taken up Mill when he was in great distress, and on the point of migrating to Caen" (of all places in the world!). He is said by the same authority to have had an annuity from the nobleman to whom he had been tutor. For some years after their first meeting, his connection with Bentham was very close. "He and his family lived with me a half of every year from 1808 to 1817," the philosopher says. They were in the habit of accompanying Bentham to his summer residence, whatever it might be—to Ford Abbey especially, a beautiful old house which he rented for a number of years, where

the younger man came with "his wife and family and a servant," a large addition to the bachelor household. It was no small proof of the natural amiability of old Jeremy, by this time between sixty and seventy, that he should have tolerated the presence of a brood of youngsters, even when one of them was the wonderful boy, afterwards fully revealed to the world which had previously known only the outside of him, in the autobiography of John Stuart Mill. Many other advantages evidently came to the family from the friendship of Bentham. "I brought him and his family hither from Pentonville," the old philosopher goes on; "I put them into Milton's house (afterwards his own dwelling-place), where his family were all at ease. Afterwards I gave him the lease of the house he holds, and put it in repair for him." This house was next door to his own in Queen's Square Place, and thus Mill was established under his master's wing. John Stuart Mill, very likely unaware of the great obligations of his father to his benefactor, or seeing them from a different point of view, yet adds, in his curious account of his own extraordinary education, his sense that his sojourn at Ford Abbey as a boy was "an important circumstance" in it. "The middle-age architecture, the baronial hall, and the spacious and lofty rooms of this fine old place, so unlike the mean and cramped externals of English middle-class life, gave the sentiment of a larger and freer existence, and were to me a sort of poetic cultivation," he says. The account of the intercourse as reported on both sides is very characteristic. Bentham's is given with a kind of careless liberality, a good-natured half contempt for the circumstances of the poor man, to whom he evidently felt he had been a kind of providence. But the son of that poor man has no idea of any such relationship. "I do not know how soon after my father's arrival in England they became ac-

quainted," John Stuart Mill says with dignity; "but my father was the earliest Englishman of any great mark who thoroughly understood, and in the main adopted, Bentham's general views of ethics, government, and law." A cynic would smile at the difference between the point of view of the conscious benefactor and that of the family he served; a contrast of feeling so common, almost invariable, so long as such relations last, with perhaps a little too much claimed on the one side, and too little given on the other.

Notwithstanding these potential services and kindnesses, however, Bentham was under no delusion as to the amiability of his disciple and companion. "He will never willingly enter into discourse with me," he says. "When he differs, he is silent. He is a character; he expects to subdue everybody by his domineering tone, to convince everybody by his positiveness. His manner of speaking is oppressive and overbearing; he comes to me as if he wore a mask on his face." And there were occasional breaches between them, as is apparent from a strange letter written by Mill to Bentham in Ford Abbey, when they were living under the same roof, proposing that they should separate at the end of the summer, in consequence of some real or supposed coldness on Bentham's part, but that this separation should be effected without a word said, either between themselves or to others — a characteristic way of conducting a quarrel. During the time of this close intercourse "he was writing his *British India*, while I was writing all manner of things," Bentham adds. The *History of India* was Mill's first work, and the foundation of his fortunes. It was the first important work on the subject, and was of the most bold and trenchant character, entering fundamentally into the history of Eastern society and civilisation, and discussing freely, not only the means by which the East

India Company could justly regulate so great an empire, but also the failures and mistakes it had made. "His interests," says Bentham again, "he deems to be closely connected with mine, as he has a prospect of introducing a better system of judicial procedure in British India." That his son should describe the book, in the fulness of years and judgment, as "one of the most instructive histories ever written," is perhaps natural in any case; but it is still, notwithstanding so many new lights, a standard work, and one which no student of the affairs of that wonderful country could pass by. There could be no better testimony to the sense and judgment of the directors of the East India Company than the fact that the daring critic and historian, who had not certainly aimed at pleasing them in any way, received very shortly after the publication of this book an appointment in their service of the most responsible description, as one of the "Assistants of the Examiners of Indian Correspondence, —officers whose duty it was to prepare drafts of despatches for India, for consideration by the Directors." Thus uncompromising honesty and courage received their reward in a way by which rewards are but seldom attained.

After this Mill's career was prosperous, and his future assured. He had leisure for a considerable deal of miscellaneous literary work on the *Edinburgh*, and afterwards, when that was established under Bentham's auspices, on the *Westminster Review*, and replied in a hot and vigorous "Fragment on Mackintosh," to the strictures made upon Bentham's utilitarian system in Sir James Mackintosh's Dissertation. His *History of India* and *Analysis of the Human Mind* are his chief works, and would have been about all we should have known of James Mill but that he produced—a thing more rare than any history—one of the strangest compounds of human qualities and paradoxes which the world has known, a son, John Stuart

Mill, already quoted, faithfully named after his ancient patron, and the object of the most astounding training to which any unfortunate soul was ever subjected. The character of the man shines through the beginning of his son's autobiography as a light through a lantern. The picture thus afforded to us of a wondering half-scared child, whose keen uncommon intellect was able to respond like a machine to the guiding touch, with little sense of what was being accomplished in it—and of the father, alarming, serious, almost awful, a strange demi-god, unrelenting, but not unkind, enduring with a kind of stern patience the boy's appeals and mistakes, and bearing him up with the compulsion of a strong will and untiring soul into regions far beyond the commerce of a child, is very curious and interesting. With the same indomitable perseverance and patience which were necessary to enable him in ten years' time, besides the constant necessities of pot-boiling for a large family, to write the *History of India*, this extraordinary Scotsman set himself to re-create a human soul, and did it triumphantly, making of a susceptible and sensitive nature, full of attractive weakness, credulity, and sentiment, an infant freethinker, a baby philosopher, a scholar in petticoats—a man, when he grew up, who knew almost everything except himself, and whose rigidity of second nature, the art and influence of his father, never ceased to jar against, yet never overcame, the docility and softness of the first. In the strange household thus revealed to us, there is no shadow of any woman, no sound of domestic chat, no genial companionship of brothers and sisters, but only a prolonged encounter of two wits, the one teaching, the other listening and obeying; the man without ruth or thought for the flesh and blood he is straining, the other with innocent child's eyes fixed upon that prominent figure, ready to follow till he dies. The only thing it

reminds us of is the painful training of a young acrobat, where the child obeying a lifted finger goes sheer on to risk any fall or mutilation, or death itself, nothing being worse to its scared faculties than the beating or vituperation which a mistake would occasion. Mill did not either whip or vituperate so far as appears, but his son, we can see even in the record, has his eye nervously, constantly, upon him from beginning to end : and a more extraordinary exhibition of the mental force which one nature can exercise upon another never was.

There are few things more curious than the revelation of such a mind and story, and it is a testimony to what we may call the universal imagination, the rudely symbolic faculty by which human nature classifies character, that this perfectly sincere and honest individual, in mind so much above the common level, in character so unusual, is the very embodiment of what we call the conventional, the popularly invented and received type—at once of a philosophical tyrant, a severe father, and a Scotsman. His tyranny was entirely well meant, his severity adapted to what he considered the loftiest ends, and his nationality swamped by convictions very different from those which belong generally to his race. Yet had it been given to any imaginative writer on a commonplace level to invent an intellectual Scot, it would have been a vulgarer Mill whom he would infallibly have set before the world. In his son's record, James Mill attains, as is not unnatural, an importance not elsewhere given to him, and, indeed, figures as almost more the inventor of Benthamism than Bentham himself. He was, at all events, one of the strongest and most able upholders and exponents of the Utilitarian philosophy. The master and the disciple diverged in later days from each other, in sympathy at least. Mill became independent of Bentham's help, and naturally his time was no longer his own when he entered

the India House and finally attained that independence: and other disciples arose who, perhaps, did not please the stern and exacting temper of one who felt himself the chief expositor of the veiled prophet; but the master never ceased to interest himself in the schemes of the disciple, nor the disciple to explain and reiterate the dogmas of the master. Bentham would seem to have shared even, to some extent, in what we have called the greatest production of Mill, the creation of the mind of his son. The following letter, written evidently in the view of some generous arrangement on the part of Bentham to promote the boy's interests in case of his father's death, has something touching in it. It was written before Mill had begun to see land, while he was yet in the midst of his difficulties, living with Bentham half the year and struggling through the remainder as he could. The child in question—strange little subject of so many philosophical experiments—was but six years old.

"I am not going to die, notwithstanding your zeal to come in for a legacy. However, if I were to die any time before this poor boy is a man, one of the things that would pinch me most sorely would be, the being obliged to leave his mind unmade to the degree of excellence of which I hope to make it. But another thing is that the only prospect which would lessen the pain would be leaving him in your hands. I therefore take your offer quite seriously . . . and then we may perhaps leave him a successor worthy of both of us."

Many a parent has entertained similar hopes, and has been woefully disappointed. Mill was one of those happy enough to see all his hopes carried out. The result has been a spectacle to all the world, regarded by few with approval, by all with astonishment; but from his own point of view there can be no doubt that the philosopher-father secured a success far sweeter and more complete in this particular, than by his works either of philosophy or history, a success not made in pen and ink but in flesh and blood.

The names of Malthus and Ricardo have a right to a place in any record of philosophy, though scarcely in literature. They are little more entitled to be called writers than those who avail themselves of the arts of design, for the purpose of making mathematical diagrams, are to be known as artists. Literature is with them simply a vehicle for the conveyance of their theories to the world. Malthus was a well-born Englishman of the class of country gentry, and was educated at Cambridge, where he became a Fellow of Jesus College. He was a clergyman and held a cure in the Church for some time, but ended as a professor at Haileybury, where Mackintosh found him, and found in him a congenial soul when he accepted a similar appointment there. It is difficult to understand what caused the violent prejudice and obloquy with which his book upon population was received. A sort of madness seems to have affected his generation on this subject, as if it had been immoral to discountenance imprudent marriages, or to recommend to his countrymen the thought of ascertaining their own capacity to support a family before venturing upon the cares of one. Such sentiments are universally applauded in private, and why the public statement of them should have been attended by odium it is impossible to divine. Whether his calculations were altogether trustworthy is, of course, a totally different question. The works of Ricardo were entirely on Political Economy, works of the greatest importance in that science, but scarcely coming within our range as literature at all.

THE UTILITARIAN THEORY.[1]

The history of philosophy, in this age, is prominently that of one system only. Apart from the echoes of the

[1] By C. F. Oliphant.

Scotch school, in which Dugald Stewart, by his lectures, attracted listeners from far and near, its principal interest centres in one theory and, to a great extent, in one man. Stewart, in all probability the greatest philosopher of the age, did not, in spite of his ability, attain to the important position that was yielded, without opposition, to Jeremy Bentham. This man, contradicting everybody, arrogating to himself a higher place in the philosophical world than Aristotle or Bacon, attracted the attention of his time not more by the startling originality of his doctrines than by the imperious self-assertion with which he laid them down. Even so strong a mind as James Mill's came entirely under the mysterious subjugation, which seems to have been one of the chief powers of Bentham's intellect, and he treats the assaults made upon his master by Sir J. Mackintosh much in the same tone in which an earnest theologian would comment upon the published opinions of an avowed atheist upon matters of religion. The political controversies of the time are chiefly concerned with Bentham's new system; it forms the basis upon which Malthus built up his much discussed theories on population, and it is not too much to say that the history of the philosophy of the age is the history of Bentham and of utility. It is as the champion, or rather the inventor, of the utilitarian theory that Bentham claims for himself the highest place in the history of philosophy; it is in the same character that Mackintosh devotes all his powers to his annihilation, and it is again on the same ground that Mill takes up his defence against Mackintosh. The theory of utility is the only original philosophy of the period; the really more important school of the Scotch professors belongs properly to an earlier date, and Dugald Stewart, conspicuous as he was as an exponent and historian of philosophy, shone little as an original theorist, the doctrines which he laid before his delighted

classes being those which had been introduced by his master and predecessor in the chair which he occupied, Reid. Teaching no new truths, he was still unrivalled as an expositor of doctrines already set forward, and Mackintosh goes so far as to say of him that "without derogation from his writings, it might be said that *his disciples were among his best works.*" But, even granting Stewart's supremacy as a teacher, as a theorist Bentham is undoubtedly the centre round which the philosophical activity of the period before us groups itself. The circumstances of the time were all in favour of the success of a new school: a state of affairs familiar enough to the ancients, but never satisfactorily treated, or even really appreciated by modern philosophers up to this time, now called for a return, more or less complete, to the tenets of the ancient masters. The impossibility of distinctly separating from each other the principles of moral and political science was one of the truths most apparent to the ancient philosophers. It was their favourite theory that there could be little difference between the principles upon which an individual ought to order his own life, and those upon which a legislator ought to order the affairs of the state or nation subject to him. Hence the two researches could be carried on side by side, and when we had once found out the highest rule of living, we might be fairly certain that we possessed also the guide to perfect legislation. But at the time when Bentham arose this principle had fallen into comparative neglect, and though for some time past the problems of legislative science had been brought prominently before the eyes of all thinking men by the events of a troubled period of history, and had been solved in ways more or less concordant with the generally received maxims of political philosophy, yet such problems still remained as isolated difficulties overcome by exceptional means, with-

out there being any clear perception of a general principle, applicable in every case, and showing the way out of all difficulties. Adam Smith, who preceded Bentham in the field of Political Economy, had confined his attention almost entirely to the sphere of that science, devoting himself to the practical difficulties connected with national wealth, but making no attempt to arrive at a general principle of political philosophy as a whole, legislative as well as economic. It was this general principle that Jeremy Bentham attempted to produce, and to find it he had to go back to the old connection between moral and political science. But though the idea with which he begins is an old one, he makes it his own at once by beginning, as it were, at the other end of the system. To Aristotle Ethics were a part of Politics, because a man could only be properly considered as a member of a community, and his happiness was a consequence of the happiness of the community to which he belonged. To Bentham, on the contrary, the individual is the chief consideration; to him "the community is a fictitious *body*, composed of the individual persons who are considered as constituting as it were its *members*. The interest of the community then is what?—the sum of the interests of the several members who compose it." In short, to the ancient philosopher the individual was nothing more than a member of the community; to the modern the community was nothing more than an assembly of individuals.

It was in this conception of the community and of its true interests that Bentham found the theory which made him so conspicuous a figure in his own age, and has raised him to such prominence in the general history of philosophy. If the community is to be considered as nothing more than a mass of individuals, then naturally the happiness of the greatest number of those individuals must occur to every one as the obvious synonym for the happi-

ness of the community, and the ultimate end to which all the actions of its members should tend. And with still stronger force it is apparent that if all moral actions should proceed from a desire to promote the happiness of the greatest number, legislation, which places the interests of the community in the first rank, should always be governed by the same principles of utility, and that no laws are good which do not tend directly or indirectly to produce the same effect. As an example we may instance the laws on usury which have been universal in all countries, by way of limiting the power of the rich lender over the poor borrower, and preventing what had been found to be one of the cruellest of individual wrongs. Bentham entirely disapproves of these laws, on the ground that every artificial means of controlling the operations of money and trammelling its circulation, is against the interests of the mass, always benefited by that circulation, however individuals may suffer. In this, as in every similar question, individual interests are to give way and individual wrongs to be accepted as a necessity, unpleasant indeed, but not sufficiently important to arrest the career of "Utility," the greatest happiness of the greatest number. Here, as in most of the purely theoretical parts of his system, it is difficult to deny that, as a principle of legislation, this sounds eminently reasonable.

In questions of moral science, however, his theory is open to opposition on one or two of those principal and ever open points of esoteric philosophy, the examination of which hardly comes within our present scope. It will be enough to state briefly that Bentham strongly espouses one side in the great controversy as to whether our actions are inspired by our reason or by something else; or, in the usual terms, whether the ultimate motive of moral action is something within ourselves or something external to ourselves. The theory of morals which he wishes to

establish fixes the ultimate motive as something which he calls pleasure, which determines our actions from without, while our reason only plays the ancillary part of elaborating the steps by which this end may be attained, without being any real authority upon the question of the desirability of its being attained. The two motives for moral actions laid down by this particular theory are the ideas of pleasures and pains; that is, the ultimate motive of action is the realisation of a pleasure or the avoidance of a pain. "Take away *pleasures* and *pains*," says Mr. Bentham, "and not only *happiness*, but *justice* and *duty*, and *obligation* and *virtue*, all which have been elaborately held up to view as independent of them, are so many empty sounds." A little later on, to prevent all doubt as to the thorough exclusion of reason in constituting these ends our motives for action, we have the further explanation, "It is no otherwise than through the *imagination* that any pleasure or any pain is capable of operating in the character of a *motive*." (In both the passages quoted, the italics are Bentham's.) This theory, which makes the motive an idea conceived by the imagination to which the reason guides our actions, has been called the Determinist theory, as determining our acts from without, and to this Bentham appears clearly to have given his adherence.

The word pleasure, too, brings Bentham again into the region of ethical controversy. Like all moral philosophers from Plato and Aristotle downwards, our modern theorist gets entangled in the attempt to make "pleasure" a chief point in his system of morality. His vague and speculative idea of pleasure, to be conceived apparently in the abstract, entirely apart from any conditions, can convey very little practical idea to the mind. It is a phantom as impossible to grasp as the most indefinite of the Platonic ideals.

In political philosophy the points which he thinks of essential importance, are, to a great extent, identical with those subsequently demanded by the Charter. Universal suffrage he regards as indispensable, with the concomitant points of secret voting, annual parliaments, and the payment of members of the House of Commons. So far, these are the mere commonplaces of political philosophy; plans brought forward from time to time by theorists, and likely to be so brought forward again and again, until either they are accorded, or a decisive proof is given that their attainment is hopeless. But, save in one particular, these principles have not as yet gained favour in this country, notwithstanding the gradual enlargement of the franchise to an ever wider and farther-reaching sphere; the ballot, the sole particular in which his plan has been realised, is still on its trial, and does not seem to have carried out the hopes founded on it.

The real objection to Bentham's political philosophy is its universality; the theory of utility is essentially one which, if true anywhere, must be true everywhere, a characteristic useful, and even necessary to a sound theory of morals, but an important if not a fatal objection to a theory of political government. Every great problem that has yet arisen in this sphere has tended still further to enforce the truth that no universal theory of government can be laid down which will not have, in all its practical workings, to be modified according to the different customs and circumstances of different nations. These special circumstances may affect a theory in so many ways, as to the ease with which it can be introduced, the practical utility of its introduction, and the difficulties in the way of its execution, whether from already existing adverse prejudices, or a general want of respect for its provisions, as to make it impossible for any man to lay down an absolute rule for the government of a nation with anything

like the certainty which may be claimed for a similarly universal rule for the regulation of individual characters or actions.

Bentham's first published work, entitled *A Fragment on Government*, was nominally an examination of a passage in Blackstone's *Commentaries*, but the germs of all his subsequent theories are to be found in it. In this he first announces his zeal "for improvement in those shapes in which the lot of mankind is meliorated by it," and declares his indebtedness to a pamphlet of Priestley's, then recently published, for the phrase which had struck his mind so much, "the greatest happiness of the greatest number," the sentence which he afterwards made his motto. His subsequent publications include many pamphlets on the special political questions of the day, including the celebrated *Defence of Usury*, but the principal works by which his distinctive theory is illustrated are the *Introduction to the Principles of Morals and Politics*, and the *Discourses on Civil and Penal Legislation*, published respectively in 1789 and in 1802.

Sir James Mackintosh has gained the name, enviable or unenviable, of the man who *should* have been the most important figure of the time, just as Bentham has the reputation of *being* the central figure. James Mill is perhaps the only philosophical writer who has failed, purposely perhaps as a disciple of Bentham, to acknowledge his pre-eminent merit. As a historian of the philosophy of the period immediately preceding his own, and that of which he formed a part, he has gained by his *Dissertation on the Progress of Ethical Philosophy* a reputation second to none. His general qualifications as a historian of philosophy may be well illustrated by the opinion of Sydney Smith, who says that "he had looked into every moral and metaphysical question from Plato to Paley." And it is less as an original theorist in either morals or

metaphysics than as a critic that he claims our attention. His own theory of the motive of moral action he derives to a great extent from the philosophers who preceded him; in fact he says himself that Dr. Butler's three first sermons are the real source of all his moral philosophy. The importance of the moral sentiments is the chief ground upon which he works, though his sympathy with Hartley's principles of association makes him develop them into the ultimate motive power which he calls conscience. The point about him, however, that we have most to regard at present is that he was one of the few men of his time who emphatically declined to accept Bentham's estimate of his own importance in the sphere of philosophy, and declared to the world which he had enslaved that his theories were based upon unsound foundations, expounded in unintelligible terms, and capable of no sort of practical application. The phraseology in which Bentham has chosen to set his theories before the world must have struck everyone who has even dipped into his writings. Not only does his wish to take in strict order all the notions contingent upon the idea which he may chance to be enunciating lead him into the confusion of endless parenthetical sentences, but his dissatisfaction with the usual phrases of moral philosophy then familiar to the popular mind tends to make his utterances difficult of comprehension. To take one instance among many, there is probably no phrase more familiar to everybody than that we do a thing because we *ought* to do it: to this mode of expression Bentham has an insuperable objection, and suggests that whenever the word "ought" is used we should retort "why?" The answer to this last question would, of course, from his point of view, be because it tends to the general happiness, but it is difficult to think that this sort of phraseology can be as intelligible, and consequently as useful in practical crises as that which is

more familiar to us. Mackintosh's vehement objections to Bentham's theories are chiefly founded upon one great charge, well enough known to all who have gone at all seriously into the abstruse discussions of the different modern theorists in the realms of moral philosophy. He accuses Bentham of having made the inexcusable mistake of confounding the *Theory of Actions* with the *Theory of Sentiments*, or, in other words, of making no distinction between the mental process which precedes and originates moral actions, and the standard or criterion by reference to which we approve or condemn such actions. There is no doubt that in most of the systems of moral philosophy with which we are acquainted these two points are invariably kept distinct and separate; in fact, there is perhaps no principle, save that of Utility as understood by Bentham, which could combine the two in the way that he does. But it seems to be a mistake to charge Bentham with making a blunder in this. The explanation which suggests itself is that Mackintosh did not perceive that this confusion of two distinct ideas was not the blunder that he considers it, but was intentional on the part of Bentham, and that the theory originally designed to bring under one head the problems of moral and political philosophy, was equally framed with a view to simplify the difficulties of the former by bringing to one main test those of both its branches, and making the origin of our moral actions itself the criterion by which our approbation of them is to be regulated. Sir James's objections, in short, may fairly be deemed arguments, and to our mind most cogent arguments, against Bentham's system; but we cannot for a moment conceive that Bentham made the confusion alluded to otherwise than purposely. It is from its effect, intended or accomplished as it may be, in unifying or bringing under one head a vast number of different questions that the principle of Utility derives its chief import-

ance. That its tendency to increase the general happiness is an element, and a considerable element, in the goodness of an action, no one could venture to deny, but Sir James Mackintosh, with the bulk of modern philosophers, while acknowledging this, yet made the distinction that, while the idea is inseparable from our notion of moral approbation, it is entirely and easily to be distinguished from the sources of our moral action. To Mackintosh the supreme sanction, which with him comes to the same thing as the ultimate general motive of our actions, is the authority and influence of conscience, which he separates from reason. The chief opposition that he seems to fear is that of the school who term all appetites and all affections the result of "self-love," and, taking this term as his text, he proves that self-love can be, and probably is, absent from the state of mind from which benevolent actions emanate, and that even the appetites which might fairly be deemed selfish may be entirely independent of the supposed supremacy of "self-love." Mackintosh's theory is really more akin to the old, and even then exploded, theory of sympathy than to any other system before him, but his adoption of the ultimate sanction of conscience keeps us still in the difficult position of having nothing tangible, nothing about the meaning of which all men are agreed, to go by. The indefiniteness (practically) of his own system is not much less than that of the ideas against which he is striving.

So strenuous an opponent of Bentham's theories could not but find a severe antagonist in James Mill. Himself a moral philosopher of no mean eminence, he can scarcely find any heavier charge against Mackintosh than that he condemned and even scoffed at Bentham. His first remark upon the connection sufficiently illustrates the tone of his subsequent observations: "Sir James has made the most perfect exhibition of himself in the article on

Mr. Bentham." He goes on, in the same spirit, to remark that Mackintosh's language proves him "to have been a man who, in speaking of others, to serve a purpose, little minded whether he was speaking correctly or incorrectly." Not even the most ardent admirer of Bentham's theories could call this a fair way of commencing a review of any criticism of any philosophical system. Mill's remarks on Mackintosh are throughout rather unfair, but the *Fragment* cannot be fairly estimated unless we attempt, which is not our task at present, a thorough review of the works of the man whom it condemns. Why Mr. Mill should have chosen for refutation the statements that Bentham and his followers "braved vulgar prejudices," and that in their phraseology and otherwise they "sought distinction by singularity," it is difficult to guess, unless it means, that, as a horse-dealer is always most eloquent in praise of the worst points of the animal which he is selling, so Mill lends his support to Bentham against the accusations which he knows to be truest.

James Mill's chief work is the *Analysis of the Human Mind,* in which he does his best to make an enlargement and illustration of Bentham's theories into an original work. His first step is the division of our states of consciousness into *sensations, i.e.* the class of feeling "which exists when the object of sense is present," and *ideas, i.e.* "that which exists after the object of sense has ceased to be present." After careful analysis of these two heads, and a dissertation upon language and nomenclature, in which we find most probably the source of the stress laid by his son upon the importance of thoroughly appreciating the exact signification of words in the study of Logic, Mill proceeds to condemn the ideas previously held about consciousness and conception, which had been called "powers of the mind," an expression which, after the perusal of all Mill's arguments, still appears more expressive than the

phrase of "states of the mind" which he wishes to substitute for it. The only point in which Mill goes a little beyond his master is in his extended use of the principle of association; like Bentham, he separates sensations into pleasurable and painful sensations, but the theory of the association which forms many individual ideas, first into one complex idea, and subsequently into a generality, goes rather further than Bentham chose to venture. But this generality it is hard to realise, for "when an idea becomes to a certain degree complex, from the multiplicity of ideas it comprehends, it is of necessity indistinct." General ideas, such as, for instance, the idea of "man," which Mill himself selects, are, according to his theory, only to be acquired by the association, or, so far as we can gather, the agglomeration of individual ideas, and even then must be to a certain extent vague and indefinite.

Besides the *Analysis of the Human Mind,* and the *Fragment on Mackintosh,* which, though we have treated it first, was the last of Mill's philosophical works, he published nothing in philosophical literature worthy of notice except the *Elements of Political Economy,* which is no more than Bentham without his cumbrous phraseology.

The mention of Political Economy in this age, brings before us the name of a much-abused man, Mr. Malthus. In the one branch of the science to which he devoted himself, he may be said almost to have created a new school, and *Malthus on Population* will be quoted as an authority, whether with favour or disfavour, so long as this particular branch of Political Economy continues to occupy the minds of theorists. On general points, though a great deal of his attention is devoted to details, the subject of his work may be described as the ratio of the population of a country to the food which the land can produce for their support. It must be remembered that

Malthus wrote in an age of Protection, and that the prevailing idea of the time was that the population of a country was to be fed by the produce of that country; and, things being as they were, it was a somewhat alarming revelation when he proved that, whereas the population tended to increase in a geometrical ratio as 1, 2, 4, 8, etc., the food-producing capabilities of the land could only be made to increase in an arithmetical ratio, as 1, 2, 3, 4, etc. This being so, the writer's attention was naturally directed to the possible checks on the increase of the population, and it is for this that his name has been held up by pseudo-philanthropists to the abuse of the easily-led portion of mankind, as a man devoid of sympathy towards the poorer classes, a cold-blooded statistician with an utter disregard of the feelings of the people about whom he writes. As well might a doctor, who prescribes unpleasant medicines, be called hard-hearted; all that Malthus does is to point out the fact that an evil exists, and that there are remedies, some always present and always working, and some which, in contradiction of those which do exist and should not, should exist, and might exist, but as a rule, do not. Some of the checks to population may perhaps be taken as being between these two extremes, such as utter destitution, compulsory military service, the prevalence of epidemic disease or any similar cause; but apart from such more or less exceptional checks, Malthus divides his remedies into these two classes—firstly, preventive, meaning such as are instituted by the action of reason and prudence, such as the avoidance of marriage without the prospect of being able to sustain a family; and secondly, positive, by which he implies such checks as rise unavoidably from the laws of nature, and which he classes as misery, under which head comes the utter destitution mentioned above, with the addition of severe labour, unwholesome occupations, bad

nursing, or undue exposure to the weather. All forms of vice too are positive checks, but these are of the kind which have to be taken into consideration only because they exist, and the continuance of which the most ardent opponent of the excessive increase of population cannot wish. If, upon these principles, Malthus is to be criticised in such terms as everyone must have heard used about him, it is difficult to know what social system can be so framed as to escape censure.

Malthus published one essay upon the *Principles of Population* before he gave to the world the work upon which his reputation is founded. Among many treatises upon the different points of Political Economy raised in his time, an *Inquiry into the Nature and Progress of Rent, and the Principles by which it is Regulated,* published in 1815, is perhaps the most important.

HENRY HALLAM, born 1798 ; died 1859.

Published View of the State of Europe during the Middle Ages, 1818.
Constitutional History of England, 1827.
Introduction to the Literature of Europe in the 15th, 16th, and 17th Centuries, 1837-39.

JOHN LINGARD, born 1771 ; died 1851

Published Catholic Loyalty Vindicated, 1805.
Antiquities of the Anglo-Saxon Church, 1809.
History of England from the first Roman Invasion to the Accession of William and Mary, 1819-1830.
And many polemical pamphlets.

THOMAS M'CRIE, born 1772 ; died 1835.

Published Life of John Knox, 1812.
Life of Andrew Melville, 1819.
Suppression of the Reformation in Spain, 1829.

JEREMY BENTHAM, born 1747 ; died 1832.

Published A Fragment on Government, 1776.
View of the Hard Labour Bill, 1778.
Principles of Morals and Legislation, 1780.
Defence of Usury, 1787.

Rev. THOMAS ROBERT MALTHUS, born 1766 ; died 1834.

Published An Essay on the Principle of Population, 1798.
" " enlarged in 2d edition, 1803.
An Inquiry into the Nature and Progress of Rent, 1815.
Principles of Political Economy, 1820.
With smaller works on Political Questions, the Corn Laws, Poor Laws, etc.

CHAPTER XI.

THEOLOGIANS.

It is hardly possible to reckon so important a name as that of Paley as belonging to the period within which we are limited. It is true that his last publication, and one of his most important, came before the world only in 1802, but neither in his life nor his work was there any variety from the moderate religiousness and scientific dignified apologetics of the eighteenth century, to which he belonged. His first publication on Moral Philosophy appeared to some of Bentham's friends to be likely to "take the wind out of the sails" of the Utilitarian system, and alarmed them momentarily, eliciting from the philosopher himself a half cry of panic. But this alarm seems to have been without foundation. Paley's works, whether judiciously or not we need not pause to inquire, are still text-books at the universities, but the scepticism against which he sets his forces in array was not of the kind to which we are now accustomed, which takes much of the force from his defence. They are still however eminently readable in a merely literary point of view, and extracts might be made, in which the reader would find much happiness of expression and force of illustration, without any of the disadvantages of antiquated polemics. Dr. Watson, the Bishop of Llandaff, who lived for some time, almost a neighbour of the poets, on the edge of the

Lake country, and in his day too defended Christianity, without perhaps any very warm enthusiasm for it, requires mention at least. Godwin dedicated to him a volume of the sermons which he had preached in the earlier part of his career, which was, perhaps, but a doubtful compliment to his orthodoxy. Dr. Horsley Bishop of St. Asaph, Dr. Beilby Porteous Bishop of London, and Dr. Marsh Bishop of Peterborough, can scarcely be said to exist save to students of the most dusty shelves in theological libraries. Dr. Hartwell Horne, the author of the *Introduction to the Study of the Scriptures,* is better known and holds a more living place: but even he still lingered in the eighteenth century, and cannot be called a man of his time.

It is not, however, in detached names or treatises that we find the special religious interest of the age, but in the predominating Evangelical party then in full zenith of its power in England, first in all great and good works, and attaching to itself not only the most devout but the most benevolent and philanthropic spirits of the age. The men who with the hard labour of twenty years won from England the abolition of slavery—a step which cost so much in actual expenditure, and by which the nation ventured nobly upon a great sacrifice and effort for abstract right with doubtful results—belonged, without exception, to this straitest of religious communities. These men can scarcely be said to belong to the history of literature, but they all dabbled in composition more or less, pouring forth pamphlets, speeches, pleas of every kind, masses of evidence, and appeals full of the eloquence at least of sincerity, and glowing earnestness and zeal. Among these guides and leaders, however, were some whose gift of speech was indisputable, and who have left behind them volumes of sermons and essays and church histories which have supplied reading for thousands of devout persons, and have been considered by their readers

as something almost divine—as far superior to the less sacred array of books, as heaven is to earth: for the finest poetry, the highest philosophy, is not read by half so extended an audience, or regarded with half the admiration which a popular book of sermons will call forth. To a great mass of our countrymen, even now, such productions embody all that is known of literature.

Still more was this the case in the beginning of the century, when books were neither so cheap nor so plentiful as now; and when the Evangelicals were at the height of their power. We doubt much whether any extended religious movement can ever exist, especially among the millions, which is not strongly leavened with those views which are identified with the Low Church party. The claims of Church and priesthood do not touch the heart of the populace, and we doubt greatly whether all the splendour of a restored ritual would ever have the same effect upon the English crowd as the homely excitement of a prayer-meeting, or the emotional preaching of one who acknowledges himself to have been the greatest of sinners. In the time of which we treat, the zeal of Evangelical religiousness was penetrating among the wealthy, as it had already become supreme in the lower classes. It was the time when the "Clapham Sect" was at its height, when Simeon at Cambridge was proselytising with all his might, and sending forth, in all the warmth of a propaganda, the young men whom he converted; when Isaac Milner, Dean of Carlisle, a large and jovial figure full of genial force and breadth of life, recommended the self-denying doctrines of modern Puritanism by the warmth of his *bonhommie* and enjoyment of that existence which he fervently believed to be a perpetual struggle against the world and sin; when Wilberforce wrote his *Practical View*, and prayed and fought, and talked and jested, with the same mixture of oppressive

doctrine and gay spirits; when brilliant parties ended with exposition and prayer, and society itself was almost persuaded in the midst of corruption and license to be converted too. Religious life has rarely gone through a more remarkable phase. It was to break up after a time, and give way to the germ of reawakening Catholicism and the attractions of tradition in the Church of England: and in a less important, yet scarcely less interesting way to find an outlet, bursting its husks, and pressing into a higher air of enthusiasm, in the movement of new zeal and high-toned spiritual life, which has been connected with the name of Edward Irving. But, in the meantime, the Evangelical party was supreme, doing all the good that was being done, aiming at every benevolent enterprise and effort of salvation that came within its reach, seeking freedom for men's bodies and for their souls, and believing that it had found a way by prayer and preaching, and the glow of social piety, to reconcile the Church and the world.

The incongruous point which has always cast a certain air of unreality upon a society so truly pious and full of good deeds and great effort, is the contrast between the ascetic side of Christianity—the self-denial which was the chief of virtues, the injunctions to come out of the world and be separate, the denunciation of worldly pleasures and gaieties which were its dogmatic utterance—and the extremely prosperous, luxurious, and enjoyable life of the leaders of this religious party. When such doctrines are preached by apostles who go out scripless and shoeless, with their lives in their hands: when they are put forth by ascetics worn with toil and fasting, by men whose self-abnegation is evident, whose life has no solace but God's service, of whom we can even feel, with a high sense of fitness, that they have served God for naught and depart to their recompense in another world, having had none in this

—there is nothing that jars upon our feeling of harmony and appropriateness. But when the same sentiments are preached by the happy and wealthy, men with all the enjoyments of life about them, sitting at luxurious tables, surrounded by happy families, successful in everything, moving in a circle of admiration and love and praise, yet bidding us all the time to come out of Babylon, to love not the world, to regard life as a struggle and this earth as a vale of tears, there is at the best an inappropriateness in the preaching, which, certain as we are of the sincerity of the preachers, perplexes the sympathetic and brings a laugh from the cynic. The picture of the Clapham Sect living in those luxurious villas, with everything that wealth could command, in a pleasant commotion of congenial society, hushed and sanctified by the prayer-meeting, but still full of amusing talk, of delicate flattery, of the very atmosphere of pleasure, is as bright as any picture of society could be, but it does not harmonise well with the tenets of world-renunciation and self-denial. There is no reason why they should not have been happy and enjoyed themselves,—neither was there any reason why Henry Martyn, the devoted missionary, should not have had twelve hundred a year from the Indian government. Nothing can take away from the certainty of his real devotion, his almost martyrdom, "yet the ideal would be better without" that comfortable income, as Sir James Stephen says. And so we feel that the ideal of a Church militant, of a band who in the world are to have tribulation, and who were eager in claiming for themselves all the characteristics of those who were desired in their utter humiliation and poverty to take no thought for the morrow, would have been better had they been less rich, less happily off, less safe from all the assaults of fate.

This, however, though it explains the secret sentiment, not strong enough to be called suspicion, with which this

party has always been regarded, the imagination being instinctively displeased by their luxurious wellbeing, is at the best a fanciful objection. And it is better to indicate who they were and what their connection with literature, than to discuss the curious intricacies of nature which make it possible to combine the precepts of asceticism with all the comforts of life, and yet be perfectly sincere both in the profession of the one and the enjoyment of the other. Of William Wilberforce, and of his work and character, everybody knows something. He was the most remarkable and distinguished of the four indefatigable champions whose untiring exertions procured the abolition of slavery—which is fame enough for a man. For twenty years, in season and out of season, he urged upon the country and upon Parliament the horrors of slavery, the shame and sin to a free and Christian people of holding slaves. It has happened on several occasions since then, and notably in our own day, that England has done a thing which cost her a great deal both in purse and feeling, and of the advantage of which nobody was quite convinced, because it was right. The abolition of slavery was one of these. It ruined one of our wealthiest dependencies, it took a great deal of money out of the national pocket, it has not turned out all that hope suggested it might; but, nevertheless, it is a thing which it is impossible to regret, as it was a thing impossible to refuse: and to Wilberforce and his associates, Thomas Clarkson, Zachary Macaulay, and Grenville Sharp, belongs the immortal credit of having convinced and persuaded the national mind that it was impossible. Before he had entered upon this warfare, however, when a young man just leaving college, gay, witty, wealthy, with all the world before him, and no disinclination towards its pleasures, Wilberforce had become a member of the party with which all his life was henceforward associated. The religious

teachings which had guided his childhood had been thrown off in the freedom and turmoil of youth, but he was still a young man at the opening of his career when these severe and absorbing doctrines became the deliberate choice of his excellent intellect and fervent heart. The piety of his early home had been inspired by Whitfield, and the wave of religious revival of which he was one of the chief agents; but the fervent religious feeling of Wilberforce was of a different type from that which went out into the highways and hedgerows to compel the poor and neglected to come in. His was not the fashion of mind which naturally seeks the brotherhood of the poor, or yearns over the ignorant masses. There was another work to be done in England, a work which should supplement and complete the work of Whitfield and Wesley. It had been the common people who had heard them gladly, as their prototypes in Judea heard a greater than they. But the other half of the world—the educated, the well-off, the people to whom no missionary or evangelist got access, whom the wandering preacher at the street corner moved only to contempt or resentment, by what means were they to be reached?

Wilberforce's sympathies were all among this higher class. He was as fond of society as he had been before his conversion. An active member of Parliament, a man in full intercourse with the world, and amid all the excitements of public life, street-preaching or personal effort among the miners or the cotton-spinners would have been entirely out of his way; but he could speak to the people about him with at once a warm brotherly sympathy and the authority of one who had made religion his chief object, without relinquishing anything that was really good in life. His ardent mind was full of the desire to do something, to say his say for the sacred cause which he had espoused with all his faculties; and it was this

desire and not any literary impulse which produced the *Practical View*, which is his only connection with literature, and the sole permanent utterance of his life. It had been "for several years the earnest wish of the writer of the following pages to address his countrymen on the important subject of religion," he says in his preface to his book. The form it took was that of a contrast between the prevailing "Religious System of Professed Christians in the Higher and Middle Classes in this country," and "Real Christianity;" and the persons he addressed were men such as those whom St. Paul addressed on Mars' Hill, but whom few preachers were bold enough to summon to the bar, with the same unhesitating plainness with which they arraigned their humbler neighbours. Wilberforce did not appeal to infidels or unbelievers. He made no assault upon scepticism. His object was to show the respectable and intelligent how far their calm and easy ignoring of religion, even while professing it, was unlike the spirit of Christianity. There is no special charm of style to redeem his treatise from the respectful oblivion into which—after a popularity greater in degree than that which almost any other kind of literary production enjoys in its day—religious books are apt to fall. And nothing can be more unlike the works which have gained something of a similar influence in our own time. It is to be feared that to Wilberforce that broad and conciliatory treatment which translates the time-worn language of Christianity into the phraseology of its philosophical opponents, by way of betraying these latter tenderly into something like faith, or approval at least—would have appeared flat blasphemy. He would have had no understanding of the process which turns the love of Christ into the Enthusiasm of Humanity. The society which he addressed was not one which required such methods. It was as much Christian as orthodoxy re-

quired, and could be made to demonstrate its zeal for religion "by mentioning the name of some acknowledged heretic." What made the heart of the good man burn within him was to see how completely it could ignore the creed it held, and how the truths, that were to him vital, had got mossed over and practically obliterated by spiritual apathy and the calm of habit. The insidious idea that it did not much matter what a man believed, so long as he did believe sincerely, and lived a life in accordance with his principles, was to him a poison terrible to contemplate. "With such transcendent means of knowing the way which leads to life, what plea can we have to urge in our defence if we remain willingly and obstinately ignorant?" he asks. No doubt as to the certainty of the means of acquiring that knowledge had entered his mind, nor was it necessary to take into consideration such doubts in his audience. That they suffered the light to grow dim, or preferred to enjoy a distant glimmer from its general illumination, rather than to rejoice in the particular glory of a radiance which pervaded and revealed every corner of the soul, was his complaint. It is the universal complaint of the preacher in all generations, even in the very bosom of the Church itself; but it is not on religious indifference only, or neglect of the "transcendent means of knowing," that a religious writer of the importance of Wilberforce would be likely to address society now.

He had, however, the fullest hearing in his own day. The public, to whom his book was addressed, received and read it with devotion. In six months almost as many editions were called for, and 7500 copies sold; and from the time of its publication in the end of last century—1797—until quite recent days, it has gone on in periodical reproduction, commending itself still, it is to be supposed, to devout souls, though no longer perhaps to the higher classes, the educated part of the community, to whom it

was at first addressed. Almost all the other publications of Wilberforce were on questions connected with slavery, and therefore of temporary application; so that his connection with literature is solely through this book. If it is not, perhaps one of those proverbial books which no gentleman's library can be without, there is yet scarcely a household collection of any permanence in which a copy will not be found.

Wilberforce himself is one of the most attractive and delightful figures of his time, commending his religious views even more powerfully by the personal charm of a character so genial, buoyant, and sweet, than by his writings. When the Abolition Bill was passed in 1807, and Sir Samuel Romilly, in his speech in Parliament, referred to the individual member who, after the exertions of twenty years, thus saw his long labours crowned with success, "the whole house, surprised into forgetfulness of its usual habits, burst forth into acclamations of applause," a tribute of approbation "such as was rarely ever before given," says Bishop Porteous, "to any man sitting in his place in either house of Parliament."

Dean Milner, who is said to have been the active instrument of Wilberforce's entrance into the Evangelical party, and who was himself one of its leaders, is chiefly known as part author of the *History of the Church*, which his brother Joseph Milner originated and partially executed, a book superseded now and of little authority, which Sir James Stephen shoots a fatal bolt at, by informing us that though it has "been extolled as containing the most comprehensive and authentic account of the Reformation in Germany and of the character of the great German reformer," neither of the authors "ever had seen, or would have been able to read, one line of the many volumes written by Luther in his mother tongue, and even yet untranslated into any other," a statement which throws a

curious light upon the shortcomings of historical investigation at that time. It is unnecessary to discuss a book belonging in reality to an earlier period, before the science of history had become what it now is, and while German was still a barbarous language unrevealed to the world, without even the little taper of the Norwich critic and philosopher William Taylor, much less the poetic torch of Coleridge, to throw light upon it. Dean Milner was, however, a personage so notable, as to demand a regard wherever he passes. There is something in him of Samuel Johnson, but in a far more genial interpretation ; and something of Dr. Whewell, but without his science, a large and influential personality, which is independent of anything actually done or even said by the possessor of it. Laden with honours and successes, always popular, always prosperous, a courted and flattered member of the best society wherever he went, it is extremely difficult to realise that he too was at the head of the party vulgarly called the Saints, the preachers of world-renunciation and self-denial. The combination is one of the most curious in history.

Another leader of this party whose position demands observation was Charles Simeon, whose life and work was at Cambridge, and whose influence upon the young men who in so many successive generations passed through his sphere was as great as that which in an after period attended the work of Newman in Oxford—as great, but of a kind as different as could well be conceived. That he should have numbered among the youths whom he led into the evangelist's office the name of Henry Martyn is almost distinction enough for an apostolic teacher, but his work of this kind was greater and more pervasive than that of any other of the modern fathers of the Church. Not only did he draw the youth of the University into his fold, and mould with his own hands, so to speak, the young clergy who made the Evangelical party so

important, and, for a time, secured to the Low Church the chief influence in religion and religious life—but he prepared for his disciples a system of instruction and suggestion, which, if human nature were capable of such bondage, would have kept them within the very print of his footsteps for generations: and after his death employed his fortune in the purchase of benefices, in order to secure the appointment of men according to his own heart. It would be, however, ungenerous to use these words, did they imply any intention of self-glorification in Simeon's mind. It was the service and love of Christ which he inculcated, not any discipleship of his own. "His whole life was but one long labour of love," says Stephen. "Slowly, painfully, but with unfaltering hopes, he toiled through more than fifty successive years in the same narrow chamber, and among the same humble congregation, requited by no emolument, stimulated by no animating occurrences, and unrewarded, until the near approach of old age, by the gratitude or cordial respect of the society amidst which he lived." It is not necessary to enter here, where he has so very slight a standing ground, into the strange levities of manner, of which Sir James Stephen gives a graphic description, and which hindered the progress of a man whose influence at last became so powerful: for nothing could be slighter than the connection of Simeon with literature, or, at the same time, more quaint and out of the way. His first publication was a treatise on the composition of sermons, and his works—one of the most strange contributions ever made to literature—consist of a series of collections of skeleton sermons, intended for the benefit and guidance of his converts and disciples, amounting in all, we are told, to 2536 discourses! They are described as "peculiarly adapted to assist the studies of the young clergy in their preparations for the pulpit," and, no doubt, were intended

to keep in the strait way of orthodoxy so many intelligences which might have strayed to one side or the other. It was Simeon's habit, in his own preaching, to avail himself of this little piece of machinery, which he enlarged from his private meditation, or the impressions made upon his mind at the moment of delivery. It is natural that a teacher should think the system which suits himself good for his pupils, but there must have been great rigidity, as well as simplicity, in the mind which thus furnished leading strings for an entire generation. It is a vulgar test of excellence, but yet a most curious sign of the times, that Simeon received for this curious collection of intellectual anatomical studies the great sum of £5000, which he forthwith distributed among missionary societies. His own patrimony sufficed to purchase the advowsons of fifty parishes, by which, we presume, the Simeon trustees endeavour still to keep a germ of the old Evangelical party, so long since driven from the foreground of the national life, within the bosom of the Church.

It was not, however, in the Church of England that the literature of the pulpit attained its highest development. We have to turn to a small sect, the most rigid of the many Nonconformist subdivisions of the faith, to find the really great preacher whose name ranks with the highest in England, and almost on a level with the great preachers of France. The noble energy and eloquence of Robert Hall seem neither to have suffered from the premature development of an infant prodigy nor the too early success of youth, through both of which stages he passed. He was of the strictest sect of the Pharisees, a Baptist, and a devout one, neither breaking the bonds of his communion, nor in any way unfaithful to its limitations —yet full of the natural frankness and liberality of a great mind. He was one of the men whose personality makes a distinct mark upon their age, and

touches the most diverse intelligences with a sense of fervid sincerity, truth, and genius. His praise comes to us from all quarters, from the most unlikely voices. Not only his co-religionists, or the kindred party in the Church, or the sympathetic critics in Scotland who judged English dissent at all times with less prejudice than their contemporaries elsewhere, but even from the midst of those to whom a Dissenter was as poison, the same testimony breaks forth. Dr. Parr, in his Spital Sermon, the *Quarterly Review*, Lord Brougham, who ranks him near Massillon, Lord Lytton in his novels—who adjures his reader to "send for Robert Hall! It is the life of a man that is good to mankind itself to contemplate,"—all men are of one mind where he is concerned. It is scarcely possible, however, to set him in the history of literature in a place at all proportioned to that which he occupied in his generation. The sermons which live, save in the humble habitual reading of those classes of the community who read sermons for duty and not with any critical perception—are very few: and Robert Hall's style is of a more formal description—in print—than that of the orators who have outlived their day. But the appreciation of those who heard and knew him was so thorough and enthusiastic, that its warmth still lingers with a genial glow about his name. The fire and fervour of him give a certain radiance of life to his narrow community and rigid creed. He was uncompromising in his condemnation of all that he thought irreligious, or contrary to the teachings of Christianity. There is a curious little encounter of arms between him and the well-known Crabb Robinson, in the early years of that friendly commentator on literature—against whom Hall had opposed all his influence, in consequence of the youth's adoption of the principles of Godwin's *Political Justice*. But the frankness of the young free-thinker, who wrote to him pro-

testing against such treatment, called forth a reply, so "prompt and respectful," that injury was forgotten in admiration. He was not to be beguiled by the dazzling of a great literary reputation from instant hostility to everything that savoured of unbelief; but yet he ventured to write and speak boldly in favour of freedom of the press, and was, so long as that was possible, a champion of France in her great struggle, and a strenuous opponent of the "impious war" in which England had joined against that representative of freedom.

Hall was partially brought up at the University of Aberdeen, and while he was there lived on terms of the closest brotherhood, as has been already told, with James Mackintosh. They were entirely unlike each other, but never ceased to be warm friends. Hall, like his brother-in-arms, modified, if he did not change, his sentiments, as most of the early sympathisers with the French were compelled to do. He was always liberal, with the somewhat polemical tendency of his class, launching against Pitt the fiercest diatribes; although when necessity came he did his best to reanimate national feeling, and in milder times his wail for the national calamity of the death of the Princess Charlotte was almost lyrical. Part of his life was spent at Cambridge, where the preaching of the eminent Nonconformist stirred even the classical calm of the University, though we cannot call to mind in what way, or if at all, Simeon and he, both holding similar views, and labouring with the same end, came in contact with each other. His great exertions, however, in a sphere so important, disturbed the balance of his intellect, and the great preacher twice had an attack of insanity, which it is evident came less from any predisposition that way, than from the strain of exciting oratory which moved himself as much as his hearers, and the restless and continued work which accompanied it. He was all

his life subject to attacks of excruciating pain, against which he struggled with the noblest fortitude, refusing any exemption from the claims of life on account of these tortures, and rising in a moment, on the cessation of the pain, which had made him roll on the ground in agony, into instant resumption of his work, or of the conversation in which he had been interrupted: altogether a man of noble mettle, and the most dauntless heroic nature.

It was in Scotland, however, that the highest example of the religious writer and orator, the Christian philosopher and statesman (for such in his way was Chalmers, in addition to his other gifts), was to be found. A generation later than the Low Church leaders, and the great Dissenter, Thomas Chalmers, was born when they were beginning the work of their lives, at a time when Scotland was as apathetic in the matter of religion as England, with a touch of ruder scepticism and joviality, but, notwithstanding her invariable theological tendencies, no greater earnestness or devotion—nay, rather less than more, for she had not been stirred by such an outburst of spiritual life as that which Whitfield and Wesley had called forth. The New Light, the attempts at evangelical revival, at which Burns had jeered, though backed by a profound but silent sympathy in the inner heart of the nation, had been laughed down so far as that was possible, and, surrounded by many unlovely circumstances, such as those of the Holy Fair, had repelled the more highly educated classes still more than the popular piety had done in England; while at the same time the humorous faculty of the nation had seized upon its own aspect of indifference, and with the double meaning which the popular intellect loves, had fixed the epithet of Moderate upon the easy-going and too tolerant Church, with a satirical mingling of ridicule and approval. Chalmers began life in the contented composure of this "Moderate" religion, holding a mathematical

lectureship along with his cure of souls, with more interest in the former than the latter. But in the quiet of his north-country parish other thoughts soon arose; and, as he himself describes, other magnitudes became apparent to him, the depths and problems of human life, the greatness of eternity. This new impulse soon made itself known, and the changed voice in which the minister of Kilmeny addressed his humble flock reached to the larger Scotland, which even then was ever open to the mental stimulant of preaching. He was soon (in 1815, being then thirty-six) called from his country parish to Glasgow, whither he went in all the vigour of manhood and force of his genius. Here the pulpit of St. John's soon became a centre of influence, and the great commercial community about him had to stop its multifarious wheels and arrest its endless activity to listen to the rolling sentences of a somewhat laboured but always fervent eloquence, full of high thoughts and moral elevation, and instinct with that incommunicable magic of true oratory against which nothing but the obtuse can stand unmoved —and big Glasgow, noisy and self-important, has never been obtuse. It was here that Chalmers's most remarkable productions were brought forth—the *Astronomical Discourses* and those called *Commercial*, addressed to the men in trade who were his spiritual charge—with many more. The first of these series is perhaps the one most adapted at this distance to show the reader what manner of preacher he was. There is an oratorical fulness and repetition of phrases in them which is sometimes wearisome to the eye in reading, but which no doubt increased the effect in utterance as they rolled forth impetuous and strong, rising from the moderation of the beginning to a climax of fine indignation or moving tenderness. He "buried his adversaries under the fragments of heaving mountains," Jeffrey said. But as he reasons of the gran-

deur and greatness of nature, all founded on the endless variety of Divine invention, pervaded by endless Divine care and forethought; or turns to confound the sceptic, who scoffed, amid a world so vast as that of the starry system, at the human conceit which supposed mankind to be the first object of God's care, by directing him to a drop of water in a microscope, the infinitely small beside the infinitely great; or discourses upon Newton and the modesty of true science (which, perhaps, had he lived to our day, in which science is regnant, he might have been less certain of), there is throughout a largeness of conception, a breadth and elevation of thought in the preacher's views, which is worthy of his subject. The reader cannot but feel that the heavy clouds that hang over that great damp smoky town must have lifted, the atmosphere cleared, the horizon widened out, as the multitude sat and listened. A large magnanimity and greatness, as of a bigger world, is in the strain; and when he points out the great conflict of spiritual forces that had arisen in the immense unknown universe over the inhabitants of this globe, and suggests the interest of myriads of beings more great than we in the problems which it is for us to work out, and reminds his hearers that all our history is but a chapter in the measureless eternity of God, no more in His divine life than a passing incident in ours—we can well conceive how the elevation of lofty thought which transported the preacher should have moved the most commonplace of his hearers as if it had been a great dramatic poem full of contrast and event which poured forth over their heads, intoned in all the broad vowels and emphatic gutturals of their native speech. It is more easy to make this world contract into a sort of universal parish meeting according to the ordinary treatment of it in the pulpit; but that was not Chalmers's way.

He had, besides, another kind of work to which he

addressed himself with equal enthusiasm—an essay at legislation, or rather local statesmanship, which was of the most interesting description. In the old Scotch system of parish organisation the weekly offertory, the "plate" at the door of every church, was the appointed provision for the poor. To Chalmers it seemed that legalised public relief was destruction to all those traditions of independence to which it was the pride of a Scotsman to cling, and that this old-world provision ought to be sufficient, in the hands of brotherly charity, to supply all wants. Accordingly, the all-potent minister made a bargain with the authorities of the town, by which the entire control of his parish was left in his hands, all aid of poor-law or public charity set aside, and a densely populated district, with as many inhabitants as a principality, made over to him as to an independent ruler. A high-handed visionary, the most practical man in Scotland, Chalmers carried out his intention with complete success. "His project for providing for the support of the poor," says a political economist, "was futile and visionary, inconsistent with principle, experience, and common sense." But it was perfectly successful so long as he was at the head of affairs, and triumphantly demonstrated the power of loving-kindness and Christian charity to provide for even the miseries of a great town when properly watched over and organised, and with a man of genius to guide and regulate all—the grand defect, of course, in such a system being that the man of genius, the inspiring heart and intellect, cannot be found whenever he is wanted, like a poor-law surveyor. But there could not have been a more interesting experiment.

This Glasgow church was also the scene of another kind of experiment. Another great preacher, of powers as remarkable, and imagination more great than that of Chalmers, a soul of the prophet type, full of undiscovered

faculty, paused there on his way to his sphere of revelation, the ground of his triumph and martyrdom, and was not found out by the absorbed and preoccupied crowd, who were incapable perhaps of seeing more than one at a time of the great servants who laboured for them. Edward Irving, a still more rare and splendid phenomenon than Chalmers, passed a year or two as his assistant and subordinate before he went to London. With the exception of Robert Hall, these two were the greatest preachers of their day. Irving had scarcely taken his place in London, where he went in 1822, when the world found him out, and in his obscure chapel he became almost the most noted of all the notabilities of town. Even now when his story is well known and his own journals and letters have proved the nobleness and sincerity of the man, it is difficult for the world to forget that it once believed him (after having followed and stared at him as a prodigy) an impostor or a madman. And it is well known that the too lofty and unworldly strain of his great mind separated him from that homely standing-ground of fact, upon which alone our mortal footsteps are safe; and from the very exaltation of his aspiring soul brought him down into humiliation, subjection to pettier minds and to the domination of a sect, created by his impulse, yet reigning over him. The eloquence of Irving was like nothing else known in his day. Something of the lofty parallelism of the Hebrew, something of the noble English of our Bible, along with that solemn national form of poetic phraseology "such as grave livers do in Scotland use," composed the altogether individual style in which he wrote and spoke —his discourses to a crowded and eager audience differing little from the letters which he wrote to his wife in his study, conveying a journal of his daily proceedings to her. It was no assumed or elaborated style, but the natural utterance of a mind cast in other moulds than those

common to the men of the nineteenth century, and in himself at once a primitive prophet, a mediæval leader, and a Scotch Borderer, who had never been subject to the trimming and chopping influences of society. It is said that a recent publication of his sermons has failed to attract the public; and this is comprehensible enough, for large volumes of sermons are not popular literature. But the reader who takes the trouble to overcome the disinclination which is so apt to arrest us on the threshold of such a study, will find himself carried along by such a lofty simplicity, by such a large and noble manliness of tone, by the originality of a mind incapable of doubt, taking God at His word, instinct with that natural faith in all things divine which is, we think, in its essence one of the many inheritances of genius, though sometimes rejected and disowned—that he will not grudge the pains. He who held open before the orphan that grand refuge of the "fatherhood of God" which struck the listening statesman with wondering admiration; he who, in intimating a death, "made known to them the good intelligence that our brother had had a good voyage, so far as we could follow him or hear tidings of him," saw everything around him with magnified and ennobled vision, and spoke of what he saw with the grandeur yet simplicity of a seer—telling his arguments and reasonings as if they had been a narrative, and making a great poetic story of the workings of the mind and its labours and consolations. In the most abstruse of his subjects this method continues to be always apparent. The sermon is like a sustained and breathless tale, with an affinity to the minute narrative of Defoe or of the primitive historians. The pauses are brief, the sentences long, but the interest does not flag: once afloat upon the stream, the reader—and in his day how much more the hearer!—finds it difficult to release himself from the full flowing tide of interest in which he

looks for the accustomed breaks and breathing places of pulpit oratory in vain.

Of all the preachers here indicated Chalmers is perhaps the only one for whom we can claim the title of a theologian in the real sense of the word. There was little science in Simeon, though the bond of doctrine was rigid; and not much in Robert Hall, whose soul and spirit were occupied in the great task of exhortation and entreaty as an ambassador of God to convey his message to men, and whose few publications, apart from his sermons, were upon subjects of the moment. Nor was Irving—with a soul all open to the miraculous, and no sense of any limit save in that withholding of God's grace which is the most terrible of punishments, the saddest proof of man's indifference or unwillingness to seek His aid—capable of the examinations and comparisons, and careful elucidation of the growth and development of systems which is necessary for a scientific theologian. The gift of preaching, or even that professional occupation with theological subjects which is necessary to every clergyman, does not involve science. Dr. Chalmers held the Chair of Philosophy in St. Andrews for several years, and was afterwards Professor of Divinity in Edinburgh, and his works on both subjects were extensive. But he has not added any original speculations or striking views to the literature either of theology or moral or political science. In the latter branch of inquiry he supported the doctrines of Malthus. In theology he adhered strongly to the orthodox traditions of the Scotch Church, and trained his students to contend for that "Headship of Christ," or spiritual independence of the Church, which resulted in what is called the Disruption of the Church of Scotland, and semi-heroic march out of it of a large number of its clergy with Chalmers at their head. When this step was taken he distinguished himself once more

by his legislative power, by the maturing of a great scheme of organisation by which his unprovided community was delivered from that dependence on the popular pleasure which is the drawback of unendowed churches. One of the most remarkable features in his character was this power at once of conceiving and putting in practice schemes such as might be very well described as "a devout imagination," had not their originator, by sheer energy and practical force, succeeded in carrying them out.

WILLIAM WILBERFORCE, born 1759 ; died 1833.

Published Practical View of the Prevailing Religious System of Professing Christians in the Higher and Middle Classes contrasted with Real Christianity, 1797.
With many Speeches and Pamphlets upon the Abolition of Slavery, and other subjects of the day.

ISAAC MILNER, born 1751 ; died 1820.

Continuation of Milner's Church History (previous volumes by Joseph Milner), 1819.

CHARLES SIMEON, born 1759 ; died 1836.

For Judgment to Come, 1824.
Babylon; or, Infidelity Foredoomed, 1826.
Homilies on the Sacraments, 1828.
The Last Days, 1828.
Expositions of the Book of Revelation, 1831.

We have gone as far as space will permit in the literary history of the beginning of this century, linked as it is inextricably with the end of the last, and forming a distinct epoch in the literary life of England. The age in which we ourselves live is as yet unfulfilled. Though several great names have been placed in the records of the past since these pages were begun: and though the fame of our two greatest living poets has been sufficiently long established, and is sufficiently certain to give the perfection necessary in every picture: yet perhaps the age of Victoria has not yet "orbed into the perfect star" which it will eventually become. The epoch which we have endeavoured to treat is that of the later Georges, an age which, perhaps—though with no heroic monarch in it, or splendid court, or picturesque surroundings—will appear to posterity almost as great as that of Elizabeth. Two great schools of poetry, each enough for one cycle of history, but as opposite in their character and tendencies as the next generation generally is from that which has

immediately preceded it; a great and noble new beginning in fiction, such as has largely swayed the development at once of social life and subsequent genius: an extraordinary reconstitution of that Art of Criticism which occupies more minds, perhaps, and fills more lives than either of the preceding, and which is, indeed, so important to the nineteenth century that it has been virtually the creation of a new profession highly estimated and prosperous:—these are the principal features in the story. The rise of philosophical history among us and the great philosophical machinery of the Utilitarian system, give also weight and importance to the age as new departures, beginnings, characteristic and well defined: though on these subjects the present writer speaks with diffidence, feeling the authors indeed, but only in a smaller degree their works, to be within her sphere: yet comforted by the thought that close criticism of such works does not come within the limits of Literary History. The one branch of literature, if it can be so called, which has been altogether omitted, is that of Natural Science, the new departure in which, or it might be said, the creation of which as really enriching literature at all, belongs to the present age. A scientific treatise in the beginning of the century meant science and not literature. Even Sir Humphry Davy, its sole apostle in letters, and in himself so interesting and amiable a figure, penetrates into the second quarter of the century, and will be fitly treated along with the more recent generation, who have given to their researches a voice such as even those who are indifferent to their subjects may with pleasure hear. The Darwins, Huxleys, and Tyndalls are an original class of which previous historical records were unaware. It may be added that Narratives of Travel have also been omitted, partly from want of space, partly because in few cases can these works be ranked as pure literature.

We have said that to posterity this age will appear not inferior to the "spacious times of great Elizabeth." Great in war, with generals more triumphant and an influence more powerful than anything achieved in that reign; great in the arts, if not as applied to the embellishment and glory of life (for there is no painter in it worthy the name), yet to its service and enrichment—for railways and steamboats both began in this exuberant era; great as no age ever was before in philanthropy, for ever distinguished as the time in which Slavery was abolished—we know of no such simultaneous and splendid action of all the forces of the intellect. The same period contains what is confessedly the greatest political event in the world since our Commonwealth, the French Revolution, with all its sudden influences which have worn out in the minds of individual men, and all those slower workings, which are not exhausted nor probably ever will be. These great things belong to another province of history. Our business has been to show how the quickened life found utterance in words, and with what eloquence and energy the genius of the nation interpreted its highest thoughts and noblest life.

AN

ETYMOLOGICAL DICTIONARY

OF THE

English Language,

ARRANGED ON AN HISTORICAL BASIS.

BY THE

REV. WALTER W. SKEAT, M.A.,

Elrington and Bosworth Professor of Anglo-Saxon in the University of Cambridge.

UNABRIDGED EDITION.

Complete in One Vol. Quarto, $2.50; Free by mail, $2.75.

"So far as regards the derivation of the words composing the English tongue, no dictionary extant can for a moment be compared with the work now published in a volume of 800 pages by Macmillan & Co., under the title of an Etymological Dictionary of the English Language, by the Rev. Walter W. Skeat, Professor of Anglo-Saxon in the University of Cambridge. . . . . . But we have probably said enough to convince the reader that this is not only one of the most useful but one of the most interesting books that have ever been offered to the student of the English language. We should mention that an abridgment of this admirable lexicon has been published, but this, although serviceable, cannot assume to be an adequate substitute for the principal work, which itself is presented in a portable, cheap and convenient form."—*N. Y. Sun.*

MACMILLAN AND CO., NEW YORK.

MACMILLAN AND CO.'S PUBLICATIONS.

THE ENGLISH POETS.

SELECTIONS,

With Critical Introductions by Various Writers, and a General Introduction by
MATTHEW ARNOLD.

EDITED BY THOMAS HUMPHRY WARD, M.A.

Vol. I.—CHAUCER TO DONNE.
Vol. II.—BEN JONSON TO DRYDEN.
Vol. III.—ADDISON TO BLAKE.
Vol. IV.—WORDSWORTH TO ROSSETTI.

"All lovers of poetry, all students of literature, all readers will welcome the volumes of 'The English Poets' ——. Mr. Matthew Arnold has written a most delightful introduction, full of wise thought and poetic sensibility——. Very few books can be named in which so much that is precious can be had in so little space and for so little money."—*The Philadelphia Times.*

"Altogether it would be difficult to select four volumes of any kind better worth owning and studying than these."—*Nation.*

"Mr. Ward gives us the genuine thing, the pure gold, and not a bare description of how it looks. These four volumes ought to be placed in every library, and if possible, in the hands of every student of English."—*Churchman.*

"This work is the completest and best of the kind in the English language."—*Christian at Work.*

"The best collection ever made. * * * A nobler library of poetry and criticism is not to be found in the whole range of English literature."—*N. Y. Evening Mail.*

"For the young, no work they will meet with can give them so good a view of the large and rich inheritance that lies open to them in the poetry of their country."—*J. C. Shairp, in "Academy."*
